TEST INSTRUMENTS & TOOLS

For decades, Johnstone Supply has been your one-stop shop for leading brands of HVACR equipment, parts and supplies. But these days, your business success depends on more than a great range of products. Today's contractors need to stay current on product and technology changes, in addition to programs that make it easier to do business.

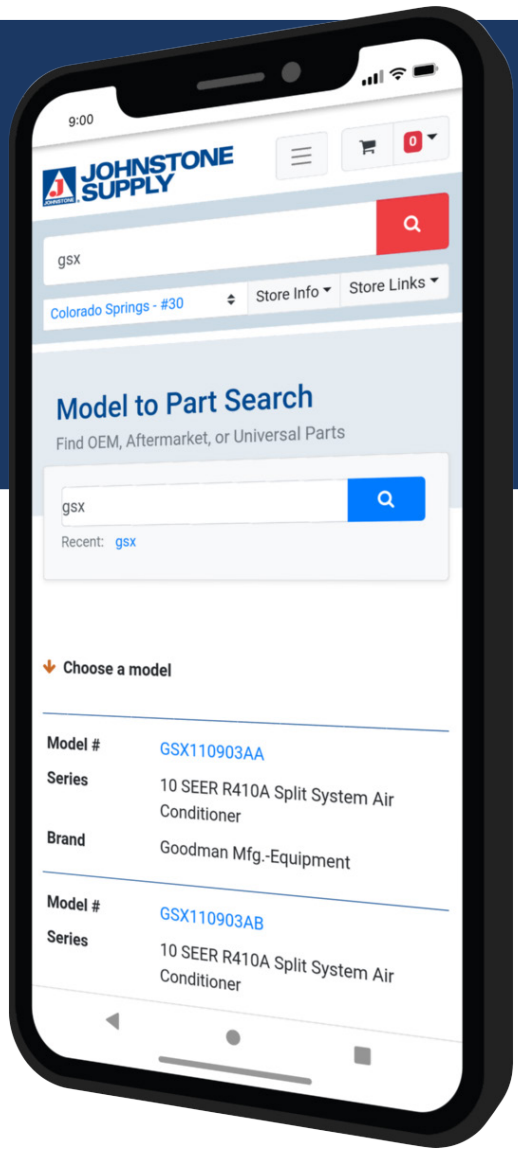
We deliver solutions:

- A website and mobile app that offer our customers real-time pricing and availability
- A state-of-the-art cross-reference utility tool equipped with refrigeration sizing tool that can locate virtually any HVACR product, including obsolete items
- Equipment Selector Tools: System Selector and Mini Split Selector allow you to easily identify and order AHRI Certified HVAC Systems that meet rating requirements and the application needs and identify rebates
- In-person & online training to educate you on products, trends, changes, and certifications
- Access to 2 million special order parts

MAKING IT EASY FOR THE CONTRACTOR

THAT'S THE POWER OF JOHNSTONE™

Save Time & Money. Buy Online



Johnstone Mobile App

Now Featuring Model to Part Tool:

- **HVAC Equipment Model Numbers** – Search and get a list of over 50 thousand critical OEM or Aftermarket / Universal parts
- **System & Mini-Split Selectors** – Match over 800,000 Current Certified Systems
- **Customized Pricing** – Affordable Pricing and Exclusive Online Deals
- **Available 24/7** – Logged in Users see Real-time Inventory, Pricing and Availability Filtered by Brand
- **Barcode Scanning** – Scan the Barcode and Save to Product List

Order Any Part from Any Device, Anywhere, Anytime

- Searching and browsing are now easier than ever with auto-fill search, ranked results and local options
- Gain more productive hours in your week by speeding things up with PartStock™ inventory replenishment and DirectConnect automated order entry

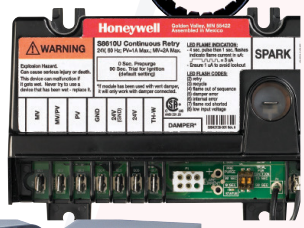
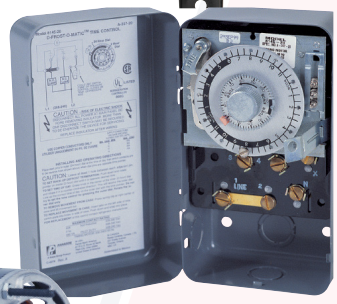
Repair, Replace Upgrade

Johnstone excels at stocking industry-leading repair, replacement parts and equipment so that you have the right product right when you need it for residential, commercial, refrigeration or facilities maintenance. The JohnstoneSupply.com online catalog contains 70,000 stocked products, and most locations across the country offer a unique local selection.

With six distribution centers in our supply chain network, you can be sure our 450+ stores either have your product available in stock same day or can receive it overnight. Our manufacturer partners offer us the availability of their entire line — whether we stock it or not — for those times when your need is critical. That amounts to over a million special order parts available to you.

We stock hundreds of OEM parts for nearly every major brand so you don't have to wait. Plus, using our proprietary cross-reference utility, we can find hard-to-locate and even obsolete parts and recommend quality replacements for repairs on older or more obscure equipment.





YOUR ONE STOP FOR ALL YOUR OEM REPLACEMENT PARTS

THAT'S THE POWER OF JOHNSTONE™

JOHNSTONE UNIVERSITY

LEARNING THAT EARNS

Johnstone University is your source for HVACR training online, anytime and anywhere. Gain the knowledge and skills to help drive successful business results with JohnstoneUniversity.com

Online you will learn how to:

- Keep technical skills current
- Stay safe and productive
- Increase revenue per job
- Maintain NATE certification
- Remain compliant with laws
- Know industry regulations and standards
- Build your dream team with the Technician Training Plan
- Hundreds of other free product courses

A FEW MORE THINGS ABOUT HOW WE DO BUSINESS.

WHOLESALE ONLY	Identification may be required of purchasers. Possession of Johnstone's catalog does not constitute an offer to sell by Johnstone, or the right to purchase from us.
PRICES	Subject to change without notice. Quantity prices are available on selected items and will be quoted on request.
SERVICE	It is Johnstone's policy to ship all orders the same day as received if possible. All Johnstone outlets are stocking warehouses with inventories for immediate delivery where available.
CREDIT TERMS	Open account terms are available to firms with established credit. If credit is not established please authorize C.O.D. shipment or send check with order. Past due accounts may be subject to a service charge.
WARRANTY	Johnstone Supply will administer and promptly process all warranties in accordance with the manufacturer's specified warranty policies and procedures.
FREIGHT	Contact your local Johnstone Supply for their freight policy.
RETURNS	Contact your local Johnstone Supply for their return policy. All returns must have prior approval and are subject to a restocking charge.
WARRANTY DISCLAIMER	Johnstone is committed to illustrate and describe all the products in this catalog accurately. Such descriptions and illustrations are for the sole purpose of identification, and do not imply that the products will fit for a particular purpose, or that they will conform to the descriptions or illustrations. No guarantee or warranty other than set forth above is made or authorized by Johnstone. Johnstone's liability in all events is limited to the purchase price paid.
PRICES SUBJECT TO CHANGE WITHOUT NOTICE	Due to conditions beyond our control we are unable to guarantee the prices in this catalog for any length of time. Prices in this catalog are only suggested and may vary from time to time because of conditions or by location.

THE POWER OF JOHNSTONE™

TRAINING • INVENTORY • SUPPORT

Whether you visit a location or shop online, we handle your purchase with speed and respect for your needs. Our friendly experts are here to help you locate replacement parts or special order products.

We are your Supportive Business Ally

- We leverage technology and content to help your needs
- We have a network of distribution facilities that provide rapid order fulfillment of a wide variety of products

We know that your success comes when you can get back on the road quickly.

You can count on Johnstone to be your first and best supplier, and to offer a wide array of solutions. Because service isn't just being fast at the counter, it's offering what you need before you even need it. We are your partner in success — here to make it easy for you to do business.

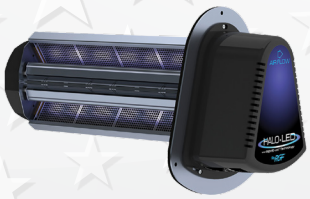
IAQ Products You Can Count On

Proudly designed, engineered, and manufactured in the USA

Whole Home In-Duct Air Purifiers



REME HALO LED™

L82-571

Mfg. #REME-LED

LED technology reduces energy usage

Zero ozone creation and no mercury

Reduces airborne and surface bacteria, viruses, odors, and mold

REME HALO®

L82-570

Mfg. #REME-H

Utilizes RGF's patented REME® Cell technology.

UV-C light creates low level, airborne hydrogen peroxide throughout the air-conditioned space reducing airborne and surface bacteria, viruses, odors, and mold.

ecobee for Pro

ecobee smart thermostats & sensors boast the latest innovations, enabling professionals and homeowners to reimagine how they can benefit from smart technology.

L51-232

Mfg #EB-STATE6P-01

Smart Thermostat **PREMIUM**

- Includes remote sensor
- Monitors air quality, air pressure, humidity, and occupancy

L51-233

Mfg #EB-STATE6LP-01

Smart Thermostat **ENHANCED**

- 7-day programmable
- Humidity sensing

L49-427

Mfg #EB-STATe3LTP-02

Lite Pro Smart Wi-Fi **THERMOSTAT**

- Home IQ™ energy report
- Live weather, free software upgrades and mobile app

G38-522

Mfg #EB-CAMSDB-01

Smart Doorbell **CAMERA** (wired)

- Connects via phone, tablet, or ecobee Premium Thermostat
- Hardwired for an expansive 175° vertical field of view.
- Hear doorbell chimes through any speaker-enabled ecobee device.

ENERGY STAR

Premium and Enhanced Thermostats include a Power Extender Kit for installations without a C wire.

720 Series
Whole-House Fan Powered Humidifiers

AprilAire

Industry Leading Performance and Water Savings

- 2X more efficient
- Install fan on left or right side
- High/low settings for noise reduction
- 21 GPD - highest capacity in the industry*
- One-piece HydroCore™ for easy maintenance

PRODUCTS DESIGNED BY HVAC TECHS WHO GET IT

MAGNATEMP TELESCOPIC PROBE

H28-983
Mfg # MTEMP

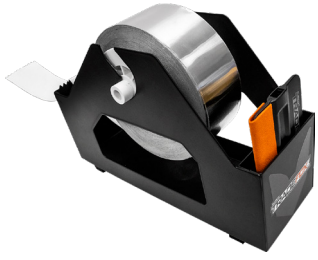
The telescopic temperature probe allows the technician to check air temperature in most situations, inside the ceiling duct without needing to use a ladder. The magnet and hook allow you to leave it in place so you can leave it while doing other tasks.

NITROGEN PURGE BOOT

H28-984
Mfg # TFXNPB

The Nitrogen Purge Boot was designed to assist the technician in the purging & brazing process. O-rings fit and seal over various sizes of tubing creating a 'hands-free' and hassle free solution between your nitrogen regulator and the refrigerant line.

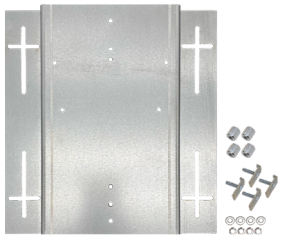
UNIVERSAL TAPE DISPENSER



G81-162
Mfg # TFXUTD

Keep your tape clean and within reach on the job site with this convenient magnetic tape holder.

DISCONNECT MOUNTING PLATE



G38-513
Mfg # TFXDMP

A universal way to secure the disconnect to the unit, without blocking access to the electrical panel.

The NEW ZONELINE™

Cutting-Edge Inverter Technology

Meet GE Appliances' first PTAC to use inverter technology and a variable-speed compressor that gives guests more comfort, more often.

Whisper-Quiet Operation

A large cross-flow blower, a variable speed compressor, and two EC motors work together to minimize noise and maximize comfort.

Cost-Saving Performance

A variable-speed compressor drastically reduces energy-intense startup cycles, which can help save money on electricity and utility costs.

Efficient Cold Weather Heat Pump

The variable speed compressor and advanced defrost capability allow for the best-in-class heat pump operation down to 0°F.

Open Ventilated Refrigeration Replacement Motors

Shaded Pole

Applications:
- Unit cooler fans and blowers, refrigeration cabinets, unit heaters, space heaters, remote air conditioners, blower units and other air moving applications
- For many popular commercial condensing units (Copeland, Tecumseh, Hussmann, Tyler, etc.)

Features:
- Single-speed, all-angle sleeve bearing, 42Y frame
- These four motor ratings replace 21 of GE's 21/29 frame designs
- 1/2" shaft adapter included, mechanically reversible
- Extended studs on 3-1/2" bolt circle for stud mounting (mounting washers and nuts included)
- Extended hubs with 2-1/4" rubber rings for base mounting
- Automatic reset thermal protection

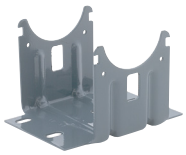
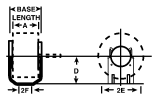
Resilient Bases
For 4-5/16", 5", 5-1/2" and 5-5/8" Diameter Motors





- Check "A" dimension of motor (overall body length, excluding hubs)
- Select base that fits motor body length
- Verify correct shaft height ("D" dimension)

Note: Resilient mounting rings, mounting clips and adapter rings not included.

21/29 Frame Replacement Motors

PSC, 42 Frame, Open Dripproof Air Over

Applications:
- Four motors replace over 30 GE Motors used for air conditioners, refrigerated cabinets, window fans, etc.
- Complete mounting provisions for replacing 21/29 frame motors

Features:
- Versatile all-angle operation
- Single-speed
- Mechanically reversible
- Dummy end shield can be moved on the extended thru-bolts to fit existing base
- Threaded holes and bolts for 21/29 frame end mounting, 2-1/4" hub rings, resilient mount
- 1/2" shaft adapter furnished, flatted shaft
- Automatic thermal protection
- Capacitor included

21/29 Frame Motors

PSC, 42 Frame, Open Air Over

Applications:
- Direct drive furnace blowers, air conditioners, fans, blowers and locations where the motor is located in the airstream

Features:
- Rotation: electrically reversible
- Resilient rings for base mounting
- 3-speed
- Sleeve bearing for all-angle mounting
- Capacitor not included

Direct Drive Blower Motors

PSC, 42 Frame, Open Air Over

Applications:
- Direct drive blower motor suitable for a wide variety of air moving applications such as refrigeration condensers, unit heaters, unit coolers, central air conditioning, etc.

Features:
- Automatic thermal protector
- Sleeve bearing
- Includes 2-1/2" resilient rings
- Rotation is non-reversible

Unit Heater and Furnace Blower Motors

Applications:
- Unit heaters, furnace blower, fans and blowers
- Open ventilated PSC motors designed as OEM replacement furnace blower/unit heater motors for Payne, Day & Night, Bryant, Reznor, Intertherm, Coleman, Janitrol, etc.

Features:
- Thermally protected, capacitor leads with 1/4" flag terminals, reversing plug
- Shaft: 2-1/2" flatted
- Studs: three or four on 4.62" centers, 13/16" long, #10-32 thread, on shaft end of motor
- Resilient rings: not included

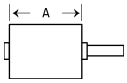
DIRECT DRIVE MOTORS
5" Diameter Shaded Pole & PSC

FASCO

Heating and Ventilation Motors
Shaded Pole, 42 Frame, Open Air Over



Applications:
- 1-, 2- and 3-speed motors designed as replacements on central heating and direct drive blower units
- May also be used for ventilators, exhaust fans, etc.

Features:
- Thermally protected, sleeve bearing
- **S89-413** is a replacement for Siegler & Williams wall heaters

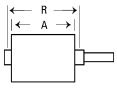
Century®

1-, 2-, 3- and 4-Speed Fan and Blower Motors
Shaded Pole or PSC, 42 Frame, Open Air Over

A

B



Applications:
- Direct drive furnace blowers, shaft mounted fans, unit heaters or any continuous duty application where the motor is located in the airstream

Features:
- Automatic reset thermal protectors
- All motors have 30" leads
- **S88-272** has extended mounting studs on the shaft extension end of the motor

RESCUE EZ13® Blower Motors

- Universal ECM replacement for furnaces and air handlers
- Built-in 6,000 volt surge protection
- Replaces X13, Endura Pro and SelecTech constant torque ECM
- Truck stock
- Universal replacement
- Ready to install
- Replaces Thousands of OEM Models
- Pre-programmed with Universal Program, no programming required
- Inputs: 24Vac, tap inputs
- Rotation: Auto-Rotation sensing
- Hertz: 60 & 50Hz
- Operation mode: constant torque
- NEMA 48 frame, open air over (OAO) Enclosure, Belly-band Mounting
- Up to 82% Efficiency

RESCUE® Select Pro™ Blower Motors

- Programmable ECM replacement for furnaces and air handlers
- Built-in 6,000 Volt surge protection
- Replaces X13, Endura Pro and SelecTech constant torque ECM
- Truck stock
- OEM direct replacement
- Programmable and tunable in operation
- Replaces thousands of OEM models
- Integrated Bluetooth® Technology, no additional programming tool required
- RESCUE® Select Pro™ programming app offers OEM direct programming, customized airflow in operation
- Inputs: 24Vac, tap inputs
- Speeds: programmable (1075/Var)
- Rotation: programmable (CCW or CW)
- 60 & 50Hz
- Operation mode: Constant Torque
- NEMA 48 Frame, open air over (OAO) enclosure, belly-band mounting

DIRECT DRIVE MOTORS
48 Frame ECM Motors

RESCUE EZ16® Blower Motors

- Universal ECM replacement for furnaces and air handlers
- Built-in 6,000 volt surge protection
- Field tunable with EZI (included)
- Replaces thousands of OEM models
- Direct drop-in
- Adjustable airflow at point of installation
- Multi-HP trim function to increase flexibility
- Remote mount for ease of access
- Universally compatible with all 2.0, 2.3, EON motors and Nidec 16X4W
- Inputs: 24Vac or PWM
- Rotation: CCW or CW (24Vac) / Auto-Rotation (PWM)
- Hertz: 60 & 50Hz
- Operation Mode: Constant Torque
- NEMA 48 Frame, Open Air Over (OAO) enclosure, belly-band mounting
- Up to 82% efficiency

RESCUE EcoTech® Motors
ECM, 48 Frame, Open Air Over

- High Efficiency Direct Drive Blower Motors

Applications:
- A high efficiency drop-in for indoor direct-drive blowers originally equipped with a PSC motor
- Designed for air handler, furnace and heat pump systems

Features:
- Easy installation — connects just like a PSC motor, no modifications to wiring or system control required
- Energy efficiency and low available speed support improved comfort and indoor air quality
- Five speeds: 600–1200 RPM
- Reversible rotation
- Electronically protected motor
- 36" leads
- No capacitor required
- Ball bearing

Evergreen® VS Motors

- Designed to replace Genteq constant airflow (variable speed) ECM indoor blower motors
- Replaces Genteq models 2.3, EON, and 3.0 motors
- The User Interface is included to replace 2.3 and Eon (16-pin)
- 2-year warranty

Evergreen EM Dual Voltage

- 48 frame, belly band mount
- Multi-speed, constant torque, brushless DC motor
- Automatically determines motor direction using Genteq's rotation sensing technology
- Operating speed range 600-1200 RPM
- Encapsulated electronics
- 4kV surge protection
- Soft start and off ramp for quiet operation
- Does not replace premium ECM constant airflow products such as Eon, 3.0, 2.3, and 2.5

Note: Pre-wired for 208-230V

Evergreen® EM Replacement Blower Motors

ECM, 48 Frame, Open Air Over

Applications:

- Designed to replace direct-drive blower motors in residential and light commercial indoor furnaces, air handlers and package systems designed with a standard ECM motor, such as an X13 or equivalent competitor model
- Does not replace premium ECM constant airflow products such as Eon 3.0, 2.3 and 2.5

Features:

- Belly band mount
- Multi-speed, constant torque, brushless DC motor
- Automatically determines motor direction using Genteq's rotation sensing technology
- Operating speed range 600-1200 RPM
- Encapsulated electronics
- 4kV surge protection
- Soft start and off ramp for quiet operation

Evergreen® Motor Accessories

- **S59-612** Evergreen InTune™ from Genteq provides wireless connection from a smart phone or tablet to stock Evergreen EM (constant torque replacement EC) and CM (commercial VAV EC) motors for realtime adjustment of the motors operating point
- **S59-653** Evergreen 0-10 VDC Harness Kit, Harness connects 0-10 VDC controls directly to Evergreen EM & CM motors to select precise operating points from 600-1200 RPM to dial in system performance
- **S59-654** PWM Control (Single Input), Converts a single 24vac thermostat or motor demand to a PWM signal with a manually adjustable range of 600-1200 rpm to set a precise operating point

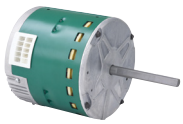
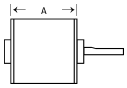
Evergreen® CM Commercial Blower Motors

ECM, 48 Frame, Open Air Over





- 80% High efficiency ECM technology
- Replaces X13 and similar competitor constant Torque ECM
- Upgrade/replace PSC motors in VAV and air handler applications
- Precise air balancing using PWM or 0-10VDC controls
- Pre-programmed for truck stock
- No complex wiring or configuration
- Two year warranty

Applications:
- VAV boxes, packaged heat pumps and direct drive belly band blower motors

Evergreen™ IM Retrofit Blower Motors

ECM, 48 Frame, Open Air Over

- Designed to upgrade system performance by replacing standard PSC blower motors

Applications:
- For use in ALL air handler, heat pump, electric and fossil fuel furnace applications

Features:
- Constant fan (600 RPM) operation optimizes the efficiency of IAQ accessories and reduces air stratification in the home
- Ball bearing
- 80% High efficiency ECM technology
- RPM range: 600–1075
- Quiet operation
- Five pre-programmed speed-torque profiles
- Correct direction of rotation automatically determined by patented auto-rotation capability

TECHINSPECT Pro Service Tool

- Analyzes GE ECM motors independent of the HVAC system
- Test basic settings of fan-only, heating, cooling and dehumidify and variable Speed
- Detect and isolate motor failures from HVAC system failures

Applications:
- Works on all OEM constant airflow ECM Genteq motors

Order #	Mfg. #	Each
S58-935	GA447	**365.00**

Short Finder Tool

- Locate 3A and 5A shorts in 24VAC circuits
- Auto-resetting
- Trip indication LED
- Includes 18" leads with alligator clips

Order #	Mfg. #	Each
S59-795	ZSPRT	**85.00**

Universal Zebra ECM Motor Testers

- Quickly troubleshoots ECM motor problems
- 3-way position switches test up to 6 speeds
- LEDs indicate power and signals being set
- Includes rugged case and adapter for common GE/Regal Beloit Series 2.0 and 2.3 motors
- UZALL Kit includes UZ-1 Motor Tester and all available motor adapters
- Other adapters sold separately

Order #	Mfg. #	Description	Each
S59-418	UZ-1	Universal ECM Motor Tester	**349.00**
S59-791	UZALL	Universal ECM Motor Tester Kit w/all Adapters	**855.00**

H27-447	UZACC	Accessories Case	**49.49**

SideWinder Winding Section Analyzer

- Quickly diagnose faulty ECM motors
- Displays faults (shorts or opens) in each phase of winding section
- A second test indicates any shorts between the motor frame and any phase winding
- No external power source needed (includes 9V battery)

Order #	Mfg. #	Description	Each
H28-522	SW-5	SideWinder ECM Motor Winding Section Analyzer	**229.00**
H28-565	ZSWAE	SideWinder Emerson Motor Adapter	**34.49**

Zebra HVAC

Variable Speed Zebra

- Uses simple to operate microprocessor controlled tests
- Accurately diagnoses exactly which component has failed in a variable speed system that isn't working correctly
- Assists in system setup by reporting CFM airflow and motor RPM as room vents and other controls are adjusted
- Allows easy adjustment of all available settings and options on ECM (Variable Speed) blower motors to obtain maximum comfort

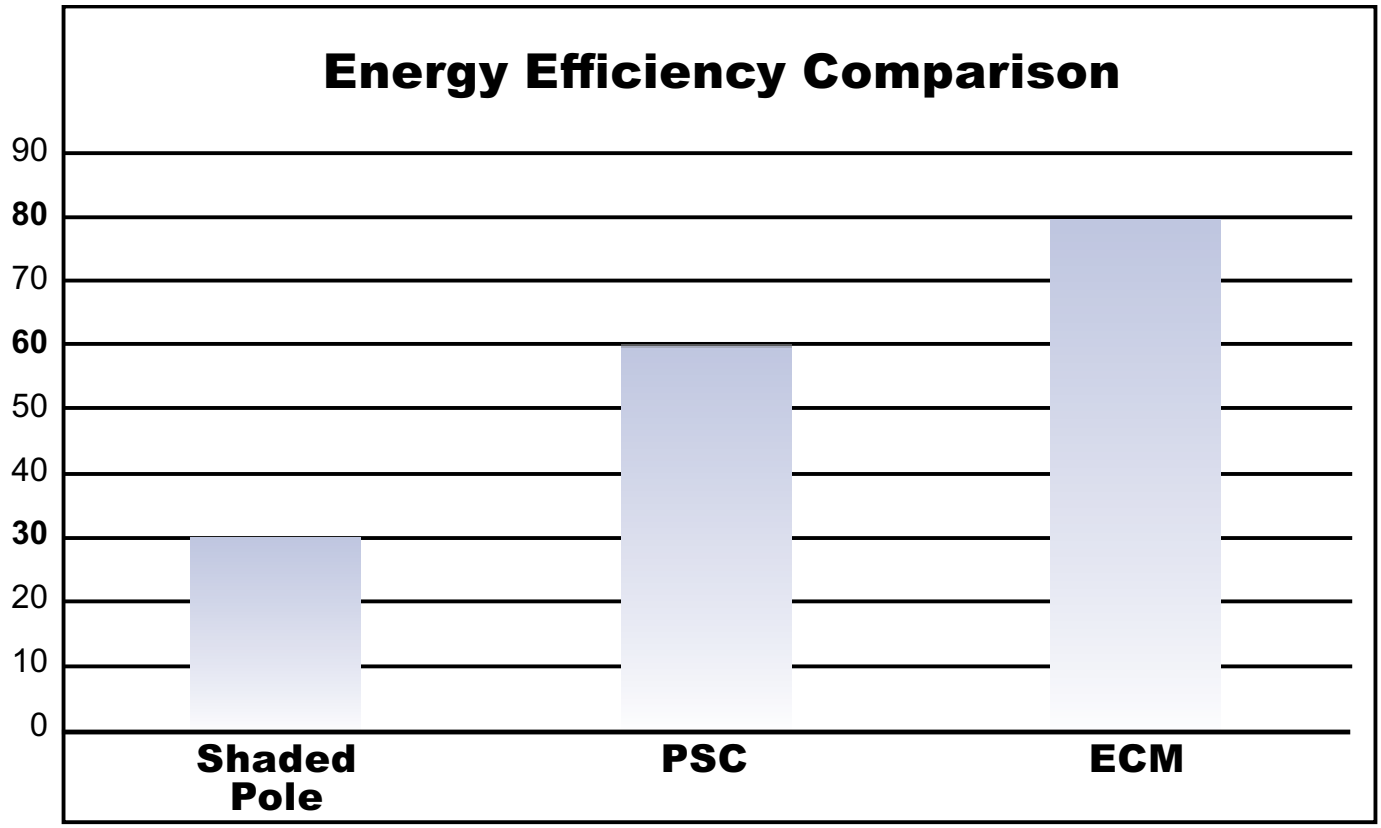
What is an ECM (Electrically Commutated Motor)?

Simply stated, a way to achieve a higher level of motor efficiency. Through the use of built-in internal electronics and a permanent magnetic rotor, the advantages of greater control and efficient operating levels are both achieved. This efficiency is up to 80% in some cases; see the chart below comparing the efficiency levels of Shaded Pole, PSC and ECM.



RSH-20 Motor Protectors

◀ NEW

- UL Recognized
- Thermally fused MOVs
- 5 year product warranty
- 3 Modes of protection: L-G, N-G, L-N
- Plug-n-Play for ease of installation
- Diagnostic LED indicates protection
- 120/240 VAC Type 4CA

Patriot™ Multi-Horsepower Furnace and Air Handler Direct Drive Blower Motors

PSC, 48 frame, Open Air Over

- Made in the USA

Features:
- Mounted by belly band, flex mount
- Rheem/Ruud® side shell holes, hub rings or the extended studs
- Long life ball bearing
- Class B insulation
- 36" terminated leads

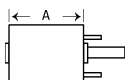
The Consolidator Direct Drive Motors

PSC, 48 Frame, Open Enclosure



- All angle mount
- Stud, hub rings, band, shell hole mount
- Class B insulation
- 40° C ambient temperature
- Capacitor requirement noted on motor label

EZ-FIT® Furnace and Air Handler Direct Drive Blower Motors

- For Use in Furnace and Air Handler Direct Drive Blower
- 48 Frame, OAO, 4-speed motor
- 2-1/2" hub rings for base mounting included
- Designed to use with 370V Capacitor
- Mounting: Thru-Bolts, Rheem®† Shell Holes or Belly Band
- Extended Mount Studs
- Automatic Reset Thermal Overload Protector

3- and 4-Speed Direct Drive Blower Motors

PSC, 48 Frame, Open Air Over

Applications:
- For direct drive furnace blowers and other air over applications

Features:
- Automatic thermal protection
- 24" line leads, four studs shaft end on 5-1/8" bolt circles
- Sleeve bearing for all angle mounting
- Rotation reversed by electrical connection
- 2-1/2" hub rings for base mounting included
- Capacitor not included

Masterfit® Pro Multi-Horsepower Motors

PSC, 48Y Frame, Open Air Over

Applications:
- 277V light commercial VAV blower and furnace replacement motors

Features:
- Automatic thermal protection
- All purpose capacitor included
- Extended thru bolts
- Rheem mounting holes in shell
- Resilient rings

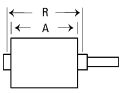
DIRECT DRIVE MOTORS
48 Frame Permanent Split Capacitor



1625 RPM Direct Drive Blower Motors
PSC, 48 Frame, Open Air Over

Applications:
- Designed as replacements for direct drive furnace blower motors, air conditioners, exhaust fans and other applications where the motor is located in the airstream

Features:
- Automatic thermal protection
- 3-speed
- Electrically reversible rotation
- Sleeve bearing
- Capacitor not included

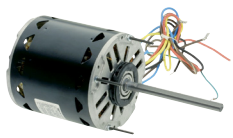
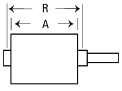
Helpful Hints for Replacing a PSC Motor

- Always check the capacitor before replacing a permanent split capacitor motor
- Before dismantling, scratch an arrow on the case of the bad motor indicating direction of rotation
- Matching ampere rating is usually more accurate than matching horsepower for fractional horsepower motors
- An overloaded motor always runs hot and slow, and draws more than nameplate amps Reading the motor current draw with an ampere meter is the most accurate method of identifying an incorrect replacement
- Green is always the ground wire





3-Speed Direct Drive Motors
PSC, 48 Frame, Open Air Over

- **S88-436** replaces Fasco #D712
- **S88-437** replaces Fasco #D711 and may also be used as a condenser fan motor using **S58-215** drip shield

Applications:
- Replaces motors used in the higher tonage gas and electric furnaces

Features:
- All-angle ball bearings
- Class B insulation, 40°C ambient
- Includes two 2-1/4" mounting rings with two 2-1/2" mounting adapters
- Rotation is plug reversible
- Both motors use 20M370V capacitor (**G21-909**, not included)

3-Speed and 4-Speed Direct Drive Blower Motors

PSC, 48 Frame, Open Air Over

Applications:
- Ideal replacements for blowers in direct drive furnaces, air conditioners and exhaust fans

Features:
- Automatic thermal protection
- Extended tie rods shaft end
- Mounting hubs both ends
- Capacitor not included

3-Speed Direct Drive Blower Motors

PSC, 48 Frame, Open Air Over

Applications:
- Designed as replacements for direct drive furnace blower motors, air conditioners, exhaust fans and other applications

Features:
- Automatic thermal protection
- Reversible rotation
- Horizontal mount
- 2-1/4" resilient rings
- 26" long leads with 1/4" straight terminals
- 1/2" x 4" long flatted shaft with flat 3-1/2" long
- 3/4" long studs on 5.12" bolt circle, #10-32 thread on shaft end

Direct Drive Blower Motors
PSC, 48 Frame, Open Air Over

Applications:
- Window air conditioners
- Fans and blowers

Features:
- Automatic thermal protection
- Electrically reversible rotation
- All-angle
- Sleeve bearing
- Open construction

Heavy-Duty, Multi-Purpose Direct Drive Motors

PSC, 48 Frame, Totally Enclosed Air Over

- Replace Motors Used in Dirty, Dusty Environments

Applications:
- Unit heaters, hot house fans, agricultural fans for chicken, cow and hog houses, condenser fan motors and furnace blower motors

Features:
- Automatic thermal protection
- Capacitor included
- Single-speed
- All-angle mount
- 5/8" shaft adapter included, class B insulation
- 60°C ambient
- Electrically reversible rotation

Unit Heater Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Replaces unit heater motors on Reznor, Modine, Trane, Carrier and others

Features:
- Automatic thermal protection
- Four extended studs shaft end 1" long
- 18" leads
- Base and capacitor included
- Electrically reversible rotation

Direct Drive Unit Heater Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Designed as replacements for direct drive furnace motors and other applications where the motor is located in the airstream

Features:
- Automatic thermal protection
- Capacitor included
- Ball bearing
- Motor rotation can be easily changed with reversing plug or quick connects
- Continuous duty, air over
- #8-32 mounting studs included

Flex Mount Direct Drive Motors 3- and 4-Speed

PSC, 48 Frame, Open Air Over

- Fits 9" or 10" Diameter Mounting

Features:
- Automatic thermal protection
- Reversible rotation
- Shaft: 1/2" x 6" long
- Leads: all 26" long
- Lugs: three, 120° apart
- Capacitor not included

Direct Drive Ventilation Blower Motors
PSC, 48 Frame, Open Air Over

Applications:
- Designed to meet manufacturer's requirements for direct drive ventilation units

Features:
- Automatic thermal protection
- Capacitor included and mounted
- Continuous duty

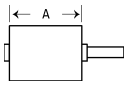
Single-Speed Blower Motors
PSC, 48Y Frame, Open Air Over



Applications:
- Single-speed PSC motors designed to replace shaded pole motors for direct drive furnace blowers, air conditioners, blowers, etc.

Features:
- Automatic thermal protection
- Capacitor leads include 1/4" terminals
- 2-1/4" diameter resilient rings with expanders for 2-1/2" diameter
- Horizontal mount only; not suitable for vertical mounting
- Rotation: electrically reversible
- Capacitor not included

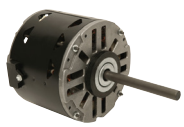
Blower Motor
PSC, 48 Frame, Open Air Over



- Internally Mounted Capacitor Included

Applications:
- Replacements for shaded pole direct drive fans and furnace blowers

Features:
- Automatic thermal protection
- 2-1/2" rings for resilient mounting
- Internally mounted capacitor simplifies wiring

Belt Drive Fan Motors

Split Phase, 48 Frame, Open Dripproof

Applications:
- Replacements for furnace blowers, belt driven fans, air coolers and similar applications with moderate torque requirements

Features:
- Automatic thermal protection
- Continuous duty
- All-angle mounting
- 40°C rise
- Reversible rotation
- Resilient base included
- Not recommended where automatic reset creates a hazard

Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	Bearing Type	Wt. Lbs.	Each

Belt Drive Fan and Blower Motors

Split Phase, 48/56 Frame, Open Dripproof

Features:
- Automatic reset overload protection
- 2-1/2" resilient rings
- All-angle bearings
- 1/2"–5/8" diameter shaft adapter included
- Continuous duty, 40°C ambient
- CCW/CW electrically reversible rotation
- Fig. A slotted frame, base included: fits 48 and 56 frame mount
- Fig. B length adjustable, base not included: 1-1/2" splined hub (OSE) for adjustable mounting

Furnace Blower and Fan Duty Motors

Split Phase, 48 Frame, Dripproof

Features:
- Automatic thermal protection
- Low starting amps
- All-angle sleeve bearing
- Resilient mounting furnished
- 40°C ambient
- Continuous duty
- Reversible rotation
- 60 Hz
- Class A insulation
- Not recommended where automatic reset creates a hazard

2-Speed Belt Drive Fan and Blower Motors
Split Phase, 56 Frame, Open Dripproof

- **S87-774** is 56Z frame and has flatted shaft, **S87-775** has keyed shaft

Features:
- No thermal protection
- Reversible rotation
- Continuous duty
- 60 Hz
- 40°C rise
- Resilient base for all-angle mounting
- Extended thru-bolts on shaft end
- 1.0 Service Factor

Single-Speed Belt Drive Fan and Blower Motor
Capacitor Start, 56 Frame, Open Dripproof

Applications:
- Widely used for rooftop heating and air conditioning units

Features:
- Automatic thermal protection
- Reversible rotation
- Capacitor and base included

Multifit™ Multi-Horsepower Motors

PSC, 42 Frame, Totally Enclosed Air Over

- Replaces 4.42 BC Emerson clam-shell, GE cap can, 4.62BC A.O Smith/ Westinghouse, Emerson 42 frame, 4.33BC GE 42 frame, and Fasco 42 frame

Features:

- Multiple mounting configurations with removable studs providing 3 bolt circles
- Includes water resistant rubber grommets for lead openings
- Reversible rotation
- 36" leads
- Double sealed ball bearings

Help Johnstone Supply Help You With Your Motor Replacement Needs

Provide the following information for more accurate motor replacement:

1. Before dismantling, scratch an arrow on the case of the motor indicating direction of rotation.
2. Note the voltage. Often, it is not indicated on the nameplate.
3. Note the number of speeds.
4. Note the type of motor: Permanent split capacitor (PSC) or shaded pole.
5. Note the shaft diameter.
6. Note the capacitor size if a PSC motor.
7. Provide all nameplate data:
   a. Horsepower
   b. Amps
   c. RPM

Condenser Fan Motors

PSC, 42 Frame, Open Air Over

Applications:

- For replacing horizontal, base mounted condenser fan motors

Features:

- Automatic thermal protector, sleeve bearing
- Continuous duty, air over

CONDENSER FAN MOTORS
48 Frame ECM Motors

Evergreen® ECM Outdoor Condenser Fan Motor

NEW

ECM, 48 Frame, Totally Enclosed Air Over

- 80% efficient
- 2-speed taps, one for 1100RPM tone for 850RPM, which means it replaces a 6-pole PSC and an 8-pole PSC in one motor
- Electrically reversible
- For residential use

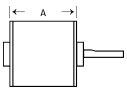
RESCUE EcoTech® Condenser Fan Motors

ECM, 48 or 56 Frame, Totally Enclosed Air Over

A

B



- **S82-764** and **S83-361** are 48 frame and replace 6- and 8-pole motors
- Line-voltage starting motor with 2 speeds
- Second speed adjustment use a 24V speed tap
- Rotation adjustment use a 24V rotation tap
- High 60°C max ambient operating temperature
- **S83-359** and **S83-360** are 56 frame for use in commercial refrigeration condensers
- ECM technology lowers energy usage, especially at partial output and integrates easily into existing air-cooled condenser designs

Specifications:

- **S82-764** mounts vertical, shaft down
- **S83-361** mounts vertical, shaft up

HeatMaster™ Ultra 80°C Ambient Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- For use with head pressure/speed controls

Features:
- Automatic thermal protection
- Three-Year Warranty
- UL and CSA approved Class F Insulation achieves superior dielectric strength for long thermal life
- Double sealed ball bearing with high temperature synthetic grease
- Water-resistant reversing plug
- 48" color coded high temperature leads for easy identification and installation
- Mounts by belly band, adjustable extended thru-bolts, or Rheem/Trane mounting holes, with screws supplied

Century® HeatMaster®

HeatMaster™ High Temperature Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Replaces motors in units by Carrier/Bryant and others

Features:
- 70°C ambient
- Three year warranty
- UL and CSA approved Class F insulation achieves superior dielectric strength for long thermal life
- Single-speed
- Sleeve or ball bearing
- Large high-temperature nylon glass-filled shaft slinger for bearing protection; keeps water and dirt out of motor bearings
- 36" color coded high temperature leads for easy identification and installation
- Easy to remove drain plugs in both end frames allow accumulated condensation to be expelled quickly

Century® HeatMaster®

Save Time and Money Upgrading to a ECM Condenser Fan Motor!

- Evergreen® OM motor, is an electronically commutated motor (ECM) designed to replace induction motors (shaded pole or PSC) in outdoor fan applications in HVAC systems. The Evergreen® OM Motors replaces both 1100 RPM (6-pole) and 850 RPM (8-pole) PSC motors helping you save time and money.

Century®

MasterFit® Pro Multi-Horsepower Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Features:
- All purpose capacitor included
- Mounts by belly band, thru-bolts or shell holes
- Extended thru bolts
- Rheem mounting holes in shell
- 2 speed

RESCUE® EZ-WIRE™ Condenser Fan Motor

PSC, 48 Frame, Totally Enclosed Air Over

- For use in commercial and residential condensing units
- Automatic reset thermal overload protection
- Designed for use with 440v capacitor
- Shell holes for Rheem mount
- Multi-horsepower
- Reversible rotation
- 48" leads
- Side shell holes
- Thermally protected

Mojave® Series Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

- 158°F (70°C) ambient motors built to withstand extreme temperature conditions
- Class F insulation — thermal endurance to over 300°F

Applications:
- Residential and commercial condensing unit fan motors in extreme temperature locations

Features:
- Automatic thermal protection
- Ball bearings
- 48" leads
- Special corrosion protection
- Reversible rotation

Note: Figure B are RESCUE® brand motors

Save Time and Money Upgrading to a ECM Condenser Fan Motor!

The Rescue Ecotech® condenser fan motor is programmed to match the rotation and speed most preferred by major equipment manufacturers and offers the flexibility for adjustment to speed and rotation. This motor replaces both 6 and 8 pole condenser fan motors.

Patriot Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed

- Made in USA
- Royal blue shell for easy identification

Features:
- Rheem side shell holes
- Trane & Rheem blind boles in endshield
- 70° C (Mojave Rated)
- All position ball bearing
- 48" leads
- Reversible rotation

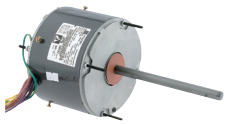
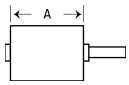
CONDENSER FAN MOTORS
48 Frame Permanent Split Capacitor

The Consolidator Condenser Fan Motors
PSC, 48 Frame, Totally Enclosed





- The Original Multi-Purpose Condenser Fan Replacement Motors
- Consolidate 12 applications into one motor
- Multi-mount, multi-application
- 60°C ambient
- **S81-012** is a 70°C ambient, F class motor with ball bearings

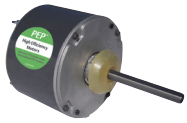
PEP® Condenser Fan Motors
PSC, 48 Frame, Totally Enclosed Air Over



Applications:
- Residential and commercial condensing unit fan motors to meet manufacturer's requirements

Features:
- Up to 76% efficient, saving up to 70 watts
- Hubless lead end
- Drain holes on both ends

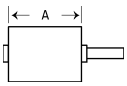
4-in-1® Multi-Horsepower Condenser Fan Motors
PSC, 48 Frame, Totally Enclosed Air Over



Features:
- Automatic thermal protection
- All angle mounting
- Removable drain plugs at each end
- Rheem mounting holes, screws included
- Multi-application
- Reversible rotation
- 60° Ambient

Specifications:
- **S89-728** is a direct replacement for mfg. #51-20668-11, 51-23055-11, 51-23054-11, and 51-23053-11

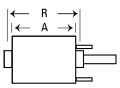
460 Volt Condenser Fan Motors
PSC, 48 Frame, Open Ventilated



Applications:
- Primarily used in commercial rooftop air conditioning units

Features:
- Automatic thermal protection
- Class B insulation systems
- Lead end bell open all models, shaft end bell closed except as noted
- Rotation: electrically reversible
- Capacitor not included
- **S88-586** has flat end bells, and the **S88-587** has shaft end bell open

Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Residential and commercial condensing unit fan motors
- Replaces motors in units by Carrier/Bryant and others

Features:
- Automatic thermal protection
- 60°C ambient
- Flat end bell on lead end

Single-Phase Rooftop Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Industrial and commercial rooftop units

Features:
- Single-speed, 1075 RPM, PSC, ball bearing
- Automatic reset thermal protection
- Shaft has water slinger
- 6" leads in outlet box
- Capacitor included, except **S89-644**, and **S81-099**

Note: Totally enclosed except **S88-084** which is enclosed end opposite shaft

Condenser Fan Motors

PSC, 48 Frame, Open Air Over

Applications:
- Used for vertical or horizontal shaft applications where the motor is located in the airstream

Features:
- Automatic thermal protection
- 208-230V
- Capacitor not included

Note: S89-578, **S89-579** and **S89-580** closed on shaft end, open on opposite shaft end

Condenser Fan Motors
PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Designed for all-angle mounting

Features:
- Electrically reversible 48 frame motors feature flat end bell opposite shaft end with 1" long #8-32 extended studs to mount to bulk heads in shaft down applications
- Single-speed
- 24" power leads, 4" capacitor leads
- Class B insulation
- Water slinger included, capacitors not included; order separately

Standard Duty Condenser Fan Motors
PSC, 48 Frame, Open Dripproof Air Over

Features:
- Automatic thermal protection
- 30" leads and 6" green ground lead
- Four 1-1/2" x 8-32 extended mounting studs
- Water slinger on shaft
- Provision for mounting capacitor
- Class B insulation to allow operation in higher ambient temperature
- Rotation: reversible with quick connects
- Protected against moisture by EMR
- High efficiency rated
- Enclosed except for end shield at lead end

Note: Comes less base, capacitor and hub rings

Condenser Fan Motors

PSC, 48 Frame, Open Dripproof Air Over

Applications:
- For use on condenser cooling fans

Features:
- Automatic thermal protection
- Comes complete with capacitor (except **S89-640** and **S89-641**)
- 21" leads
- Rotation: reversible with quick connects in frame band
- Enclosed end shield on shaft end
- **S87-815**, **S87-825** and **S87-816** have extended thru-bolts

Note: S87-825, **S89-640** and **S89-641** do not include base

Standard-Duty Condenser Fan Motor

PSC, 48Y Frame, Open Air Over

Applications:
- Designed for standard replacement horizontal or vertical shaft up mounting on central air conditioning condenser units

Features:
- Automatic thermal protection
- Electrically reversible
- Shaft end plate enclosed
- Energy efficient
- Plug reversible
- 60°C ambient except **S88-713** which is 40°C ambient
- Capacitor not included
- Thru-bolts: four 1-5/8" long with #8-32 thread

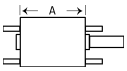
CONDENSER FAN MOTORS
48 Frame Permanent Split Capacitor

FASCO

A

B



Condenser Fan Motors
PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- For use on central air conditioning systems and outdoor condensing units

Features:
- Automatic thermal protection
- All-angle mount
- Extended tie rods both ends
- Flat end bells both ends
- Four drilled and tapped holes in the shell (except for **S89-583**)

Note: Capacitor not included

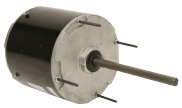
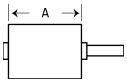
Tech Tip

Don't forget to remove appropriate Condensation Drain Plug. Drain holes should be at lowest point in motor to permit proper condensate drainage.

Century®





Condenser Fan Motors
PSC, 48 Frame, Dripproof Open Lead End

Applications:
- For shaft up or horizontal applications, short body design

Features:
- Automatic thermal protection
- Heavy-duty ball bearing
- Class B
- 60°C ambient
- Extended thru-bolts and bearing hubs for resilient rings for different types of mounting
- Electrically reversible
- **S88-984** is for heavy-duty applications, it produces 1.1 HP

Note: Capacitor not included

TEAO Condenser Fan Motors

PSC, 48 Frame, Totally Enclosed Air Over

Applications:
- Replaces motors in units by Carrier/Bryant and others

Features:
- Automatic thermal protection
- 60°C ambient
- Short body design
- Shaft up or down mounting with extended thru-bolts both ends
- Class B insulation
- Electrically reversible

Note: Capacitor not included

Condenser Fan/Heat Pump Motors

PSC, 48Y Frame, Open Air Over

Applications:
- For horizontal or vertical shaft up mounting in heat pump applications, central air conditioning outdoor condenser fans where motor is located directly in the air stream

Features:
- Automatic thermal protection
- Water slinger on shaft end
- End bell on shaft end is totally enclosed with water slinger on shaft, end bell opposite shaft end is open
- Continuous duty, designed for frame band mounting or with four #8-32 thru-bolts extended -1/2"
- Frame drilled and tapped with two 11/64" diameter holes for capacitor mounting when required
- Shaft 6" long with two flats 90° apart
- Electrically reversible rotation

Direct Drive Condenser Fan Motors

PSC, 48Y Frame, Totally Enclosed Air Over

Applications:
- Direct drive condenser fans for all angle mounting. Needs to be mounted in the airflow of the fan for proper cooling.

Features:
- Automatic thermal protection
- Condensate drain holes
- Rotation: reversible with use of quick connectors
- Slinger on shaft
- High breakdown torque
- High temperature thermal protector reduces nuisance tripping

Note: Drain holes with removable plugs are located in each end bracket. Remove the plug on the bottom when the motor is installed. Leads: 36"; shaft: two flats, 90° apart; studs: four, 1-1/2" long on 5.12" bolt circle, #8-32 thread.

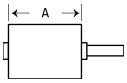
CONDENSER FAN MOTORS
48 Frame Permanent Split Capacitor

Deluxe Heatmaster Condenser Fan Motors
PSC, 48 Frame, Open Air Over



Features:
- Patented canopy design
- Fan blades move cooling air through the motor for extra performance and long life
- Electrically reversible
- 70°C ambient
- Heavy-duty ball bearings
- All 5/8" diameter shafts have flat and key
- All models, except **S88-407**, are suitable for use with solid state speed control devices

Note: S88-219 and **S88-407** are supplied with conversion kit allows their use in 56 frame wire belly band basket

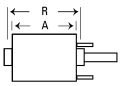
Commercial Condenser Fan Motors
PSC, 56 Frame, Open Dripproof or Totally Enclosed



Applications:
- Replacement for Carrier, Trane, York

Features:
- Automatic thermal protection
- Extended thru-bolts, flat end bell lead end
- Shaft: 5/8" D x 6" L with 5" flat and keyway 90° apart
- Continuous duty air over
- Ball bearing, 56Z frame
- 40°C ambient

Note: Capacitor not included. Open dripproof models are shaft end totally enclosed, opposite end open

Commercial Condenser Fan/Heat Pump Motor
PSC, 56Y Frame, Open Air Over

Applications:
- Heavy duty design for commercial direct drive condenser fans mounted vertically, shaft up. Needs to be mounted within the airflow of the fan for proper cooling.

Features:
- Automatic thermal protection
- Single-phase
- Belly band
- Shaft up
- Shaft slinger
- 60°C ambient
- Ball bearings
- Flat and key on shaft
- Unique rain shield fits over shaft to protect motor in vertical shaft up position

Note: Capacitor not included

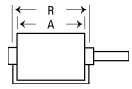
Single-Phase Rooftop Condenser Fan Motor with Resilient Base

PSC, 56 Frame, Totally Enclosed Air Over

Applications:
- Industrial and commercial rooftop units

Features:
- Automatic reset thermal protection
- Capacitor included
- Single-speed
- 1075 RPM
- Ball bearing
- Shaft has water slinger
- 6" leads in outlet box



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	"R" Dim.	Bearing Type	Wt. Lbs.	Capacitor To Match	Each

Deluxe Heatmaster Three-Phase Condenser Fan Motors

PSC, 48 Frame, Open Air Over

Features:
- Patented canopy design, fan blades move cooling air through the motor for extra performance and long life
- Off-winding protectors protect all three legs of circuit
- Heavy-duty ball bearings
- 70°C ambient
- All 5/8" diameter shafts have flat and key

Note: S88-222 and **S88-408** are supplied with conversion kit allowing their use in most 56 frame applications

CONDENSER FAN MOTORS
56 Frame PSC & Three-Phase

Varitough® Commercial Condenser Fan Motors
Three-Phase, 56 Frame, Open Dripproof

Features:
- 70°F maximum ambient rated
- Thermostat overload detection
- AEGIS SGR™ bearing protection ring already mounted
- Class F insulation system
- Double-sealed ball bearings
- Shaft-up
- Continuous duty, air over
- Voltage change device
- Inverter duty

Helpful Motor Connection Hints

1. Green is always the ground wire
1. Never connect line voltage to two-speed leads
1. Motor should be installed so leads are in the 6 o'clock position, or looped so water cannot enter motor

Condenser Fan Motors with Aegis Shaft Grounding Included
- 3-phase commercial 56 frame condenser fan motors for use with any VFD
- Shaft grounding already mounted and included
- 70°c ambient
- Enclosed shaft end bracket, vented frame
- Continuous duty, air over
- Automatic reset thermal protector
- Nameplated 60/50 hertz
- Double sealed ball bearings

JuggerNaut Condenser Fan Motors with Bearing Current Protection (BCP)

Three-Phase, 56 Frame, Open Air Over

- JuggerNaut Pro with Bearing Current Protection (BCP) or standard Juggernaut models available

Features:
- 70°C (158° F) ambient temperature
- Enclosed shaft end bracket with vented frame
- Automatic reset thermal protector
- External shaft slinger
- A threaded lead exit
- Voltage Change Device™ (VCD) to quickly change voltage on the spot
- Double-sealed ball bearings
- For commercial and residential fan/heat pump applications and may be installed outdoors

Note: F/L Amps shown in chart is based on a rating of 60 Hz and 208V.

Vertical Condenser Fan Motors

Three-Phase, 56 Frame, Totally Enclosed Air Over

Applications:
- Used on many Carrier, York and McQuay rooftop units

Features:
- Automatic thermal protection
- Class B insulation
- 70°C ambient
- Double sealed ball bearings
- Shaft with both keyway and flat
- Rotation: reversible

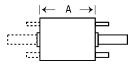
Double Shaft Blower Motor

Shaded Pole, Open Enclosure

Applications:
- Heaters, range hoods, bath ventilators and window air conditioners
- Suitable for a wide variety of air moving applications

Features:
- Single-speed
- Open ventilated
- Double shaft extensions
- Thermally protected
- Leads: 18" long
- Flatted shafts



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	Bearing Type	Wt. Lbs.	Each

1550 RPM Double Shaft Window Air Conditioner Motors

Shaded Pole, Open Ventilated

Applications:
- Excellent replacements for small window air conditioners

Features:
- Can be mounted by band or studs, overload protection
- Four 3/4" long studs on 2.84" centers
- Shaft length is the same on both ends

Multi-Speed Double Shaft Blower Motors

Shaded Pole, Open Air Over

Applications:
- Widely used on fans and blowers

Features:
- Studs: Four extended on each end, 9/16" long on 2.84" centers
- Two black leads 14" long, 18 gauge
- Non-reversible, thermal overload protector

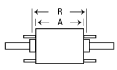
DOUBLE SHAFT MOTORS
4-7/16" Diameter Shaded Pole & PSC

FASCO

Double Shaft Fan Coil Air Conditioner/Heating Units Motors
Shaded Pole, Open Enclosure



Applications:
- Used in hotels, motels, offices and hospitals where a central system pumps hot or cold water or refrigerants to remote units
- This line is unusually broad to provide replacements with a minimum of modification and at the same time closely match performance of the original motor

Features:
- Multiple-speed, thermally protected
- Leads: 60" long for **S88-109** and **S88-110**; 30" long for **S88-111**
- Shaft: flatted both ends; resilient rings: 2-1/2" diameter, supplied
- Shaft length is the same on both ends

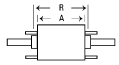
277 Volt Fan and Blower Motor

Shaded Pole, 42 Frame, Open Air Over

Applications:
- 277V direct drive blower wheel heating/air conditioning consoles, fan coil units, through-the-wall air conditioners, rooftop equipment

Features:
- Generous double shaft extensions which may be cut off to desired length or changed to a single shaft motor with desired rotation
- 3- or 4-speed
- Adaptable to most application requirements where the motor is located in the airstream
- Automatic reset thermal protection
- Shaft: same length both extensions



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	"R" Dim.	Bearing Type	Wt. Lbs.	Each

Multi-Speed Fan Coil Air Conditioning/Heating Unit Motors

PSC, 42 Frame, Open Ventilated

Applications:
- Designed for use in fan coil air conditioner/ heating units in hotels, motels, offices and hospitals where a central system pumps hot or cold water or refrigerants to remote console type room units

Features:
- Thermally protected
- Shaft: flatted and same length both ends, height is 3-1/2"
- Resilient rings: 2-1/2" diameter supplied, except **S89-417**
- Capacitor Included

Double Shaft Fan and Blower Motors
PSC, 48 Frame, Open Air Over

- Single-phase, 1625 or 1075 RPM, sleeve bearing "Conservationist" energy-efficient design

Applications:
- Can be used in a variety of commercial and residential air conditioners, furnaces, air handlers, unit heaters and similar air over applications

Features:
- Quiet sleeve bearings in heavy diecast end bell
- 3-speed
- Automatic reset thermal overload protector
- Long double shafts, extended thru-bolts
- Packed with a heavy-duty length adapter kit which includes a ring bracket
- 2-1/4" resilient rings, split rings for conversion to 2-1/2" and necessary hardware
- Provision for mounting capacitors (capacitors and strap not included)

Williamson Draft Inducer Blowers

Direct Replacement for Williamson

- **S88-841** replaces Williamson #02-568, #7021-5510
- **X89-520** replaces Williamson 100,000 Btu furnaces, #7021-6999, #7021-7042

Note: X89-520 leads may require some modification on certain replacements.

Shaded Pole, C-Frame Motors

- For air coolers, displays, kitchen fans, portable room heaters, food dehydrators and applications where a tight fit is mandatory
- Shaft rides on self-aligning, pre-oiled, sintered bearings for long life and minimum noise
- All motors have thermal protection (either impedance protection or thermal device)
- Clockwise rotation facing output shaft, direction reversed by changing motor field
- Two #6-32 stud bolts extending 1/2" from stack on 1-7/8" centers; two 5/32" mounting holes on each side of stack on 1-7/8" centers; 60 Hz

EM&S

Unit Bearing Agitator Motors

For Ice Machines and Beverage Dispensers

- Direct replacements for ice machines and beverage dispensers manufactured by Cornelius, Scotsman, Reed, Vendo, Alco, Booth, Rowe and others
- **S58-537** and **S58-538** have threaded shafts 1/4"-20 by 1/2" long at shaft end
- **S58-539** has two pin holes #52 approximately 3-1/2" apart
- **S58-662** shaft has 3/4" flat
- **S58-540** has one pin hole 0.095" diameter 3/8" from end of shaft
- Stainless steel shafts match originals
- Each motor comes packed with 11 #8-36 screws for mounting
- Overload protected
- Cast iron body

Carbonator Pump Motors

Split-Phase

Applications:
- Carbonator pumps, direct drive gear and vane-type pumps, utility pumps

Features:
- Continuous duty, 40°C ambient
- Automatic reset thermal protector
- 5/8" quiet all-angle bearings
- Open dripproof enclosure
- Thrust bearing carries up to 25 lbs. end thrust

Carbonator Pump Motors

Close Coupled Resilient Mount

Applications:
- Designed for use on carbonator and liquid transfer pumps
- Used for under-the-counter beverage dispensing equipment

Features:
- Specially designed end shield with extended hub and short slotted 5/8" diameter shaft, which enables close coupled pump to be mounted directly to motor
- Split-phase, automatic overload protection, sleeve bearing, reversible, 3" shaft height
- Base mounting holes 4-1/4" x 2-3/4", 48Y frame

Evaporative Cooler Motors

Applications:
- Replacements for Arctic Circle, Wright, Universal, Alpine, Champion, Phoenix and other coolers with built-in base

Features:
- Split-phase, resilient rings, base and clamp not included
- Motors have external oil ports and are manufactured using the Emerson Moisture Resistant System (EMR) that includes epoxy painted rotors, plastic coated switches and actuators
- Automatic thermal overload protection
- Includes 2-1/2" mounting ring

"Copper Line" Special Feature Evaporative Cooler Motor

Applications:
- For swamp coolers and other applications in high moisture areas

Features:
- All copper windings, oil ports for reoiling, thru-bolts, phosphatized shaft and hardware, zinc chromate rotor core
- Shells painted inside and out, studs and QC connectors on terminal board
- CWSE, includes 2-1/2" mounting rings

Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	Bearing Type	Wt. Lbs.	Each

Moisture Resistant Motors

For Swamp Coolers and Other Equipment in High Moisture Areas

Features:
- Epoxy finished rotor core, stator bore, resilient mount, sleeve bearing
- 115VAC, 60 Hz, 40°C ambient, 1.0 Service Factor, class B insulation, continuous duty
- Dripproof design, 5/8" shaft adapter furnished where necessary
- **S88-414** and **S88-415** are capacitor start design
- **S88-416** is split-phase

C-Face Commercial Farm Duty Pump Motors

56C Frame, Totally Enclosed Fan Cooled, Single-Phase

A

B

Applications:
- Commercial and industrial pumps, centrifugal and hydraulic pumps, machine tools and other equipment requiring NEMA C-face mounting configurations in dusty or dirty areas

Features:
- NEMA C-face mounting
- NEMA service factor
- Reversible rotation
- No thermal protection
- Fig. A: no base
- Fig. B: welded base
- Capacitor start

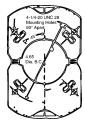
Hot Water Circulating Pump Motor

Replacement for Bell & Gossett, Split-Phase, Frame 48Y

Applications:
- Designed specifically as a replacement for Bell & Gossett hot water circulating pumps

Features:
- Special mounting bracket for direct interchangeability
- Split-phase, automatic reset thermal protector
- 1.0 Service Factor



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	Bearing Type	Wt. Lbs.	Each

Replacement for Miller Furnace Motor

Shaded Pole

- Direct replacement for Miller

Applications:
- Direct replacement for Miller stock #MG8260, MMG82CG and MHLO-85; Duotherm #760R and Preway Mark series furnaces

Features:
- Two conductor leads, 21" long, with molded plug
- Mounting rings included, 12" ground lead attached

Bell & Gossett Motors

Single-Speed, 1725 RPM, Single-Phase

- Single-Speed, 1725 RPM, Single-Phase

Features:

- Manufactured to rigid Bell & Gossett specifications to ensure quiet, dependable performance, including immediate start-up on system demand even after seasonal shutdowns
- Resilient mounted, with oil lubricated bronze sleeve bearings
- **S88-377** is 5" diameter, **S88-376** is 6" diameter
- **S88-417** is for 60 series pumps, **S88-419** and **S88-420** are for PD and 60 series pumps, **S88-481** is for 2-1/2" and LD3 pumps

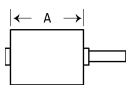
First Company/Summit Direct Replacement Fan Coil Motors



- Direct replacement for First Company/Summit

Applications:

- Direct replacement for First Company/Summit 42 frame fan coil motors

Features:

- Open construction, thermally protected, PSC capacitor supplied
- **S89-796** replaces mfg. # M10
- **S82-401** replaces M8, 326P400, 746
- **S82-402** replaces M10, 747, 326P451, D258

Hussmann Direct Replacement Motor

Solid State Commutator Refirgeration Motors

- Unit bearing construction
- SSC Dirct replacement for Hussmann Refrigeration
- Two to three times more efficient than a standard shaded pole motor
- Lower operating temperatures and extended motor life
- Direct drop-in Replacement for motors 35-50 watts output that use a threaded shaft
- Constant 1550 RPM operating speed is identical on either 60 Hz or 50 Hz
- Constant 1550 RPM regardless of fluctuations in line voltage
- 100% performance tested

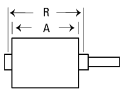
Lennox Direct Replacement Furnace Blower Motors



- 4-Speed

Applications:
- PSC replacement for Lennox #P8-7505 and P8-9450 furnace blower motors, also replaces GE motor #5KCP39HG9174AS

Features:
- Supplied with 2-1/2" diameter resilient rings, automatic reset thermal protector
- Capacitor and base not included

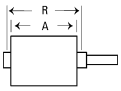
Lennox Direct Replacement Furnace Blower Motors



- Direct replacement PSC motors for Lennox furnace blower motors
- **S87-957** replaces GE 39-frame #5KCP39PG9701S for Lennox model #P8-9080; it is also a ball bearing motor
- Thermally protected
- **S88-340**, **S87-822**, **S87-818**, **S87-973**, **S88-259** fit various other Lennox furnace blower applications

Note: S88-259 is not UL recognized

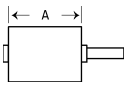
Lennox Direct Replacement Commercial Condenser Fan Motors

48 Frame, PSC



- 48 Frame, PSC

Applications:
- **S81-354** is a direct replacement for Lennox #88C740
- **S81-355** is a direct replacement for Lennox #88C730

Features:
- Single-speed, 60hz, single-phase
- Ball bearings; open air-over construction
- Automatic thermal protection; Class B insulation
- **S81-354** has maximum operating ambient of 40°C
- **S81-355** has maximum operating ambient of 60°C
- Belly-band or basket mount
- Drip shield included
- Capacitor not included

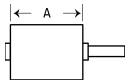
There Are Several Benefits That Come When Using A Variable-Speed Blower Motor:

- Electrical efficiency: variable-speed motors can actually reduce energy bills, as they consume less electricity than standard motors
- Cooling efficiency: variable-speed technology also means you will gain heating efficiency
- Zoning: variable-speed motors are excellent for zoning, which allows customization in different areas of the home and control energy usage
- Air quality: a variable-speed motor can also help clean the air; when the fan is in constant operation the motor will continue to slowly circulate air, allowing filters to capture more contaminants

Lomanco Direct Replacement Attic Ventilator Motor

Applications:

- Single-speed replacement motors for Lomanco powered attic ventilators
- Includes the mounting bracket kit which mounts to the motor; replaces Lomanco #AO416B2059, #AO510B2389 and #FO510B2497



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	Bearing Type	Wt. Lbs.	Each

Miller/Nordyne Direct Replacement Furnace Blower Motors

- Direct replacement for Miller/Nordyne

Applications:
- Replaces several different Miller/Nordyne furnace blower motors

Features:
- Single-speed, shaded pole
- Open construction

Nesbitt Direct Replacement Motors

- Direct replacement for Nesbitt

Applications:
- Direct replacement motors for ITT Nesbitt HVAC wall and ceiling units found in schools, hotels, hospitals, auditoriums and gymnasiums

Features:
- Manufactured to the same standards as the original designs
- 40°C ambient, PSC, class A insulated
- Resilient base included, 1.0 Service Factor
- Double shaft motors have the same shaft lengths on both ends

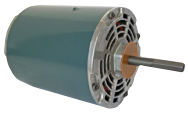
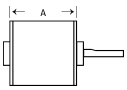
Trane Direct Replacement Commercial Condenser Fan Motors

48 Frame, PSC





- 48 Frame, PSC

Applications:

- **S81-340** is a suitable replacement for the following Trane and GE models: X70670706010, X70671180017, MOT3771, MOT5717, 5KCP39SFL19KS, 5KCP39SFL153DS
- **S81-341** is a suitable replacement for the following Trane and Fasco models: X70671653-01,X70671656-01, X70671654, X70671652-01, MOT9192, MOT9188, 7126-4088, 7126-4089, 7126-4090, 7126-4299

Features:

- Single-speed, 50/60 Hz
- Sealed ball bearings; open drip-proof
- Automatic thermal protection; Class B insul., 40°C ambient
- **S81-341** has a keyed shaft
- Rain shields available in Motor Accessories section under Motor Mounting Parts

Kryo Fortress Unit Bearing ECM Motor

- IP67, waterproof and dustproof for up to 30 minutes
- Retrofits for OEM, other ECM, or shaded pole unit bearing motors in commercial refrigeration evaporator units
- Standard rear 3-hole and Hussmann 4-hole mounting
- Can be used in evaporator and condensing applications
- Standard 2-pin Lyall plug
- Can operate in temperatures -40° to 55° Celsius
- Replaces up to 28 different motors

High Efficiency Commercial Refrigeration Display Case Motors

Replaces GE ECM 44 Motors

- Replaces 2 through 12 watt motors
- ECM motors provide advanced energy saving technology to commercial refrigeration applications
- Designed for drop-in replacement of conventional unit-bearing motors in 2 to 25 watt applications
- Built for tough environments, with precision ball bearing for moisture resistance
- Operates efficiently over wide speed range, optimum fan blade design can be achieved without limitations associated with conventional motors

Unit Bearing ECM Motors

Unitronix ECM Supermarket Case Fan Motors

Features:

- For replacement of 6–12 or 14–16 watt output shaded pole motors
- Delivers constant speed regardless of line voltage fluctuation
- Identical speed at 60 Hz or 50 Hz
- Low motor heat rise maximizes system efficiency
- All temperature motor oil for use in condenser or evaporator applications
- Mounting holes for rear mount or "A" bracket capability

Specifications:

- Cast iron
- EMF P-2-1A power plug
- 15" leads

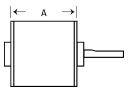
RESCUE® ECM Walk-in Evaporator Motors



- Totally enclosed air-over
- Automatic thermal protection
- Stud mounting
- IP66 dust tight with all angle moisture protection
- Suitable for use in evaporator
- High efficiency up to 70%
- Dual voltage
- Robust ball bearing system

RESCUE® ECM Watt Motors

Applications:
- For refrigeration evaporator and condensing applications

Features:
- 2-year warranty
- Environmental protection rating: IP67, capable of being submerged in water up to 30 minutes and dust tight
- High efficiency up to 70%

Specifications:
- Straight two prong plug included
- Universal mounting: two sets of feet and five holes in opposite shaft side
- Temperature rating: -40°C +55°C
- Totally enclosed air over (TEAO)
- Thermally protected

Are Your Refrigerated Cases Eating Your Profits?

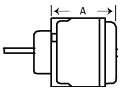
Upgrade to ECM Technology — The High Efficiency Alternative

Save Energy
- Electronically Commutated Motors (ECM's) operate at higher efficiency (approx. 68%) than traditional watt motors
- Higher efficiency means lower electrical operating costs

Reduce Waste-Heat
- Heat in a refrigerated space has always been a necessary evil in the food marketing industry with lights, motors and defrost heating elements as the culprits. Heat not only shortens food storage life, it also adds to the load placed on the refigeration system.
- ECM's dramatically reduce the waste-heat generated by refrigeration case evaporator motors.

Comply with New Legislation
- As of January 1, 2009, California's Title 20 Appliance Efficiency Standards required that all new walk-in coolers and commercial freezers use ECM evaporator fans. With many states referring to Title 20 in their own efficiency rulings, this new standard will quickly become the law of the land.
- According to the U.S. Department of Energy (DOE), replacing traditional shaded-pole motors with ECM's is one of the best ways to improve energy efficiency.

ELCO®



Commercial Refrigeration ECM Motors

Elco High Efficiency

Features:
- Life expectancy of 60,000+ hours
- IP65 moisture protection grade
- Totally enclosed
- Sealed ball bearings

Specifications:
- Working temp: -40°C +55°C
- M4 Studs on 3.72" B.C. for shroud/guard

Order #	Mfg. #	HP	Watts	Volts	RPM	F/L Amps	Rot.	"A" Dim.	Bearing Type	Each

Packard

Commercial Refrigeration Fan Motors

Elco NU Series

- For use in industrial and commercial refrigeration fans for condensing, ventilating and evaporator units, walk-in and reach-in coolers, freezers, food and beverage chillers
- All-angle self-aligning sleeve bearings
- Totally enclosed
- Continuous air over
- Class B insulation
- Standard operating temperatures -40°F to +104°F (-40°C to +40°C)
- UL listed, CSA approved
- Rear mount: 3 tapped holes #8-36 thread
- Foot mount: 4 holes, #8-36 thread

Unit Bearing Fan Motors

Direct Replacement for GE 51 Frame, Shaded Pole, Totally Enclosed Used on Commercial and Domestic Refrigerators, Freezers, Refrigeration Display Cases, Unit Heaters and Exhaust Fans

- These motors will fit existing brackets used by GE and Morrill
- Designed for quiet, efficient fan duty operation
- Permanently lubricated
- Die-cast aluminum housing and end shield 2–9 watt
- **S58-948** and **S88-225** to **S88-228** are cast iron
- All-angle mounting, mounted by three screws on lead end
- All motors except 2 watt have rigid foot mounts
- 24" leads with molded strain relief or 2 watt, 25" leads on 4–9 watt
- Used with 7" to 10" hubless fan blades
- All have threaded shaft with hub
- Includes vibration dampener, hubwasher, speed nut and three mounting screws: 2 watt has four screws, 4 watt has three screws and 6–9 watt has five screws

Packard

Johnstone Supply Unit Bearing Motors

- For refrigerators, freezers, display cases and walk-in coolers
- Single-speed, single rotation, 1550 RPM
- All-angle operation, continuous air over
- Improved permanent lubricated
- Long life sleeve bearings
- Impedance or overload protection
- 50/60 Hz
- Side pad mounting, except **S55-109**
- Shaft: 1/4" threaded, 1/2" long
- Cast iron construction, except **S55-109** is aluminum
- **S55-109** has detachable female plug
- 50 watt motors are 3/8" x 1 1/2" shaft
- 50 watt motors are semi-enclosed

RESCUE® ECM Watt Motors

Applications:
- For refrigeration evaporator and condensing applications

Features:
- 2-year warranty
- Environmental protection rating: IP67, capable of being submerged in water up to 30 minutes and dust tight
- High efficiency up to 70%

Specifications:
- Straight two prong plug included
- Universal mounting: two sets of feet and five holes in opposite shaft side
- Temperature rating: -40°C +55°C
- Totally enclosed air over (TEAO)
- Thermally protected

Unit Bearing Fan Motors From Morrill

Applications:
- Commercial and domestic refrigeration equipment, room and hood ventilators, room heaters, evaporative coolers and various equipment using 6" to 10" fan blades

Features:
- Cast iron
- Unique two rigid foot bases, top and bottom, with four mounting holes
- Three drilled and tapped holes in base allow vertical or horizontal mounting
- Positive flow lubrication system
- Large pre-oiled felt wick reservoir for long life
- 1/4" x 20" threaded shaft with rubber mounting pad
- **S58-707** is a 5W direct replacement for Hill Refrigeration

Packard

Linear Unit Bearing Motors

- Primarily used in commercial refrigeration; both evaporator and air cooler
- Fits existing brackets used by GE, Morrill and A.O.Smith
- Single Foot

Unit Bearing Fan Motors

Shaded Pole

- **S88-316** replaces #050-0267-00, 810M035A29
- **S88-318** replaces #050-0267-01, 810M035A21 and 810M035A28
- **S88-320** replaces #050-0244-01, 998-1008-00
- **S88-322** replaces #050-0244-00, 998-1007-00
- **S58-666** replaces #050-0244-03
- Leads: 22" long
- Shaft: 35 watt motors — 1/4"-20 thread; 50 watt motors — 3/8" diameter, flatted shaft

Note: All shafts 1/2" in length are 1/4"-20 threaded. Four #8–36 motor mounting screws are supplied, and 35 watt units come with fan silencer and Tinnerman fan fastener.

Single-Phase, Split-Phase Motors

48 Frame, Dripproof, Single-Speed

Applications:
- Commercial fans, blowers and evaporative coolers, having moderate starting loads or loads applied after the motor is up to speed

Features:
- Reversible rotation
- Resilient or welded base

Single-Phase, Split-Phase Motors

48 Frame, Dripproof, Single-Speed or Two-Speed

Applications:
- Commercial fans, blowers and evaporative coolers having moderate starting loads or loads applied after the motor is up to speed

Features:
- Extended through bolts

- Resilient base
- Reversible rotation
- No thermal protection

Note: No thermal protection

Commercial and Industrial Capacitor Start Fan and Blower Motors

48 Frame, Dripproof, Single-Phase

Features:
- Automatic reset overload protected
- Continuous duty ball bearing motors designed for belt driven fans and blowers, roof ventilators and exhaust fans
- 60 Hz, permanently lubricated, open dripproof, 40°C ambient
- Reversible rotation
- Resilient base
- Keyed 5/8" shaft except as noted
- 1-5/8" long flat on shaft

Applications:
- Pumps, air compressors, commercial refrigeration compressors, and other applications requiring hard or heavy-duty starting torque

Features:
- High starting torque
- Reversible rotation
- Selected "Energy Saver" designs are available by special order

marathon Motors

Capacitor Start Commercial and Industrial Fan and Blower Motors
56 Frame, Dripproof, Single-Phase

Features:
- Automatic reset overload protected
- Continuous duty ball bearing motors designed for belt driven fans and blowers, roof ventilators and exhaust fans
- 60 Hz, permanently lubricated, open dripproof, 40°C ambient
- Reversible rotation
- Resilient base
- Keyed 5/8" shaft except as noted
- NEMA service factor

Capacitor Start General Purpose Motors

56 Frame, Dripproof, Single-Phase

Applications:
- Pumps, air compressors, commercial refrigeration compressors, machine tools, conveyors and other applications requiring high starting torque

Features:
- Higher starting torque than standard split-phase motors
- Lower starting current than standard split-phase motors
- Fig. A: rigid base, fig. B: resilient base
- Reversible rotation
- 40°C ambient temperature rated
- NEMA service factor

Capacitor Start General Purpose Motors

56 Frame, Dripproof, Single-Phase

Applications:
- Powertools, fans, blowers coolers and other non-hazardous machinery requiring moderate starting torque

Features:
- Rigid or resilient base
- Reversible rotation
- 40°C ambient continuous duty
- 1.0 service factor, keyed shaft
- Fig. A: rigid base, fig. B: resilient base

Rigid Base Capacitor Start General Purpose Motors

56 Frame, Totally Enclosed Fan Cooled, Single-Phase

- No thermal protection

Applications:
- Pumps, air compressors, commercial refrigeration compressors, machine tools, conveyors and other applications requiring hard or heavy-duty starting torque

Features:
- Electrically reversible rotation
- High starting torque
- Double sealed ball bearing

GENERAL PURPOSE MOTORS
56 Frame Capacitor Start TEFC

marathon Motors

Capacitor Start Rigid Base General Purpose Motors
56 Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- Pumps, fans, compressors, power tools, conveyors, etc.

Features:
- Continuous duty, ball bearing
- 1.15 service factor
- Reversible by electrical reconnection
- **S88-034** and **S87-908**, are capacitor start, capacitor run motors

Rigid Base Capacitor Start General Purpose Motors

56-182T Frame, Dripproof, Single-Phase

Applications:
- Compressors, pumps, conveyors, blowers and fans

Features:
- Ball bearing
- Starting and pull up torque is more than twice that of split-phase motors with one third starting current
- Reversible rotation

Rigid Base Capacitor Start T-Frame Motors

143-213T Frame, Dripproof, Single-Phase

Applications:
- Pumps, fans, blowers, compressors and conveyors

Features:
- No thermal protection
- High starting torque, integral HP motors designed for continuous duty, 40°C ambient conditions
- Meet or exceed the NEMA design B definition, are Class B insulated
- Suitable for use in environments where dust, dirt and moisture are minimal
- Motors are reversible by electrical reconnection

Note: S91-224 and **S91-225** are capacitor start, capacitor run

Rigid Base Capacitor Start T-Frame Motors

143-215T Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- Fans, pumps, blowers, compressors, conveyors and machine tools

Features:
- Standard torque
- 40°C rise, continuous duty, 1.15 Service Factor
- Reversible rotation
- Ball bearings, capacitor furnished
- Keyed shaft, no overload protection

Note: S91-233 is capacitor start, capacitor run.

GENERAL PURPOSE MOTORS
T-Frame Capacitor Start

General Purpose Capacitor Start Motors
56-184T Frame, Open Dripproof, Single-Phase

Applications:
- Designed for air compressors, pumps, conveyors, blowers and general industrial equipment

Features:
- Double shield ball bearings
- All motors are rigid base except **S82-575** is resilient base
- Class B insulation, continuous duty, 40°C ambient
- F1 assembly
- Reversible rotation
- No thermal protection except **S82-571** and **S82-575**

A

B

C-Face Commercial Farm Duty Pump Motors
56C Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- Commercial and industrial pumps, centrifugal and hydraulic pumps, machine tools and other equipment requiring NEMA C-face mounting configurations in dusty or dirty areas

Features:
- NEMA C-face mounting
- NEMA service factor
- Reversible rotation
- No thermal protection
- Fig. A: no base
- Fig. B: welded base
- Capacitor start

Quad-Plus™ Capacitor Start C-Face General Purpose Motors
56 Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- Commercial pumps, conveyors, speed reducers and other equipment that mounts directly on NEMA C-face applications

Features:
- Removable base
- Double sealed ball bearing
- 1.15 service factor
- Class B insulation (**S89-528** has class F insulation)
- No overload protection
- Reversible rotation
- Horizontal, vertical shaft up or shaft down mounting
- Standard NEMA C-face shaft: 5/8" x 1.88" with keyway

Split-Phase C-Face Motors

56 CZ Frame, Dripproof, Single-Phase

Applications:
- Commercial fans, blowers and exhaust fans having moderate starting loads

Features:
- Ball bearing
- Electrically reversible rotation
- NEMA service factor
- No thermal protection
- Base not included

Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Shaft Diam.	Shaft Length	Rot.	Bearing Type	Wt. Lbs.	Each

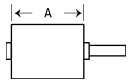
Split-Phase C-Face Motor

56CZ Frame, Dripproof, Single-Phase

Applications:
- Designed for applications having moderate starting loads, like commercial fans and blowers, and exhaust fans requiring NEMA C-face mounting configuration

Features:
- Electrically reversible rotation
- Ball bearing
- End mounted
- Automatic thermal protection



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Efficiency	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	Bearing Type	Wt. Lbs.	Each

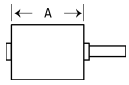
Split-Phase C-Face Ball Bearing Motors

56 Frame, Dripproof, Single-Phase

Applications:
- For commercial and industrial fan and blower exhaust ventilators

Features:
- No overload protector, dripproof, keyed shaft
- Used for Greenheck and other ventilators using C-face mounting
- Electrically reversible



Order #	Mfg. #	Diam.	HP	Volts	RPM	Speeds	F/L Amps	Shaft Diam.	Shaft Length	Rot.	"A" Dim.	Bearing Type	Wt. Lbs.	Replaces	Each

Capacitor Start C-Face Four-in-One Motors

56 Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- Broad and varied, including pumps, compressors, fans, blowers, food machinery, material handling, agricultural applications, power tools, gear motors and other power transmission applications
- Ideally suited for replacement where one motor will replace a dripproof, TEFC, C-face or a standard horizontal motor

Features:
- Removable base for round motor applications
- Reversible rotation
- Full gaskets for tough environments
- 1.15 Service Factor except for **S88-487** which has 1.00
- No overload protector

GENERAL PURPOSE MOTORS
56 Frame C-Face

marathon Motors

C-Face Four-in-One Motors
56-184T Frame, Totally Enclosed, Three-Phase

Applications:
- Broad and varied, including pumps, compressors, fans, blowers, food machinery, material handling, agricultural applications, power tools, gear motors and other power transmission applications

Features:
- Removable base for round motor applications (except for **S82-795**)
- Rated 60/50 Hz with 190/380V on 50 Hz at the next lower horsepower
- Reversible rotation
- Full gaskets for tough environments, 1.15 service factor
- No thermal protection

marathon Motors

Hazardous Location Motors
56 Frame, Totally Enclosed Fan Cooled, Single-Phase

Applications:
- For use in hazardous locations
- Class I group D, class II group F and G models
- Pumps and fans used in hazardous location atmospheres

Features:
- Ball bearing, rigid base, 1.0 Service Factor, 60 Hz
- Code requires installation with rigid conduit and an explosion-proof condulet
- Continuous duty, keyed shaft, rotation easily reversed
- Single-phase motors are capacitor start, induction run
- All motors have automatic reset thermal protectors
- Do NOT use on applications where automatic restart could create a hazard

marathon Motors

Three-Phase Motor
48 Frame, Dripproof

Applications:
- Pumps, fans, blowers, machinery and other industrial equipment with moderate to high starting torques in dry, clean and well ventilated areas

Features:
- Ball bearing
- Welded base
- No thermal protection
- NEMA service factor

marathon Motors

Flex-In-1 Motors
56 Frame, Open Dripproof, Three-Phase

- General purpose use on gear reducers, pumps, machine tools, and other direct-coupled equipment installed in damp, dusty, or dirty environments
- 180˚ rotatable conduit box- 7/8" & 1-1/8" knockouts on all sides
- Repositionable base
- Removable base
- C-Face mounting
- Mounting holes in frame and C-Face (at 90˚ increments) allows F-1/F-2/F-3 conduit box locations

Three-Phase Hazardous Location Motors

56 Frame, Totally Enclosed Fan Cooled

Applications:
- For use in hazardous locations
- Class I group D, class II group F and G
- Pumps and fans used in hazardous location atmospheres

Features:
- Ball bearing, rigid base, 1.0 Service Factor, 60 Hz
- Code requires installation with rigid conduit and an explosion-proof condulet
- Continuous duty, keyed shaft, rotation easily reversed
- All motors have automatic reset thermal protectors
- Do NOT use on applications where automatic restart could create a hazard

Three-Phase Belted Fan and Blower Motors

56 Frame, Open Dripproof

Applications:
- Designed for use on belted fans and blowers

Features:
- Resilient base
- 40°C ambient
- Class B insulation
- Suitable for all-angle operation (within blower housing)
- Reversible rotation
- Automatic thermal protection

GENERAL PURPOSE MOTORS
56 Frame Three-Phase

marathon Motors

Three-Phase General Purpose Motors
56 Frame, Dripproof

Features:
- Resilient base
- Ball bearing
- Rolled steel frames, resilient mounting furnished
- NEMA 56 frame
- 60 Hz
- 40°C ambient
- High service factors
- Continuous duty
- Reversible rotation
- Automatic reset thermal protection
- Not recommended where automatic restarting creates a hazard

Three-Phase General Purpose, Energy Efficient Motors
56 Frame, Open Dripproof

Applications:
- Designed for pumps, fans, compressors, and other general purpose applications where contaminants are minimal

Features:
- Resilient base
- Double shielded ball bearings
- Rolled steel frame, aluminum end shields
- Reversible rotation
- 40°C ambient
- No thermal protection except for **S82-543**

Three-Phase General Purpose Motors

56 Frame, Dripproof

Applications:
- Used on pumps, conveyors, air compressors, machinery, blowers, fans and other heavy-duty applications

Features:
- Double shielded pre-lubricated ball bearings, NEMA service factors
- Rotor dynamically balanced, 60 Hz, 40°C ambient
- Rotation easily reversed by interchanging any two leads

marathon Motors

143T-254T Frame Premium Blue Chip® Severe Duty XRI® Three-Phase Motors

High Efficiency, Totally Enclosed Non-Ventilated

Applications:
- For use in chemical plants, paper mills, refineries, mines, food processing, foundries, and other severe duty environments where long life and ultra-high efficiency are desired

Features:
- Premium Blue Chip® XRI motors built tough and designed for efficiency
- Rigid base
- 1.15 service factor, class F insulation system, 40°C ambient, continuous duty, ball bearing
- Cast iron construction, 60 Hz, built to NEMA standards and dimensions, no overload protection
- Guaranteed efficiencies for extra return on your high efficiency investment
- Available in 1200 and 3600 RPM and 575V in 1800 RPM ratings by special order
- VFD compatible

marathon Motors

143T-326T Frame Three-Phase Motors with Shaft Grounding Ring Internally Installed

NEMA Premium Efficiency Motors, Open Dripproof

- Shaft grounding bearing current protection is factory installed inside the motor housing and can be used with any VFD
- No modifications or additional parts needed; simply ready to install and use with variable frequency drives
- Three phase
- Open dripproof
- NEMA premium efficiency
- Ball bearing
- 1800RPM
- Rigid base
- No thermal protection
- Meets or exceeds NEMA Premium efficiencies
- Class F insulation
- Nameplated 60/50 hertz
- UL recognized, CSA certified and CE marked
- Three year warranty

143T-447T Frame NEMA Premium® XRI® Efficiency Three-Phase Motors

Open Dripproof

- General purpose motors for use on compressors, pumps, conveyors, blowers and other HVAC equipment
- Meet or exceeds NEMA Premium® efficiencies
- Inverter duty, suitable for use on a VFD, suitable for 10:1 VT on all frame sizes and 10:1 CT up to 365T frame
- Class F insulation, standard F1 assembly reversible to F2 assembly
- Horizontal mount
- Rigid base
- No thermal protection
- 1.15 service factor
- Three phase
- Insulation class F
- 40° ambient
- Horizontal mount
- Ball bearing
- Reversible rotation
- 60/50 Hz
- Three year warranty

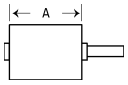
Hundreds of Thousands of OEM Solutions at Your Fingertips
For all of your AC needs *supporting you from installation and beyond*

GENERAL PURPOSE MOTORS
T-Frame Three-Phase Premium Efficient

143T-326T Frame Three-Phase Motors with Shaft Grounding Ring Internally Installed

NEMA Premium Efficiency Motors, Totally Enclosed Fan Cooled



- Shaft grounding bearing current protection is factory installed inside the motor housing and can be used with any VFD
- No modifications or additional parts needed; simply ready to install and use with variable frequency drives
- Three phase
- Totally enclosed fan cooled
- NEMA premium efficiency
- 1800RPM
- Ball bearing
- Rigid base
- No thermal protection
- Class F insulation
- Nameplated 60/50 hertz
- UL recognized, CSA certified and CE marked
- Three year warranty

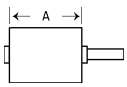
143T-449T Frame NEMA Premium® XRI® Efficiency Three-Phase Motors

Totally Enclosed Fan Cooled



- General purpose motors for use on compressors, pumps, conveyors, blowers and other HVAC equipment
- Meet or exceeds NEMA Premium® efficiencies
- Inverter duty, suitable for use on a VFD, suitable for 10:1 VT on all frame sizes and 10:1 CT up to 365T frame
- Class F insulation, standard F1 assembly reversible to F2 assembly
- Horizontal mount
- Rigid base
- No thermal protection
- 1.15 service factor
- Three phase
- Insulation class F
- 40° ambient
- Horizontal mount
- Ball bearing
- Reversible rotation
- 60/50 Hz
- Three year warranty

143T-447T Frame Three-Phase Motors

NEMA Premium Efficiency Motors, Open Dripproof

Applications:
- Designed for pumps, fans, compressors and other general purpose applications where contaminants are minimal

Features:
- 1.15 service factor, open dripproof construction, rigid base, 50-60 Hz
- Class F insulation, class B rise at service factor (140 frame and larger)
- Rolled steel frame 56-320, cast iron frame 280-440
- 40°C ambient, NEMA design B performance
- Regreasable bearings on 440T and larger
- Suitable for Wye-Delta start 250T and larger
- All motors are tested and designed to be 100% variable frequency drives (VFDs) compatible
- No thermal protection

Globetrotter IHP NEMA Premium® Motors

Open Dripproof

- Meets or exceeds NEMA Premium® efficiency
- Model is in compliance with EISA2007
- Steel frame
- Inverter Duty 10:1 Variable Torque and 2:1 Constant Torque
- Class F Insulation
- Standard assembly F1, reversible to F2 assembly

GENERAL PURPOSE MOTORS
T-Frame Three-Phase Premium Efficient

marathon™ Motors

Globetrotter IHP NEMA Premium® Motors
NEMA Premium Efficiency, Totally Enclosed Fan Cooled

- Meets or exceeds NEMA Premium® efficiency
- Model is in compliance with EISA2007
- Cast iron frame and brackets
- Inverter Duty, 10:1 Variable Torque and 10:1 Constant Torque
- Class F Insulation
- Standard assembly F1, reversible to F2 assembly

143T-256T Frame Three-Phase Motors

Premium Efficiency, Totally Enclosed Fan Cooled

Features:
- Class F insulation, class B rise at service factor (140 frame and larger)
- Rolled steel frame (140 Frame), cast iron frame (180 frame and larger)
- 40°C ambient, NEMA design B Performance
- Regreasable bearings 180 frame and larger, double shielded bearing 48-400, open on 440 frame
- All motors are tested and designed to be 100% variable frequency drive (VFD) compatible
- No thermal protection

143T-445T Frame E-Plus® 3 Three-Phase Motor

NEMA Premium Efficiency Motors, Open Dripproof

Applications:
- Fans, pumps, compressors, conveyors and other commercial HVAC/R equipment

Features:
- 1.15 service factor, open dripproof construction, rigid base
- Ball bearing, 40°C ambient
- Continuous duty, NEMA design B
- E-Plus® 3 motors exceed the requirements of Energy Policy Act (EPAct)
- All E-Plus® 3 motors are Speed Engineered™ designs and tested to be 100% variable frequency drive (VFD) compatible
- No thermal protection

143T-447T Frame Three-Phase Motors

Premium Efficiency, Totally Enclosed Fan Cooled

Applications:
- Designed for pumps, fans, compressors and other general purpose applications where contaminants are minimal

Features:
- 1.15 service factor, rigid base, 5060 Hz
- Dual voltage 230/460 volts (1100 HP)
- Class F insulation, Class B rise at service factor (140 frame and larger)
- Rolled steel frame (140 frame), cast iron frame (180 frame and up)
- 40°C ambient, NEMA design B performance
- Regreasable ball bearings 250 frame and up, double shielded bearings 140-360, open on 400-440
- Cast iron frame, cast iron end brackets
- Shaft slinger on pulley end
- Condensation drains with plastic plugs
- Steel fan cover and conduit box
- No thermal protection

Why Is Efficiency Important?

Worldwide, motors consume between 55% and 63% of all electrical energy being produced. Recent US Department of Energy reports show that energy costs could be cut by at least 18% by utilizing energy efficient motors.

How Can Efficiency Be Improved?

Motors are affected by countless environmental, mechanical and electrical issues that could be rectified or improved.

Low or high voltage

- Low voltage levels cause motors to be slightly less efficient and may raise current levels beyond design. These can generally be corrected with transformer taps.
- Line harmonic issues can be mitigated with various reactors, shielded cables and isolation transformers.

Non-optimal load

- Motors "like" to operate around 90% to 95% and lower load levels tend to make them less efficient. Overloaded situations cause significant drops in efficiency along with numerous other issues including a significant rise in operating temperature.

Mechanical issues

- Misalignment, physical looseness and imbalance not only adversely affect a motor's performance and longevity but also its efficiency. Many times minor adjustments to belts, pulleys, sheaves or bearings can add years to a motor's life and result in big savings due to improved efficiency.

The costs of replacing poorly performing motors with Premium Efficiency motors will be quickly offset by the savings in energy costs.

Federal Energy Management Program (FEMP)

- Federal agencies are required by the Energy Policy Act of 2005 to purchase Energy Star™ qualified products or FEMP-designated products. In both of these cases the products fall within the top 25% of energy efficiency.

Energy Independence and Security Act of 2007

- Amended in 2014 this law expanded and raised minimum efficiency levels for motors that were covered by Energy Policy Act (EPAct) of 1992 and the Energy Policy Act (EPAct) of 2005 mentioned above.

Turbolytic™ 50 and Turbolytic™ Jr.

Universal Replacement Start Capacitors

- Six built-in capacitance values permit 64 different motor-start capacitance values
- Industrial-grade, permanent replacement parts which outperform older-style, plastic-caused capacitors with vent holes
- Protected to 10,000 AFC
- Diameter: 2-1/2"

Motor Start Capacitors

- AC electrolytic starting capacitors are designed for intermittent duty on single-phase capacitor start AC motors
- Will operate properly up to 20 starts of three-second duration per hour at not more than 66 Hz
- Meet "EIA" RS-463 Type 2 standards
- Round cases are moisture resistant molded plastic
- Dual type terminals for quick connect or solder connections
- Individually packaged

Titan PRO™ Dual Rated Motor Run Capacitors

Oval

- 60,000 hour reliability
- 440/370V, 50/60 Hz
- Metalized polypropylene film
- Proprietary Epoxidized Soybean Oil (ESO)
- UL and CUL
- -40° C to 70° C operating temperature
- Rated from 240V to 660V
- Aluminum case
- Meets EIA-456A industry standards

Titan HD™ Dual Rated Motor Run Capacitors

Oval

Applications:
- Designed for continuous heavy-duty applications such as air conditioning, refrigeration, business machines and fans

Features:
- Aluminum case construction
- 60,000 hours operation life
- Capacitance stability ±3% throughout life
- Environmentally friendly patented non-PCB Epoxidized Soybean-oil®
- Self-clearing metalized polypropylene film
- Patented pressure interrupter meets UL810 requirements
- Case sizes approximate; dimensions may vary
- Height dimension does not include terminals; add 1/2" for terminals

Help Maximize your Capacitor Life

In order to maximize capacitor and motor/compressor life, remember:

- Use the microfarad rating specified
- A higher-voltage rating can be used
  - Never use a lower voltage rating
  - Capacitor life will be exceeded if operating capacitor volts measure higher than rated
- Be certain electrical connections are rust and corrosion free
- Actual capacitance = (2653 x Capacitor Amps) Capacitor Volts
- A 6-7°C (@44°F) change in capacitor case temperature changes capacitor life by about 50%
  - Do not wrap the capacitor in tape
  - Do not install the capacitor in its box
  - Mount the capacitor in the coolest location
- STAY SAFE! Discharge capacitors using a 2 Watt, 15,000 Ohm bleed resistor
  - Permanently attach a bleed resister to start capacitors

TITAN PRO 370™

Titan PRO™ Motor Run Capacitors

Oval

- Non-PCB dielectric fluid
- Pressure-activated circuit interrupter virtually eliminates case rupture at end of life
- For continuous heavy-duty application such as air conditioning, refrigeration, business machines, fans, light ballasts, etc.
- Seamless steel cases
- 1/4", four-blade quick disconnect terminal with phenolic insulated caps
- Dimensions may vary due to manufacturing changes; dimensions shown are for reference only

Titan HD™ Motor Run Capacitors

Oval

Applications:
- Designed for continuous heavy-duty applications such as air conditioning, refrigeration, business machines and fans

Features:
- Aluminum case construction
- 60,000 hours operation life
- Capacitance stability ±3% throughout life
- Environmentally friendly patented non-PCB Epoxidized Soybean-oil®
- Self-clearing metalized polypropylene film
- Patented pressure interrupter meets UL810 requirements
- Can sizes approximate; dimensions may vary
- Height dimension does not include terminals; add 1/2" for terminals

Titan PRO™ Motor Run Capacitors

Round

- 60,000 hour reliability
- 440/370V, 50/60 Hz
- Metalized polypropylene film
- Proprietary Epoxidized Soybean Oil (ESO)
- UL and CUL
- -40° C to 70° C operating temperature
- Rated from 240V to 660V
- Aluminum case
- Meets EIA-456A industry standards

TITAN PRO™

Titan PRO™ Dual Rated Motor Run Capacitors

Round

- 60,000 hour reliability
- 440/370V, 50/60 Hz
- Metalized polypropylene film
- Proprietary Epoxidized Soybean Oil (ESO)
- UL and CUL
- -40° C to 70° C operating temperature
- Rated from 240V to 660V
- Aluminum case
- Meets EIA-456A industry standards

Titan HD™ Dual Rated Motor Run Capacitors

Round

TITAN HD™

Applications:
- Designed for continuous heavy-duty applications such as air conditioning, refrigeration, business machines and fans

Features:
- Aluminum case construction
- 60,000 hours operation life
- Capacitance stability ±3% throughout life
- Environmentally friendly patented non-PCB Epoxidized Soybean-oil®
- Self-clearing metalized polypropylene film
- Patented pressure interrupter meets UL810 requirements
- Case sizes approximate; dimensions may vary
- Height dimension does not include terminals; add 1/2" for terminals

REVCOR REVOLUTIONARY AIR FLOW™

KC and KH Commercial Fan Blades

- Designed for use with air circulators, cooling towers and air cooled condensing units
- High quality steel
- 4 winged blades
- **W91-162** and **W91-165** have 5/8" fixed hubs
- Use the taper lock bushings with KH and KC fan blades
- The H bushings are for 24"–48" blades; the P bushings are for 54"–60" blades
- Performance at static pressure of .30" of water column
- Individually boxed

Universal Replacement Condenser Fan Blades

- 3-, 4- and 5-blade, 10" to 26" diameters
- Rugged, heavy-duty aluminum blades, with plated steel spiders
- Produce maximum air delivery with minimum noise
- Use with interchangeable hubs
- Hub designed to attach readily to propeller

Note: Free air and 0.30" static pressure are approximate ratings 1140 RPM. **W89-188** has a fixed hub 5/16" bore.

OEM Replacement Condenser Fan Blades

Fixed Hub

- Direct replacement for Rheem, Carrier, Lennox, Liebert and others
- Rugged, heavy-duty aluminum blades
- 20" to 30" in diameter
- Produce maximum air delivery with minimum noise

Note: Free air is an approximate rating 1140 RPM.

Universal Condenser Fan Blades

Hubless

- 10 to 26 in. diameter
- Steel spiders
- Highly embossed for added strength
- For motor speeds up to 1625 RPM
- Use with interchangeable hubs
- Individually boxed
- Aluminum fan blades

Applications:
- Air conditioning condensers, power roof ventilators, heat pumps, heat exchangers, unit heaters, commercial and industrial equipment

Sensible Products®

Ultimate Puller

- Removes various sizes of fan blades and blower wheels
- Both pushing and pulling force
- Hardened steel hooks and screws won't flatten with use

Order #	Mfg. #	Each
H85-404	UP-1	**145.00**

marathon™ Motors

Blower Wheel Puller

- 6" barrel will work on shafts up to 5-1/2" long
- Wide mouth hub lock will work on hubs up to 2" diameter
- Square head bolts on hub lock and hardened push bolt

Order #	Mfg. #	Each
H24-948	KIT-256	**465.00**

Packard

Fan Blade Pitch Gauge

- Tool to help determine pitch on blade before replacing

Order #	Mfg. #	Each
H24-850	PG5099801	**79.00**

marathon™ Motors

Shaft Locking Tool

- Made of 1/2" thick steel, it locks on motor shaft beneath hub of propeller-type fan blade, providing a pry point for prying off blade
- Complete with instructions

Order #	Mfg. #	Description	Each
H24-958	KIT-257	Locking Tool	**149.00**

marathon™ Motors

Forged Steel Fork

- Has tines 11/16" apart for prying off pulleys, fan blades, etc. from any motor shaft 5/8" diameter or smaller
- 16" length provides maximum leverage

Order #	Mfg. #	Each
H24-959	KIT-258	**215.00**

Replacement Blower Wheel

- For Nutone # 5900A000
- CW rotation
- Measures 5-3/4" x 2" x 1/4

Order #	Mfg. #	Each
S58-976	A65900	**25.99**

Lau

Double Inlet Replacement Blower Wheels

- For heating and air conditioning use
- Belt drive wheels work for either rotation
- Mount by set-screw in hub with keyway
- Wheel diameter is measured from outer edge to outer edge of the wheel blades and indicates the true diameter of the wheel

Note: Direction or rotation is determined while viewing hub

Shaft Extension Kit

- Extends shaft up to 4-1/2" in length
- Kit includes coupler and set screws

Order #	Mfg. #	Diam.	Length	Each
S58-697	A61308K	1/4"	4-1/2"	**31.49**

Unit Bearing Motor Adapter

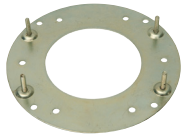
- Screws on to motor shaft to convert from threaded shaft to 1/4" x 1" long round shaft
- Will accept hub type blades

Order #	Description	Each
S58-087	Motor Adapter	**24.99**

Fedders Bolt Pattern Adapter

For 5" to 5-5/8" Diameter Motors

- Adapts 48 frame motors to Fedders bolt pattern of 2-9/16" x 4-5/16"

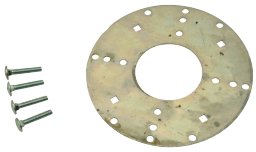


Order #	Mfg. #	Description	Each
S58-404	87256032	Pattern Adapter	**46.99**

Franklin Redmond Pattern Adapter

For 4-1/8" Diameter Mounting

- Kit includes one adapter plate to match various motor mountings to old Franklin/Redmond bolt pattern, four carriage bolts and eight nuts



Order #	Mfg. #	Description	Each
S58-568	87256145	Pattern Adapter	**79.00**

Motor Rain Shields

Century

- Fits NEMA 42, 48 or 56 frame motors
- 6-3/4" diameter

A B

Adapter Bracket and Rubber Grommets

- For use with 3-3/8" (3.3") diameter motors
- Three 15/22" diameter holes equally spaced on 4-3/8" diameter and two mounting holes on 2-27/32" diameter
- Grommets sold three per pack

Order #	Description	Each
S58-383	Adapter Bracket	**46.99**
S58-384	Rubber Grommets	**25.99**

Auto-Tensioning Motor Bases

Tenso-Set™ Series 600

- Significantly reduces time required to change v-belts
- Promotes greater efficiency by constantly maintaining v-belt tension
- Tube rail and one-piece carriage design promotes and maintains superior drive alignment
- Eliminates need to cut off belts or roll them onto sheaves for improved safety
- Optional quick release mechanism for more efficient belt changes

Note: Larger sizes up to 286T frame available online

Resilient Bases

For 4-5/16", 5", 5-1/2" and 5-5/8" Diameter Motors

- Check “A” dimension of motor (overall body length, excluding hubs)
- Select base that fits motor body length
- Verify correct shaft height (“D” dimension)

Note: Resilient mounting rings, mounting clips and adapter rings not included.

Furnas Magnetic Motor Starters

ESP 200 Class 14, Solid State

A

B

- Magnetic with solid state overload (does not require heaters)
- True phase loss protection; trips within 3 seconds
- Full voltage non-reversing
- Selectable trip class 5,10,20,30
- High accuracy trip curves: ± 2% repeat trip accuracy
- Overload is self protected against short circuits
- Overload is self powered; requires no hard wiring or separate power source
- Front removable auxiliary interlocks
- Dual voltage, dual frequency coils
- Three-phase, three-wire
- Figure A: open style starter only
- Figure B: NEMA Type 1 enclosed starter
- Starters are stocked with 110 to 120/220 to 240VAC dual voltage coils

Definite Purpose Motor Starters

- Combination definite purpose contactor and overload relay
- Class 10 trip class
- Selectable manual or automatic reset operation
- Electrically isolated NO-NC contacts
- Shrouded terminals for safety
- Additional coil voltages and F/L amp ranges are available by special order at participating locations
- Amps in chart are full load

EATON
Powering Business Worldwide

Freedom Series NEMA Starters

Full Voltage Starter with Electronic Overload Relay

- Horizontal or vertical mounting on upright panel
- Holding circuit NO contact supplied as standard on each unit
- Designed for 3–5 million electrical operations and 10 million mechanical operations
- Straight through wiring, line lugs are at the top, load lugs at the bottom
- Screw-type power terminals have captive, backed-out self lifting pressure plate with screws, to reduce wiring time
- Accessible top coil terminals for easy wiring
- 95% less power consumption than an electromechanical overload relay
- Phase imbalance protection ensures efficient use of motor output
- Lower heat generation means higher density/ smaller panels, less secondary cooling needed
- Self-powered design covers from 01–1500 amps, users just need to dial the setting potentiometer to the motor FLA and the overload is ready to protect
- Other larger NEMA sizes, FLA overload ranges and coil voltages are available through Johnstone Supply

IEC XT Contactors

- Small — smallest 10 HP contactor
- Efficient — low coil power consumption
- Easy to install — DIN rail or panel mount
- Safe and reliable — finger and back-of-hand proof, more secure top/bottom termination and high quality
- All have one N.O. auxiliary contact

SIEMENS
Ingenuity for life

IEC Contactors

- Din rail or panel mount
- Finger safe connections
- Accepts snap-on auxiliary contacts, timing relays and mechanical latch attachments
- Size 00 contactors includes 1-NO auxiliary contact
- Size 0 contactors include 1-NO and 1-NC auxiliary contact
- Communication modules for connection to TIA and Portal via AS-Interface and now IO-Link
- Mounting of front and side auxiliary contact blocks for design flexibility

IEC Solid State Overloads

- Attaches to load side of 3RT2 IEC contactor to make a complete motor starter
- Provides class 20 solid state over-current protection
- Complete with current adjustment dial, overload trip indicator, test trip lever and manual/automatic reset switch
- Includes one N.O. and one N.C. auxiliary contact
- Requires no heaters
- Direct mount to contactors of same size or panel mount using optional mounting kit
- Screw terminal connection system

Fractional HP Manual Starters

SIEMENS Ingenuity for life

- 1 HP @ 115-230VAC/277VAC; 3/4 HP @ 115-230VDC on 2-pole only
- Overload protection as well as manual ON/OFF
- Continuous current rating — 16A
- Overload trip assembly
- Requires Class SMF heater element, see ad below for specifications
- **G32-283** and **G32-284** dimensions: 2" W x 4.12" H x 2.22" D

Solid State Motor Speed Controls

For Shaded Pole and PSC Motors

- Specifically designed for use on range hoods, air conditioners, humidifiers, fans and blowers
- **G22-731** is the same as **G22-689** minus the cover plate
- **G32-397** through **G32-400** are NOT UL or CSA approved
- Fig. A fits 2" box size

Order #	Mfg. #	F/L Amps	L/R Amps	Volts	Switch Body Dimensions	Each

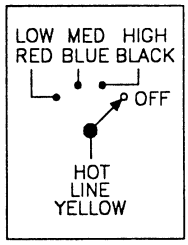
Speed Control

- For use with shaded pole, PSC and universal AC (brush type) motors
- Satin aluminum finish
- 2" box size

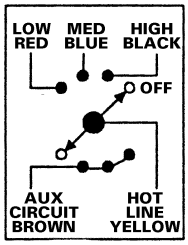
Order #	Mfg. #	F/L Amps	L/R Amps	Volts	Switch Body Dimensions	Each
G22-692	H2884	10	20	120	2-1/2" x 1-1/2" x 1-3/8"	**305.00**

Rotary Motor/Fan Switches

A



B



- Three-speed switches with OFF position for air conditioning, heating and ventilating equipment
- Switch supplied with aluminum stenciled wallplate (removable)
- 16 AWG color coded wire leads
- **G32-086** is a single circuit switch
- **G32-087** has a common auxiliary circuit and off position
- ER = Electrical Ratings
- ER @ 125VAC 10A, 1/4 HP
- ER @ 250VAC 5A, 1/2 HP
- ER @ 77VAC 5A, 1/4 HP

Fig.	Order #	Mfg. #	Switch Body Dimensions	Each
A	**G32-086**	3A254-1	4-1/2" x 2-3/4" x 2"	**89.00**
B	**G32-087**	3D312-1	4-1/2" x 2-3/4" x 2"	**99.00**

Digital Megohmmeter

- 1000VDC stresses insulation to measure up to 2000Mohms
- Backlit LCD display
- Auto-off to extend battery life
- Includes case, alligator clip, leads with removable tips and batteries

Order #	Mfg. #	Each
H27-323	SMG5	**339.00**

Insulation Tester/Megohmmeter

- Measures insulation values up to 1,000 megohms at 500V and indicates the condition of insulation on the zone scale
- 20 to 1,000 megohms indicator range
- Uses 2 C batteries (not included)

Order #	Mfg. #	Each
H25-705	M500	**335.00**

Digital Capacitor Tester

- Rates run, start and DC electrolytic capacitors
- Can also be used as a continuity tester
- Two read-out ranges: 0.01 to 10 MFD and 10 to 10,000 MFD
- Includes soft carrying case
- Uses 9V battery (not included)

Order #	Mfg. #	Each
H24-883	MFD-10	**185.00**

©2024 Johnstone Supply, LLC

Shaft Voltage Tester

- CAT II/III digital oscilloscope tests voltage levels on the spinning shaft of a motor using an oscilloscope with advanced functions, a probe with special conductive microfiber tips for exceptional shaft contact, a probe holder with a magnetic base, and a compact carrying case
- 2-channel full-function 100 MHz digital oscilloscope has a 5.7" TFT LCD color display, a multi-language user interface, sampling rates of 1 GSa/s to 50 GSa/s, and a 5-hour rechargeable/replaceable lithium-ion battery pack
- Accommodates standard set-up interfaces and has a USB port for data transfer or flash drive storage

AEGIS SGR™ Shaft Grounding Kits for General Purpose ODP Motors

- Specifically designed to discharge harmful shaft voltages from VFD high-frequency switching and extend bearing life
- Easily installed on motor end bell using the (2) included screws
- Slim design minimizes shaft length requirements
- Estimated life is greater than 200,000 hours
- Cored holes on the end shield are now a STANDARD feature for attaching Aegis® Shaft Ground Rings on all Nidec 140, 180 and 210 frame size ODP motors

Order #	Mfg. #	Description	Each
S59-767	60	AEGIS SGR Shaft Grounding Kit for Gen. Purpose ODP motors Shaft grounding ring kit 140 frame	**585.00**
S59-768	61	AEGIS SGR Shaft Grounding Kit for Gen. Purpose ODP motors Shaft grounding ring kit 180 frame	**599.00**
S59-769	62	AEGIS SGR Shaft Grounding Kit for Gen. Purpose ODP motors Shaft grounding ring kit 210 frame	**645.00**
S59-770	63	AEGIS SGR Shaft Grounding Kit for Gen. Purpose ODP motors Shaft grounding ring kit 250 frame	**839.00**

Shaft Grounding Ring uKITs

Bearing Protection Ring

- Maintenance-free, lasts for the service life of the motor
- No RPM limitations
- Four mounting bracket styles and hardware to adapt the AEGIS™ ring to virtually any end bracket
- AEGIS™ Bearing Protection Ring designed for the motor's NEMA "u" dimension - shaft diameter
- Screw on or AEGIS™ Conductive Epoxy Adhesive mounting capable (Epoxy EP2400 sold separately)
- Fits over slingers, seals or shaft shoulders
- Protects both motor bearings and the bearings in attached equipment
- Channels harmful currents to ground

A	**S59-416**	CS015	Colloidal silver shaft coating. 20-25 applications based on a 3" shaft diameter. Used to improve the conductivity of the steel shaft surface. Apply to any VFD driven motor shaft prior to installing the AEGIS® SGR	**479.00**
B	**S59-417**	EP2400	Conductive epoxy. 2-3 applications. Used with to install AEGIS® SGR without drilling and tapping into the motor end bell	**509.00**

High-Frequency Grounding Straps

- Protects VFD-driven motor systems from high-frequency currents in applications involving a motor and coupled equipment that are not mounted to a common baseplate
- Flat-braided, tinned copper
- Installs at the mounting screw of NEMA or IEC frame motors

HVAC Drive H300s

- Industry standard BACnet, Metasys N2 and Modbus RTU communications onboard
- Optional SI modules include Ethernet (EtherNet/IP, Modbus TCP), PROFIBUS, PROFINET, DeviceNet, CANopen, and extended I/O
- Has an onboard Fire Mode which allows the drive to continue running in the event of a fire
- 10-speed controllable drive cooling fan and high switching frequencies (up to 16 kHz) ensure quiet drive and motor operation
- Patented air flow cooling design
- Remote connectivity allows easy system maintenance through the onboard RS485 comms or an optional Ethernet System Integration module
- Low losses, up to 98% efficient
- Energy efficiency calculator tool to demonstrate energy savings

Note: Conduit boxes are available online at www.johnstonesupply.com

VFD68 Variable Frequency Drive Fan Speed Controls

- Designed for speed control of 3-phase motors, especially for condenser fan motors in refrigeration and HVAC systems
- Condenser fan motor speed is controlled by varying the frequency and voltage of the power supplied to the motor
- Uses inputs from various devices to optimize condenser fan speed to meet changing load conditions
- Operation at low ambient conditions to -40 C
- Embedded LED display
- M-dial for easy parameter configuration and speed command
- Mode status indicators
- Push button control and access
- Optional high signal select

Johnson Controls

VSM Series II Variable Frequency Drives- MicroDrives

- Preset Application Macros, Startup Wizard, and Diagnostic Capabilities allows for quick and easy startup
- DIN Rail and Screw Mountable Chassis — reduces installation time
- Compact, Space Saving Design — allows for side-by-side installation resulting in less mounting space
- Industry-Leading Efficiency — delivers energy savings to the customer. Provides Integrated EMC filters (Mfg. #'s ending in MEM00) and brake choppers as standard features in three-phase applications, which make the unit suitable for commercial and industrial applications
- RS-485/Modbus® — includes a standard communication protocol
- PID Controller - provides stand-alone, closed-loop control

Replacement Blower Bearings

For Pillow Block; Flange Spider Mount

- Oil Type
- With insulator
- Self-aligning
- Self-oiling
- Bronze bushing
- Includes oil cup
- **L37-822** is heavy-duty
- Sold in pairs

Order #	Mfg. #	Type	Shaft Diam.	O.D.	Each	2 Lot

Bearing Lubrication

Over half of all bearing failures are due to foreign contamination and inadequate lubrication life

Hub Blaster Fan Blade/Hub Puller Kit

- Kit has all parts necessary to remove blower wheel from shaft adapters 1" to 1-5/8" O.D.
- Custom molded plastic carrying case
- Will work on some taller shafts
- Works for any HVAC motor replacement
- Made from high carbon steel

Adjustable Belts

Premium Griptwist® Belts

- For emergency replacements, vibration suppression and hostile environments
- Operating temperature range is -40°F to 240°F (-40°C to 116°C)
- Can be very effective on heat recovery equipment and high-temp exhaust fans
- Can be used in most traditional V-belts applications

Adjustable Belts

Acculink® Adjustable V-Belts

- For temporary replacement or permanent substitute for conventional rubber V-belts
- Works at same running HP ratings as conventional rubber V-belts
- Designed to fit any drive application
- Constructed of urethane elastomer and woven polyester
- Available in carton and sleeved packaging

Multi-Plus V-Belts

B/5L Section — 21/32" Top Width 13/32" Thick x 40° Angle

- Labeling identifies both RMA and FHP number to reduce your total V-Belt cost by consolidating existing classical and FHP belt sizes into a single belt line
- Replaces both “B” and “5L” belt types
- Oil and heat-resistant, anti-static

B/5L - 21/32" x 13/32"

V-Belt Operating Temperature

Key factors that contribute to overall v-belt drive operating temperature

- Ambient temperature
- Center distance (the longer the belt the more time it has to dissipate heat as it rotates)
- Sheave (pulley) diameter
- Sheave groove wear (Sheaves with wear greater than 1/32” contribute to slippage and added heat)
- Belt flex rate
- Tension level
- Sheave alignment
- V-belt type (Notched or sometimes cogged v-belts run cooler than wrapped belts)
- Belt guard design / drive enclosures

PartStock™

What You Need, When You Need It

Streamline your HVACR installations with a smart, data-driven inventory solution.

Replenish Your Inventory
Lower Job Costs
One Touch Shopping
Easy Review & Approval

Browning

Browning FHP Belts

3L, 4L, and 5L, Series Wrapped Belts

- Wrapped construction provides smooth, quiet operation
- Formulated for maximum flexibility with smaller diameter sheaves
- Oil and heat resistant
- Static conducting

3L - 3/8" 4L - 1/2" 5L - 21/32"

Browning Classical Belts

A Section — 1/2" Top Width x 5/16" Thick

- Single fabric design offers greater flexibility and allows for use of smaller diameter sheaves and reduced vibration
- Brand used by major HVAC original equipment manufacturers
- CODE 1 meets or exceeds ANSI belt matching standards
- Oil and heat resistant
- Static conducting

A - 1/2" X 5/16"

Belt Tech Tip

- Use the largest sheave possible for the allowable space. It will help reduce belt bending flex/ resistance and improve cooling
- Properly align sheaves and tension belts to manufacturers recommendation
- Use notch belts and lower operating temperature as well as improve efficiency approximately 3%
- Check sheaves for wear and replace if wear exceeds 1/32” in the groove
- Consider adequate ventilation and air flow in belt guard designs

Note: Notched v-belts should not be used in clutching applications where slip is desired

©2024 Johnstone Supply, LLC

Belt Rule

- Belt measuring tool
- Used to determine pitch and length of V-belts

Order #	Mfg. #	Each
P94-001	3839	**275.00**

Belt Tension Checker

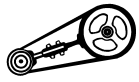
- Verifies tension on all (3L, 4L, 5L, A, B, C, D, 3V, 5V, 8V) V-belts
- Unique, spring-loaded measuring graph leaves O-ring at current tension level
- Adjustable from 10" to 170" span and 35 lbs. of tension
- Instructions and handy pocket clip included

Order #	Mfg. #	Description	Each
H27-031	1302546	Belt Tension Checker	**199.00**

Belt Jack

Instant Belt Tightener, One Hand Operation

- Sets belt tension while you align belt pulleys
- Comes with two extensions



Order #	Mfg. #	Description	Each
H24-319	BJ10	Belt Jack BJ10	**89.00**

Browning

Browning Cogged Belts

Notched V-Belts

- Commerical and industrial belts provide greater horesepower than wrapped belts
- Run cooler than wrapped belts
- Notches allow belts to be run in smaller diameter sheaves
- Brand used by major HVAC original equipment manufacturers
- CODE 1 meets or exceeds ANSI belt matching standards
- Oil and heat resistant
- Static conducting
- Length is outside diameter

A - 1/2" X 5/16"

B - 21/32" X 7/16"

C - 7/8" X 17/32"

Browning "358" Cogged Belts

3VX and 5VX Section

- Exclusive ground-form design reduces vibration and increases belt and bearing life
- Fabric on top and bottom to increase rigidity and stability, wider notch spacing
- Transmits more horsepower in less space
- (Code 1 "off-the shelf") — meets or exceeds ANSI belt matching standards
- Oil and heat resistant
- Static conducting
- 3VX cross section is 3/8" x 5/16"
- 5VX belt cross section is 5/8" x 17/32
- Length is outside diameter

3V - 3/8" X 5/16"

5V - 5/8 X 17/32"

Tension that belt!

- Ideal tension is the lowest tension at which the belt will not slip under peak load conditions
- Check tension frequently during the first 24 hours of operation. Check after jog start or 1-3 minutes of operation, at 8 hours, 24 hours, 100 hours and periodically thereafter are recommended
- Over tensioning shortens belt and bearing life
- Keep belts free of foreign material which may cause slip Make v-drive inspection on a periodic basis. Under-tensioned belt drives often produce audible squeal noise. Tension when slipping. Never apply belt dressing as this will damage the belt and cause early failure

Browning

"AKH" Cast Iron Sheaves

For "4L" or "A" and "3L" Belts

- Highest torque carrying capacity
- Double split barrel assures true concentricity
- Requires “H” bushing (not included)

Variable Pitch Die Cast Sheaves

For 3L, 4L, 5L, "A" and "B" Belts

Congress DRIVES

- These die cast variable speed pulleys permit speed variations of approximately 30%, ideal for installations where speeds must be changed or where it is impossible to predetermine the correct speed
- Made of rugged zinc die cast; will not rust or corrode
- **L36-795** has no keyway

Order #	O.D.	Hub Bore	Wt. Lbs.	Each	10 Lot

Browning

Variable Pitch Cast Iron Sheaves

For "A" and "B" Section Belts and Combination 3L/O, 4L/A and 5L/B V-Belts

- One- and two-groove pulleys are made of annealed cast iron
- Machined and balanced for reduced vibration and long belt life
- Speed variation of up to 30% is possible
- Set screw provided
- One-groove up through 10 HP; two-groove up through 20 HP
- Matched belts not required for use with 2-groove pulleys below

CLIMAX METAL PRODUCTS COMPANY

Solid and Spoke Congress Die Cast Sheaves

- Rugged precision cast sheaves for popular 4L and A type V-belts
- Machine tested and balanced; individually boxed
- Set screws provided
- Made of zinc die cast; will not corrode or rust

Air Over Motor (AO) — The motor, directly connected to a fan, is kept cool with the stream of moving air.

Alternating Current (AC) — The flow of electricity through a conductor that is constantly changing its direction of flow. House current is AC.

Ambient (Amb) — The temperature of the air surrounding the motor.

Ampere (Amp) — The unit of measurement for rate of current flow, commonly referred to as an "amp".

Armature (Arm) — That part of an electrical machine which includes the main current carrying winding. In direct-current machines, the armature winding is connected to the commutator and the armature is the rotating member. In alternating current machines without commutators, the armature may be either the rotating member or the stationary member.

Bearing — Located in the end bell, it supports the shaft and provides for smooth rotation. ***Sleeve (Slv.):*** Used where low noise level is important, such as on fans and blower motors. ***Ball:*** Used where higher load capacities are required or where relubrication is inconvenient. ***Unit:*** Motors with one long sleeve bearing constructed for fan duty only.

Binding Post — A threaded terminal for connecting wire to electrical equipment. Also known as a stud.

Bracket — Another name for end shield or end bell.

BTU — An abbreviation for British Thermal Unit; 12,000 BTU equals 1 ton air conditioning.

CW, CCW — Clockwise and counter clockwise rotation when viewing motor from the end indicated by manufacturer.

Capacitor (Condenser) — A device which introduces capacitance into an electric circuit. The material which separates the conductors in a capacitor is called the dielectric. Capacitors are usually classified according to this material. For example, there are paper, air, oil and mica capacitors.

Conductor — Material that may be used as a carrier of electrical current.

Constant Speed Motor — A motor whose speed is constant or substantially constant over the normal range of loads.

Current — The flow of an electrical charge through a conductor with the ability to overcome resistance and perform work.

Definite Purpose Motor — A motor designed for use on a particular application, with operating characteristics and mechanical construction required by the application. Example: Sump pump motor, oil burner motor.

Duty — A requirement of service which defines the degree of regularity of the load.

Efficiency — The ratio or comparison of useful power output to the power input.

Electric Motor — A machine which transforms electrical energy into mechanical energy.

Electrically Reversible Motor — One which can be reversed by changing the external connections.

End Bell (End Shield) — Shield at the end of the motor which supports the bearings. Also called end plate.

Enclosure (Encl.) — Motor envelope types: ***Open:*** An open motor is self-ventilated, having no restriction to ventilation or to the enclosure other than necessitated by mechanical construction. ***Drippproof (DP):*** Constructed with ventilation openings so that falling liquid at an angle of 15 degrees from vertical will not enter the motor. T***otally Enclosed Non-Ventilated (TENV):*** Constructed with no openings in brackets or frame. ***Totally Enclosed Fan Cooled (TEFC):*** Constructed with no openings in brackets or frame, but includes an external fan with shroud to blow cooling air over motor. ***Totally Enclosed Air-Over (TEAO):*** Depends on air flow from driven device for motor cooling.

Explosion Proof (XP) — An enclosed motor whose enclosure is designed and constructed to withstand an explosion of a specified gas or vapor which may occur within the motor and to prevent the ignition of this gas or vapor surrounding the machine. Refer to charts for various classes and groups of explosion-proof motors.

Frame — The supporting structure for the stator parts.

Frame SIZE — Refers to a set of physical dimensions of motors as established by NEMA. These dimensions consist of shaft length, shaft diameter, shaft height and location of base mounting holes.

Frequency (Hertz) — The rate at which alternating current changes its direction of flow, usually expressed in terms of cycles per second, usually 60 Hz in USA.

Full Load Current (FLA) — The current stamped on nameplate which motor will draw while operating at its designated full load at corresponding voltage.

General Purpose AC Motor — An AC motor built in standard ratings, with standard performance and mechanical construction, offered for general use.

Horsepower — Formulas for determining horsepower: HP equals Watts output divided by 746; 746 Watts equals 1 HP. To estimate HP: HP equals torque in oz. inches times rpm divided by one million.

Impedance Protected — Motor designed to not burn out in less than 15 days under locked rotor condition, in accordance with UL standards.

Induction — The production of an electric current in a conductor by a magnetic field in close proximity to it.

Induction Motor — An AC motor in which a primary winding (usually on the stator) is connected to the electrical power source and a secondary circuit (usually the rotor) carries an induced current.

Insulation (Ins) — Insulations are classified by their ability to withstand a specified temperature for a specified length of time without deteriorating. The insulation classes normally used and their total allowable temperature (both ambient and rise) are as follows:

Class A	105°C	(221°F)	Class F	155°C	(311°F)
Class B	130°C	(266°F)	Class H	180°C	(356°F)

Locked Rotor Current (LRA) — The measured current taken at rotor stand-still with rated voltage and frequency applied.

Mounting — ***Rigid:*** Motor solidly fastened to equipment through a metal base welded to the motor shell. ***Resilient:*** Motor shell isolated from the base by rubber rings on the end shields. ***Stud:*** Motor has bolts extending from front or rear by which it is mounted.

Multispeed Motor — One which can be operated at any of two or more definite speeds, each being practically independent of the load. In the case of multi-speed permanent-split capacitor (PSC) and shaded pole motor, the speeds are dependent on the load.

NEMA — National Electrical Manufacturers Association. This organization sets electrical and mechanical standards for electric motors.

OEM: — Original Equipment Manufacturer. Same as the original part.

Ohm — The unit of electrical resistance to the flow of current.

Overload Protector — A temperature detecting device built into the motor that disconnects the motor from the power source if the temperature rise becomes excessive.

Polyphase — More than one phase, usually three phase.

Power — The amount of work which can be done in a unit of time.

Power Factor — The ratio of real power (watts) divided by apparent power (volt-amperes). Not to be confused with efficiency (measure of the extent to which power transmission or distribution systems are utilized).

Rating — The designated limit of operating characteristics of a machine, apparatus or device based on definite conditions. Load voltage, frequency, and other operating characteristics may be given in the rating.

Resistance — The property of an electric circuit or of any object used as part of an electric circuit which determines for a given current the rate at which electric energy is converted into heat or radiant energy, and which has a value such that the product of the resistance and the square of the current gives the rate of conversion of energy.

Rotor — The rotating part of most alternating current motors.

Service Factor — Number by which the horsepower rating is multiplied to determine the maximum safe load that a motor may be expected to carry continuously.

Slot Insulation — Also called Slot Liner. The insulation lining the slot containing the motor windings.

Speed (RPM) — The running speed of an AC motor is dependent upon the number of poles and the frequency of the power source.

$$RPM = \frac{120 \times Freq.}{No.\ Poles}$$

No. of Poles	Synchronous Speed	Normal Speed	No. of Poles	Synchronous Speed	Normal Speed
2	3600	3450	6	1200	1075
4	1800	1725	8	900	825

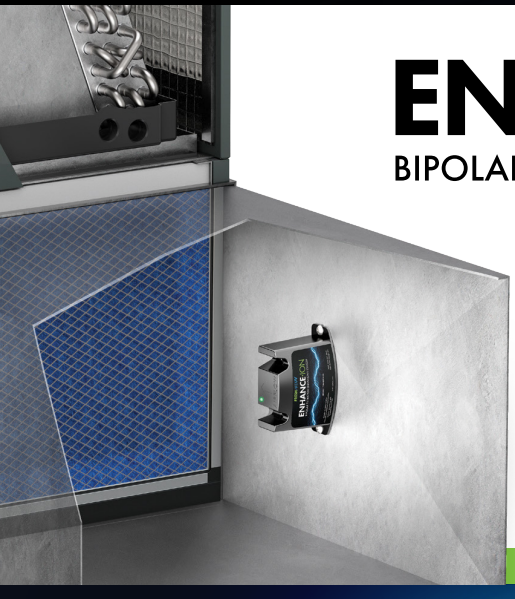
FRESHAIRE UV

VALIDATED
ZERO OZONE EMISSIONS

APCO®-ONE
AIR TREATMENT SYSTEM

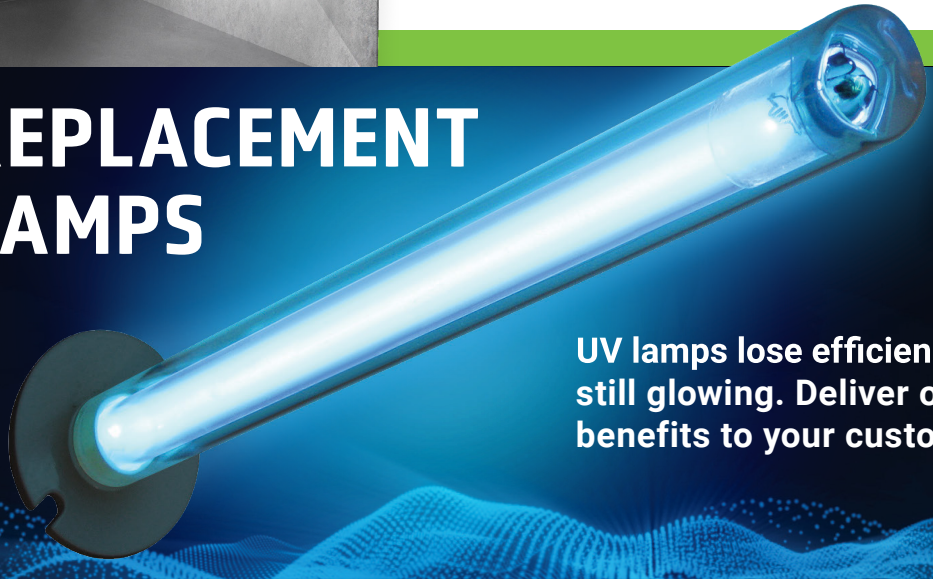
LIFETIME WARRANTY
ALL PARTS
3-YEAR LAMP

- Neutralizes airborne mold, bacteria, viruses
- Helps keep HVAC equipment clean
- Reduces odors/VOCs in the airstream
- LED status light-bars monitor lamp life
- 24V (Packard transformer included)
- UL2998 validated for zero ozone



ENHANCE·ION™
BIPOLAR FILTRATION ENHANCING IONIZER

- Increase filtration efficiency with proven bipolar technology
- Installs into AHU or ductwork with magnet or hard mount
- Turbulence generator for ion distribution
- Virtually maintenance free
- 3 year warranty



REPLACEMENT LAMPS

FRESHAIRE UV
GENUINE LAMPS

UV lamps lose efficiency over time even if they are still glowing. Deliver ongoing Indoor Air Quality benefits to your customers by replacing lamps.

Centrifugal Belt Drive Upblast Roof and Wall Ventilators

- Permanently lubricated ball bearings (10" thru 24" models) and regreaseable pillow block bearings (30" thru 36" models)
- 10" thru 24" models are wall mount capable
- Open dripproof motors are factory wired with 6' pigtail; single-phase models 1 HP and smaller are wired 115V; three-phase models 2 HP and smaller are wired 220V, 3 HP and larger are wired 440V; voltage is field convertible
- Variable pitch motor sheaves allows for 25% speed/CFM reduction
- Shipped completely assembled with motor and drive package
- Power ratings (BHP) do not include drive losses

Note: Also available as part of our Shell Program - ask your store for details

Performance shown is for installation type A: free inlet, free outlet. Performance ratings include the effects of birdscreens in the airstream.

The sound ratings shown are loudness values in fan sones at 5-ft. (1.5M) in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for installation type A: free inlet fan sone levels.

Centrifugal Direct Drive Upblast Roof and Wall Exhaust Ventilators

- Designed to continually exhaust foul air, smoke, fumes, odors and grease-laden vapors from range hoods and commercial cooking appliances
- All ventilators are UL standard 705 listed power ventilators
- All ventilators are UL listed restaurant exhaust equipment subject 762 (YZHW) and complies with NFPA 96 application requirements allowing operating inlet temperatures up to 300°F (except 8" diameter models)
- Junction box mounted in externally cooled motor compartment
- Fully welded venturi to windband eliminates grease leakage
- Fully rolled windband bead for added strength and stability
- Welded curb corners eliminate water entry into ducts or building
- Pre-wired class B insulated ball bearing 60 Hz motor
- **X90-903**, **X90-905** and **X90-906** are 115/230V; all others are 115V
- Units are speed controllable when wired 115V only (speed controller optional)

Speed (RPM) shown is nominal and performance shown is based on actual speed of test.

The sone ratings at 5-ft. in a hemispherical free field per AMCA Standard 301.

Centrifugal Belt Drive Downblast Exhaust Ventilators

- Designed for low to moderate static pressure in industrial and commercial applications where steady rooftop exhaust is required
- Roof mount applications only
- Features spun aluminum housing construction, steel support braces, backward inclined aluminum wheel, externally cooled motor compartment, birdscreen, junction box, welded curb corners and maximum operating inlet temperatures up to 170°F
- Open dripproof motors are factory wired with 6' pigtail; single-phase models 1 HP and smaller are wired 115V; three-phase models 2 HP and smaller are wired 220V, 3 HP and larger are wired 440V; voltage is field convertible
- Variable pitch motor sheaves allows for 25% speed/CFM reduction
- Shipped completely assembled with motor and drive package
- Power ratings (BHP) do not include drive losses

Note: Also available as part of our Shell Program - ask your store for details

Performance shown is for installation type A: free inlet, free outlet. Performance ratings include the effects of birdscreens in the airstream.

The sound ratings shown are loudness values in fan sones at 5-ft. (1.5M) in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for installation type A: free inlet fan sone levels.

Axial Direct Drive Downblast Exhaust Ventilators

- Designed for steady exhaust air applications under low to moderate static pressures
- 10", 12", and 16" models are wall mountable
- Fully rolled windband for added strength and stability
- Spun aluminum hood construction
- Venturi, inlet and supports are galvanized
- Maximum operating inlet temperature up to 140°F
- All units require single-phase power
- 115V
- Fixed mounting curbs and dampers are available separately
- Speed controllable

Performance ratings include the effects of appurtenances in the air stream. Performance shown is for installation type A: free inlet, free outlet.

Speed (RPM) shown is nominal and performance shown is based on actual speed of test.

The sound ratings are loudness values in fan sones at 5 Ft (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type A: free inlet sone levels. (Free outlet sone levels on supply models.)

Centrifugal Belt Drive Filtered Supply Ventilators

- Designed to provide filtered supply air in industrial and commercial applications
- Includes one set of 1" washable aluminum filters
- Lifting lugs are standard on all sizes
- Permanently lubricated maintenance-free bearings
- Galvanized metal housing and base
- Roof or wall mountable (15" models are roof mount only)
- 120/130V
- All ventilators are UL Standard 705 listed power ventilators
- All motor and drive packages comply with the minimum efficiency levels of EPAct '92; affected motors bear the seal
- Variable pitch motor sheaves allows for 25% speed/CFM reduction
- Shipped completely assembled with motor and drive package
- Power ratings (BHP) do not include drive losses

Performance ratings include the effects of filters in the airstream. Performance shown is for installation type B: free inlet, ducted outlet.

Shutter Mounted Exhaust Fans

- Designed for through-the-wall, low static pressure ventilation of stores, offices, factories, shops and farm buildings
- Heavy-duty guards have corrosion-resistant gray polyester coating
- 7" to 24" diameter aluminum blade propellers; 30" and 36" diameter galvanized steel blade propellers; 7" to 24" diameter are speed controllable
- Totally enclosed sleeve or ball bearing 115V, 60 Hz motors
- Guards comply with OSHA regulations
- Shipped completely assembled with automatic shutters

Warning: OSHA-complying guards are required when fan is installed within 7 ft. of floor, working level or within reach of personnel. Review OSHA codes.

Performance shown is for installation type A: free inlet, free outlet. Performance ratings include effects of birdscreens in the airstream.

Speed (RPM) shown is nominal and performance shown is based on actual speed of test.

The sone ratings at 5-ft. in a hemispherical free field per AMCA Standard 301.

Eliminator™ Foundation Vent Fan

FIELDCONTROLS

- Reduces moisture problems in a crawl space including dry rot, fungus growth or moisture that can encourage termite infestation
- Air changes are increased dramatically for better moisture removal and control
- Galvanized steel housing mounts to new or existing crawl space vents
- Operates off a temperature switch which activates the motors at or above 50°F
- Requires one per 1,000 square feet of crawl space
- 115V
- Mounting plate dimensions 14-3/8" x 6-7/8"

Order #	Mfg. #	Description	CFM	Amps	Each
L86-872	46264901	EL-1 Crawl Space Vent	135	0.60	**355.00**

Eliminator™ Dehumidistat

FIELDCONTROLS

- Optional dehumidistat can be used to operate **L86-872** at varying levels of relative humidity
- Control can be wired in place of, or in series with, the standard temperature switch
- Adjustable from 20%–80%
- 115V
- Mounting plate dimensions 14-3/8" x 6-7/8"

Order #	Mfg. #	Description	CFM	Amps	Each
L40-716	46281500	EDH-1 Dehumidistat Control	135	0.60	**119.00**

UnderAire™ Crawl Space Exhaust Fans

- Ventilates excess moisture through existing passive vents, reducing mold, mildew and wood rot
- Increases air circulation to fight condensation
- Constant operation helps vent radon, treated wood off-gassing and odors that might otherwise migrate into living areas
- 120V, 20W motors
- Includes freeze protection thermostat which opens at 40°F
- 6' power cord

Order #	Mfg. #	Description	CFM	Each
X72-248	V1	Fan Only	110	**289.00**

TrueFRESH™ Balanced Ventilation System

Heat and Energy Recovery Ventilators

- Streamlined, lightweight design is easy to lift, easy to hang and easier to fit in more applications
- Two variable-speed motors — one for the supply air stream and one for the return air stream — work with the integrated speed control so installers can adjust the speeds of each motor up and down with the touch of a button to easily balance the system
- Removable duct collars let you spend less time on the ladder by easily connecting the ductwork to the collars away from the unit before it's hung, and then sliding the collars back into place once ducted
- Meets ASHRAE 62.2 standards

- Units are designed, when properly installed, to achieve ASHRAE Standard 62.2 2010
- Complies with 2012 & 2015 IECC (2.8 CFM/Watt)
- Control is integrated into the ventilator
- High and low temperature limit lock-outs while maintaining ASHRAE 62.2 2010
- Simple plug-in installation
- Installation temperature range up to 160°F
- Removable, washable filter
- 115V

AprilAire

Energy Recovery Ventilator

NEW

- Provides a constant and controlled supply of fresh air year-round
- 1.45cfm/watt and SRE of 72% provide efficient, effective energy recovery ventilation
- Helps remove moisture from incoming air
- 118 cfm at 0.30" w.c. external pressure
- Reduces indoor air pollution
- Ceiling, wall, and floor mounting capable
- Intermittent control with patented temperature and humidity lockouts available with 8120X control or AprilAire Thermostats
- Equipped with 4' power cord
- Meets IECC 2021 ventilation requirements

Intelli-Balance™ 100 Energy Recovery Ventilators

Panasonic

- Engineered for use in any North America Climate Zone
- Two (2) revolutionary DC motors with Smart Flow™ technology ensure optimum CFM output
- Pick-A-Flow speed selector (50 to 100 CFM) provides customizable airflow to create balanced, positive or negative pressure within the home
- Exclusive built-in ASHRAE 62.2 timing function helps ensure code compliance
- MERV 8 filter included; optional MERV 8 and MERV 13 replacements available
- Patented exchange capillary core recovers heat and moisture
- Connect to existing ductwork or use as a standalone, whole-house ventilation solution
- Wall or ceiling mount capability
- Can be used to meet green building code requirements and helps minimize the impact to your HERS index

Intelli-Balance™ 200 Energy Recovery Ventilator

Panasonic

- Multi-speed selector (60 to 200CFM) provides customizable supply and exhaust airflow to create balanced, positive or negative pressure within a residential or commercial space
- Two (2) powerful ECM motors with Smart Flow™ technology ensure predictable airflow outputs up to .40" w.g. of static pressure
- Occupant controllable Boost function provides increased ventilation on demand
- Designed for single family dwellings and new airtight envelopes built to meet energy efficiency standards
- Engineered for use in any North America Climate Zone
- Core material permeated with anti-mold treatment
- Built-in ASHRAE 62.2 intermittent timing function helps ensure code compliance and simplifies the installation process
- MERV 13 filter included for superior air filtration; MERV 13, MERV 8 and HEPA filter replacements available
- Can be used to meet Green Building Standards and contribute to better HERS/ERI scores
- Compatible with the intelligent Cosmos™ Healthy Home System to help automatically maintain a healthy indoor environment
- Powder coat finish for a professional look from a professional installer

Panasonic

WhisperComfort™ Energy Recovery Ventilator

- Sensible Recovery Efficiency 70% at 32°F
- Total Recovery Efficiency 60% at 95°F
- Multi-speed selector (20 to 50 CFM) provides customizable airflow
- Occupant controllable Boost function moves fan speed to 60 CFM when activated
- Engineered for use in virtually any North America Climate Zone
- High efficiency capillary core recovers heat and helps maintain desired moisture levels inside
- Two powerful DC Panasonic ECM motors provide quiet and efficient airflow
- Uses **L50-807** MERV 13 replaceable filters for superior air filtration
- Core material permeated with anti-mold treatment to help prevent mold
- Separate control of supply and exhaust airflow
- WhisperVent™ Wall Cap allows for supply and exhaust air through one building penetration - up to 100 CFM each side
- Can be used to comply with the latest green building codes and standards
- HVI certified for energy recovery and sound
- Static pressure access ports make it easy for raters to verify airflow for ASHRAE 62.2 compliance
- Suitable for new/remodel, single-family/ multi-family, energy efficient projects

Blower Assemblies Less Motors

- Includes complete blower assemblies without motors
- Adjustable motor mounting bracket
- Universal housing supports and Vibro-Pads (type “DD” are direct drive units, type “BD” are belt drive units)
- Lau Model # indicates blower wheel size

Note: When using a motor above 1 HP, a special mounting bracket and bearing may be required: Refer to instructions supplied with blowers.

Fresh Air Ventilation Systems with TrueZONE Dampers

- Designed to help meet local ventilation codes and standards, including ASHRAE 62.2-2010 standard
- Smart control optimizes air delivery by syncing ventilation calls with heating/cooling
- Easy-to-use input dials allow customized ventilation for each installation
- Test mode that includes immediate feedback to installer to confirm that air delivery requirements of selected ventilation standard are being met
- Economical supply-only ventilation; works with forced air system
- Can be used with other equipment, such as an HRV/ ERV, for balanced ventilation
- **X82-744** includes **G32-811** Ventilation controller, **L41-968** 24V Transformer and **L81-631** TrueZONE damper/actuator

Specifications:
- Electrical rating: 24VAC
- Airflow capacity: 50 to 160 CFM

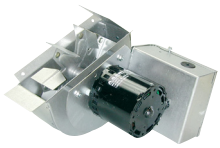
Our partnerships were not built in a day or with a single project, but over time.

It’s not about a quick sale, a low price or giveaways. It’s always been about relationships with you.

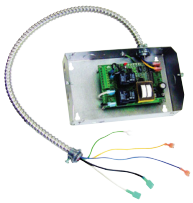
High Temperature Blowers and Draft Inducers

A

B



C



D

- Exhausts hazardous flue gases from furnaces, boilers, unit heaters and water heaters
- Used to improve burner combustion efficiency by overcoming back drafts, negative building pressure and minor sizing errors
- Sidewall power venters feature safety controls to prevent burner from firing until venter operation is proven
- UC-1 interlock contains adjustable pre and post purge, LED stater diagnostic indicators, proven switch check circuit and selectable voltage
- To vent low BtuH millivolt appliances use water heater venting package **X89-440**
- Plug-in connections
- **L43-992** is the standard interlock control for the full line of fixed speed venters, draft inducers and combustion air in-forcers
- **L43-992** is included with the **X89-438**, **X89-439** and **X81-964**
- **L43-993** is used in conjunction with the **L43-992** to interlock up to one additional 24 VAC, 115 VAC or millivolt controlled applicance

Note: Not for wood burning applications. Adapters are required to fit pipe sizes other than 4".

Oil and Gas Furnace Power Venters

FIELDCONTROLS

- Vents combustion gases produced by 80%+ efficiency LP or natural gas and oil furnaces, boilers and water heaters
- Unique negative pressure design prohibits flue gas leakage
- For use in old chimneys with insufficient draft
- Combines the fan, motor and vent hood into one unit
- Designed for use down to -40°F and to overcome 40 MPH winds
- Designed for use in a damp environment with an aluminized steel enclosure
- Not for use with solid fuels such as wood, coal and waste oil
- See chart below for required control kit
- **X71-183** includes a 4" MG-1 draft control for gas applications
- **X89-554**, **X89-555** and **X71-184** are ETL approved
- **X89-859** kit includes SWG Power Venter, 4" MG1 Draft Control and CK-43F Control Kit; can be used with all 80+ gas draft induced furnaces from Amana, Armstrong, Bard, Carrier, Consolidated, Dunkirk, ICP, Lennox, Rheem, Trane and York

Combustion Air Systems

FIELDCONTROLS

- **X89-861** and **X89-862** airboot kits come complete with 4" intake air hood, 4" vacuum relief valve and Field AirBoot®
- **X92-379**, **X92-380** and **X83-905** Fan-in-a-Can™ and Fan-in-a-Drum™ systems are designed to provide combustion air for appliances when direct connection to the burner is not possible
- **X92-379**, **X92-380** and **X83-905** are dual voltage for oil or gas applications

FIELDCONTROLS

Thermal Safety Kits and Switches

- For use on gas fired heating appliances, water heaters and furnaces
- Manual reset switches to help eliminate continuous flue gas spillage
- Switches are for draft control or draft hood mounting
- Switches are single pole single throw type
- **X71-205** is a thermocouple adapter for use on 30 millivolt gas thermocouple powered gas valves for splicing into thermocouple circuit
- **X71-203** kit includes two **X71-202** (GSK-3) thermal safety switches, one 12-gauge jumper wire and one 6' length 12-gauge lead wire, comes with switch enclosure
- **X71-204** kit includes two GSK-4 thermal safety switches, one 12-gauge jumper wire and one 6' length of 12-gauge lead wire; switch enclosures not included
- **X71-293** is manual reset and designed for use with power venting and chimney vented systems for oil-fired applications

FIELDCONTROLS

Gas Vent Dampers

- Work to allow natural draft during appliance operation while preventing heat and conditioned air from escaping during off cycles
- Prevents infiltration of cold air during down drafts
- Dual safety switches allow the burner to fire only when damper is in the open position
- Keyed wiring harness plug installs only one way preventing incorrect wiring connection
- Stainless steel construction
- Normally closed

In-Line Radon Fans

fantech® a systemair company

- Specially designed with higher pressure capabilities for Radon mitigation
- UV resistant, UL Listed durable plastic
- UL Listed for use in commercial applications
- Automatic reset thermal overload protections
- Vibration welded seam ensures leak proof housing
- 120V

BROAN

Lo Sone® Ventilators

- Low RPM motor on resilient mount for quiet operation
- Dynamically-balanced centrifugal blower wheel for quiet, efficient performance
- Motor designed for continuous operation
- May be ducted horizontally, vertically or in-line
- Quiet automatic backdraft damper located in duct connector
- 1/2" acoustic insulation inside housing

Panasonic

D-65 Series Destratification Fan

◀ NEW

- Creates uniform air temperatures from floor to ceiling
- Energy savings up to 35% in the heating season and up to 25% in the cooling season
- Effective in facilities with ceiling heights from 15' to 75' high
- Quiet, energy-efficient fans, delivering a focused, easy-to-direct column of air
- Run independently of existing HVAC system
- Speed controllable, allowing fine-tuning for individual comfort
- Includes 3 types of UL approved fast-mounting hardware
- 10-years Limited warranty
- 120V

Duct Booster Kits

- Used on duct runs up to 130'
- Maintains 1,200 FPM to keep lint suspended
- Galvanized steel housing
- Backward inclined impeller allows lint to pass through fan
- **X82-012** comes with automatic sensing switch, mounting bracket, hardware and 5.5' power cord
- **X82-013** comes with integrated air flow sensing switch, mounting bracket, quick connect/disconnect, wall mounted indicator panel; LED light on wall panel lets homeowner know fan is working properly
- **X82-627** is UL listed to UL705 supplement and includes integrated pressure switch, mounting clamps, cleanouts, wall mounted indicator panel, and a 50' control cable
- Five-year warranty

Duct Booster® Fan

- Allows heated or cooled air to reach "problem" areas
- Eliminates upgrading or installing auxiliary heating or cooling equipment
- Fits round, square or flat ducts
- Can be wired directly to appliance blower or with optional air pressure sensing switch (**G31-186**)
- Attached to duct with four sheet metal screws
- Requires a 4" x 7" cutout
- 120V
- Maximum operating temperature 200°F

Order #	Mfg. #	Each

WhisperGreen Select™ Ventilation Fans

◀ NEW

Panasonic

- Customizable, all-in-one fan and fan dimmable chip LED light combinations
- Pick-A-Flow speed selector – one fan, you choose the CFM
- Unique Plug 'N Play modules provide up to three value-added features
- Revolutionary ECM motor with SmartFlow™ technology ensures optimal CFM output
- Complies with the JA8 CA Title 24 requirements
- Flex-Z Fast™ bracket provides flexible, fast and easy installation
- Meets stringent green building codes and standards, including ASHRAE 62.2, LEED, ENERGY STAR for Homes 3.0, IAP, JA8 Title 24, CA Title 24 and WA Ventilation Code
- Fits in 2 x 8 construction
- UL listed for tub/shower enclosure when used with a GFCI protected circuit

WhisperFresh Select™ Fresh Air Supply Fan

Panasonic

- Customizable fresh air supply fan featuring Pick-A-Flow™ technology – one fan, you choose the CFM (50-60-70-80-90-100-110-130-150 in CFM; 9 settings)
- Intelligent ECM motor with SmartFlow technology provides optimum CFM output for precision whole-house supply ventilation
- Operates as a stand-alone filtered supply fresh air solution to meet ASHRAE 62.2 requirements for make-up/supply air
- Capable of communicating with Panasonic's acclaimed WhisperGreen® Select™ to create a balanced ventilation solution
- Incorporates adjustable high humidity and low temperature dials for easy adjustments in any climate zone
- Upgraded junction box on hardwired model has 2 convenient knockouts for routing power
- Pressure ports for airflow verification
- Built-in Plug'n play module port with smart home capability
- HVI certified for use with MERV 8 (FL0815NL1) and MERV 13 (FV-FL1315NL1) filters. MERV 13 filter included, MERV 8 and MERV 13 replacements available
- Can be used to comply with ASHRAE 62.2, LEED and CA Title 24

Panasonic

WhisperAir Repair

- Ceiling mount spot purification device utilizes patented nanoe™ X charged water particle generation technology to purify contaminated air
- Inhibits growth of bacteria, viruses, allergens and mold; and breaks down hazardous substances for a healthier home environment
- Quietly deodorizes and reduces unwanted smells for a fresher, cleaner indoor environment
- Maintenance free with no filters to change, no duct work required
- Great for use in residential settings including living rooms, bedrooms, basements, closets and mud rooms
- A single unit can cover between 100-200 sq. ft. (850-1700ft3), depending on environmental factors

Panasonic

WhisperControl Condensation Sensor Plus

- Intelligent and advanced sensor technology monitors humidity and temperature to anticipate dew point, automatically operating the fan to control moisture
- Automatic seasonal adaptability with optional Moisture Sensitivity Selector allows fine tuning for dry or moist environments
- Adjustable Minutes Per Hour (MPH) Fan Timer ensures consistent and controlled ventilation throughout the day for compliance with ASHRAE 62.2
- Automatic Fan Control – 30 minute countdown timer initiates after moisture returns to normal levels
- Manual Fan Control – 20 minute countdown timer initiates once fan is turned on
- Commercial Grade – 8 Amp max load, 2 year limited warranty
- Engineered to efficiently control current LED lighting and DC motor loads
- For indoor use. Includes matching wall plate
- Can be used to comply with ASHRAE 62.2, LEED, ENERGY STAR® 3.0 and CALGreen

Swidget Modular Smart Devices

Panasonic

- Pair Swidget smart devices with Panasonic ventilation products to assist in removal of contaminated, unhealthy indoor air
- Use the Swidget App to control devices with schedules and automation, or connect to Alexa or Google Assistant for voice control
- Switches improve fan control and accept inserts that allow IAQ customization
- Inserts provide a wide menu of control options for ventilations fans
- Outlets allow control of a variety of plug-in appliances

Evolve Series Ventilation Fans

◀ NEW

BROAN

- Premium exhaust fans with selectable CFM and continuous run capability ideal for meeting ASHRAE 62.2, LEED and ENERGY STAR for whole home ventilation
- Guaranteed airflow performance with True CFM and code compliance
- Near silent operation, holding CFM up to .4” s.p.
- Modern, clean aesthetic with full lit and non-lit options
- Up to 30% faster installation with the snap-in housing and spring-less grille clips that easily slide into place
- Fan only models shall be UL Listed for use over bathtubs and showers when connected to a GFCI-protected brand circuit (ceiling mount only). Lighted models do not meet UL Listed requirement.

Flex DC Ventilation Fans

- Selectable CFM DC motor allows right-sizing at 50/80/100 CFM for any size room
- 50% tighter housing than competitive models
- Snap-fit Flange Kit will cover the edges of the cutout for a more professional finish and a tighter, leak-free seal
- Quiet fan operation that has a sone level less than 1.0 at all CFM speeds
- UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit
- Type IC, fits 2" x 6" and larger construction

688E Bathroom Exhaust Fan

NEW

- ENERGY STAR® certified
- Maintains at least 50 CFM @ .1" s.p. to meet stringent codes
- Plug-in, permanently lubricated motor
- 26 gauge, galvanized steel housing
- Same housing dimensions as the old 688 fan it is replacing

Order #	Mfg. #	Sones	CFM	Duct Size	Each
X83-987	688E	2.0	50	3"	**65.00**

Lo-Profile DC Ventilation Fan

- Selectable CFM and Continuous Run: speeds of 50-80-100 for effective ventilation and built-in continuous run technology to remove moisture and reduce the risk of mold or mildew in most full baths
- TRUE CFM™: Installed exhaust fan will not lose CFM performance even with complicated ducting
- Quiet Performance: 0.4 / 0.9 / 1.2 Sones for quiet performance, enough sound to know your fan is on
- Adjustable low CFM setting allows precise adjustment to prevent over-ventilating and maximize energy efficiency
- Adjustable time delay sets how long fan will run on high speed before returning to a continuous lower speed
- ETL listed for use over bathtubs and showers when connected to GFCI protected branch circuit (ceiling installation only)
- Powerful enough for rooms up to 90 sq. ft.
- 4" oval duct connection for installation flexibility, allows for ceiling or wall mounting

Flex™ Series Ventilation Fans

BROAN FRESH AIR SYSTEMS

- Low sone whisper quiet operation
- Installs from the room side, which makes it possible to retrofit to spaces with no attic access
- CleanCover™ grille stays cleaner longer with fewer vent slots to collect dust
- FoldAway™ mounting ears precisely positioned the fan for new construction applications or fold flat for retrofit installations with no attic access
- EZDuct connector creates an air tight seal while connecting to the duct from below the ceiling
- 30% more airtight installed performance vs standard ventilation fans
- SnapFit flange kit offers flexible installation for new construction or retrofit upgrades
- ENERGY STAR® certified
- 4 in. duct connector with damper
- Fits 2 in. x 6 in. ceiling construction
- UL listed for use in insulated ceilings (type I.C.) and HVI-2100 certified for safety
- UL listed for use over bathtubs or showers when connected to GFCI-protected branch circuit (not included)
- 3-year limited warranty

Humidity Sensing Wall Control

- Sensaire™ technology - Responds to increases in humidity rather than waiting for condensation to form or a relative humidity set point to be reached
- Precise sensitivity adjustment - Variable setting from 20% to 80% relative humidity so the fan works when the homeowner wants it to regardless of climate or season
- Continuous ventilation mode - Operates fan for set minutes per hour to achieve targeted average CFM levels and efficiently meet ASHRAE 62.2 whole house mechanical ventilation (WHMV) requirements
- Manual operation mode for ultimate user control
- Can be used to comply with California Title 24 and CALGreen

Order #	Mfg. #	Each
X72-301	82W	**135.00**

Electronic Timer Control

- 10, 20, 30 or 60 minute timer
- Includes three color options: white, ivory or light almond
- Does not include switch plate
- 150V/20A

Order #	Mfg. #	Each
X72-058	FD60EM	**119.00**

Digital Bath Fan Control

- Installs in place of a normal switch
- Manually turn fan on/off or program to run at certain times of day for increased energy efficiency and convenience
- Meets ASHRAE 62.2 ventilation standard
- Convenient display

Puro-green® MERV 13 Extended Surface Pleated Filters ◀ NEW

- Durable, moisture-resistant 100% synthetic media
- Low pressure drop and high dust loading
- Quality engineered for consistent production
- Qualifies for LEED certification points
- Proudly made in the U.S.A.

PermaFlo® Rigid Polyester Pads

- Washable polyester cut-to-fit air filter
- 0.03 in w.g. initial resistance to air flow
- **L97-674** and **L97-675** come in a box of 18
- **L97-676** comes in a box of 8

Pre-Vent® Wrap-Around Air Conditioner Filter

- Filter can be cut-to-fit any air conditioning unit
- Filter wraps around the outside of the air intake grill and is held in place across the rear of the unit by three 20" bungee cords (included)
- Low resistance to airflow, 0.02 in w.g.
- UL Classified as to flammability only
- UV protected black high abrasion media

L90-798	PREVENTWA3-R	38" x 110"	38" x 110"

Hail Guard Wrap-Around Equipment Protection

- Rigid black polypropylene netting
- Protects equipment against airborne objects such as hail
- Use alone or behind PreVent filters
- Cut to fit with scissors or utility knife
- UV Protected
- **L92-854** and **L92-855** include mounts, screws and ties
- **L90-799** requires **L45-974** mounting kit

EZ Kleen® Metal Mesh Mist Eliminator Air Filters

- Washable metal mesh air filter and mist eliminator constructed of slit and expanded aluminum media enclosed in an aluminum frame
- Low resistance filter with good arrestance of airborne dust at velocity rated between 150-650 fpm
- Compatible with all major OEM air handler systems
- Meets UL Class 900 requirements

PrecisionCell Rigid Filters

- Extended media separator type
- Designed for use in most commercial or industrial HVAC systems where medium to high efficiency is required
- Suitable for variable air volume systems
- 24 gauge corrosion-resistant steel
- Moisture-resistant micro-fine fiberglass paper media
- Operating limits: 100% RH and 350°F
- UL 900 Class 1 listed
- MERV 11-14

PrecisionPak Synthetic Media Bag Filters

- Designed for use in most commercial or industrial HVAC systems where medium to high efficiency is required
- Micro-fine synthetic media
- Thermoplastic resin pocket sealant
- Operating limits: 180°F and 100% RH
- MERV 10-14
- UL 900 Class 2

QwikProducts® PuraClean® Filter Spray

- Increases particle capture up to 300%, and proven to improve MERV rating up to 65%
- Creates a non-ionic coating making filter fibers electrostatic
- Has mild tactifier which will hold captured particulate in the filter
- Ozone safe and works on any indoor air filters
- 16 oz. bottle
- Made in the U.S.A.

Order #	Mfg. #	Each
L86-863	QT2700	**43.99**

Filterbox Grabber

- For lifting filter boxes from the ground to roof level
- Save time lifting virtually any filter box
- Safer than climbing up and down the ladder
- Lifts loads up to 20 pounds
- Rope not included

Order #	Mfg. #	Each
H85-524	FBG-1	**99.00**

Filter Pullers

- Easily grab hard-to-reach filters

Order #	Mfg. #	Description	Each

Commercial/Industrial Washable Electrostatic Air Filters

PERMATRON®

- Washable electrostatic air filter made of polypropylene media and wire reinforcement contained within a galvanized steel frame
- Exclusive Accumulator Chamber® design for maximum performance
- UL classified as to flammability only
- 1/2" thickness and custom sizes available
- Stainless steel frame recommended for caustic or corrosive environments
- FDA approved materials for food processing, etc.
- Five-year warranty

AprilAire

Electronic Air Cleaner
5000 Model

- Combines electronic cells and pleated media in one unit
- Now featuring an “air cleaner control” that can be mounted on the unit or at a remote location
- 80% efficient at removing virus size particles of 0.01 micron
- 94% efficient at removing respirable dust size particles as small as 0.35 micron
- Traps particles on grounded micro-fiber media that only needs to be replaced annually
- Unit can be installed horizontally, vertically or at an angle
- Maximum airflow capacity of 2,000 CFM
- Equipped with 5 ft. power cord

Order #	Mfg. #	Duct Size	CFM
L96-864	5000	16" X 25"	2,000

Honeywell Home

Electronic Air Cleaners

- Captures up to 99% of airborne particles passing through the system
- Pre-filter screen protect cells from large particles, antimicrobial postfilter increases efficiency
- Low pressure drop
- Solid state power supply is self-regulating, maintaining peak efficiency over a wide range of cell dirt loading conditions
- Galvanized cabinet protects against rust

iWave™ Air Cleaners

Nu-Calgon

- Injects equal amounts of positive and negative ions into the air reducing passing pollutants, gasses and odors
- Contact with ions has a microbicidal effect on certain viruses and bacteria, which disrupts their surface proteins and renders them inactive
- Ions also attach to dust and other particles causing them to band together until they are large enough to be caught by filters

Order #	Mfg. #	Description	Each
L82-080	4900-10	iWave™-C Commercial Model with Programmable Self-Cleaning for HVAC systems up to 12 Tons	**1699.00**
L82-081	4900-20	iWave™-R Residential Model with Programmable Self-Cleaning for HVAC Systems up to 6 Tons	**1099.00**
L82-083	4900-40	iWave™-V Residential Model with Low Maintenance for HVAC systems up to 6 Tons	**445.00**
L82-136	4900-35	Ductless and flexible applications	**615.00**

NuShield™ Air Ionization Systems

Nu-Calgon

- NuShield emits both positive and negative ions into airstream to reduce certain viruses and bacteria
- UL 2998 validation for zero Ozone Emissions
- Contact with ions has microbicidal effects on certain viruses and bacteria, which disrupts surface proteins and renders them inactive
- The ions emitted from the NuShield ionization system attaches to particles like dust and dander, causing them to band
- Patented self-cleaning design
- Multi-voltage input 24VAC to 240VAC
- No replacement parts needed

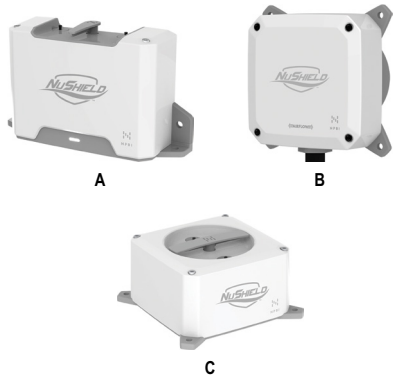

Fig.	Order #	Mfg. #	Description	Each

RGF ENVIRONMENTAL GROUP INC.

Clear Sky™ Self-Cleaning Ion Generator

A

B

- Self-cleaning, maintenance-free treatment option for HVAC systems
- Produces high concentrations of both positive and negative ions that will reduce bacteria, mold and particulates in the conditioned space
- Uses continuous "self-cleaning" technology achieved by ultrasonic energy coupled with induced oscillations targeted directly to the carbon ion emitters
- For use within HVAC systems up to 2,400 CFM or 6 tons

Hero HS 300 Whole-House HEPA Filtration

fantech® a systemair company

- Whole house HEPA filtration system that is 99.7% effective down to 0.3 microns
- Designed to clean and filter the air in an average 2000 sq. ft. home every hour while larger homes will take slightly longer
- Duct or wall mounted
- Pulls air from the air stream for filtering and does not affect system performance
- HEPA filter lasts 2 to 5 years depending on maintenance of the prefilter
- Prefilter should be replaced every 3 months
- Permanently lubricated motor with sealed ball bearings to guarantee long life and maintenance-free operation
- 120V

UV Air and Surface Treatment Systems

A

B

- Ultraviolet light penetrates microorganism and breaks down molecular bonds causing cellular and/or genetic damage
- Germs are killed or sterilized, leaving them unable to reproduce
- UV bulbs made from sodium-barium silicate and don't produce ozone
- SmartLamp™ technology provides extended lamp life by turning on with airflow and turning off 30 minutes after airflow stops
- SnapLamp™ feature reduces bulb costs by reusing the handle
- LED bulb change indicator
- **L86-488** is coil irradiation unit that mount in supply side air duct or downstream from air conditioner cooling coils and reduces mold on coil surfaces and drain pans

Specifications:

- Outside duct operating temperature: 30°F to 120°F
- Duct mounted operating temperature: single and two-lamp operating temperature: 30°F to 120°F; coil-irradiation unit operating temperature: 30°F to 170°F in moving air, 30°F to 120°F in still air
- Electrical supply: power cord that plugs into 120VAC electrical outlet

In-Duct UV Air Purifiers

SANUVOX

- For residential and light commercial applications
- Turbulator slows, twists and mixes contaminated air around a proprietary UV "J" lamp, increasing the time contaminants are exposed to UV light and maximizing amount of bacteria killed
- 19mm UVC/UVV quartz germicidal lamp
- Aluminum reflecting tube contains and reflects the UV energy back onto the air
- **L80-892** has smart voltage ballast that automatically switches from 110 to 240V and a 3" LCD screen that displays real-time system status
- **L81-287** is 110/240V with a multi-color LED status display and microprocessor controlled Thermistor for automatic operation
- CSA/NRTL certified

Bypass Humidifiers

- Furnace blower moves air through water panel where humidity is generated
- Installs on supply or return plenum
- Includes built-in bypass damper
- Plenum opening dimensions: 10" W x 12-3/4" H on **B84-262**,**B85-646**, **B84-265** and **B84-266**; 9-1/2" W x 9-1/2" H on **B84-263** and **B84-264**
- **B84-262**, **B84-263** and **B84-265** utilize an outdoor sensor and automatic digital humidity control (convertible to manual mode) that displays humidifier status
- **B84-262** and **B85-646** feature evaporative technology that uses 100% of the water; perfect for homes with septic systems or where a floor drain is not available
- **B84-263** and **B84-264** are economy units designed for smaller homes
- Output in gallons/day

Honeywell Home

TrueEASE™ Evaporative Humidification Systems

- Interchangeable bypass eliminates the need to disassemble and rebuild a humidifier if the bypass direction needs to change
- User-friendly pad replacement is accessible from the front and either side of TrueEASE™ Bypass models, and the easy, slide-out design means there's no disassembly
- Advanced models include a timer-based solenoid which wets the pad only as needed, reducing water waste by 30-50%
- H6062A1000 HumidiPRO™ Digital Control with Window Protection
- Output in gallons/day

Honeywell Home

Fan-powered Flow-through Humidifier

- Fan-powered flow-through humidifiers work best with variable speed, multistage furnaces, which reduce airflow during extended runtimes when only the first stage of heat is operational
- The internal fan acts as a booster to the furnace blower during reduced airflow cycles

Order #	Mfg. #	Each
B87-532	HE365A1000/U	**885.00**

Honeywell Home

Electrode Steam Humidifier

- Includes HumidPRO™ digital humidity control and also works with Honeywell VisionPRO® 8000, Prestige® IAQ and Lyric™ thermostats to maximize flexibility to integrate to any system
- Duct-Mountable steam humidifier enables replacement and new installation opportunities
- Easy access wiring for rapid installation
- Pre-salted canister and advanced system logic for optimized humidifier performance
- 5 year warranty

GENERALAire

Manual and Auto Humidifiers

A B

- Low profile cover ensures heated air goes directly through the Vapor Pad® at its warmest point
- Distributor ensures even water saturation over the entire Vapor Pad® for maximum humidity output
- Frame profile is thinner, exposing more of the saturated Vapor Pad® for maximum humidity output
- Easy snap stable cover allows for quick access to Vapor Pad
- Stainless steel disributor tube allows for either cold or hot water supply
- Left or right bypass installation options
- Left or right solenoid valve installation option
- MHX3 manual control or GRX3 digital automatic humidistat is included
- Output in Gallons/Day

Steam Humidifiers

A B

- Electrode technology — proven more effective to generate steam; requires no cleaning
- Easy installation — remote or duct mount applications with no additional accessories
- Easy to maintain — simply remove canister and replace
- Dispersion technology prevents condensation in the duct
- Drain water flushes with fresh inlet water
- Can be used with any condensate pump
- Water filtration never required
- Includes: control; 6' commercial grade steam hose; 10' drain hose and dispersion tube
- **B87-229** will not work with water that has been artificially softened with a water softener

- Relay Module for Smoke and "Smart Interconnect" CO Alarms
- Works with BRK and First Alert Smart interconnect models **G38-387**, **G38-391**, **G38-393**

Order #	Mfg. #	Description	Each
G38-388	RM4	Relay Module	**55.00**

Carbon Monoxide Detector with RealTest™ Technology

SYSTEM SENSOR

- RealTest™ Technology allows installer to test detector with CO gas
- Full compliance with UL 2075
- Code required trouble relay
- Wiring supervision with SEMS terminals
- Six-year end-of-life timer
- 12/24 VDC
- Current draw of 20mA in standby and 40mA in alarm
- Versatile mounting for wall and ceiling
- Electrochemical sensing technology

Order #	Mfg. #	Description	Each
G35-532	CO1224T	Carbon Monoxide Detector w/RealTest, 12 or 24 Volt	**225.00**

Google Nest Protect Smoke and CO Alarms

Nest Pro

- Nest Protect sends a message to everyone in the family when there's a problem or the batteries are low
- Nest Protect speaks up if there's smoke or carbon monoxide and tells where it is
- Every second counts – The foam and particle board in today's homes makes fires burn faster. Nest's Split-Spectrum Sensor looks for both fast-burning and slow-smoldering fires
- Nest Protect lights up as someone walk underneath it, to light the way at night
- Nest Protect tests its sensors and batteries over 400 times a day
- 10-year CO sensor lifetime

Warning: This product contains lithium batteries and cannot be shipped by air

E3Point Toxic and Combustible Gas Monitors

- Detects CO, NO2, O2, H2, H2S, CH4, C3H8
- Comes in standalone, standalone with remote (dual gas mode) or network versions
- Connects to analog or digital systems
- Connects to wired or wireless system (via 301CW wireless controller)
- Wall or duct mount, factory-calibrated cartridges
- Advanced electrochemical (for toxic gases) and catalytic bead (for combustible gases) sensor performance

Order #	Mfg. #	Description

Wall-Mount Horns and Strobes

SpectrAlert® Advance

- Intended for primary signaling use
- Universal mounting plate included
- Field selectable horn tones
- Automatic selection of 12 or 24V operation at 15 and 15/75 candela
- Meets ADA signaling requirements
- **G32-676** is weatherproof (NEMA 3R)
- **G32-675**, **G32-676** and **G32-679** have candela options of 15, 15/75, 30, 75, 95, 110 and 115

SYSTEM SENSOR

Duct Smoke Detectors

A

B

- Patented interconnect feature for multi-fan shutdown
- Photoelectric low-flow technology allows operation in airflow speeds of 100 to 4,000 feet per minute
- Test/reset button allows testing with the cover on
- **G35-090** has a 2:1 sensor-to-power capability allows monitoring of two sensors and the ability to mount in square or rectangular configuration
- **G35-090** has a patented tool-free front or back install of sampling tube
- **G35-090** includes integral Low-Flow technology capable of air velocities from 100 to 4000 FPM, ideal for VAV and fire/smoke damper applications
- **G35-149** features a watertight NEMA 4 rating for protection against dirt, rain, windblown dust and slashing water — ideal for rooftop applications

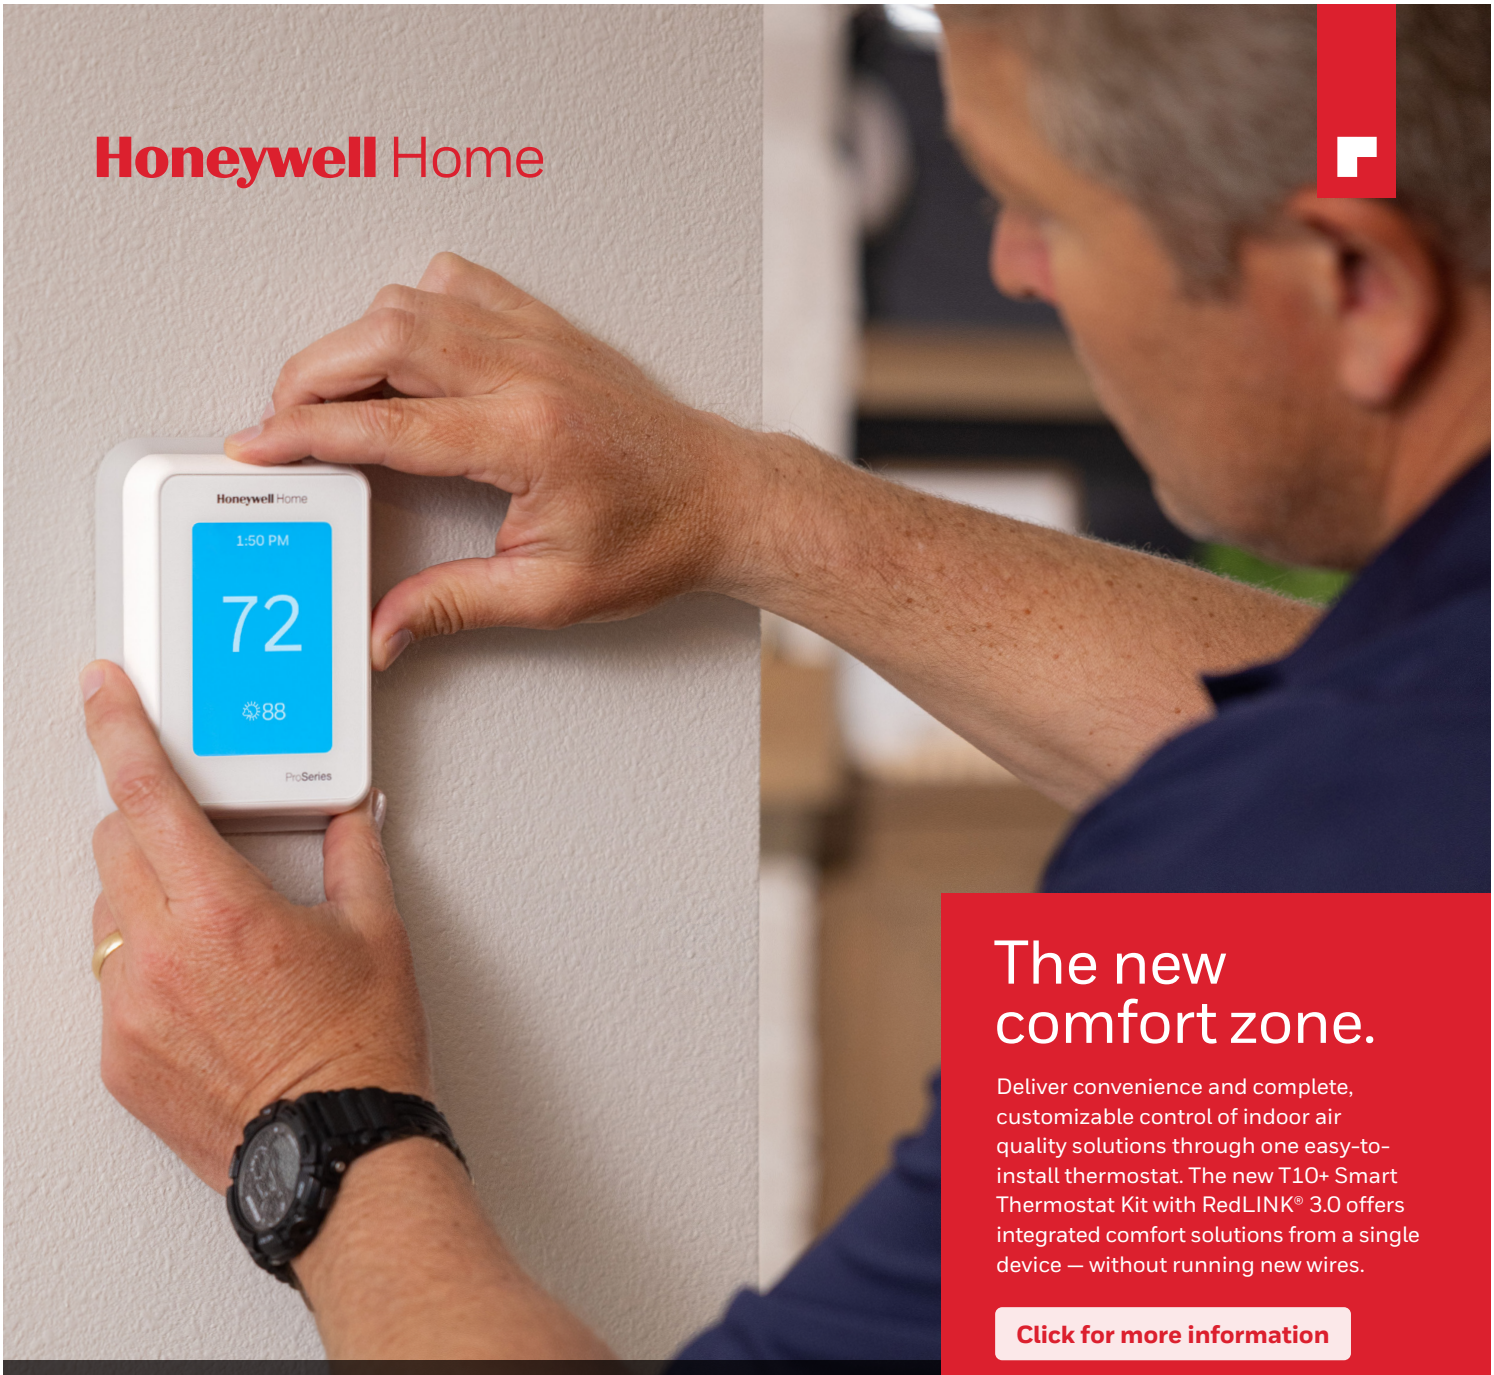
Honeywell Home



The new comfort zone.

Deliver convenience and complete, customizable control of indoor air quality solutions through one easy-to-install thermostat. The new T10+ Smart Thermostat Kit with RedLINK® 3.0 offers integrated comfort solutions from a single device — without running new wires.

Click for more information

Simple Setup

- On-thermostat configuration, sensor pairing and WiFi connection process help streamline setup
- Quickly register devices using QR codes

Deliver Convenience

- RedLINK 3.0 sensors feature a 200-ft. range from the thermostat to the sensor, which is greater than the advertised range of other sensors
- Homeowners can monitor and update comfort settings from the thermostat or Resideo app

Direct Connection

- Through the Resideo Pro app, you can enhance current services or enable additional services that may lead to increased revenue streams
- Pro-IQ™ Services allows you to improve reach with in-app branding, easily connect with customers in need and stay alert of potential HVAC issues before they become a problem

T6 Pro Thermostats

- **L49-155** and **L49-156** are WI-FI Capable
- Available with optional ventilation control and dual fuel capabilities for residential new construction projects that need to meet the ASHRAE 62.2 standard
- Program a schedule or use location-based control with geofencing technology, uses smartphone location to save energy when away from home and make the home comfortable
- Large, clear backlit digital display

T10+ with RedLINK Smart Thermostat and Accessories

Honeywell Home

- Connected thermostat with both Wi-Fi and RedLINK capabilities
- Geofencing and flexible programmability
- Remote comfort control via computer, tablet or smartphone
- Wireless Equipment Interface Module works with T10+ Pro Smart thermostat to allow for control of up to 4 Heat/2 Cool heat pump systems, up to 3 Heat/2 Cool conventional systems, or IAQ products
- RedLINK 3.0 indoor sensors for T10+ sense indoor temperature, humidity and motion
- 200' range transmits through most building materials to the T10+ thermostat
- RedLINK 3.0 outdoor Air Sensor offers reliable performance in any climate
- Kits include: thermostat, EIM, wireless sensors
- 5-year warranty

Warning: This product contains lithium batteries and cannot be shipped by air

Prestige IAQ Kits and Thermostats

A

B

C

- Works in Residential and Light Commercial applications
- 60% smaller than original Prestige
- Connects to the Internet to provide remote access from PC, smart phone or tablet using **L46-108** Honeywell's RedLINK Internet Gateway (RIG)
- Three assignable outputs for Indoor Air Quality and staging control
- Customizable service reminders
- 2-Wire installation with Equipment Interface Module
- Delta T Alerts and Diagnostics inform users when the system is not operating as expected
- USB port allows downloading of installer settings to quickly and consistently perform setup of thermostats in similar applications
- RedLINK enabled to communicate with optional RedLINK Internet Gateway, Wireless Outdoor Sensor, Wireless Indoor Sensor, Portable Comfort Control, Exit/Entry Remote and Vent and Filter Boost Remote
- Thermostats date code of 1546 or newer are compatible with **L48-822** Equipment Remote Module

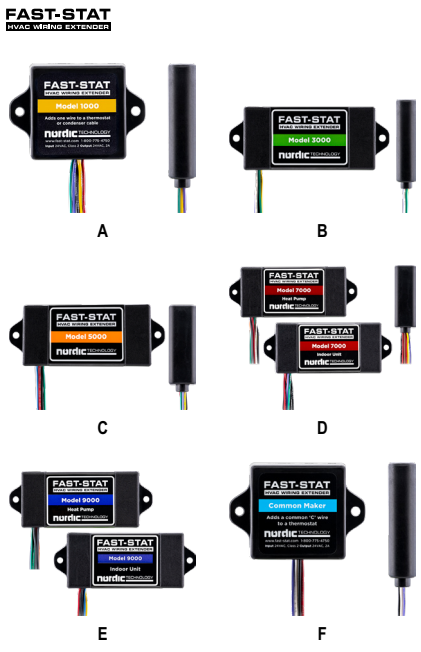
L50-842	TH1110E1000/U	24 Vac systems, single stage heat + cool systems. Gas, Oil, Electric, or Steam / Gravity Systems. Single stage heat pumps without aux heat.	1/1	Battery or Hardwired	White	**75.00**

Fast-Stat Wiring Extenders



A B C D E F

- Upgrade or add equipment without pulling new thermostat or condenser cables
- Reliable wired (not wireless) system operates over existing thermostat or condenser cables — no programming or batteries required
- **L41-963** provides 2 functions over 1-wire, can be used anywhere an extra wire is needed; convert from single-stage A/C to 2-stage A/C when transformer is added at the outdoor unit (provides R,C, Y1, and Y2 with a 2-wire condenser cable)
- **L41-964** provides 3 functions over 1-wire, used to add A/C to a heating system, many other uses as well
- **L41-965** provides up to 5 functions over 1-wire, used to add wiring between a thermostat and indoor unit
- **L41-966** is designed for A/C to heat pump conversions; it is a 3-part kit that adds wiring from the thermostat to the indoor and outdoor units; it has a built-in fossil fuel kit (optional use)
- **L45-135** is a 2-part kit used to add wiring between the indoor and outdoor units when converting to a heat pump; it has a built-in fossil fuel kit (optional use)

Fig.	Order #	Mfg. #	Description	Each

The Round® Mercury-Free Thermostats

Honeywell Home

- Mercury-free electronic switch
- Manual changeover
- **L41-489** has an enlarged scale and raised numbers for easy viewing and setting

Specifications:
- Electrical rating: 20 to 30VAC
- Temperature range: 40°F to 90°F
- Dimensions: 3-11/16" diameter x 1-3/4" D

Warning: This product contains lithium batteries and cannot be shipped by air

Prestige IAQ Kits and Thermostats

A

B

C

- Works in Residential and Light Commercial applications
- 60% smaller than original Prestige
- Connects to the Internet to provide remote access from PC, smart phone or tablet using **L46-108** Honeywell's RedLINK Internet Gateway (RIG)
- Three assignable outputs for Indoor Air Quality and staging control
- Customizable service reminders
- 2-Wire installation with Equipment Interface Module
- Delta T Alerts and Diagnostics inform users when the system is not operating as expected
- USB port allows downloading of installer settings to quickly and consistently perform setup of thermostats in similar applications
- RedLINK enabled to communicate with optional RedLINK Internet Gateway, Wireless Outdoor Sensor, Wireless Indoor Sensor, Portable Comfort Control, Exit/Entry Remote and Vent and Filter Boost Remote
- Thermostats date code of 1546 or newer are compatible with **L48-822** Equipment Remote Module

Warning: This product contains lithium batteries and cannot be shipped by air

CommercialPRO® 7000 Programmable Thermostat

Honeywell Home

- 7-day programming with two occupied and two unoccupied periods per day
- Large backlit display
- Auto or manual changeover
- Easy-to-use menu driven programming
- Title 24 commercial code compliant with override button control and pre-occupancy purge
- Commercialized control algorithm for accurate control

Specifications:
- Electrical rating: 20 to 30VAC
- Temperature range: 40°F to 90°F (heat); 50°F to 99°F (cool)
- Dimensions: 6" W X 3 3/4" H X 1 3/8" D

Warning: This product contains lithium batteries and cannot be shipped by air

SuitePRO™ Digital Fan Coil Thermostats

Honeywell

- Digital display of ambient temperature, setpoint, mode icons when cooling or heating relays operate, when energy savings mode is active and fan status
- Four buttons allow manual control of system operation, fan speed and temperature setpoint adjustment
- VersaSpeed™ fan ramp algorithm automatically adjusts low, medium, high fan speed
- Optional freeze protection feature that turns on heat, if necessary
- Activity sensing algorithm sets back thermostat to economy mode
- Energy savings mode — external energy savings input from dry contact such as time switch, occupancy sensor or hotel cardkey overrides comfort setpoint with selectable setback heating or cooling setpoints
- Proportional plus integral (P+I) control algorithm for precision temperature regulation
- Optional remote temperature sensor

Specifications:
- Electrical rating: 24VAC rating: fan: 1.0A, relay: 1.0A; 120VAC rating: fan: 6.0A, relay: 1.0A; 240VAC rating: fan: 3.0A, relay: 1.0A Temperature range: 50°F to 90°F Dimensions: 5-13/16" W x 3-13/16 "H x 1-1/8" D

Commercial ZonePRO Modulating Thermostats

Honeywell

- Modulating (TB6980), floating (TB7980) or standalone control for VAV zones
- Can be used in any application requiring floating or analog control of an actuator
- Energy saving features include night setback input, range stop temperature limits and timed occupancy override
- Range stop temperature limits for setting maximum and minimum setpoints
- Timed occupancy override (2 hours)
- Single and multi-output models available

Specifications:
- Power supply: 24V
- Auto changeover deadband: 9ºF
- Temperature range: 50º F to 95º F
- Dimensions: 2.7" W x 4.6" H x 1" D

EConnect™ Comfort Control Systems

A

B

- Wireless programmable/non-programmable line volt thermostat kit with RedLINK
- Convenient wireless control from the floor to the wall
- Compatible with baseboards, convectors and fan-forced heaters
- One thermostats controls up to eight baseboards in a room
- Works with RedLINK Internet Gateway, Portable Comfort Control and Wireless Outdoor Air Sensor

Applications:

- System application: Electric, baseboard, convector or fan-forced heater
- Temp. Range: 32°F - 122°F
- Differential temp: 1°F
- Volts: 100 to 240VAC
- Color: white

Line Voltage Thermostats

Honeywell Home

- Provides reliable line voltage control of resistive rated electric heating equipment
- Snap-action switch makes heating circuit on temperature fall
- Replaces virtually any two-wire (**L39-736**) or four-wire (**L39-737**) line voltage wall-mounted electric heating thermostat

Specifications:
- Temperature range: 40°F to 80°F
- Electrical ratings (resistive): 22A at 120/208/240VAC; 19A at 277VAC
- Dimensions: 2-3/4" W x 4-1/2" H x 2-1/4" D

Order #	Mfg. #	Switch Action	Color	Each

Line Voltage Thermostats

Honeywell Home

- Provides precise line voltage control of resistive-rated electric heating equipment including fan-forced and baseboard electric heaters
- Mounts directly on vertical 2" x 4" outlet box, or on 4" x 4" box
- **L39-739** includes positive off

Specifications:
- Temperature range: 50°F to 80°F with 2°F differential
- Electrical ratings (resistive): 22A 120/208/240VAC; 19A 277VAC
- Dimensions: 4-1/2" H x 2-7/8" W x 2-5/8" D

Heavy-Duty Line Voltage Thermostat

Honeywell

- Used for direct control of fan coils, fans, motor starters, valves, contactors and circulators in heating and/or cooling systems
- Removable setpoint knob locks setpoint and prevents tampering
- Locking cover

Specifications:
- Temperature range: 46°F to 84°F
- Electrical ratings: 120-240VAC; 50/60 Hz

Order #	Mfg. #	Switch Action	Each
L40-054	T6052A1015	SPDT	**1045.00**

Medium-Duty Line Voltage Thermostat

Honeywell

- Provides line voltage control of valves, motors, contactors, electric heat elements, duct furnaces and fan coil units
- Mounts on standard vertical or horizontal outlet box
- Automatic cooling and heating anticipation
- Includes thermometer, range stops, locking cover screws, wall plate and horizontal scaleplate without thermometer
- Switch breaks heating and makes cooling on temperature rise

Specifications:
- Temperature range: 44°F to 86°F
- Electrical ratings (resistive): 22A @ 120 to 240VAC; 19A @ 277VAC
- Dimensions: 2-15/16" W x 4-1/2" H x 1-1/2" D

Line Voltage Thermostats

- Snap action bimetal switch
- Convenient snap-off cover with comfort zone indicator
- Temperature range: 50°F to 90°F
- Electrical ratings: 22A, 125/208/240/277VAC
- **L37-725** has thermometer on face plate

Mechanical Temperature Controls

PECO

- Rugged temperature regulating controls for single-stage and two-stage control of heating, ventilation, air conditioning and refrigeration equipment
- Weather and corrosion resistant design allows use in harsh environments, including water spray, high humidity and applications where external formation of ice occurs
- Complies with N.E.C. 547 and NEMA 4X requirements
- Available in local sensing and remote bulb models

Specifications:

- 120VAC – 16 FLA; 80 LRA; maximum resistive load 25A; maximum pilot duty 125VA
- 208VAC – 13.2 FLA; 66 LRA; maximum resistive load 25A; maximum pilot duty 125VA
- 240VAC – 12 FLA; 60 LRA; maximum resistive load 25A; maximum pilot duty 125VA
- 277VAC – 10 FLA; 50 LRA; maximum resistive load 22A; maximum pilot duty 125VA

Thermostat Guards

Honeywell Home

- Patented, double-wall construction makes guard more tamper-resistant
- "Fail Safe" locking mechanism — key can be removed only when in locked position
- Mounts vertically or horizontally
- Vents in guard base allow airflow for optimum thermostat performance
- Includes opaque plastic wallplate, ring base, guard cover, tumbler lock, two keys and Honeywell stick-on logo
- Dimensions listed are inside dimensions

Thermostat Guards

mars

- Provides complete enclosure protection
- Air circulating ports on all sides to ensure proper thermostat operation
- Single key can be used on all guards

Note: L36-655, **L36-858**, **L39-603** and **L37-374** are constructed of high-impact plastic with metal locks; add 1/4" to depth dimension when using ring base. **L36-961** (Ring Base), **L36-654** (Solid Base) and **L39-604** (Solid Base) are constructed of 8/22 gauge steel for rugged applications. **L49-584** is keyless and uses a combination lock with changeable code.

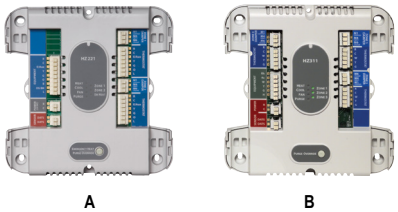
TrueZONE Panels



- Variable-speed fan control reduces blower speed in cooling when one zone is calling
- Push-in terminal blocks, color-coded labels and flexible wire routing can cut installation time in half
- Smaller Footprint
- Volts: 24
- **L43-884** and **L43-885** have a digital display that guides the installer through setup and checkout
- **L43-885** is expandable up to 32 zones
- **L44-526** is heat pump compatible only
- **L44-527**, **L80-115**, **L80-116** and **L80-117** zoning kits include zoning panel, transformer and C7735A discharge air temperature sensor

Note: Pair **L43-885** with **L82-631** (TAZ-4H/U for systems where more than 4 zones are required

Fig.	Order #	Mfg. #	Description

Honeywell Home

Wireless Zoning Systems

- Powered by RedLINK™
- No interference with other wireless devices in the home
- Choose from programmable or non-programmable kits; kit includes: wireless adapter
- Allows for wireless zoning when used with HZ432 or HZ322 TrueZONE™ panels (sold separately)
- Adapter receives communication from all wireless devices
- Wireless FocusPRO® thermostat
- Same great features of the FocusPRO® thermostats — now wireless
- 1-year battery life
- Displays outdoor temperature and humidity (outdoor sensor sold separately)

Order #	Mfg. #	Description
L44-538	YTH6320R1023	Wireless FocusPRO 5-1-1 Programmable Thermostat w/Wireless Adapter (Compatible with RedLink-Enabled TrueZONE Panels)
L44-539	YTH5320R1025	Wireless FocusPRO Non-Programmable Thermostat w/Wireless Adapter (Compatible with RedLink-Enabled TrueZONE Panels)
L44-542	THM4000R1000	Wireless Adapter used to make TrueZone Panels & TrueSteam Humidifiers Redlink Enabled

Honeywell Home

Zone Control Panel

- Can be easily added to the control configuration, usually with no additional equipment necessary
- Use multiple TAZ-4 Control Panels to control up to 32 zones

Order #	Mfg. #	Description
L82-631	TAZ-4H/U	4-Zone Add-A-Zone Panel Used with HZ432

Retrofit Round Dampers

Honeywell Home

- Designed for retrofit zoning systems, slides into existing ductwork
- Universal compatibility - powered on 24VAC circuit
- Easily expandable with 2.5VA actuator enabling up to 12 dampers on any Honeywell zone panel
- Easy Installation with visual position indicator, range stops and manual position adjustment

Order #	Mfg. #	Description
L87-232	RRD5	5" Retrofit Round Damper
L87-233	RRD6	6" Retrofit Round Damper
L87-234	RRD7	7" Retrofit Round Damper
L87-235	RRD8	8" Retrofit Round Damper

TrueZONE® Bypass Dampers

Honeywell Home

- Significantly cuts installation time by replacing the old weight system with a simple handle
- Installs at any orientation at any angle
- Provides constant pressure relief regardless of the blower speed
- 4 sizes meet the needs nearly all applications

Order #	Mfg. #	Description
L81-213	CPRD8	8" Round Constant Pressure Regulating Bypass Damper (Bypass up to 600 CFM)
L81-214	CPRD10	10" Round Constant Pressure Regulating Bypass Damper (Bypass up to 1000 CFM)
L81-215	CPRD12	12" Round Constant Pressure Regulating Bypass Damper (Bypass up to 1400 CFM)
L81-216	CPRD14	14" Round Constant Pressure Regulating Bypass Damper (Bypass over 1400 CFM)
L46-659	CPR8	Replacement Regulator for CPRD8
L46-660	CPR10	Replacement Regulator for CPRD10
L46-661	CPR12	Replacement Regulator for CPRD12
L46-662	CPR14	Replacement Regulator for CPRD14

Automatic Round Dampers

Honeywell Home

- Features galvanized steel with single-blade damper, which closes off tightly against gasket for minimal leakage
- Designated as power closed/spring return open damper for use with Honeywell Zoning Systems
- Can be field-converted when used as an independent zone or for fresh air intake
- Rated to operate up to 1 in.W.C.
- **L81-631** and **L81-632** are used for fresh air intake for ventilation or for combustion makeup air

Honeywell Home

Parallel Blade Dampers

- 24V, power close/spring return open dampers used to control circulating air in HVAC systems
- Damper can be installed in any orientation (mounting side can be on either the bottom or the side of the duct)
- Mechanical visual position indicator for damper status
- Solid construction using extruded aluminum frame and blades
- Parallel blade design for low leakage performance
- Simple, easy-to-wire, two-wire installation

Zone Control Panels

- Zone panels can be used with programmable or non-programmable, digital or mechanical thermostats
- Compatible with 2 or 3-wire dampers
- LED status indicators
- Fan purge
- Short cycle protection
- Dual fuel operation (**L40-219** and **L40-220**)
- **L40-220** is universal - works with heat pump or heat/cool, single stage or multi-stage, gas or electric
- **L41-742** simplifies installation when the number of dampers exceeds fuse rating of the zone panel

Round Dampers

- Features the exclusive Flexible Link™ design
- Supports bypass or controlled pressure relief
- Rigid spiral shell
- Two-wire, normally open

Order #	Mfg. #	Description
L86-692	6606	6" Round Damper
L86-693	6608	8" Round Damper
L86-694	6610	10" Round Damper

L86-695	6612	12" Round Damper
L86-696	6614	14" Round Damper
L86-697	6616	16" Round Damper

Retrofit Round Damper

- Spring-return damper, designed for use in 6" round branch duct
- Allows zoning installation without costly duct modification
- High-resolution LED on the damper lights when closed, simplifying system checks and trouble-shooting
- Requires 10VA @ 24V

Order #	Mfg. #	Description
L87-259	6706	6" Retrofit Round Damper

AprilAire

Parallel Blade Dampers

- Features the exclusive Flexible Link™ design
- Supports bypass or controlled pressure relief
- Constructed of heavy-duty aluminum frame and blades with galvanized faceplate

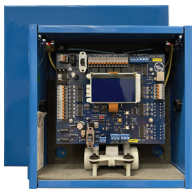
Arzel Zoning



HeatPumPro™ Control Panels

- For any heat pump, furnace, air conditioner or variable speed equipment
- Menu driven “Set-up Wizard”
- Displays all operations at a glance
- Works with standard 4-wire thermostat
- Proactive staging with outdoor reset
- Dual fuel control
- Leaving air temperature and outdoor sensor included
- Modulating bypass port

Packard

Control Transformers

- These Class 2 rated, inherently limited transformers easily mount for use with low voltage control circuits
- Designed for over 60,000 hours of continuous use under normal load conditions
- 8" wire length
- UL listed except **L37-560** and **L37-561**
- **L37-103** includes built-in fuse
- **L37-310**, **L37-560** and **L37-561** include manual reset overload
- **G33-064** comes with 2 mounting plates with different bolt patterns

Industrial Control Power Transformers

- Epoxy encapsulated coils protects against moisture, dust, dirt and industrial contaminants
- Two jumper links can be wired for dual primary voltages
- Silicon steel laminations to minimize core losses
- Copper magnet wire
- UL listed, CSA certified
- Heavy gauge steel mounting brackets

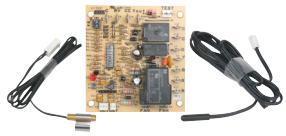
Demand Defrost Control Kit

WHITE-RODGERS

- Demand defrost algorithm "self-calibrates" to the heat pump system
- LED diagnostic display
- Compressor short-cycle protection
- Dipswitch-selectable defrost termination temperature (50/60/70/80°F)
- Replaceable ambient and coil temperature sensors
- Includes high- and low-pressure switch inputs with multi-strike lockouts for additional compressor protection



Order #	Mfg. #	Volts	OEM Replacement for	Each
B19-026	47D43-811	24 VAC	Rheem	**115.00**

Universal Heat Pump Defrost Control

WHITE-RODGERS

- Replaces virtually all single stage defrost controls
- Selectable demand or timed defrost
- Universal mounting with rotating display
- Preconfigured for major OEM brands
- Integrated indoor thermostat
- Access set up and diagnostic menus from any orientation
- Brown out and short cycle protection

Order #	Mfg. #	Volts	Each
L47-933	47D01U-843	24 VAC	**269.00**

Universal Heat Pump Defrost Control

resideo

- Defrost control for single stage on/off heat pumps
- Provides control of the outdoor equipment; compressor contactor, reversing valve, and outdoor fan in response to thermostat requests and air and coil temperatures
- Replaces more than 260 OEM defrost controls

Order #	Mfg. #	Volts	Each
B21-262	DB7110U1000/U	24 VAC	**355.00**

BC Blower Control

Supco

- Increase heating efficiency by delaying the ON and OFF cycle of blower fan
- Control voltage: 24 VAC
- Relay contacts: SPST
- Blower on time: 0-240 seconds adjustable
- Blower off time: 0-240 seconds adjustable

Order #	Mfg. #	Each
L47-609	BC7070	**109.00**

Fan Control Centers

ICM CONTROLS

Made in USA

- OEM replacement control circuit boards for circulating fans in heat pumps, air conditioning units and forced-air systems
- Dual function fan delay timer
- OFF delay purges ducts of residual air
- ON delay allows air to reach the proper comfort level prior to energizing fan
- Input voltage: 18 to 30VAC

Order #	Mfg. #	OEM Replacement for	Switch Action	Primary Voltage	Secondary Voltage	Time Delay	Volts	Each
L38-651	ICM271C	Robertshaw: 695-100; Carrier: CES0110017, CES0110018; Carrier/BDP: HH84AA010, HH84AA011, HH84AA012, HH84AA013, HH84AA020, P771-7002, 302075-3	Relay	120VAC	18-30VAC	HEAT BLOWER ON: 75 sec., HEAT BLOWER OFF: 105 sec., COOL BLOWER OFF; 90 sec.	18-30VAC	**235.00**

L43-835	ICM277C	Goodman: B1370735S	Relay	—	18-30VAC	ON: 7 sec., OFF: 65 sec.	18-30VAC	**175.00**

Fan Blower Controls

- Controls the circulating fan in heat pump, air conditioning and forced air systems
- Timer continues to run the fan at the end of the heating/cooling cycle, thereby purging ducts of residual air and increasing system efficiency

Furnace Control Module — Lennox

- Direct replacement for OEM control boards
- Controls inducer fan motor, blower fan and monitors limit switches
- Functions with all 24VAC thermostats
- Microprocessor based

Order #	Mfg. #	OEM Replacement for	Switch Action	Primary Voltage	Secondary Voltage	Time Delay	Volts	Each
L45-172	ICM289	Lennox: Replaces all BCC1, BCC2 & BCC3 Control Boards Including 48K98 & 45K48	Relay	120VAC	18-30VAC	COOL BLOWER ON: 1 sec., COOL BLOWER OFF: 1 sec., HEAT BLOWER ON: 45 sec., HEAT BLOWER OFF: 90,150, 210 or 270sec.	24 and 120VAC	**409.00**

Fan Control Centers

- Provides low voltage control of line voltage fan motors and auxiliary circuits in heating, cooling or heating/cooling circuits
- Provides overload protection for transformer
- Mounts on standard 4" x 4" junction box
- Includes relay enclosure

Specifications:
- F/L Amps @ 120V/240V: 12A/6.9A
- LR Amps @ 120V/240V: 72A/41.4A

Order #	Mfg. #	Switch Action	VA Rating	Primary Voltage	Secondary Voltage	Relay	Each

Furnace Control Module-Carrier

- Controls gas valve, ignitor, blower motor, inducer, humidifier and air cleaner
- Microprocessor precision
- Twinning compatible with another ICM2807 control
- Reverse polarity detection
- Secondary brownout voltage protection
- Diagnostic LEDs

Order #	Mfg. #	OEM Replacement for	Switch Action	Primary Voltage	Secondary Voltage	Volts	Each

RBM Type 84 and 184 Switching Relays

WHITE-RODGERS

- Used for switching single- or two-speed fan motors, solenoids, relays, resistive loads and general purpose switching
- Temperature range: -40°F to +150°F
- **L37-098** and **L37-100** are heavy-duty relays with 48A inrush ratings that allows for use in circuits with greater loads
- 8A inductive rating @ 250V; 25A inrush @ 250V

Switching Relays

- For refrigeration and air conditioning equipment, appliances, vending machines, electric furnaces and other applications
- Contacts rated for voltages up to 600VAC
- Base designed for easy replacement
- **L39-731** and **L39-732** are heavy-duty

Specifications:
- Maximum ambient temperature: 155°F
- Contact ratings (power rated): 15A resistive @ 120VAC and 208/240/277VAC, 10A resistive @ 480VAC, 5A resistive @ 600VAC
- Contact ratings (pilot duty): 3VA @ 24, 120, 480VAC (minimum); 25VA @ 24VAC, 125VA @ 120, 240 and 480VAC (maximum); 3A @ 277VAC (resistive)
- Powerpile (millivoltage) for R4222 and R8222 only: the normally open pilot duty contacts are rated 0.25A @ 0.25 to 12VDC
- Dimensions: 2-5/32" W x 1-7/8" H x 2-3/8" D

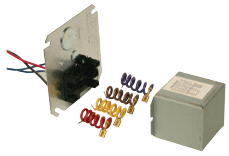
Plate-Mounted Relay Receptacle

- For installing R4222, R8222, R4228 and R8228 relays on junction boxes
- Use with appropriate relay and **L36-288** or **L36-289** transformer
- Includes cover and eight leadwires



Order #	Mfg. #	Each
L39-719	Q633A1007	**129.00**

Enclosed Power Relays

- For use with 1 to 3 HP motors, fans and pumps
- LED relay status indicator
- NEMA 1 rated housing
- Wire length: 16"
- **L39-100** and **L39-101** have dual voltage coils
- **L39-101** has an HOA override switch
- **L39-106** includes both relay and enclosed adjustable current sensor (adjustable from 0.5A to 20A)

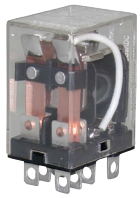
General Purpose Plug-In Relays

A



B

C

- Versatile and rugged general purpose relays for use in smaller energy conversion systems such as vending machines, small motors and pumps, HVAC systems, lighting and other applications
- Totally enclosed compact cube style
- UL recognized and CSA approved in addition to various International/European standards
- Pin configurations differ among relays; carefully check relays and sockets before installation
- **L38-130** and **L38-131** are 13A relays, arc barrier equipped with high dielectric strength, silver cadmium oxide contacts and a plug in square base with spade terminals, replacing Aromat, Omron, Struthers-Dunn and others
- **L38-132** through **L38-149** are 10A relays with a compact design, capable of breaking relatively large load currents, with a plug in octal base, silver nickel contacts and includes mechanical indicator and push-to-test buttons, replacing IDEC, Potter & Brumfield, Struthers-Dunn and Omron

General Purpose Plug-In Relays

A

B

- Totally enclosed relays ideal for vending machines, motors, HVAC systems, elevators and other applications
- 1500V dielectric strength with silver cadmium oxide contacts
- SKAP relays use **G22-786** socket and SKMP relays use **G32-226** socket
- Pin configurations differ among relays; carefully check relays and sockets before installation

Specifications:
- SKAP series: Contact rating — 13A resistive @ 28VDC, 120VAC; 10A resistive @ 240VAC; 1/3 HP @ 120VAC; 1/2 HP @ 240VDC
- SKMP series: Contact rating — 5A resistive @ 32VDC, 120VAC

Sockets For Plug-In Relays

- Octal Sockets (fig. A, B) have high impact plastic, has sealed back for surface mounting
- Square Sockets (fig. C, D) have high impact plastic, has sealed back for surface mounting
- Electrical Rating: 10A, 300VAC
- DIN rail mountable
- DIN Rail meets standard DIN dimensions: 1-3/8" W x 39" L x 1/4" D

Potter & Brumfield Enclosed Power Relays

- For applications requiring higher horsepower such as elevator control panels, manufacturing systems, pumps, motors and others
- Designed to control compressor loads to 3.5 tons
- DPST – N.O.
- 0.250" quick connect terminals

Specifications:
- 30A 120/277VAC resistive; 14 FLA, 60 LRA 240VAC with AC coil
- 2.5 HP 240VAC

Order #	Mfg. #	Coil Voltage	Each
L38-136	3TX7131-4CC13	24	**65.00**
L38-137	3TX7131-4CF13	120	**65.00**
L38-138	3TX7131-4CH13	240	**65.00**

Delay on Make Timer

- Time delay on start up or after a power outage
- Conformally coated for added protection

Specifications:
- Frequency: 50/60 Hz
- Power consumption: 2 watt maximum during timing
- Maximum output rating: 1.5A
- Minimum rating: 40mA
- In-rush: 15A

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B13-620	ICM104B	10 to 1,000 Sec. Adj.	18 to 30VAC	Solid State	**115.00**

Delay On Make Timer

- Delay on make timer designed for use in anticipator-type thermostat applications with resistors as low as 1.8K ohms
- Protects compressors against damage from rapid short-cycling
- Fixed or adjustable models
- Solid state reliability
- Epoxy-encapsulated circuitry

Specifications:
- Output: SPST N.O. 1.5A, 15A in-rush
- Time delay: Repeat accuracy ±2%

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B11-834	ICM102B	Adj. 0.03 to 10 Min.	18 to 240VAC	Solid State	**55.00**

Pressure Switch Bypass Delay On Make Timer

- Extends ON time switch closures
- Reduces nuisance lockout
- Adjustable time range: 12 to 390 seconds

Specifications:
- Input: 18 to 240VAC; output: SPST N.C. 1A maximum, in-rush 10A

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B11-974	ICM175B	10- 1000 seconds Adj.	18 to 240VAC	Solid State	**55.00**

Switch-Settable, Digital Delay On Make Timer

- Ideal for ice machines
- Simple two-wire hookup
- Digital timing circuitry
- Adjustable time range: 1 to 1023 seconds

Specifications:
- Input: 18 to 240VAC/VDC; output: SPST N.O. 1A maximum, in-rush 10A

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B11-970	ICM103B	1-1023 seconds Adj.	18 to 240VAC	Solid State	**65.00**

Delay on Break Timer

- Compressor lockout/anti-short cycle time
- Adjustable delay is ideal for stagger starting multiple units
- Conformally coated for added protection

Specifications:
- Frequency: 50/60 Hz
- Power consumption: 2 watt maximum during timing
- Maximum output rating: 1.5A
- Minimum rating: 40mA
- In-rush: 15A

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B13-624	ICM203FB	10 Min. Adj.	18 to 240VAC	Solid State	**85.00**

Delay On Break Timer

- Lockout delay prevents rapid short-cycling of compressors
- Will not energize unless control voltage is above 18VAC
- Anti-short cycle with lockout control
- Solid state reliability
- Epoxy encapsulated circuitry

Specifications:
- Input: 18 to 30VAC/VDC; output: SPST N.O. 1A, 10A in-rush
- Time delay: Repeat accuracy ±2%

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B11-838	ICM206B	3 to 10 Min. Adj.	18 to 30VAC	Solid State	**105.00**

Delay On Break Timer

- One model replaces many in field
- Universal voltage anti-short cycle timer
- Simple two-wire hookup
- Solid state reliability

Specifications:
- Input: 18 to 240VAC/VDC; output: SPST N.O. 1.5A, 15A in-rush
- Time delay: Repeat accuracy ±2%
- Range: 0.3 to 10 minutes

Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
B11-835	ICM203B	Adj. 0.03 to 10 Min.	18 to 240VAC	Solid State	**49.49**

ICM Universal Time Delay Relays

NEW

ICM Omni App Configurable

- Universal function programmable timers
- Uses near field communication in conjunction with a smart phone App
- Four or six different timer modes
- Adjustable time delay: 0-100 hours
- Solid State or Relay

A

B

Fig.	Order #	Mfg. #	Time Delay	Volts	Switch Action	Each
A	**B22-843**	ICM-UFPT-2	0-100 hours Adj.	24 to 240 VAC	Solid State	**99.00**
B	**B22-844**	ICM-UFPT-5	0-100 hours Adj.	24 to 240 VAC	Relay	**105.00**

PowerPRO Contactors

- Meet ARI 780/790 standard that requires 500,000 cycles of mechanical life, 200,000 cycles of electrical life and 10,000 cycles of recycle life
- Multiple input voltage range from 24/120/208/240 configurations
- Available in 25, 30, 40, 50, 60, 75 and 90 Amp configurations
- Hex screw and quick connects on units up to 30 A; lugs on units rated at 40 A and above
- Quick connects for coil termination

Order #	Mfg. #	Ind. F/L Amps	Poles	Coil Voltage	Res. Amps	Each	5 Lot
L46-526	C25GNF390B	90	3	240 VAC	90	**665.00**	**629.00**

1 and 2 Pole Definite Purpose Contactors

- Compact design with low VA coil
- Sealed housing keeps contaminants out and lowers noise
- Includes arc cover
- **L36-875**, **L36-876**, **L36-877**, **L36-881**, **L36-882** and **L36-883** are 1 pole contactors with terminal block to replace 2 pole

Contactor Accessories

- **L37-578** is a side mounted auxiliary kit that is heavy-duty pilot rated for 10A at 600VAC with standard pressure plate terminals
- **L40-774** and **L40-775** are side mounted snap switch auxiliary contacts with quick connect terminals

1+, 2, 3 and 4 Pole Definite Purpose Contactors

- In accordance with UL Bulletin No. 508 "Industrial Control Equipment," contactors meet specifications for devices up to 600 VAC
- Silver plated contact with cover
- Box lugs and spade terminals standard on all sizes
- Class B coil insulation
- UL recognized for the US and Canada
- Auxiliary switches and replacement coils available

SureSwitch™ Multi-Volt Contactor

- Multi-Volt design replaces single-phase contactors in A/C and refrigeration
- Multi-Voltage coil reduces truck stock and saves time
- 30/40A, 24/120/208/240 VAC; 1, 1.5 and most 2 pole contactors
- Totally sealed switch keeps out ants, pests and debris
- Brownout protection avoids low voltage stress on compressor
- 5-year limited warranty

Specifications:

- General ratings: Amps: 30/40(FLA) Coil: 24/120/208/240 VAC; Amps: 200 (LRA) Pole; 1 or 1.5, plus most 2 pole contactors

Time Start Fan Controls

CAM-STAT

- Replaces all F47TS series controls
- Special fan controls with a built-in "heat-assist" timer
- Time delay turns on the blower as a function of time and/or temperature after the room thermostat calls for heat
- Turns off the blower as a function of temperature at the indicated dial setting of the fan
- 25–60 second time delay @ 24V
- Electrical rating: Timer, "heat assist", 0.08A at 24VAC
- Pilot duty: 40VA at 30 and 120VAC

Order #	Mfg. #	Element Length	Fan Off Temp.	Fan On Diff.	Each

resideo

High Limit Controls

- Opens line or low voltage circuit and shuts off fan if air temperature reaches set point
- Manual reset
- May be used as a fire stat in ductwork
- Flat bimetal strip inserted directly into airstream actuates snap-acting, SPST, normally closed switch
- Dimensions: 2-5/16" W x 3-3/4" H x 2" D

Fan and Limit Controls

- Faster recognition of temperature changes means safer operation
- Wiring options include push-in connectors, female quick-connects, field add-on screw
- Manual fan switch allows continuous fan operation
- Pilot duty: 2A @ 24VAC; 0.25A @ 0.25 to 12VDC
- Fan ON range: 65°F to 215°F; fan OFF range: 50°F to 200°F
- High limit range: 100°F to 250°F; maximum temperature 350°F
- Dimensions: 3" W x 4-5/16" H x 2" D

Thermal Cut Offs

- For electric furnaces, heat pumps and duct heaters
- Complete unit is easily replaced rather than soldering the fusible link
- Known as “one-shot” or TCO, the cut off interrupts the electrical circuit when operating temperatures exceed the rated temperature
- Maximum 15A and 250VAC

Humidistat SPDT Switch

- For low or line voltage
- SPDT contact action provides control of humidifying or dehumidifying equipment
- Mounts on a flat surface or on a standard 2" x 4" outlet box
- Dial lock feature
- Range: 10% to 90% relative humidity
- Pilot duty: 125VA @ 120/240VAC

Order #	Mfg. #	Each
L36-821	W42AA-1C	**475.00**

Current Sensors

- Contact closes when current is sensed, perfect for activating power to humidifiers, air cleaners and other equipment
- SPST switch action
- NEMA 1 rated housing
- Includes removable mounting tab
- **L42-855** and **L42-856** include LEDs to show when sensor is over or under trip point
- Dimensions: 1.46" W x 2.05" H x 1.51" D (**L42-853**, **L42-854** and **L42-855**); 2" W x 2.52" H x 1.75"D (**L42-856** and **L42-857**)

Current Switch

- Solid core switches with fixed or adjustable trip points
- Low operating trip points
- LED status indication
- Integral DIN rail mounting flange
- Accepts up to a 350 MCM (17.3 mm) cable
- Operates up to 250A
- RoHS and WEEE Compliant
- Limited 5-year warranty

Order #	Mfg. #	Description	Range	Output
L44-391	CSS-C-F5-001	Solid Core "Go/No Go" Current Switch, Normally Closed	0-250A	0.15A at 300VAC/VDC

Current Transmitters

A

B

- Solid or split core loop-powered current transmitters for 4-20 mA models
- Integral DIN rail mounting flange
- Polarity sensitive output
- Accepts up to a 350 MCM (17.3 mm) cable
- Operates up to 250A
- True RMS versions are available
- RoHS and WEEE compliant
- Limited 5-year warranty

- Replaces 100 small footprint air switches

Order #	Mfg. #	Description	Each
L45-006	NS2-0000-03	Universal Air Switch	**129.00**

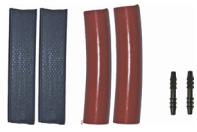
Barb Fitting

- Used with **L37-510** and **L37-511**
- Tube I.D. 1/4"; pipe size 1/8
- Lead free

Order #	Mfg. #	Each	10 Lot
R57-446	JS-LF3110104029826	**2.25**	**2.05**

Square Air Switch Tubing

- Square to avoid kinking
- Contains 5' of 3/6" ID no-kink air switch tubing
- 1800 max PSIG and temp range of -40°F to +300°F
- Meets ASTM D200
- The kit easily replace a corroded tube without replacing the entire tube
- Kit includes (2) Double barb fitting, (2) 3" square air switch tubing and (2) 3" square silicone tubing



Order #	Mfg. #	Description	Each
R58-794	SQAST-5	Square Tubing	**33.99**
R58-795	SQAST-KIT	Square Tubing Kit	**30.99**

Neoprene Air Tubing

- Temperature Range: 0°F to 160°F (-17°C to 71°C)
- Pressure Range: -20 to 20 in. W.C.

Order #	Mfg. #	Description	Each
R58-235	SNAT185	1/8" ID x 5'	**17.49**
R58-236	SNAT3165	3/16" ID x 5'	**13.99**
R58-237	SNAT316100	3/16" ID x 100'	**189.00**

Silicone Air Tubing

- NSF 51, Soft , Red
- Temperature Range: -100°F to +500°F (-73°C to +260°C)
- 5' rolls

Order #	Mfg. #	Description	Each
R58-232	SSRT185	.125" I.D. and 5/16" O.D. 25 PSI Working Pressure x 75 PSI Burst Pressure	**13.99**
R58-233	SSRT3165	3/16" I.D and 5/16: O.D.20 PSI Working Pressure x 60 PSI Burst Pressure	**13.99**
R58-234	SSRT145	1/4" I.D. and 3/8" O.D. 5 PSI Working Pressure x 15 PSI Burst Pressure	**13.99**

Multi-Purpose Air Flow Switch

- Used to sense low pressure or differentials of pressure on vacuum
- Field adjustable from 0.05" to 12.00" W.C.
- SPDT switch rated 15A @ 125/250/277VAC
- One 12" piece of 1/4" O.D. flexible tubing included

Order #	Mfg. #	Model #	Description	Switch Action	Type	Range	Includes
L36-817	RH3A9	RH3A9	Multi-Purpose Airflow Switch	SPDT	Adjustable	0.05" to 12.00" W.C.	One 12" piece of 1/4" O.D. flexible tubing

Dual Purpose Air Switch

- Responds to positive, negative or differential air pressure
- Field adjustable from .07" to 12" W.C.
- Switch action: SPDT
- Furnished with one 6" piece 1/4" O.D. flexible tubing, nuts and ferrules

Order #	Mfg. #	Temp. Range	Each
L39-558	770-1	-40°F - +180°F	**155.00**

Air Pressure Sensing Switch

- Senses positive, negative or differential air pressure
- Set point range: 0.05 ± .02" W.C. to 12.0" W.C.
- SPDT switch rated 15A @ 125/250/277VAC
- One 12" piece of 1/4" O.D. flexible tubing included

Order #	Mfg. #	Each
L39-312	AFS-222-201	**159.00**

Universal Air Pressure Sensing Switch

- Contains a glass-filled polycarbonate housing containing a sensing diaphragm and an integral snap-acting switch with three male 90° quick-connect terminals
- Can sense positive, negative or differential air pressure switch
- Field adjustable set-point range .10" W.C. to 10.0" W.C.
- Accessories can be applied to a wide variety of residential and light commercial applications

Order #	Mfg. #	Model #	Description	Switch Action	Type	Range	Temp. Range	Each
L46-987	2374-510	NS2-0000-08	Universal Air Sensing Switch Kit	Snap-acting	Glass-Filled Polycarbonate Housing	0.10" W.C. to 10.0" W.C.	-40°F to +190°F	**85.00**

Johnson Controls

Differential Pressure Switches

- For sensing air-flow in ducts
- Adjustable set point with scale
- Range in. W.C. (kPa): 0.05 to 5
- Sensitivity in. W.C. (kPa): **B13-738** — 0.04; **B13-739** and **B13-740** — 0.025

Order #	Mfg. #	Switch Action	Includes	Each
B13-738	P32AC-2C	SPDT	1/4" Compression Fitting, 4" Extension Tube, Gasket & "U" Mounting Bracket	**315.00**
B13-739	P32AF-1C	SPDT	"L" Mounting Bracket	**279.00**
B13-740	P32AF-2C	SPDT	1/4" Compression Fitting, 4" Extension Tube, Gasket & "U" Mounting Bracket	**289.00**

Honeywell Home

Sail Switch

- Activates equipment that is energized when fan is operating
- Designed for use in electric heating systems to prove minimum airflow
- Allows wiring of equipment independently of blower motor
- Senses vertical or horizontal airflow
- Normally open contacts make at 250 FPM, break at 75 FPM; normally closed contacts make at 75 FPM, break at 250 FPM
- Maximum ambient temperature: 125°F at switches, 170°F at sail
- Dimensions:3-3/4" W x 2-5/16" H x 2-1/8" D
- Switching action: SPDT

Order #	Mfg. #	Description	Each
L36-820	S688A1007	Sail Switch	**245.00**
L40-749	123773A	Replacement Sail	**85.00**

Dual Valve Combination Gas Controls

A

B

- Conforms to latest ANSI safety standards for redundant valves
- Two automatic valves meet dual safety shut-off code requirements
- First valve is solenoid-operated, second is diaphragm-operated
- Inlet and outlet pressure taps allow troubleshooting
- Easy pilot adjustment for optimum flame
- Natural to LP gas conversion kit included with all models except **L39-032**
- Reducer bushings included
- **L39-813**, **L39-815** and **L39-808** include Q340 thermocouple kit
- Wire connections: 1/4" male quick-connects

Combination Gas Controls

- Inlet and outlet pressure taps allow troubleshooting
- Easy pilot adjustment for optimum flame
- Diaphragm type main valve closes automatically if gas or power supply is interrupted
- Add separate energy cut-off where codes call for dual safety shutoff
- Angle flanges available for side tap applications
- Reducer bushing included
- **L37-018** uses a 750mV pilot generator
- **L39-807** and **L37-018** for natural gas only
- **L39-818** for LP only
- Temperature range: -40°F to +175°F

Dual Valve Gas Controls

resideo

- With VR8215 Direct Ignition Gas Valves, two valves replace 61 OEM and competitor controls
- The multipoise valves can be mounted in any direction and feature a 2.35" swing radius
- The direct ignition gas valves have capacities from 15 to 200 CFH natural gas

Intermittent Dual Valve Combination Gas Controls

resideo

- Gas valves for use in 24VAC, gas-fired, intermittent pilot appliances with capacities from 30 to 415CFH
- Use with S86F, H; S860D; S8600F, H; S8610 and S90A, B modules
- First valve is solenoid-operated, second is diaphragm-operated
- Conforms to latest ANSI safety standards for redundant valves
- Includes safety shutoff, manual valve, two automatic operators, pressure regulator and pilot adjustment
- All models are for natural gas

Specifications:

- Wiring connections: 1/4" male quick-connects
- Temperature range: -40°F to +175°F
- **L39-033**: Pressure regulator setting: 0.9" Step, 3.5" W.C.

Direct Ignition Dual Valve Combination Gas Controls

resideo

- Combination gas control for use with hot surface/direct spark systems in 24VAC, gas-fired appliances, with capacities from 30 to 415CFH
- Use with S89C,E,F and S87 series 5 and later control modules
- Conforms to latest ANSI safety standards for redundant valves
- Includes safety shutoff, manual valve, two automatic operators and pressure regulator

Specifications:

- Wiring connections: 1/4" male quick-connects
- Temperature range: -40°F to +175°F

Universal Electronic Ignition Gas Valves

- Wide-capacity control for almost any IP, HSI or DSI gas-fired appliances
- 1/8" NPT inlet and outlet taps on top of valve to allow adjustment in problem installations
- Multipoise mounting allows 0° to 90° installation
- Includes terminal block, pilot plug, two 1/2" x 3/4" reducer bushings and one 1/2" x 3/8" bushing (except **L41-696**)
- Temperature range: -40°F to +175°F

SmartValve™ Gas Controls

A

B

- For direct replacement of OEM installations
- Inlet and outlet pressure tap accessible through top of unit
- Low voltage hot surface element lights pilot quickly
- Flame rectification proves pilot flame before main gas flows
- Appliance automatically resets after gas or power outage
- Universal kits include natural to LP conversion and 3⁄4" to 1⁄2" bushings
- Universal family increases service efficiency and reduces truck and warehouse inventory

Specifications:
- Size: 1/2" inlet x 1/2" outlet
- Ignitor warm-up time: 5 seconds (nominal)
- Voltage and frequency: 24VAC, 50/60 Hz
- System transformer: 40VA minimum, NEMA rated
- Thermostat current: 0.2A

Note: Do not attempt to apply this control except as a direct replacement for the specific Honeywell models noted in the cross-reference chart on the next page.

Standing Pilot Gas Valves

WHITE-RODGERS

- Replaces over 600 OEM & Competitive models
- Ideal for general purpose replacement on Standing Pilot Systems
- Available with 24V or millivolt operators (depending on model)
- Straight through pattern design with or without side taps (depending on model)
- Valves can be mounted either vertically or horizontally
- Reducer bushings included

Specifications:

- Regulator adjustment range: 2.5" to 5" W.C., LP gas 7" to 12" W.C.
- Ambient operating range: -40°F to +175°F
- Reducer bushings included

WHITE-RODGERS

Direct Replacement Intermittent Ignition Valves

- Compact, multi-function replacement valves for Goodman, Amana, Carrier, York, Lennox and Trane
- Equipped with solenoid operated redundant valves
- Valves can be mounted vertically or horizontally
- **L41-798**, **L41-799**, **L41-800**, **L41-801** and **L41-972** use an on/off switch instead of a knob

Specifications:

- Regulator adjustment range: 2.5" to 5" W.C., LP gas 7" to 12" W.C., 4" to 9.5" W.C on **L41-800**, **L41-801** and **L41-972**
- Ambient temperature rating: -40°F to +175°F
- Includes reducer bushings kit, except **L44-645** and **L44-648**

700 Series Combination Control Valves

- For 24V and millivolt systems
- Manual gas valve with automatic safety pilot (except **L37-712** and **L37-262**)
- Mounts in any position, except upside down
- 24V valves include reducer bushings, LP adapter plate and built-in regulator set at 3.5" W.C.; LP adapter for millivolt valves available for purchase separately (see **L37-261**)
- **L37-712** and **L37-262** are 24V silent, electric, single function diaphragm controls without safety magnet for replacing solenoid gas valves
- **L38-367** is slow opening valve with auxiliary pilot lighting tube

Specifications:
- Pressure tap 1/8" NPT and pilot outlet 1/4" tubing

Redundant Multi-Function Gas Valve

- For use with all types of intermittent ignition systems
- Includes LP kit
- Direct replacement for the older White-Rodgers model 36E93-304, Carrier part# EF32CW233, EF32CW183
- May be mounted any direction other than upside down

Order #	Mfg. #	Volts	BtuH Capacity	Opening Style	Inlet Conn.	Outlet Conn.	Bushings	Each
L45-743	36C94-303	24 VAC	230,000	Slow	1/2"	3/4"	No	**465.00**

720 Series Dual Valve Controls

- Designed for 24V constant pilot applications
- Mounts in any position, except upside down
- **L37-640**, **L37-714** and **L37-715** have convertible regulator for mobile home use
- **L37-715** is convertible from 40% to full flow within 30 seconds
- **L37-714** is convertible from 25% to full flow within 30 seconds
- Meets all ANSI standards

Specifications:
- Dimensions: 4-1/8" W x 4-3/4" H x 2-29/32" D
- Ambient temperature: -40°F to +175°F
- Current: 0.2A
- Capacity: 150,000 BtuH (at 3.5" W.C.) is universal for replacing most residential equipment
- Pressure rating: 1/2 PSI maximum
- NEC: Class 2
- Power consumption: 5 watts
- Swing radius: 3-9/16"
- Six-function valves incorporate manual valve, safety shut off magnet, dual automatic valves, main gas regulator and pilot adjustments
- Features integral manual selector with four gas flow positions: OFF, ON, PILOT and SET
- SET provides pilot-only gas flow during magnet energizing and lockup

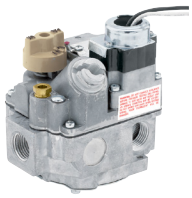
Line Voltage Combination Gas Valves



- Control combines manual valve (gas cock) and silent line voltage operator
- Tapered style gas cock
- Automatic pilot valve is separate from gas cock and provides gas shut off in case of pilot outage
- Electromagnet is field replaceable

Specifications:
- Voltage rating: 120VAC, 0.034A
- Pilot outlet: 1/4" tubing
- Cover type: For conduit connection
- Ambient temperature: -40°F to +175°F
- Side outlet connection for **L37-263** is 1/2", **L37-709** is straight through

Order #	Mfg. #	Inlet Conn.	Outlet Conn.	Pressure Setting	Each
L37-263	700-452	1/2"	3/4"	Natural Gas, 3.5" W.C.	**485.00**

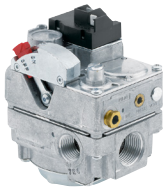
Hot Surface Ignition Valve



- Slow-opening feature
- 1/2" x 3/4" with pilot outlet
- Two 1/2" outlet plugs, one 3/4" to 1/2" reducer bushing included
- Pressure regulator is factory set 3.5" W.C., adjustable 3" to 7" W.C.
- Direct replacement for Rheem #60-22525-06
- For natural gas applications

Order #	Mfg. #	Inlet Conn.	Outlet Conn.	Pressure Setting	Each
L37-704	720-050	1/2"	3/4"	Natural Gas, 3.5" W.C.	**609.00**

Universal Gas Valves

A

B

- Designed for intermittent pilot, direct spark and hot surface applications
- Includes all necessary parts and instructions needed to convert to direct spark or hot surface applications
- Designed for many residential and commercial applications central heating units, wall heaters, boilers and mobile home furnaces
- All wiring connections, manual selector and adjustments are easily accessible
- Electrical: 24V, 60 Hz
- Ambient rating: -40°F to +175°F
- Maximum inlet pressure: 14" W.C. (1/2 PSI)

Fig.	Order #	Mfg. #	Description	Gas Type	Inlet Conn.	Outlet Conn.	Each

Universal Ignition Gas Valve

- Universal model — intermittent pilot, direct spar-hot surface
- For use with LP or natural gas applications
- Snap acting
- Swing radius: 3-9/16"
- Ambient temperature range: -40°F to +175°F
- Maximum inlet pressure: 7" W.C. natural, 14" W.C. LP
- Complete with LP gas conversion hardware, reducer bushing, outlet plugs and instructions
- Regulator setting: 3.5" natural, 11" LP
- Coil voltage: 24VAC; 0.45 amps

Order #	Mfg. #	BtuH Capacity	Inlet Conn.	Outlet Conn.	Each
L37-849	720-079	150,000	1/2"	3/4"	**435.00**

Combination Gas Valves

- Thermostatically controlled by remote temperature sensing bulb
- Single capillary model with temperature adjustment knob on gas valve
- Two 1/2" x 3/8" reducer bushings included
- Valve type: Snap action or snap throttle
- Capacity is based on 1000 Btu/cu. ft. 0.64 sp. gr. natural gas or 2500 Btu/cu. ft. 1.53 sp. gr. LP gas @ 1" W.C. pd.
- Three position outlet: 1/2"

Compact Gas Valves

- Replacements for General Control gas valves for up to 70,000 BtuH applications
- Compact size and lower capacity range ideal for limited space and low capacity heating applications like recreational vehicles, wall heaters, space heaters and gas fired fireplaces
- Mounts in any position, except upside down
- **L38-368** has adjustable regulator for fireplace log control
- **L37-509** and **L37-525** have a capillary tube with sensor
- **L37-437**, **L38-368** and **L39-645** use two lead thermopiles only

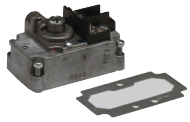
Gas Valve

- Designed to allow field conversion of the 700 and 710 series manual gas valves to wall thermostat control
- Replacements for specific 700-450 Series and 700-460 series gas valves
- Will operate at either 24VAC or 12VDC
- Includes gasket and screws for a complete installation



Order #	Mfg. #	Gas Type	Volts	Each

Pressure Regulator Kits

- Kit designed for 700 series natural gas valves
- Provides adjustable W.C. pressure
- Kit includes gasket, mounting screws and instructions

Note: Always use a new gasket and mounting screws when replacing a pressure regulator.

G35-147	FF75	Door Switch Depressor	31.99

Direct Ignition Gas Valves

resideo

- Designed to replace more than 60 standard ans slow-opening VR8205 and VR8215 controls
- Includes manual valve, two automatic operators and pressure regulator
- Compact design for maneuverability in tight spaces
- Multipurpose mounting orientations for streamlined installation
- Dual redundancy with two independent valves acting as fail-safes for each other

Universal Intermittent Pilot Retrofit Systems

resideo

- Complete retrofit kits for converting conventional standing pilot systems to energy saving intermittent pilot systems
- For use with gas-fired atmospheric furnaces, boilers and heating appliances; single or dual rod applications
- Provides 100% pilot gas shutoff if pilot fails to light; after 6 minute delay, trial for ignition is repeated
- Ignition trial and delay sequence is repeated until ignition occurs or call for heat is removed
- High voltage ignition cable unaffected by heat of gas ignition
- Anti-rotational feature prevents ground rod from rotating out of position
- Includes ignition cable with connectors, reducer bushings and installation hardware
- EnviraCOM compatible
- Uses S8610U3009 control module — **L37-808**

Specifications:

- Temperature range: -40°F to +165°F
- Electrical rating: 24VAC, 60 Hz; current rating 0.7A

Gas Ignition Systems

Robertshaw

- Replaces standing pilots on gas furnaces and other gas appliances
- Electronic flame sensor provides flame rectification for faster, safer operation
- Eliminates standing pilots for fuel conservation
- Intermittent pilot burns only when thermostat calls for heat
- Universal electrode/sensor assembly adapts to most thermocouple-type pilots
- Single pilot, 24V
- Ambient temperature range: -40°F to +175°F
- Auto reset includes **L37-838** non-lockout module; manual reset includes **L37-839** lockout module

Millivolt Kit

- Three popular Millivolt parts all in one kit for repair or retrofit applications, includes a low profile millivolt actuated gas valve, a pilot generator kit and easy-to-use mercury free mechanical wall thermostat
- Reduces truck-stock inventories by providing the three most common parts needed for repair/retrofit applications all in one convenient kit

C

Intermittent Pilot Ignition Controls

- Direct replacement parts for G60, G65, G67 and CSA Series ignition control systems
- Widely used for OEM equipment — Lennox, Carrier, Reznor, Friedrich, Magic Chef and others
- For field replacement a separate adapter kit will be available to adapt to the VLV or Q15,Q96 units
- **L37-488** and **L37-490** model replaces 80% of all G600 Johnson Controls ignition models; see cross-reference below
- **L38-662** and **L38-504** Y75 flame sensors may be used to replace broken or damaged sensing probes in G60, G65, G66, or G600 electronic ignition control systems
- **L37-488** and **L37-490** include damper plugs

Fig.	Order #	Mfg. #	Type	Description	Each

Intelligent Valve Retrofit Kit

WHITE-RODGERS

- Intelligent intermittent pilot HSI retrofit kit for ICP, Lennox single stage PSC furnaces
- Upgrade systems with select SV9500, SV9501, SV9502 electronic intermittent pilot gas valves to standard gas valve with 120V HSI ignition
- Complete kit includes new gas valve, control board, combination ignitor and flame sensor

Order #	Mfg. #	Each
L50-929	50I56D-905	**639.00**

OEM Replacement Pilot Relite Control

WHITE-RODGERS

- Will spark until flame is sensed between electrode and ground
- Relite control detects flame through flame conduction
- When flame current is sensed between electrode and pilot burner ground, relite control stops sparking
- If flame is extinguished during call for heat, relite control will begin sparking the instant the flame goes out

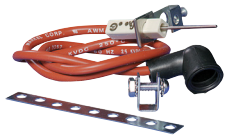
Specifications:
- 0.03A, 24VAC — 1/4" male spade terminals
- High voltage connection — 1/4" male spade

Order #	Mfg. #	Description	Each
L36-975	5059-134	Spark Ignitor	**339.00**

Ignition Electrode Assembly

WHITE-RODGERS

- Replaces cycle-pilot ignition electrode and cable assemblies
- 24" lead with slip on bracket and perforated mounting strap



Order #	Mfg. #	Description	Each
L36-976	760-56	Electrode Assembly	**185.00**

Universal Non-Integrated HSI Ignition Module

White-Rodgers Connect App Enabled

WHITE-RODGERS

- Use with the White-Rodgers Connect app Universal HSI module replacement for Fenwal, Honeywell, UTEC, ICM, White-Rodgers, and Robertshaw
- 24V, 120V or 240V ignitors
- Configure without power, prior to install
- On-board digital display displays operation status, diagnostics and real time flame current
- Controls an inducer motor and monitors a pressure switch
- Easy-install harness included

Order #	Mfg. #	Description	Ignition Trials	Ignition Trial Time	Retries	Prepurge Period	OEM Replacement for	Each
L51-757	50E47U-843	Universal hot surface ignition module replaces 24V, 120V or 240V non-integrated (HSI) modules	seconds	7, 4, 10, 15	1*,3	32*, 0, 8,13,15,17, 30, 34, 4 seconds	Carrier/ICP, Goodman, Lennox, Trane, York, Pentair, StaRite, Jandy	**465.00**

Universal Hot Surface Ignition Control

WHITE-RODGERS

- Microprocessor-based gas ignition control
- Tri-color LED indicator for diagnostics
- Direct and indirect flame sense
- Prepurge feature allows the operation of an induced draft blower to purge the combustion chamber during period between initial thermostat contact closure and the start of the ignition cycle
- Retry feature allows controls to re-initiate ignition sequence in the event that the flame is undetected, or established and then lost
- Kit includes mounting hardware, double-sided foam back tape, cross-reference guide, color coded timing label, program keys and pre-printed hanging carton

Specifications:
- Relay load settings: Valve relay: 1.5A @ 28VAC 50/60 Hz .6pf
- Ignitor relay: 1.52 115VAC 50/60 Hz resistive
- Electrical rating: Input 18 to 30VAC, 25VAC Nominal Max. Input Current @ 25VAC; .250mA @ 25°C
- Dimensions: 4.13" W x 4.13" H x 1.5" D

WHITE-RODGERS

Silicon Nitride and Silicon Carbide Ignition Controls

A

B

C

- For use in natural and LP gas applications
- Diagnostic LED or flash indicators streamline system troubleshooting
- **L39-566** replaces most White-Rodgers 50A50/50A55 controls and OEM replacement hot surface ignition controls for Trane, ICP, Amana and York
- **L39-567** replaces all White-Rodgers 50A65 controls

Specifications:

- Input voltage: 25VAC, 50/60 Hz
- Maximum input current: 25VAC, 0.45A
- Operating temperature: -40°F to +176°F
- Humidity: 5% to 93% relative humidity (non-condensing)

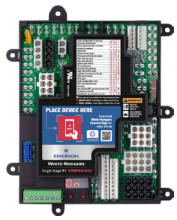
Universal Integrated Furnace Control for PSC & ECMx Blower Motors

WHITE-RODGERS

- Universal Single Stage HSI Integrated Furnace Control for PSC & ECMx blower motors
- Includes Universal 120V Silicon Nitride Ignitor and utilizes the White-Rodgers Connect App for simple configuration and diagnostics
- Replaces 550+ parts including Honeywell S9200U1000



Order #	Mfg. #	Each
L51-345	50M56X-843	**455.00**

Universal Two-Stage HSI Integrated Three-Speed (PSC) Circulator Furnace Control Kit

WHITE-RODGERS

- Replaces White-Rodgers boards made for Trane, Lennox, York and Goodman
- Includes universal 120V nitride ignitor kit

Order #	Mfg. #	Description	Each
L45-098	21M51U-843	Universal 2-Stage IFC Replacement Kit	**579.00**

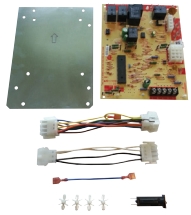
Nitride Ignition Integrated Furnace Control

WHITE-RODGERS

- Controls gas valve, ignitor, blower, inducer, humidifier and air cleaner
- Includes diagnostic indicator flash codes
- Three fan speeds
- Remote flame sense

Specifications:

- Input voltage: 25VAC 50/60Hz
- Maximum input current @25VAC: 0.45A
- Valve relay: 1.5Amp @ 25VAC 50/60Hz 0.6PF
- Ignitor relay: 2.0Amp @ 120VAC 50/60Hz (resistive)
- Inducer relay: 2.2FLA- 3.5LRA @ 120VAC
- Circulator relay: 14.5FLA- 25.0LRA @ 120VAC
- Operating temperature range: -40 to +170°F (-40 to +79°C)
- Humidity range: 5% to 93% relative humidity (non-condensing)

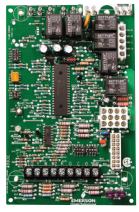


Order #	Mfg. #	Description	Each
L46-466	21D83M-843	Nitride Ignition Integrated Furnace Control	**539.00**

Universal Two-Stage HSI Integrated Variable-Speed (ECM) Circulator Furnace Control Kit

WHITE-RODGERS

- Replaces White-Rodgers boards made for Trane, Goodman, Lennox, York
- Includes universal 120V nitride ignitor kit



Order #	Mfg. #	Description	Each
L45-097	21V51U-843	Universal 2-Stage IFC Replacement Kit	**585.00**

Carrier Single Stage HSI Integrated Furnace Control Kit

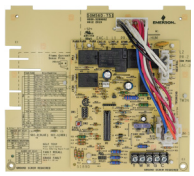
WHITE-RODGERS

- Replaces White-Rodgers 50M56-751 and virtually all Carrier single stage HSI controls with 120V ignitors
- Easy install kit includes: ignition control module, installation instructions and OEM cross-reference, set of interconnect harnesses, bag of accessories
- System Diagnostic LED with Fault Recall
- Low-Speed Continuous Fan Option
- 120VAC Ignitor Output
- 120 or 24VAC Humidifier Output
- 120VAC Electronic Air Cleaner Output
- Self-Test Installation Routine

Order #	Mfg. #	Description	Ignition Trial Time	Retries	Prepurge Period	Each
L47-385	50M56U-751	HSI Integrated Furnace Control Kit	4 Seconds	2 Times	30 Seconds	**315.00**

WHITE-RODGERS

Carrier Single Stage Integrated Furnace Control



- Carrier direct replacement integrated furnace control
- For single stage 120V hot surface ignistion and PSC blower motors

Order #	Mfg. #	Description	Ignition Trial Time	Retries	Prepurge Period	Each
L50-820	50M56D-751	HSI Integrated Furnace Control Kit	4 Seconds	2 Times	30 Seconds	**235.00**

WHITE-RODGERS

Trane Single Stage 120V Ignitor HSI Integrated Furnace Control Kit

- Replaces White-Rodgers and Trane Single Stage HSI Controls with 120V Ignitors
- Easy install kit includes: ignition control module, installation instructions and OEM cross-reference
- 120VAC Ignitor Output
- 120VAC Humidifier Output
- 120VAC Electronic Air Cleaner Output
- 120VAC 2-Speed PSC Circulator Output
- Fuse Protection — 5A
- Furnace Status LED
- Heat Fan OFF Delay (Dipswitch Selectable)

Furnace Controls

WHITE-RODGERS

- Kits come with everything needed for a fast and accurate change out
- Restores furnace equipment to original factory performance
- Single Stage applications
- **L48-513** services most current Lennox / Allied Air Enterprises single stage furnaces with 2 or 3-speed PSC motors and 120V HSI. The kit includes wiring harnesses, control with Fault Recall and LED display and dipswitches to set blower delays. It replaces Lennox 81W03, 56W19, 94W83 and 74W03 service platforms – which have no other competitive replacements.
- **L48-982** services Lennox Intermittent / Proven Pilot Spark furnaces. The kit includes module, flame sensor with lead wire, ground wire and metal mounting bracket with required hardware for installation. Module features LED for system diagnostics. It replaces Lennox 30W33 kit and is the only complete replacement kit available outside of Lennox

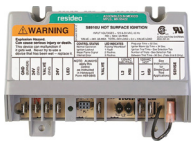
Trane Direct Replacement Two-Stage Furnace Control Kit

- For 80V And 120V hot surface ignition and variable speed blower motors & inducers
- Supersedes 50V64-743 and includes OEM style IGN00152 120V nitride ignitor, bracket and wire harness
- Replaces Trane KIT-15816 For XV95 type furnaces

Order #	Mfg. #	Description	Each
L49-550	50V54-820	For OEM Integrated Furnace modules	**999.00**

resideo

Universal Hot Surface Ignition Control



- Field selectable dip switches
- Expands cross-reference to over 800 controls
- Warm up time enhancement- Four most popular timings
- Trial for ignition
- Pre-purge
- Simplified LED Diagnostics- Tri-color LED, simpler codes
- Micrometer ports for reading flame current - Test quality of ignitor

Specifications:

- Control voltage: 24VAC @ 50 Hz; 60 Hz
- HSI electrical voltage: 120VAC
- Prepurge: 32 seconds
- Number of ignition trials: Single or 3, field selectable
- Trial for ignition: 4 seconds or 7 seconds, field selectable
- Between trial purge: 96 seconds (with three trials selected)

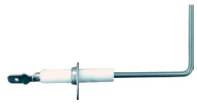
Flame Sensor

- For hot surface ignition (HSI) systems
- Mount on multiple burners or adjacent to igniter
- Use with spark ignition and flame sensing
- Alumina ceramic insulator
- Kanthal flame rod material can withstand 1800°F



Order #	Mfg. #	Each
L49-697	FLS301	**20.99**

Universal Integrated Furnace Control

- For use in natural and LP gas applications
- Replaces over 195 furnace controls
- Complete set of wiring harnesses for universal compatibility and simplified installation allowing for direct replacement of competitive boards
- LED indicators provide system status, performance and diagnostic information
- EnviraCOM enabled for remote monitoring and diagnostics

Order #	Mfg. #	Each
L43-886	S9200U1000	**385.00**

Universal Electronic Fan Timer

- Replaces 44 existing Honeywell controls
- Integrates control of all combustion blower and circulating fan operations in a gas warm-air appliance
- Replaceable fuse
- DIP switch selectable heat and cool delay on and off times
- Diagnostic LED
- EAC and HUM convenience terminal connections and continuous low speed indoor air circulation are provided
- Electrical rating: 24VAC
- Temperature rating: -40°F to 175°F
- Heat fan on/off delay: 30 or 60 sec/60, 100 or 180 sec
- Cool fan on/off delay: 4 or 30 sec/30 sec

Flame Sensor

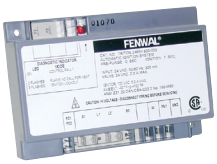
- Flame sensor can mount remotely on multiple burner or adjacent to ignitor on other applications
- 30" Teflon® insulated lead wire (250°C rating)
- 1/4" female spade terminals
- High temperature Kanthol flame rod material can withstand 1800°F

Order #	Mfg. #	Each
L37-720	10-760	**79.00**

Flame Sensor Cleaner

- Easily clean sensors to prevent false starts
- Convenient key ring

Order #	Mfg. #	Each
H28-113	FSC10	**17.49**



Hot Surface Ignition Controls

- Local or remote sensing capability
- Digital trial for ignition timings
- May be mounted vertically or horizontally
- Has a nominal heat-up period of 45 seconds
- System check circuit checks valve control and flame rectification circuits before ignition sequence is initiated
- Normally closed contacts included on all models for lockout indication

Specifications:

- Ignitor contact rating: 120VAC, 5A maximum
- Input voltage: 24VAC, 50/60 Hz
- Ambient temperature: -40°F to +160°F
- Flame failure response time: 0.8 second maximum
- Type of gas: Natural, LP, manufactured
- Moisture resistance: 90% R.H.

Universal Nitride Ignitor Kits

WHITE-RODGERS

- For upgrading standard silicon carbide systems to a nitride ignitor
- Install in gas-fired forced-air furnaces, water heaters and boilers
- No additional power supply required
- Includes mounting bracket and ceramic wire connectors

Specifications:
- Electrical rating: 102 to 132VAC
- Maximum load current: 3A 132VAC, 25°C
- Timing rating: 17 seconds minimum

Order #	Mfg. #	Lead Length	Each

Universal Intermittent Spark Ignition Control

All-Spark™ Intermittent Spark Ignition Controls

- Microprocessor-based ignition control
- For use in natural and LP gas applications
- Works with single rod or dual rod remote sensor
- Provides ignition, proof of ignition and precise timing
- LED diagnostic indicator
- White-Rodgers Connect App enabled
- Electrical rating: 18-30VAC
- Flame out recognition time: 8 Sec.
- Highly configurable, replaces over 1000 parts

Order #	Mfg. #	Description	Each
L51-064	50D50U-843	Intermittent Pilot/Direct Spark Ignition Module	**335.00**

©2024 Johnstone Supply, LLC

Universal Intermittent Pilot Control

- Replacement for over 400 Honeywell (including S8610U1003), Robertshaw, Johnson Controls and UTEC (HSC) intermittent pilot ignition controls
- Used for gas-fired furnaces, boilers and other heating equipment
- Field-selectable prepurge and ignition trial timings
- LED flame strength indicator
- Diagnostic LED for easy troubleshooting
- EnviraCOM communications port
- 100% pilot gas shutoff if pilot fails to light
- Ignition trial/delay sequence repeats until appliance lights or call for heat is removed; eliminates nuisance lockouts
- One model suitable for use with natural or LP gas
- Includes remote reset and automatic vent damper plug
- Used in systems with combination ignitor-sensor (single rod or sense) or separate ignitor and sensor (dual rod or remote sense)
- Includes cable adapters to allow field replacement of both Honeywell and competitive controls without replacing existing cable

Order #	Mfg. #	Description	Each
L37-808	S8610U3009	Control Module	**335.00**

36" Ignition Cable Assembly

- For use with the S86/S87 family
- Right angle boot on ignitor end and straight boot on module end

Order #	Mfg. #	Description	Each
L45-645	392125-2	36" Ignition Cable Assembly	**149.00**

DSI Furnace Control Boards

- DSI Control board to control gas valve, blower, indoor motors and spark ignitor
- Monitors timing, trial for ignition, flame sensing and lockout
- Microprocessor-based, 100% lockout safety feature
- Compatible with LP or Natural Gas

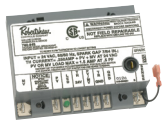
Universal Ignition Control Uni-Kits

A



B

C

D

- Universal ignition control Uni-Kits feature a flame sense circuit that works equally well on remote sense systems (two rods) or local sense systems (one rod)
- Units include mounting bracket and wiring diagrams for Johnson Controls G60 and G600 series and Honeywell's S86 series
- Non-Lockout models (**L37-838** and **L39-646**) feature automatic recycle, ensuring that if flame fails, main gas flow is shut off with a spark repetition sequence that repeats until pilot gas re-ignites
- **L37-838** replaces Robertshaw #SP715, SP715A, SP715U and US1715U models
- **L39-646** is for flame rectification systems and for use with 7000 BDER, 7100 DER and 7200 IPER gas valves, and replaces Robertshaw #SP715 and SP715A
- Lockout models (**L37-839**, **L38-366**, **L39-647** and **L39-648**) feature automatic gas shutoff if ignition fails to occur after three 60-second attempts
- **L37-839** and **L38-366** replace Robertshaw #SP735, SP735A and SP745 models
- **L39-647** is for use with flame rectification systems and 7000 BDER and 7100 DER gas valves

Specifications:
- Input voltage: 24VAC with 20VA minimum
- Ambient temperature rating: -40°F to +175°F

Direct Spark Ignition Controls

- Fail-safe on malfunction, spark interruption upon ignition
- Can be used on natural, manufactured or LP gas
- Up to three prepurge and trial for ignition periods before lockout
- Can be mounted vertically or horizontally
- Reset from lockout is accomplished by interrupting power to system
- Provides up to a 15-second delay before sparks are generated and valve is energized to permit main burner gas flow

Specifications:
- Input voltage: 24VAC, 50/60 Hz
- Valve relay contact rating: 0.6A
- Ambient temperature: -40°F to +150°F
- Flame failure response time: 0.8 seconds

Replacement Pilot Ignition Control

- Positive ignition/proof of flame
- Thermostat and/or manual reset options
- Fail-safe on malfunction, spark interruption upon ignition
- Remote flame sensing capability
- Isolated valve contacts, local sensing
- Both units are 100% lockout

Specifications:
- Input voltage: 120VAC, 50/60 Hz
- Current drain: 50mA
- Ambient temperature: -40°F to +140°F
- Trial for ignition: 10 seconds

Order #	Mfg. #	Fenwal #	Each
L37-930	814-009	35-704600-005	**769.00**

Spark Ignition Controls

- Designed for indirect burner ignition and supervision, for use with all gases and applicable to gas-fired appliances The microprocessor provides reliable software control of all timings and operates a diagnostic Light-Emitting Diode (LED)
- Provides ignition sequence, flame monitoring, and safety shutoff for intermittent pilot boilers, furnaces and other heating appliances

Specifications:
- Electrical rating: 24VAC, 50/60 Hz
- Ambient temperature range: -40°F to +170°F
- Flame current signal: 0.15µA (minimum)

BASO Gas Products LLC

L45-870	BGH2UNCNTRLHT-01CJ	Universal Hot Surface Module	**339.00**

Universal Intermittent Pilot Ignition Controls

- **L38-259** is universal replacement for intermittent pilot controls
- **L38-259** is 24VAC, 50/60 Hz pilot 1A max. and main 2A max.
- **L38-259** 100% shutoff/lockout with 5 minute continuous retry
- **L38-956** is replacement for Lennox G20, G20R, G23 and G26 series unit that has a Johnson Controls G776RGD-1, G776RGD-2, G776RGD-10 or G776RGD-11 ignition control installed, or has been replaced with a Lennox 65K93 ignition replacement kit
- **L38-956** is 24VAC, 50/60 Hz pilot 1A max. and main 2A max
- Ignition trial time: 25 seconds for **L38-259**; 85 seconds for **L38-956**
- Prepurge time: 0 (zero) seconds for **L38-259**; 15 seconds for **L38-956**

Thermocouple Adapter

- Used to make closed circuit tests of the thermocouples and thermopiles using suitable millivolt test meters

Order #	Mfg. #	Each
L39-569	10-038	**89.00**

Thermocouple Adapter

- Allows high limit switch to be connected into the thermocouple circuit on valves without slotted magnet
- 6" leads

Order #	Mfg. #	Each
L39-605	1922-001	**69.00**

Junction Block Adapter

- Used to convert thermocouples to a junction block application
- Junction book is used as a contact cutout device
- Packed in a plastic bag

Order #	Mfg. #	Each
L39-519	Y99AN-1H	**95.00**

Bell Nut Adapter

- Adapts modern Johnstone thermocouple to obsolete valves requiring female thermocouple connections

Order #	Mfg. #	Each
L36-454	31543-3D	**20.49**

OEM Replacement Mercury Flame Sensors

WHITE-RODGERS

- Mercury flame sensors consist of mercury-filled sensing bulb, capillary and diaphragm assembly mounted on a switch mechanism
- Pilot flame heat vaporizes mercury within sensing bulb, which actuates the snap-action switch
- Switch may be SPST or SPDT and is usually wired in series with main valve relay in most automatic ignition systems
- Sensors furnished with either spade terminals (3049 series) for point to point wiring or direct plug-in connections (3098 series), eliminating point-to-point wiring
- **L37-170** includes adapter fittings

Order #	Mfg. #	Capillary Length	Description	Each
L37-169	3049-115	48"	2 — 1/4" Spade Terminals, One Pin Terminal	**665.00**
L36-974	3098-134	48"	Flame Sensor - Plug-in Connector	**665.00**
L37-170	3098-156	48"	Plug-in Connector	**645.00**

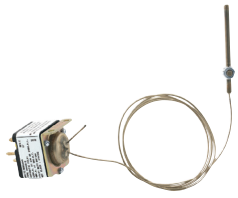
Mercury Flame Sensor

WHITE-RODGERS

- Designed for use with White-Rodgers diaphragm, "Cushioned Power" or "Silent Knight" valves having plug-in receptacle
- Sensor combines snap-action SPDT switch and mercury actuated thermal element
- Use with natural, manufactured or mixed gases and with LP gases where means are provided for obtaining automatic pilot gas shutoff
- Sensors are recycling type, which require relighting or possible restoration of proper gas pressure to return to operation
- SPDT switch can energize ignitor circuit to relight pilot (as with rooftop units)

Specifications:

- Timing: Contacts close approximately 60 seconds after pilot ignition; open approximately 40 seconds after flame is extinguished
- VA rating 120V and 240V is 125; VA rating 30V is 90



Order #	Mfg. #	Capillary Length	Each
L36-134	30A46-5	48"	**695.00**

WHITE-RODGERS

UNIVERSAL PARTS

Mercury Flame Sensor

- Prevents gas flow to main burner if pilot flame is not burning or is insufficient to properly ignite main burner
- Contains rugged snap-action switch and powerful mercury actuated thermal element
- Use with natural, manufactured or mixed gases and with LP gases where means are provided for obtaining automatic pilot gas shutoff
- Sensors are recycling type which require relighting or possible restoration of proper gas pressure to return to operation

Order #	Mfg. #	Capillary Length	Type	Each
L39-553	3046-5	48"	Screw	**695.00**

BASO Gas Products LLC

Safety Pilot Switches

A

B

- Wired to interrupt automatic main gas valve circuit if pilot flame is extinguished
- Manual reset
- SPST switch action
- **L39-008** provides 100% shut off and also interrupts pilot gas valve circuit
- **L37-914** replaces Honeywell #C434A, ITT/General Controls #A100G542 and White-Rodgers #30E02-1
- **L39-008** replaces Honeywell #C591A and ITT/General Controls #A100G543

Specifications:
- Electrical ratings: 8A 125VAC; 3A 250VAC; 0.06A 230VDC; 1/4 HP 125/250VAC

Fig.	Order #	Mfg. #	Each
A	**L37-914**	L62AA-5	**399.00**
B	**L39-008**	L62GB-3	**369.00**

BASO Gas Products LLC

Safety Shutoff Device

- For use with all gas-fired, standing pilot equipment that requires main burner shutoff when the pilot is extinguished
- Typical applications include domestic central heating and commercial space heating appliances, as well as industrial processing equipment (for example, die-casting machines and degreasers)
- Monitors the pilot flame through the use of a thermocouple
- If the pilot flame is extinguished, the switch will interrupt gas flow to the main burner (and pilot burner in 100% shutoff models), shutting down the appliance

Order #	Mfg. #	Each
L47-434	L61LL-1CJ	**835.00**

Sensible Products®

Pilot Puffer

- Force air through gas line to clean clogged pilot assemblies
- Includes rigid and flexible tubing with special tip

Order #	Mfg. #	Each
H28-389	PP-1	**65.00**

YELLOW JACKET

Gas Pressure Test Kits

- Accurately set manifold pressure for natural or LP gas
- Easier to use than a manometer and more compact
- Special, sensitive diaphragm gauge is calibrated in inches of W.C.
- Tube nipple allows easy connection to manifold

Order #	Mfg. #	Range	Each
H24-817	78060	0 to 35"	**135.00**
H25-047	78055	0 to 10"	**149.00**

Gas Pressure Regulators

MAXITROL company

- Use with natural, mixed, manufactured, LP or LP gas/air mixtures in residential, commercial and industrial applications
- Housings are rugged aluminum die castings, and all internal parts are carefully selected and corrosion-resistant
- Adjustable within spring range
- Pound to inches regulators where adequate inlet pressures are available
- High leverage valve linkage to deliver positive deadend lock-up and precise regulating control from full flow down to pilot flows
- Self-aligning valve made of nitrile rubber
- Includes automatic vent limiting device with all regulators except **L39-085** and **L86-521**
- **L39-085** and **L86-521** must be vented if being used indoors
- **L39-082**, **L39-083**, **L39-084** and **L86-521** are equipped with over-pressure protection devices (OPD) complying with new ANSI codes for 5 lb. gas pressure

Specifications:
- Maxitrol tested for 10 PSI
- Emergency exposure limits: 65 PSI inlet side only
- Ambient temperature: -40°F to +205°F
- Standard spring range: 7" to 11" W.C.

Note: All Maxitrol appliance regulators should be installed and operated in accordance with Maxitrol's "Safety Warning" bulletin (included with product). The latest ANSI Standard for Line Pressure Regulators (Z21.80) requires that an over-pressure protection device (OPD) be used on any regulator designed for use with 5 lb. gas. Check with your local code officials to see if this applies in your area.

Gas Pressure Regulators

A

B

- Mount or install at any plane or angle without restriction (upright position results in slight outlet pressure difference)
- **L37-534** is a non-convertible type, while **L37-533** is a convertible regulator with outlet pressure pre-set at 4" W.C. for natural gas
- Converting to 10" W.C. for LP can be set by removing seal cap, inverting plunger and replacing cap
- This model also has an integral vent limiting orifice as breather hole

Specifications:
- Maximum inlet pressure: 1/2 PSI
- Emergency exposure limits: 2.5 PSI
- Ambient temperature: 32°F to 225°F
- Poppet type

Selectra Electronic Gas Flame Modulation Systems

- Parts designed primarily for make up air heating as components for either direct or indirect fired equipment (Series 14, 44, 20/30, and 21/31)
- Can be field installed on existing equipment or specified for new equipment installation
- All fuel gases are compatible
- Utilizes Modulator or Modulator-Regulator valves to control gas pressure
- Amplifiers available with adjustable low-fire start duration
- Wall mounted Selectrastat senses space temperature and has an integral selector
- Remote temperature sensor paired with a separate temperature selector can be substituted for the Selectrastat

5000 Series Thermostats

- Two pole/single-throw, D1 and D2/ D18 type remote bulb controls
- Open on temperature rise and have a Positive Off feature
- All controls come with pilot light unless noted otherwise
- **F16-836** includes a stuffing box
- Fryers include 3/8" stuffing box

Order #	Mfg. #	Temp. °F	Capillary Length	Bulb O.D. x Length	Diff.	Each

Remote Type Controls for Commercial Cooking Appliances

- SPST contacts open on temperature rise
- Control has a 2" break-off shaft
- Mounting bracket fits 1-1/8" to 1-3/4" center to center mounting dimensions
- Four-way dials and bezels are not included
- **F16-693**, **F16-696** and **F16-605** are supplied with an auxiliary switch
- **F16-696** is a pilot duty (low voltage), rated 50VA @ 120/277VAC
- **F16-608** comes with 3/8" pipe stuffing box — nickel plated
- **F16-100** and **F16-838** come with 1/4" pipe stuffing box — nickel plated
- **F16-695**, **F16-838**, **F16-758** and **F16-610** are pilot duty (low voltage) rated 50VA pilot duty @ 120/277VAC
- **F16-596** are supplied with an auxiliary switch
- **F16-611** and **F16-837** are pilot duty (low voltage), rated 50VA pilot duty @ 120/277VAC
- **F16-692** has an auxiliary switch included

Millivolt Direct Current 5300-400 (RX) Series Thermostats

Robertshaw

- Single-pole/single-throw
- Hermetically sealed reed switch provides durability and accuracy in the harshest environments
- Rated 0.67A @ 5VDC
- Maximum ambient temperature 230°F (110°C)
- Precise and proven snap action mechanism

Order #	Mfg. #	Temp. °F	Capillary Length	Bulb O.D. x Length	Diff.	Each
F16-898	5300-401	200 to 400	36"	3/8" x 5-5/8"	8°F	**309.00**

Direct Acting Thermostat

Robertshaw

- SPST 5210 Series direct acting thermostat with a special switch design makes it very sensitive to small temperature changes
- Electrical rating: 20A @ 120VAC resistive load; 15A @ 240VAC resistive load

Order #	Mfg. #	Temp. °F	Capillary Length	Bulb O.D. x Length	Each
F16-897	5210-124	60°F to 210°F	36"	3/16" x 15-3/8"	**365.00**

Universal Commercial Infinite Switch Kits

Robertshaw

- Switch has a heavy-duty dial shaft, 2-1/8" long and grooved at standard break-off points
- Shunt-type heater for 15A loads; nominal low input of 5% with the infinite input up to 100%
- **F16-713** is 120V, **F16-514** is 240V

FD Series Gas Thermostats

A

B

- FD series gas thermostats are heavy-duty, high capacity units
- Valve response is either snap throttle (FDO), using dual internal valves with full on to off operation, or throttle (FDTO-FDTH) with single internal valve and full on to bypass operation
- Thermostats mount in one of four directions
- Bulb size: all controls 3/16" x 14-3/4"
- Uni-kits **F16-111** and **F16-115** include: 3/8" pipe inlets and outlets (side and rear) with two pipe plugs, 1/4" tube pilot outlets (side and rear) with 3/16" tube adapter fittings and 1/4" tubing plugs, four-way dial, index pointer for four-way dial, index pointer for four-way mounting and rear housing gasket to allow use of original rear housing
- Gas capacity: 100,000 BtuH
- **F16-646**, **F16-647**, **F16-556** and **F16-648** have optional plugged side pilot and 4-way dial
- **F16-766** and **F16-765** pipe size is tubing inlet/outlet

Temperature Limit Controllers

A

B

- LCH controls are manual reset with SPST switch action; if temperature exceeds fixed setting it must drop 50°F before it resets
- LCC controls are automatic reset with SPDT switch action; if temperature exceeds fixed setting it must drop 25°F before it resets
- LCCM controls are automatic reset with SPDT switch action; if temperature exceeds fixed setting it must drop 25°F before it resets; has gold-plated button contacts to enable its use for millivolt and line voltage (LCC)
- **F16-832** has a panel nut supplied, but no stuffing box
- Electrical ratings: LCH — 30A resistive load at 125, 250, 480VAC LCC — 25A resistive load at 125, 250, 480VAC; 125VA pilot duty at 125, 250VAC

Nickel-Plated Stuffing Box

- Provides replacement control flexibility
- Fits capillaries up to 3/8" O.D. and 3/8" pipe

Order #	Mfg. #	Each
F16-075	4650-002	**85.00**

Hydraulic Control GS Thermostats

- Maintains accurate temperature by interrupting main gas flow
- Control services applications up to 30,000 BtuH natural gas
- Includes 3/16" fittings for inlet/ outlet and nickel stuffing box
- Four-way dial (**F16-667**) is optional
- **F16-764** replaces Vulcan-Hart #110837-2
- Nickel bulb finish
- 1/4" stuffing box for **F16-649**, and 3/8" for **F16-764**

Order #	Mfg. #	Conn. Size	Temp. °F	Capillary Length	Bulb O.D. x Length	Each
F16-649	4290-006	1/4"	200 to 400	30"	3/8" x 5-3/8"	**545.00**
F16-764	4290-005	1/4"	200 to 400	48"	1/4" x 11-7/8"	**545.00**

Mini Replacement Kit for BJ Series Controls

- Adjustable outlet position
- Control mounts on manifold in any of four positions
- Contains BJ control, knob, bezel, mounting bolts and gasket
- Can be used to replace both clockwise and counter clockwise controls

Order #	Mfg. #	Capillary Length	Application	Temp. Range	Each
F16-833	4500-902	48"	Replaces BJ	250°F to 550°F	**465.00**

BJWA Gas Thermostat Kits

- Kits designed to replace BJ and BJWA thermostats
- These special high temperature kits can mount in four manifold positions (except **F16-643**)
- Rear housing may be rotated as required
- Kits include: Three plugs for unused taps, four-position knob, bezel, bezel adapters, stem length adapter, 3/16" pilot compression fitting, gasket and bolts for flange nipple mount
- **F16-643** also includes 1/4" pipe and 3/8" tubing fitting, has rear tapping position only and replaces Garland #1086700
- **F16-118** replaces Wolf #104097-1 and South Bend #1013099

Order #	Mfg. #	Outlet Conn.	Temp. °F	Capillary Length	Bulb O.D. x Length	Application	Each
F16-119	4350-028	1/4" Pipe	150 to 400	36"	3/16" x 8"	Griddle	**485.00**
F16-643	4350-029	7/16" Tubing	250 to 550	48"	3/16" x 11-3/16"	Oven	**595.00**
F16-118	4350-027	1/4" Pipe	250 to 550	48"	3/16" x 11-3/16"	Oven	**485.00**

Safety Magnet Kit Type "J"

- Robertshaw TS "J" safety magnet kit
- Used with Robertshaw series #1710 body (**F16-079** or **F16-080**)
- Kit provides 1/8" pipe, 1/4" and 3/16" tube inlet and outlet for pilot
- Flow interruption

Order #	Mfg. #	Each
F16-083	1720-801	**315.00**

Safety Magnet Kit Type "K"

- Robertshaw TS "K" safety magnet kit
- Used ahead of control valve for dryers, domestic and commercial ovens
- Used with Robertshaw series #1710 body
- Kit fits pilot sizes 3/16" tubing and 1/4" tubing
- Flow interruption

Order #	Mfg. #	Each
K34-003	1720-802	**375.00**

Robertshaw

Safety Bodies

- Used with Robertshaw #1720-801 and #1720-802 electromagnets for various applications
- For domestic and commercial ovens and dryers

Order #	Mfg. #	Conn. Size	Each
F16-079	1710-111	3/8" FPT	**125.00**
F16-080	1710-126	1/2" FPT	**75.00**

Robertshaw

Diaphragm Gas Valves

- 700 Series diaphragm valves are used for systems with remote bleed gas operator and similar types of commercial water heating and commercial cooking applications
- **F16-767** is commonly used for commercial water heating equipment
- **F16-768** is used primarily for commercial cooking
- Valves feature automatic pilot valve, bleed gas operation, inlet/outlet screens, manual gas cock valve, pilot adjusting keys, pilot gas filter and pre-set regulators
- Regulated models also feature straight line pressure regulation allowing diverse capacity requirements without regulator readjustments
- Safety magnet type is thermocouple for **F16-767**, and thermopile for **F16-768**

Order #	Mfg. #	Gas Type	BtuH Capacity	Inlet Conn.	Pressure Setting	Each
F16-767	700-804	Natural	305,000	3/4"	3.5 W.C. Natural Gas	**479.00**
F16-768	700-886	Natural	305,000	3/4"	3.5 W.C. Natural Gas	**499.00**

CHROMALOX
Advanced Thermal Technologies

Urn or Steam Table Heaters

- Elements are copper sheathed for use on coffee urns, humidifiers, kettles, percolators, steam tables and other applications for bottom mounted water elements
- Listed below are the most popular elements for single- and three-phase applications
- Also available with and without liquid cutouts
- TTUH-CO series comes with integral low liquid thermal cutout **(F84-094)**

Order #	Mfg. #	Volts	Watts	Phase	Low Liquid Cutout	Element Length	Element Height	Element Width	Each

Electric Heat Relay

- For use with a two-wire, 24V thermostat
- Switches up to 5,000 watts
- Includes 1/2" male conduit bushing
- Average time delay: 75 seconds

Specifications:
- Electrical rating: 7A 208/240/277, 14A 120VAC (full load); 42A 208/240/277, 84A 120VAC (locked rotor); 22A 120/208/240VAC, 19A 277 (resistive)
- Dimensions: 2-13/16" W x 3-7/8" H x 1-1/2" D

Order #	Mfg. #	Coil Voltage	Switch Action	Each
L40-032	R841E1068	24VAC	SPST	**589.00**

Electric Heat Silent Relay

- Provides silent operation and narrow differential control for heating or cooling installation
- For use with 2-wire, 24V thermostat
- Control Loads up to 6000 Watts, SPST, N.O.
- Ideal for all types of electrical heat
- Average time delay: 45 seconds
- Ambient temperature range: -20°F to +140°F
- 240VAC, 60 Hz; 0.2A thermostat current; resistive 25A @ 240VAC; inductive 12A @ 240VAC FLA; 72A @ 240VAC LRA
- Dimensions: 2-1/4" H x 4-11/32" W x 1-1/2" D

Order #	Mfg. #	Volts	Switch Action	Each
L36-166	24A01G-3	240 VAC	SPST	**235.00**

Electric Heat Sequencers

- Solid-state positive temperature coefficient (PTC) heaters
- Quick connect terminals
- Shock and vibration resistant
- Mounts in any position
- 24VAC control voltage
- Replaces White-Rodgers, Supco, Thermodisc, Klixon, Gemline, A1 and Mars most Klixon & TOD brands

Electric Heat Relays and Contactors

- Designed for quiet operation
- Use for furnaces with line voltage or pilot duty limit
- Simple ON/OFF switching — eliminates cold drafts on system startup
- Switches up to four 5kW electric heat elements, plus 7.0A fan motor @ 240VAC
- 1/4" male quick-connect
- Control voltage 24VAC, current draw 0.23A
- **L36-948** has universal mounting plate with mounting screws, two 12" coil leads, two wire nuts, six 1/4" female quick-connects
- **L36-906** replaces Rheem #R8229A1047 and R8229C1035 (wire only N.O. contacts)
- They replace over 50 Honeywell and competitive electric heat primaries, including the Honeywell R8330 Electric Furnace Sequencer

Therm-o-Disc Heat Sequencers

- Replaces Klixon, Mars, White-Rodgers, Watsco, Honeywell and Supco
- Double quick-connect terminals for combination and heater loads
- High ambient rated to +165°F
- 24VAC non-positional control
- 25A resistive switching
- Voltage and ambient self-compensating
- Combined fan and heat load ratings (7.2 kW)
- Direct replacements for sequencing both fan and heat
- Terminal markings are equivalent to all competitive types and allow one wiring method for various sources of sequencers
- May be wired in series to allow sequencing of one through seven element furnaces

Pneumatic Thermostats

- Low volume proportional controller provides temperature control for a wide variety of applications including return air, mixed air and unit ventilator control
- Factory set point at 57°F with each gradation representing 2°F
- Adjustable from 0°F to 270°F @ 8 PSIG
- **L38-290** is for duct mounting with an 8' averaging element and steel support bracket
- **L86-279** is for unit ventilator applications with an 18" liquid filled rigid stem element and temperature resistant plastic mounting bracket

Dual Temperature and Heating/Cooling High Volume Output Thermostats

- **L46-442** and **L46-446** are high volume output, dual temperature, and dual dial thermostats; provide individual day and night, or two set point temperature control
- **L46-446** has indexing that permits to restore the day temperature of the individual thermostat without affecting the other system thermostats
- **L46-442** does not have indexing switch
- **L46-444**, **L46-447**, **L46-448** are high volume output, dual-temperature, dual-dial, heating/cooling thermostats; provide automatic changeover between direct and reverse actions when supply pressure changes from 15 to 20 PSIG (105 to 140 kPa)
- Includes Fahrenheit dial

Integral Thermostat and Piston Top Valve Actuator

- Combination pneumatic thermostat and valve actuator providing proportional control of a steam or water valve in a heating/cooling application
- Designed for use with a valve-controlled terminal air conditioning unit
- Equipped with liquid filled bulb temperature measuring element
- Includes a built-in restrictor in the supply air connection
- Equipped with an external setpoint adjustment
- Fits any Johnson Controls 1/2" through 2" NPT normally open, normally closed, or mixing valve which takes a V-3000-1 and V-3000-8011 actuator
- Includes a protective snap-on cover
- Factory set for a nominal adjustment of ± 7.5°F (± 4°C)
- Includes pointer tabs to restrict the temperature adjustment range to as little as ± 2.5°F (± 1.4°C)
- Requires dual supply air pressures of 15 and 20 PSIG (105 and 140 kPa)

Order #	Mfg. #	Description	Mounting	Each
L46-450	T-3311-1	Direct Acting 15PSIG, Reverse Acting 20PSIG	Valve Top	**1345.00**

Valve Linkage Kits

- Used for mounting M9000 series actuators on VG1000 series ball valves
- **L46-281** ensures stable actuator mounting while preventing loading on the valve stem and stem seals
- **L46-596** provides thermal isolation and permits use of actuators on VG1000 valves with low pressure steam

A

B

Fig.	Order #	Mfg. #	Description	For Use With
A	**L46-281**	M9000-560	Ball Valve Linkage Kit	M9104, M9203, M9208 Series Electric Actuators to VG1000 Series Valves
B	**L46-596**	M9000-561	Thermal Barrier Kit	M9000-560 Ball Valve Linkage (for Low Pressure Steam)
—	**L47-339**	M9000-156	Includes: Mounting Bracket, Drive Shaft, LVR27A-602 Actuator Crankarm, Phillips Thread-Forming Screws , Self-Drilling Screws	M920X Series Actuators
—	**L47-340**	M9000-157	Includes: Mounting Bracket, Drive Shaft, LVR27A-602 Actuator Crankarm, Phillips Thread-Forming Screws , Self-Drilling Screws	M9204 Series Actuators
—	**L47-341**	M9000-158	Includes: Bottom Mounting Bracket, Top Mounting Bracket, Self-Tapping HEX Washer-Head Screw	Tandem Mount Two M9116-GGx or –HGx models; two M9124-AGx, -GGx, or –HGx; or two M9132-AGx or GGx models on a damper
—	**L47-342**	M9000-165	Includes: Mounting Bracket, Drive Shaft, LVR27A-602 Actuator Crankarm, Phillips Thread-Forming Screws , Self-Drilling Screws	M920X Series Actuators

Hundreds of Thousands of OEM Solutions at Your Fingertips
For all of your AC needs *supporting you from installation and beyond*

Valve Packing Kits

- Used to repack VG7000 series brass valves
- **L40-412** includes two ring packs, stem wiper, insertion/removal tool, bullet, grease tube and a 3" strip of crocus cloth
- **L40-413** includes two ring packs, stem wiper, stem guide, insertion/removal tool, sleeve packing installer, grease tube and a 3" strip of crocus cloth

Order #	Mfg. #	For Use With
L40-412	VG7000-6001	1/4" Stems
L40-413	VG7000-6002	3/8" Stems

Pneumatic Valve Actuators

A

B

- Accurately positions steam or water valve modulating plugs in response to a pneumatic signal from a controller
- Rolling and molded synthetic rubber diaphragm design provides a constant effective area throughout actuator stroke
- **L38-317** Exposed Yolk Actuator has a universal valve mounting design with an integral stroke position indicator providing visual reference for valve position, replaces older style V-3001 model
- **L38-318** Compact Actuator is ideally suited for 1/2" and 3/4" valve applications with restricted mounting space and a single set screw design provides easy assembly and field mounting to valve bonnet

Fig.	Order #	Mfg. #	Each
A	**L38-317**	V-3000-8012	**265.00**
B	**L38-318**	V-3801-8001	**319.00**

Valve Mounting And Spring Kits

- Used to mount VG7000 series valves with **L38-317** and **L38-318** pneumatic actuators
- Includes upper spring seat, spring, stem extension, stem locking screw and bonnet adapter

Order #	Mfg. #	Spring Range	Valve Size	For Use With	Each
L38-319	VG7000-1001	3 to 6 PSI	1/2" or 3/4"	L38-317	**109.00**
L38-320	VG7000-1002	4 to 8 PSI	1/2" or 3/4"	L38-317	**109.00**
L38-321	VG7000-1003	9 to 13 PSI	1/2" or 3/4"	L38-317	**129.00**
L40-404	VG7000-1004	3 to 6 PSI	1" or 1-1/4"	L38-317	**109.00**
L40-405	VG7000-1005	4 to 8 PSI	1" or 1-1/4"	L38-317	**129.00**
L40-406	VG7000-1006	9 to 13 PSI	1" or 1-1/4"	L38-317	**115.00**
L40-407	VG7000-1007	3 to 6 PSI	1-1/2" or 2"	L38-317	**125.00**
L40-408	VG7000-1008	4 to 8 PSI	1-1/2" or 2"	L38-317	**159.00**
L40-409	VG7000-1009	9 to 13 PSI	1-1/2" or 2"	L38-317	**109.00**
L38-322	VG7000-1010	3 to 6 PSI	1/2" or 3/4"	L38-318	**109.00**
L38-323	VG7000-1011	4 to 8 PSI	1/2" or 3/4"	L38-318	**109.00**
L38-324	VG7000-1012	9 to 13 PSI	1/2" or 3/4"	L38-318	**129.00**

Pneumatic Valve Actuators

- Positions steam or water valve-modulating plugs in response to a pneumatic signal from a controller
- Molded synthetic rubber diaphragm design provides a constant effective area throughout the valve stem stroke
- Die cast aluminum housing coated with corrosion-resistant finish
- Remove or reposition actuator by loosening a single set screw
- Easily field mounted to the valve bonnet with a single set screw
- Can be mounted to any of the V-3000, V-4000 or VT Series Valves (except V-3854)

Order #	Mfg. #	Max. Pressure	Each
L46-443	V-3000-1	30 psig	**325.00**
L47-447	V-3000-6000	30 psig	**125.00**

Pneumatic Piston Damper Actuator

- Accurately positions small dampers on Variable Air Volume (VAV) boxes and terminals
- Also for use with other air flow control dampers in interiors with a maximum area of 4 sq. ft.
- Actuator housing allows flexible front or rear mounting
- Tubular shaft accepts telescoping rods or push-pull ball joint linkage
- **L39-494** is used for swivel mounting – reduces the side load on the shaft bearing to provide smooth operation

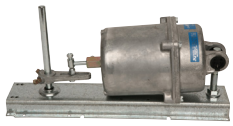
Specifications:
- Air connection: 1/8" NPT straight barb for 5/32" or 1/4" O.D. poly tubing
- Spring range: 8 to 13 PSIG
- Maximum actuator force (lb.) 8–13 PSIG: 46.2 power stroke, 33 return stroke

Order #	Mfg. #	Description	Each
L38-311	D-3062-3	Actuator	**305.00**
L39-494	D-3062-101	Auxiliary Mounting Kit	**239.00**

Pneumatic Piston Actuators

- Multipurpose positioning device that operates ventilating dampers in response to output signals from a pneumatic controller
- Two-way swivel connection on cylinder head insures non-binding movement
- Telescoping piston rod allows easy linkage to damper attachment points up to 8-3/4" away from actuator face
- Includes swivel ball joint and slotted crank arm connector for optional damper linkage methods
- Provides two positions on pivot post allowing direct actuation force on linkage not perpendicular or parallel to actuator mounting plane
- **L86-277** comes with **L38-313** positioner kit to enable sequential or two-stage actuator control (see below)

Specifications:
- Spring range: 8–13 PSIG
- Maximum actuator force 8–13 PSIG: 105 lbs. power stroke, 120 lbs. return stroke
- Air connection: Barb for 5/32" or 1/4" O.D. poly tubing



Order #	Mfg. #	Max. Pressure	Pressure Range PSIG	Each
L86-277	D-3153-1	30 PSIG	0-20 PSIG	**1845.00**
L86-278	D-3153-2	30 PSIG	0-20 PSIG	**1145.00**
L46-451	D-3153-5	30 PSIG	0-20 PSIG	**1099.00**

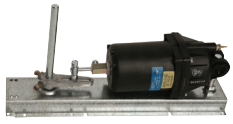
Positioner Kit

- For use with **L86-277** and **L86-278** actuators
- Provides dynamic stabilization and/or sequential control
- Includes mounting bracket for direct attachment to actuator body
- Precision relay device to adjust and maintain pneumatic damper actuators in exact places

Order #	Mfg. #	Max. Pressure	Pressure Range PSIG	Each
L38-313	D-9502-8	25 PSIG	2-12 PSIG	**825.00**

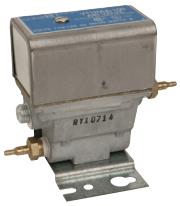
Pneumatic Actuator

- Multipurpose positioning device used to accurately position small dampers on unit ventilators, variable air volume (VAV) boxes, terminal units and small ventilating dampers in response to output signals of a pneumatic controller
- When used for proportional control, maximum damper size is limited to 6.75 sq. ft.; for two position control, damper size is limited to 11.7 sq. ft.
- Two-way swivel connection on cylinder head insures non-binding movement
- Telescoping piston rod allows easy linkage to damper attachment points up to 8-3/4" away from actuator face
- Includes swivel ball joint and slotted crank arm connector for optional damper linkage methods
- Air connection: 1/8" NPT straight barb for 5/32" or 1/4" O.D. poly tubing
- Spring range: 8 to 13 PSIG
- Maximum actuator force (lb.) @ 8–13 PSIG: 47 power stroke, 54 return stroke



Order #	Mfg. #	Each
L38-312	D-4073-2	**775.00**

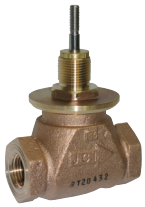
Three-Way Solenoid Valves



- For use in applications where an electrical circuit operates a pneumatic control
- Two position action
- Three piping connections — N.O., N.C. and COM (common)
- Can be operated manually by removing plug and inserting optional key (mfg. #Y99AA-4C)
- Operate in any position
- Air connections: 1/4" barb on N.C. and COM ports, 1.8" FNPT on N.O. port
- Pressure and flow ratings: At 15 PSIG inlet and 0 PSIG outlet, 2592 SCIM of air will pass from the COM to N.C. connection when energized and from the COM to N.O. connection when de-energized

Order #	Mfg. #	Volts	Max. Pressure	Pressure Range PSIG	Each
L38-308	V11HAA-100	120	30 PSIG	0–20 PSIG	**689.00**
L38-309	V11HCA-100	208	30 PSIG	0–20 PSIG	**789.00**
L38-310	V11HGA-100	24	30 PSIG	0–20 PSIG	**735.00**

Two-Way Globe Valves



- Designed to regulate the flow of hot or chilled water, 50/50 glycol solution and steam in HVAC applications
- Complies with ANSI Class 250 pressure/temperature standard
- Used with V-3000/V-3801 series pneumatic actuators or VA715x-1001 electric actuators

Specifications:
- Ambient operating temperature range: 35°F to 150°F pneumatic actuated; 35°F to 140°F VA-7150, 35°F to 122°F M9216 electrically actuated
- Maximum pressure/temperature: 400 PSIG up to 150°F decreasing to 365 PSIG at 248°F (water); 35 PSIG at 281°F (steam)
- Rangeability: 25:1

Two-Way Ball Valves

- Designed to regulate the flow of hot or chilled water, 50/50 glycol solution and low-pressure steam in HVAC applications
- Amodel® flow characterization disk allows for accurate control and eliminates the need for pipe reducers
- Used with M9000 series actuators and linkage kits
- Compact size allows for installation in tight-fit locations
- Maintenance-free design; no packing or rebuilding necessary
- Equal percentage flow characteristic
- NPT connections; also available in sweat and press connected

Specifications:

- Fluid temperature range: brass trim: 23°F to 203°F water; stainless steel trim: 23°F to 250°F water and 15 PSIG at 250°F steam
- Maximum closeoff pressure: 200 PSIG
- Rangeability: 500:1

Reset Volume Controllers

- Regulate air flow in Variable Air Volume (VAV) boxes
- Control output volume between adjustable minimum and maximum limits in response to reset signal from the thermostat or other master controller
- Fully adjustable reset start point, reset span and minimum and maximum flow set points
- Provide controllable flow down to 0.01" w.g. velocity pressure
- Range adjustable from 0.15" to 2.0" w.g.
- Isolated diaphragm design accepts any sensing line
- Fits most competitors mounting brackets
- Barbed fittings provided on all ports
- Includes replaceable filter/orifice assembly

Air Pressure Gauge

- Provides continuous indication of air pressure
- Includes equivalent metric scale
- Range: 0–30 PSIG
- Dial size: 1-1/2"
- Stem mount with 1/8" NPT center back

Order #	Mfg. #	Each
L38-305	G-2010-5	**119.00**

TE-6300 Series Temperature Sensors

- Provides economical solutions for a wide variety of temperature sensing needs, including wall-mount, outdoor-air, duct, strap-mount, well-insertion, duct-averaging, and VAV Modular Assembly (VMA) flange-mount duct-probe applications
- Offers both a metal and a plastic enclosure for the most popular models
- All TE-6300 Series sensors are two-wire, passive, resistance-output devices

Humidity Transmitters With Temperature Sensor

- Provide both humidity and temperature sensing in room wall-mount applications
- The transmitter offers local warmer/ cooler temperature setpoint adjustment and temporary occupancy override
- The humidity sensor provides Relative Humidity (RH) accuracy of ±2% or ±3% RH and measures RH over the entire range of 0 to 100%
- Include screw terminal block terminations that provide flexibility for field wiring
- Controller configuration DIP Switch allows users to adjust the room comfort and choose occupancy features that match the application and transmitter
- Power requirements: 4.5 to 7.5 mA at 14 to 30VDC and 5K ohm Load, or 18 to 25 mA at 20 to 30VAC and 5K ohm Load
- Sensor type: 1,000 ohm Thin Film Nickel
- Coefficient: approximately 3 ohm per F° (5.4 ohm per C°)
- Reference Resistance: 1,000 ohm at 70°F (0°C)
- Accuracy: ±0.34F° at 70°F (±0.18C° at 21°C)
- Platinum sensing element

Order #	Mfg. #	Description	Each
L46-866	HE-68P2-0N00WS	No Warmer /Cooler Temperature Setpoint Adjustment Override	**945.00**
L46-867	HE-68P2-1N00WS	Warmer /Cooler Temperature Setpoint Adjustment Override	**975.00**
L46-868	HE-68P3-0N00WS	No Warmer /Cooler Temperature Setpoint Adjustment Override	**875.00**
L46-869	HE-68P3-1N00WS	Warmer /Cooler Temperature Setpoint Adjustment Override	**965.00**

TE-6800 Series Temperature Sensors

- Provides temperature sensing in room wall mount applications
- Platinum sensing element
- Allows local setpoint temperature adjustment and temporary occupancy override
- An occupancy override button allows the user to request a time-of-day scheduling override when the space is occupied outside of the normal occupied hours schedule
- All sensors have DIP switches that enable or disable unit functions
- All models include a Zone Bus access port for connecting accessories to access the 6-pin modular jack

Specifications:

- Temperature sensor: 1000 ohm thin-film platinum
- Temperature Coefficient: Approximately 2 ohms per F° (3.9 ohms per C°)
- Reference Resistance: 1000 ohms at 32°F (0°C)
- Accuracy: ±0.35F° at 70°F (±0.19C° at 21°C)
- Field Connections: 1. Modular Jack- 8-position modular jack connector. 2. Terminal Block- screw type terminals for 18 to 24 AWG wire

Order #	Mfg. #	Description	Each
L46-870	TE-68PP-0N00S	Modular Jack Connection	**255.00**
L46-871	TE-68PP-1N00S	Modular Jack Connection	**199.00**
L46-872	TE-68PT-0N00S	Terminal Block Connection	**285.00**
L46-873	TE-68PT-1N00S	Terminal Block Connection	**185.00**
L46-874	NS-WALLPLATE-0	Adapts a TE-6800 Sensor (80 x 80 mm) to a standard 80 x 120 mm wallbox	**38.99**

CO2 Transmitters

- For measuring and transmitting CO2 levels, ranging from 0 to 2,000 parts per million (ppm), within heating, ventilating and air conditioning (HVAC) CO2 applications
- Specific HVAC CO2 applications include Demand Control Ventilation (DCV), fresh air and Indoor Air Quality (IAQ), and rooftop air handling economizer controls systems
- Designed to work as in stand-alone mode or as part of any integrated Building Automation System (BAS)

Order #	Mfg. #	Description	Each
L46-875	CD-W00-00-2	Wall Mount CO2 Transmitter with Logo	**785.00**
L46-877	ACC-DWCLIP-0	Drywall Spring-Clip Mounting Kit	**14.99**
L46-878	Y65T31-0	Multiple Primary Transformer, 40 VA, 120/208/240 V Primary, 24 V Class 2 Secondary with Screw Terminals: Foot Mounting or 4 x 4 in. (100 x 100 mm) Plate	**179.00**

Receiver-Controllers

- For use with remote temperature, humidity or pressure transmitters that are connected to a control variable (Cv) input
- Provides restricted supply air to low volume remote transmitters, reducing air line connections between instruments to only one line
- Cv input accepts transmitted output of any pneumatic device with a calibrated output of 3–15 PSIG
- Direct or reverse acting — action and readjustment are field selectable
- Includes hypodermic needle test points for pressure checks and output pressure gauge
- Adjustments for gain, local set point, ratio, master input balance and integral time located on controller face

Specifications:
- Air connection: Barb for 1/4" O.D. poly tubing
- Adjustable from 0.5:1 to 15:1; factory set at approximately 10:1
- Ambient operating temperature: 50°F to 120°F
- Ambient operating humidity: 10-90% R.H. at max. dew point or 85°F
- 1,000 SCIM output capacity

Order #	Mfg. #	Air Consumption	Output	Each
L38-295	T-5800-1	45 SCIM	Single, Proportional	**2945.00**
L38-296	T-5800-3	60 SCIM	Dual, Proportional	**4045.00**

Remote Element Controllers

- Equipped with flexure levers to reduce hysteresis and friction
- Gage and set point dial are visible through the cover
- Designed for surface mounting
- Adjustable gain by repositioning the sliding leakport

Order #	Mfg. #	Description	Control Action	Element Length	Each
L46-445	T-8000-3	Non-compensated capillary	Proportional	Bulb 15 ft.	**2799.00**
L46-449	T-8000-1	Non-compensated capillary	Proportional	Bulb 4 ft.	**2799.00**

Signal Transmitter

- Can be used to repeat pneumatic transmission signals, act as a high or low signal limiter, or a differential switchover device
- Operates at a 1:1 ratio to compensate for pressure drops and lag times
- Provides additional capacity for a pneumatic transmitter with input to several T-5800 receiver-controllers
- Proportional, direct acting
- Input pressure: 25 PSI maximum

Order #	Mfg. #	Each
L38-304	C-5226-3	**305.00**

Pressure Electric Switch

- Opens or closes electrical circuits in response to a change in operating air pressure
- R to Y terminals make on pressure rise
- SPDT, single function snap-acting switch in dust proof enclosure
- Factory set at 12 PSIG with switch differential of 2 PSIG
- Adjustable range: 3–20 PSIG
- Air connection: Barb for 1/4" O.D. poly tubing
- Galvanized mounting brackets and cover

Specifications:
- F/L Amps: 120VAC, 16.0; 208VAC, 9.2; 240VAC, 8.0; 277VAC, 7.0
- LR Amps: 120VAC, 96.0; 208VAC, 55.2; 240VAC, 48.0; 277VAC, 42.0
- Non-inductive amps: 120VAC, 16.0; 208VAC, 9.2; 240VAC, 8.0; 277VAC, 7.2
- Pilot duty: 125VA @ 24–277VAC

Order #	Mfg. #	Each
L38-307	P10BC-7C	**249.00**

In-Line Oil Removal Filter

- For use with T-5800 receiver-controllers and P-3800 reset volume controllers
- Combines coalescing and activated carbon filters in series to provide clean, oil free air by removing oil aerosols and vapors in pneumatic systems
- Air supply to the filter must be from a properly broken-in air compressor producing less than 6 PPM aerosol oil
- Temperature limit: 125°F; Max. input pressure: 2600 SCIM @ 125 PSIG
- 1/4" barb fittings

Order #	Mfg. #	Each
L38-299	A-4000-1037	**109.00**

Temperature Transmitters

Johnson Controls

- Measures temperature and converts measurement to an air pressure signal that is transmitted to a pneumatic receiver, controller or receiver-indicator
- Requires a 0.007" restricted supply
- Will operate in any position from a rigid, flat mounting surface
- Includes appropriate brackets for mounting to walls, ductwork or directly to hub of a duct flange or separate well
- Bimetal element compensates for ambient temperature effect

Order #	Mfg. #	Element Type	Temp. Range	Each
L38-300	T-5210-1002	Copper Bulb w/ 5-1/2" Copper Capillary	0°F to 100°F	**1099.00**
L38-301	T-5210-1004	Copper Bulb w/ 5-1/2" Copper Capillary	40°F to 240°F	**1099.00**
L38-302	T-5210-1113	Copper Bulb w/ 4' Copper Capillary	-40°F to +160°F	**1145.00**
L38-303	T-5210-1114	Copper Bulb w/ 4' Copper Capillary	0°F to 100°F	**1145.00**

Thermostats

Honeywell

- Proportional control for pneumatic valves and damper actuators
- Convertastat™ Kit includes thermostat, universal adapter, wall plate and universal satin chrome cover to convert competitive thermostats to TP970 series
- Modernization Kit (**L38-501**) includes thermostat, universal adapter and universal satin chrome cover to convert late model Honeywell thermostats to TP970 series
- **L39-899** is an energy conservation model
- **L38-897**, **L38-900** and **L39-902** require use of **L38-898** 0.005" Blue Filter Restrictor on one-pipe applications
- **L39-803**, **L39-898**, **L39-900** and **L39-902** models include a satin chrome cover with vertical and blank window options to convert competitive thermostats to TP970 series
- Satin chrome cover (**L38-899**) and Modernization Kit (**L38-501**) are required for use with **L38-897** to convert late model Honeywell thermostats to TP970 series

Specifications:

- Setpoint range: 60°F to 90°F
- Maximum supply air: 25 PSI
- Air consumption: 0.011 SCFM
- Throttling range: 2°F to 10°F; preset at 4°F
- Dimensions: 2" W x 3-1/4" H x 1-5/8" D

Honeywell

Airstream Insertion Pneumatic Thermostat

- Provides proportional control of pneumatic valves and damper actuators in HVAC systems
- Commonly used as discharge controllers for unit ventilators
- Gage tee and tank valve facilitate checking line pressures

Specifications:
- Throttling range: 10°F to 70°F
- Operating range: 40°F to 140°F
- Dimensions: 1-1/16" W x 5-7/16" H x 2-1/4" D

Honeywell

Unit Thermostats

- Provides proportional control of pneumatic valves and damper actuators in HVAC systems
- Single temperature warmer/cooler scale
- Liquid filled 36" remote bulb sensor

Specifications:
- Setpoint range: 65°F to 85°F
- Air consumption: 0.011 SCFM with 0.005" restriction, 0.022 SCFM with 0.007" restriction
- Throttling range: 3.5°F fixed
- Dimensions: 3-3/4" W x 4-3/4" H x 3" D

Honeywell

Damper Actuators

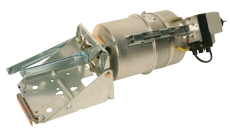
- Provides pneumatic proportional control of dampers and high velocity mixing box air valves

Specifications:
- Maximum supply air: 29 PSI
- Dimensions: 17" L x 6-3/8" H x 6-7/8" W on all models except **L38-517**; 8-5/8" H x 3-1/2" diameter on **L38-517**

Order #	Mfg. #	Description	Spring Range	Actuator Stroke	Each
L38-517	MP909E1026	Actuator Only	3 to 13 PSI	4"	**549.00**
L38-516	MP909E1018	Actuator w/ Mounting Bracket & Linkage	3 to 13 PSI	4"	**645.00**
L39-934	MP909E1034	Actuator w/ Mounting Bracket & Linkage	5 to 10 PSI	4"	**779.00**
L39-935	MP909E1174	Actuator w/ Mounting Bracket & Linkage	9 to 13 PSI	3.1"	**725.00**

Honeywell

Damper Actuators



- Provides pneumatic proportional control of medium to large size dampers in heating and air conditioning systems
- 5 PSI spring included with **L86-635** and **L86-636**

Specifications:
- Stroke: 3-1/2"
- Maximum operating pressure: 25 PSI
- Dimensions: 20-1/2" L x 8" H x 6-5/8" D

Order #	Mfg. #	Description	Each
L86-635	MP918A1024	Actuator with External Mounting Bracket and Positive Positioner; 10 PSI Span	**1945.00**
L86-636	MP918A1057	Actuator with Internal N.C. Mounting Bracket and Positive Positioner; 10 PSI Span	**2099.00**
L86-302	MP918B1006	Actuator w/External Mounting Bracket; 3 to 13 PSI	**1099.00**
L86-303	MP918B1030	Actuator Only; 3 to 13 PSI	**939.00**

Unit Ventilator Damper Actuator

Honeywell

- Provides pneumatic proportional control
- Includes hesitation feature for unit ventilator cycles requiring a minimum percentage of outdoor air

Specifications:
- Damper load rating: 2.7 sq. ft.
- Stroke length: 2-1/8" to 2", adjustable
- Minimum stroke: Pre-set at 33% full stroke; adjustable 0 to 100%
- Spring range: 3 to 12 PSI
- Maximum supply air: 25 PSI
- Air connections: 1/8" FPT
- Dimensions: 4-1/2" H x 6-7/8" D

Order #	Mfg. #	Each
L86-301	MP516A1087	**2745.00**

Damper Actuators

Honeywell

- Provides pneumatic proportional control

Specifications:
- Actuator net force: 21 lbs. @ 20 PSI for **L38-515**; 30 lbs. @ 20 PSI for **L38-514** and **L38-876**
- Stroke: 2.4" for **L38-514** and **L38-515**; 3.0" for **L38-876**
- Maximum supply air: 30 PSI
- Air connections: 5/32" for **L38-514** and **L38-515**
- Dimensions: 6-5/16" H x 2-7/16" diameter
- **L39-876** includes 1/4" barb connector, with clevis and cotter pins

Order #	Mfg. #	Spring Range	Each
L38-515	MP909D1219	8 to 13 PSI	**335.00**
L38-514	MP909D1227	5 to 10 PSI	**285.00**
L39-876	MP909D1441	5 to 10 PSI	**345.00**

Pneumatic Coil Valve Actuators

Honeywell

- Pneumatic spring return actuators provide proportional control of steam or hot/cold liquids by operating V5011 and V5013 valve assemblies
- May be installed after piping valve

Specifications:
- Maximum supply air: 25 PSI
- Air connections: barbed fitting for 5/32" O.D. plastic tubing
- Temperature ratings: operating: 0°F to 140°F; Diaphragm, maximum: 160°F on MP953C series (neoprene diaphragm); 200°F on MP953D series (EPDM diaphragm)

Order #	Mfg. #	Description	Spring Range	Action	Each
L39-954	MP953C1000	4-5/8" H x 5" Diameter	2 to 7 PSI	Direct Acting	**495.00**

Pneumatic Valve Actuators

Honeywell

- For use with V5852A2, V5862A2, V5853A2 and V5863A2 series valves to control hot and/or chilled water
- Dimensions: 2-1/4" diameter x 3-3/16" H

Order #	Mfg. #	Type	Spring Range	Max. Pressure	Action	Each
L39-877	MP958A1009	Spring Return	2 to 5 PSI	30 PSI	Direct Acting	**329.00**
L39-878	MP958A1025	Spring Return	8 to 11 PSI	30 PSI	Direct Acting	**329.00**

Honeywell

Pressure Reducing Valve

- High pressure diaphragm operated reducing valve with built-in adjustable relief valve for single pressure systems
- Includes mounting bracket and gauge taps but no gauges

Specifications:
- Output pressure range: Primary pressure: adj. 0 to 25 PSI; secondary pressure: adj. 0 to 5 PSI above primary rating
- Dimensions: 8-7/8" W x 11" H x 3-3/4" D

Order #	Mfg. #	Each
L39-884	PP901A1004	**1899.00**

Honeywell

Two-Way Globe Valves

- Used for two-position or modulating control of water and glycol solutions (to 50% concentration) in heating or cooling systems
- 50:1 rangeability per VDI/VDE 2173

Specifications:
- Materials (body): Brass with Stainless Steel Seat and Stem
- Temperature range: 36°F to 248°F water
- Use with actuator: Q5001/Modutrol IV™ Motor; Q5020/DCA
- Maximum operating pressure: 250 PSI water

Honeywell

Three-Way Globe Valves

- Controls hot water, cold water, and glycol solutions (up to 50 percent concentration) in heating or cooling HVAC applications
- Stainless steel stem and brass plug
- 50:1 rangeability per VDI/VDE 2173

Specifications:
- Max differential pressure: 230 PSI
- Temperature range: 36°F to 248°F Water
- Use with actuator: Q5001/Modutrol IV™ Motor; Q5020/DCA, MP953 Pneumatic Series and ML Electric Series
- Maximum operating pressure: 250 PSI water

Honeywell

Two-Way Cartridge Globe Valves

- Control hot and/or chilled water for VAV terminal units, fan coil units, small reheaters and recoolers in electric/electronic temperature control systems
- Valve inserts are changeable without draining valve
- Brass body and stainless steel stem

Specifications:
- Temperature range: 36°F to 230°F
- Maximum operating pressure: 230 PSIG

Three-way Flanged Globe Valve

Honeywell

- Provides proportional or two-position control of hot or chilled water in closed loop heating or cooling systems
- Not suitable for combustible gases
- Constant total flow though full plug travel

Order #	Mfg. #	Cv	Conn. Size	Spring Range	Each
L81-444	V5013B1003	63	2.5" Flanged	150 PSI	**10500.00**

Three-Way High Pressure Water Valves

Honeywell

- Provides proportional control of hot and/or cold water in unit air conditioners and fan coil systems
- Direct acting, rolling diaphragm actuator with integral high temperature plastic air connector
- Spring loaded, self-adjusting Buna-N V-ring packing replaceable
- Brass seats (lower is integral, upper is removable) and contoured plug provide metal-to-metal seating; stainless steel stem

Specifications:

- Temperature range: 35°F to 250°F
- Maximum pressure: 250 PSI
- Maximum supply air: 30 PSI
- Dimensions: 4-7/8" H x 3-1/8" W

Order #	Mfg. #	Description	Cv	Conn. Size	Spring Range	Each

Radiator Valves

Honeywell

- Single-seated valves to provide proportional control of two-pipe hot water systems
- Can be repacked without shutting down system
- Rotating actuator for aligning air connection with control air piping

Specifications:

- Maximum temperature: 180°F
- Maximum pressure: 150 PSI
- Maximum supply air: 30 PSI
- Dimensions: 4-7/8" H x 3-3/4" W

Order #	Mfg. #	Description	Cv	Conn. Size	Spring Range	Each

Terminal Unit Water Valves

Honeywell

- Single seated valves to provide proportional control of steam or hot/cold water in unit air conditioners
- Normally open, straight-through design

Specifications:

- Maximum temperature: 180°F
- Maximum body pressure: 250 PSI
- Maximum supply air: 30 PSI
- Dimensions: 3-1/2" from pipe centerline to top of actuator; 2-9/32" L on **L38-548** and 2-13/32" L on **L38-550**

Order #	Mfg. #	Cv	Conn. Size	Spring Range	Each

Pneumatic Water Valve

Honeywell

- Normally open, single seated, high pressure valve provides proportional control of hot and/or cold water in unit air conditioners and fan coil units
- Small size permits installation where space is limited
- Forged brass, straight-through body with end connections threaded for 45 degrees SAE flare fitting nuts
- Spring-loaded, self-adjusting, Buna-N "V" ring packing is replaceable without shutting system down

Order #	Mfg. #	Cv	Conn. Size	Spring Range	Each

Honeywell

Room Temperature Sensor

- One or two-pipe, direct acting
- Plug-in air connections
- High efficiency air filter
- Bimetal element
- Cover not included — uses popular TP970 covers
- Horizontal or vertical mount with plug-in backplate
- Continuous temperature indication available by using receiver gauge

Specifications:

- Sensing range: 50°F to 100°F
- Maximum supply air: 25 PSI
- Air consumption: 0.019 SCFM with 0.007" restrictor
- Throttling range: 3.5°F fixed
- Dimensions: 3" H x 1-7/8" W x 1-1/2" D

Honeywell

Remote Bulb Temperature Sensor

- Two-pipe, single temperature, remote bulb temperature sensor
- Provide proportional control of pneumatic valves or damper actuators
- Pilot operated for high capacity
- Replaceable filter cartridge
- Liquid filled remote bulb element

Specifications:

- Temperature range: 30°F to 150°F
- Throttling range: 5°F to 25°F, preset at 10°F
- Maximum supply air: 30 PSI
- Air consumption: 0.011 SCFM

Pneumatic Controllers

Honeywell

- Proportional, high capacity, single or dual input controller
- Used with remote sensors with output of 3 to 15 PSI to provide control of temperature, humidity, pressure or dewpoint for heating
- Field reversible action and adjustable compensation start point
- Integral action cut off provides trouble-free automatic startup
- **L40-043** has remote control point adjustment

Specifications:

- Maximum supply air: 30 PSI @ 0.07 SCFM air capacity
- Output signal: 3 to 13 PSI
- Adjustable proportional band: 2.5% to 50% of primary sensor span
- Integral reset time: 0.5 to 20 minutes, adjustable
- Authority for **L38-527**: 5% to 300% of span
- Compensation start point for **L38-527**: 0 to 100% of span
- Air capacity: 0.07 SCFM

Velocitrol® Velocity Sensor/Controllers

Honeywell

- Ultra-sensitive air velocity sensor and pneumatic controller control pneumatic damper actuators in HVAC systems to provide constant air velocity in the duct regardless of the static pressure
- Not position sensitive
- Insensitive to static pressure changes
- Graduated scales for minimum and maximum velocity adjustments
- Velocity reset by thermostat demand
- Adaptable to many terminal unit control strategies
- Dual Duct Variable Constant Volume application

Specifications:

- Airflow: Usage: 0.029 SCFM
- Humidity ratings: 5 to 95% RH (operating)
- Pressure ratings: 18 to 20 PSI (operating); 30 PSI (maximum)
- Operating temperature range: 40°F to 130°F
- Sensor sensitivity: Less than 5 ft/min. maximum (no orifice)
- Dimensions: Sensor is 1-3/4" W x 3-3/16" H x 4-3/16" long with orifice, 3-3/8" long without orifice; Controller is 3-1/4" W x 1-3/4" H x 2-3/8" D
- Velocity range FPM 500; reset pressure 9 to 15 PSI

Order #	Mfg. #	Description	For Use With	Each
L39-850	CP980E1060	Direct, Sequencing, Sensor C Type	Normally Open Damper and Two-Pipe Thermostat	**1999.00**
L39-851	CP980F1068	Reverse, Sequencing, Sensor C Type	Normally Closed Damper and Two-Pipe Thermostat	**1599.00**

Selector Relay

Honeywell

- Three-port relays transmit the higher of two input signals, lock out one pressure signal when a second signal is higher, or transmit the lower of two pressure signals
- Molded plastic construction includes mounting clip

Specifications:

- Operating range: 0 to 18 PSI
- Maximum supply air: 30 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Dimensions: 1/2" diameter x 1" L

Order #	Mfg. #	Description	Each
L38-523	RP470B1001	Lockout/Lower Pressure Selecting	**189.00**

Snap-Acting Relay

Honeywell

- Four-port relay converts a proportional pressure change to a positive two-position pressure change
- Molded plastic construction which includes mounting clip

Specifications:

- Operating range: 0 to 18 PSI
- Setpoint: 3 to 15 PSI, adjustable
- Differential: 1 PSI maximum, fixed
- Maximum supply air: 30 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Dimensions: 1-1/2" D x 2 -3/4" L

Order #	Mfg. #	Each
L38-522	RP471A1002	**495.00**

Honeywell

Capacity Relay

- Provides increased capacity of the branch line pressure to the final control device
- Molded plastic with neoprene diaphragms and sharp-barb connections
- Includes 1-1/2" mounting clip for mounting to wall or panel

Specifications:
- Operating range: 0 to 18 PSI
- Maximum supply air: 30 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Dimensions: 1-1/2" diameter x 1-1/2" L

Order #	Mfg. #	Each
L40-044	RP970A1008	**349.00**

Honeywell

Switching Relays

- Blocks, diverts or bleeds pneumatic air lines when pilot pressure is changed from one specific value to another
- For Day-Night, Summer-Winter, Start-Stop, On-Off-Auto and other multiple condition systems where control sequence is changed as conditions change
- Molded plastic construction with neoprene diaphragms, stainless steel lever and music wire spring
- Metal spring clip included for in-line, wall or panel mounting

Specifications:
- Main operating range: 0 to 22 PSI
- Maximum supply air: 30 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Dimensions: 1-1/2" D x 2-1/4" L

Order #	Mfg. #	Switch Action	Switching Pressure	Each
L38-524	RP670A1001	SPDT	3 PSI and 7 PSI	**379.00**
L40-035	RP670A1019	SPDT	13 PSI and 17 PSI	**309.00**
L40-036	RP670B1009	DPDT	3 PSI and 7 PSI	**679.00**
L40-037	RP670B1017	DPDT	13 PSI and 17 PSI	**569.00**

Honeywell

Ratio Relay

- Controls pneumatic valves or damper actuators in sequence from a single thermostat
- Produces a modulating pressure output, proportional in a fixed ratio to pilot input changes
- Molded plastic construction with neoprene diaphragms and stainless steel valve seats
- 100 mesh stainless steel screens in main and branch ports
- Mounting clip provided

Specifications:
- Pilot start point: 0 to 10 PSI, adjustable
- Output: 3 to 13 PSI range over 3 PSI pilot input span
- Main operating: 18 PSI
- Pilot operating: 3 to 15 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Dimensions: 2" diameter x 2-5/8" L

Order #	Mfg. #	Each
L38-531	RP971A1007	**515.00**

Honeywell

Electric/Pneumatic Relay

- Electrically operated pneumatic switch interlocks an electrical system and a pneumatic control system
- Usable as a diverting relay, a selector relay or a stop and bleed relay
- Mounts and operates in any position
- Available with lead wires or junction box
- Surface mounted model is UL listed and panel mounted model is UL recognized component and CSA recognized

Specifications:
- Maximum supply air: 50 PSI
- Air capacity: 0.42 SCFM
- Capacity index: 0.075 Cv
- Power consumption: 12.5VA inrush, 7.1VA holding

Order #	Mfg. #	Type	Volts	Dimensions	Each
L38-518	RP418A1107	Surface Mounted	120V @ 60 Hz	3-3/16" W x 2-7/8" H x 1-1/4" D	**229.00**

©2024 Johnstone Supply, LLC

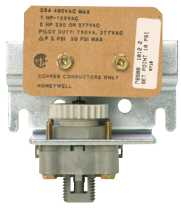
Pneumatic/Electric Switches

Honeywell

- Converts pneumatic to electrical SPDT switching action
- Neoprene diaphragm element
- Barb protected by open cage
- All ferrous parts plated to prevent corrosion

Specifications:
- Differential: 2 PSI
- Maximum supply air: 30 PSI
- Electrical ratings: 1 HP @ 125VAC, 25A resistive @ 125VAC, 750VA pilot duty

A



B

Fig.	Order #	Mfg. #	Temp. Range	Dimensions	Switching Pressure	Mounting	Each
A	**L38-520**	P658A1013	-20°F to +140°F	3-3/8" W x 5-3/8" H x 2" D	10 PSI	Surface	**429.00**

Diverting Switches

Honeywell

- Manually diverts, blocks or bleeds air in pneumatic air lines
- Mounts on a panel up to 7/16" thick
- Includes mounting nuts, knobs and scaleplate

Specifications:
- Operating range: 0 to 18 PSI
- Maximum supply air: 30 PSI
- Air capacity: 0.175 SCFM
- Dimensions: 1-9/16" W x 1-5/8" H x 3" D

Order #	Mfg. #	Description	Each
L38-532	SP470A1000	Two-Position Switch	**445.00**
L39-895	SP470A1018	Three-Position Switch	**419.00**

Position Switch

Honeywell

- Three-port pneumatic manual or minimum switch with pilot bleed
- Two breakaway stops on the knob allow 188°, 244° or 300° rotation
- Wall or panel mounting
- Complete with knob, scaleplate, locknuts and mounting bracket

Specifications:
- Main operating pressure: 18 PSI
- Setpoint span: 10, 13, or 16 PSI
- Branch and pilot range: 3 to 15 PSI
- Maximum supply air: 25 PSI
- Air capacity: 0.021 SCFM below minimum position
- Air consumption: 0.022 SCFM
- Dimensions: 1-1/2" D x 3" L

Order #	Mfg. #	Each
L38-533	SP970A1005	**379.00**

Electronic-Pneumatic Transducers

Honeywell

- Converts a proportional electric output signal from a controller into a direct-acting (DA), proportional pneumatic signal
- Requires an external 24V power supply
- Factory calibrated
- Dual barb fittings
- Screw mounting or snap rail

Specifications:
- Power consumption: 1.7VA
- Nominal high end pressure: 16 PSI with 18 PSI minimum pressure at 12VDC or 16 PSI at 11VDC
- Nominal low end pressure: 0.5 PSI at 0VDC
- Maximum supply air: 30 PSI
- Air capacity: 0.45 SCFM
- Air consumption: 0.025 SCFM
- Dimensions: 2-7/16" W x 3-5/8" H x 2" D

Honeywell

Load Analyzer

- Seven-input manifold containing logic diaphragm, air filter and restrictions
- Large integral filter assures clean air to the manifold
- Requires no field adjustment
- Minimum maintenance due to plastic construction
- Two analyzers can be connected to increase inputs to twelve
- In-line or panel mounting

Specifications:
- Operating range: 0 to 18 PSI
- Maximum supply air: 25 PSI
- Air capacity: 0.039 SCFM @ 1 PSI differential
- Air consumption: 0.025 SCFM
- Dimensions: 6-1/2" W x 3/4" H x 2-1/16" D

Schneider Electric

Barber-Colman Room Thermostats

- Pneumatic room thermostats designed for proportional control of pneumatic valves and damper actuators
- Easy to install with adjustable throttling range shown on bimetal for ease of adjustment
- **L38-487** for use in unit ventilator applications sensing return air

Specifications:
- Setpoint range: 55°F to 85°F
- Maximum supply air: 30 PSI
- Throttling range: 2°F to 12°F adjustable; preset to 3°F
- Dimensions: 2-1/32" W x 2-1/32" H x 1-3/8" D

Barber-Colman Room Thermostats

- Pneumatic room thermostats designed for the proportional temperature control of dampers and valves
- Attractive appearance with vertical mount
- Cover inserts to convert to exposed setpoint only or blank cover

Specifications:
- Setpoint range: 55°F to 85°F
- Maximum supply air: 30 PSI
- Air consumption: 0.008 SCFM
- Air capacity: 16 SCIM
- Dimensions: 2-3/4" W x 4-3/8" H x 1-5/8" D

L38-451	TK-1101	Two-Pipe	Reverse Acting	Thermostat & Cover Only	**725.00**

Valve Bodies

- Quiet operation and precision control under light or full load conditions
- Actuators available to handle a full range of pneumatic, electric, electronic, electro-hydraulic and DDC applications
- Normally open, normally closed or three-way mixing
- Compact body design for ease of installation
- Improved flow path efficiency
- 281°F maximum water temperature; ANSI Class 250 pressure rated
- 1/2" stroke makes actuator and linkage choices easier

Barber-Colman PNEUMODULAR® Receiver Controllers

- Use with remote transmitters to provide proportional control
- Use with pneumatic devices having an output of 3 to 15 PSI
- Dual input with remote setpoint adjustment; gauges not included
- Field convertible for use as a low limit controller

Specifications:
- Maximum supply pressure: 30 PSI
- Throttling range adjustment: 2% to 40%
- Authority adjustment range: 10% to 300%
- Air capacity: 8.0 SCFH
- Dimensions: 5-25/32" W x 1-63/64" H x 2-1/4" D

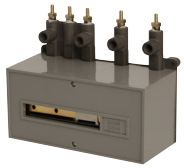
Barber-Colman Receiver Controller

- Replacement kit used in conjunction with remote proportional transmitters for control of pneumatic actuated dampers and valves
- Field reversible, provides gauge mounting and includes barbed fittings for use with plastic tubing

Specifications:
- Throttling range adjustment: 2.5% to 40%
- Authority range: 10% to 200%
- Remote setpoint adjustment range: ±10%
- Dimensions: 7" W x 5-23/32" H x 4" D
- 16 SCIM plus 36 SCIM for each transmitter and remote setpoint



Order #	Mfg. #	Type	Air Consumption	Each
L38-449	RKSR-4000	Single or Dual Sensor	0.008 SCFM	**2899.00**

Barber-Colman Temperature Transmitters

- Measure air or fluid temperatures in pneumatic control systems and transmit a direct acting, proportional, fixed span signal to controlling and indicating devices
- One-pipe devices requiring an externally restricted source of constant pressure control air
- Designed with pneumatic feedback to assure accuracy and stability over their temperature span
- Field-accessible "zero" adjustment
- Liquid-filled sensing elements available as 20' averaging element for air ducts or rigid elements for immersion or air duct insertion

Specifications:
- Maximum supply air pressure: 30 PSI
- Output pressure: 3 to 15 PSI
- Dimensions: 3-1/16" W x 2-5/8" H x 1-3/4" D

A

B

Fig.	Order #	Mfg. #	Model #	Mounting	Temp. Range	Element Length	Each

Barber-Colman Receiver Gauge

- Used to provide indication of temperature, pressure, enthalpy or humidity when used in conjunction with a transmitter-receiver system
- Plastic case and 1/8"-27 MNPT center back air connection
- 3 to 5 PSI input range with adjustable pointer
- 0°F to 100°F printed dial on gauge with application specific temperature, pressure or humidity dial overlays available at participating Johnstone Supply stores

Order #	Mfg. #	Model #	Description	Each
L38-500	2422-003	A253-12	2" Receiver Gauge	**389.00**

Barber-Colman PNEUMODULAR® Multi-Input Selector Relay

- Multi-input high and low selector relay
- Compares, selects and transmits the highest and/or lowest of up to six pneumatic input signals
- All inputs are "dead ended"; no signal air passes through the relay to the output ports

Specifications:
- Air capacity: 0.5 SCFH through high port; 1.0 SCFH through low port
- Air consumption: 1.5 SCFH (43.2 SCIM)
- Maximum supply air: 30 PSI
- Dimensions: 4" W x 2" H x 1-17/64" D

Order #	Mfg. #	Model #	Description	Each
L38-498	2373-501	R533	Multi-Input High & Low Selector Relay	**1545.00**

Barber-Colman Selector Relays

- Compares, selects and transmits the highest and/or lowest of up to two pneumatic input signals
- Small and lightweight
- **L38-497** can be used with restricted signals down to 0.5 SCFH
- **L38-496** can be used as volume booster relay when larger quantity of air is required to move multiple actuators

Specifications:
- Power consumption: 1.7Va
- Maximum supply air: 30 PSI
- Air consumption: 0.017 SCFM at main port when used as volume booster

A

B

Fig.	Order #	Mfg. #	Model #	Description	Dimensions	Each

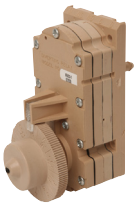
Barber-Colman PNEUMODULAR® Diverting Relays



A

B

- Converts a proportional pneumatic signal into a positive pneumatic switching action
- Feeds or exhausts branch lines, diverts supply line to either one or two branch lines or diverts one of two supply lines to one branch line
- Positive SPDT snap action pneumatic switching
- Adjustable setpoint

Specifications:
- Maximum supply air: 30 PSI
- Air capacity: 60 SCFH
- Air consumption: 1 SCFH
- Dimensions: 2" W x 4-1/8" H x 2-15/16" D for **L38-493**; 2" W x 4-1/8" H x 3-1/8" D for **L38-492**

Fig.	Order #	Mfg. #	Model #	Type	Set Point Range	Diff.	Each

Barber-Colman PNEUMODULAR® Reversing Relay

- Reverses the action of a control signal
- Field mounted or mounted to a Pneumodular® socket
- Proportional output with adjustable offset

Specifications:
- Maximum supply air: 30 PSI
- Air consumption: 0.017 SCFM
- Airflow capacity: 230 SCIM
- Crossover point: preset at 8 PSI; adjustable from 2 to 15 PSI
- Connections: 1/4" O.D.; 5/32" I.D. poly tubing
- Dimensions: 1-7/8" W x 2-1/16" H x 2-9/64" D

L38-494	2360-501	R516	Reversing Relay	**545.00**

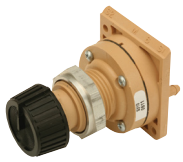
Barber-Colman Pneumatic to Electric Switching Relay

- Converts gradual pressure change into positive electric switching action
- SPDT switch action
- 3 to 25 PSI setpoint range with 2 PSI fixed differential
- May be wall or panel mounted

Specifications:
- Maximum supply air: 30 PSI
- Switch rating: 21A non-inductive @ 120/240/480VAC; 1 HP @ 120VAC; 2 HP @ 240VAC
- Dimensions: 2-1/2" W x 3-11/16" H x 2-7/16" D

Order #	Mfg. #	Model #	Description	Each
L38-495	2364-211	R471-1	Pneumatic to Electric Switching Relay	**579.00**

Barber-Colman PNEUMODULAR® Gradual Switch



- Manually sets output pressure from 0 to 20 PSI
- May be flush mounted to a panel face, on a Pneumodular® socket, or on a bracket for surface mounting

Specifications:
- Maximum supply air: 30 PSI
- Air consumption: 1 SCFH
- Air capacity: 8 SCFH
- Connections: 1/4" O.D.; 5/32" I.D. poly tubing
- Dimensions: 1-7/8" W x 2-1/16" H x 3-1/2" D

Order #	Mfg. #	Model #	Description	Each
L38-499	2390-501	S510	Gradual Switch 0 to 20 PSI Output	**1145.00**

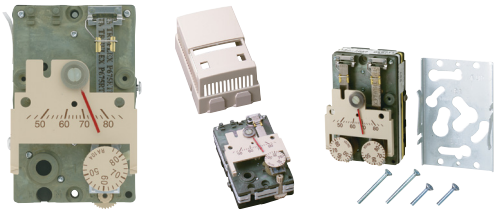
Retroline™ Pneumatic Room Thermostats

SIEMENS Ingenuity for life

- Designed to control pneumatic damper actuators and valves
- **L37-952** automatically changes over from heat/cool and day/night mode where two setpoints are required

Specifications:
- Factory calibration: 7.5 PSI 72°F
- Sensitivity: 2.5 PSI/1°F
- Scale range: 45°F to 85°F
- Operating temperature: -40°F to +140°F
- Air consumption: 20 SCIM



A B C

TH356 Limitem™ Thermostat

SIEMENS Ingenuity for life

- Used for a wide variety of applications in unit ventilators and air handler systems
- Other applications are for low limit control of air flow to a controlled space
- TH356 Limitem™ is a rigid bulb-sensing thermostat that is available in direct action or reverse action
- 1/8"–27 NPT female thread air connection for supply and control ports
- Adjustable sensitivity, degrees Fahrenheit/PSI: 0.25 to 2 PSI
- Temperature response: 0.5°F

Order #	Mfg. #	Description	Style	Temp. Range	Max. Pressure	Each
L37-969	356-0750	TH356 DA	Rigid 18"	30°F to 180°F	18 or 25	**775.00**

TH832 "D" Room Thermostat

SIEMENS Ingenuity for life

- Direct-acting pneumatic thermostat
- Unique, two-valve design eliminates a constant waste of air
- Thermostat includes chassis and base assembly
- Metal cover included and incorporates a calibrated thermometer and vandal-proof fasteners
- Concealed setpoint adjustment

Specifications:
- Operating range: 60°F to 85°F
- Control action: Direct acting
- Maximum supply air pressure: 30 PSI
- Temperature response: 0.5°F
- Sensitivity, fixed: 2.5 PSI/1°F

Order #	Mfg. #	Description	Each
L37-966	832-0120	TH832 "D" Thermostat — Concealed Adjustment	**925.00**
L37-968	856-055	"D" Thermostat Adjustment Tool	**10.49**

SIEMENS
Ingenuity for life

AP 331 Pneumatic Damper Actuators

- AP 331 pneumatic damper actuators are terminal devices designed to position air dampers for HVAC systems and fire/smoke dampers
- Typical applications are unit ventilators, unit conditioners, outside air dampers or built up sectional dampers
- Air connection is 1/8" NPT female with barb connector for 1/4" O.D. poly tubing supplied

Order #	Mfg. #	Description	Spring Range	Max. Pressure	Effective Area	Actuator Stroke	Each
L38-020	331-4311	#3 Damper Actuator	3 to 7 PSI	30 PSI	8 Sq. In.	2-3/8"	**309.00**
L38-021	331-4811	#3 Damper Actuator	8 to 13 PSI	30 PSI	8 Sq. In.	2-3/8"	**309.00**

SIEMENS
Ingenuity for life

EP 265 Electro-Pneumatic Valve

- The EP 265 electro-pneumatic three-way valve is electrically operated two position three-way valve designed to control air flow
- Port connections are barbed for 1/4" O.D. poly tubing
- Valve can be mounted in any position
- Metal junction box for conduit connections

Order #	Mfg. #	Description	Volts	Max. Pressure	Each
L38-006	265-1002	EP 265 Valve	120	30	**155.00**

SIEMENS
Ingenuity for life

Repair Parts For 656 and 658 Valves

- **L38-019** stem packing kit for ten VP 658 valves contains: ten pairs of small O-rings, 20 O-ring retainers, ten pairs of Teflon® backup rings, ten washers, repacking tool (one piece), ten packaging rings and ten pairs of large O-rings
- **L38-018** diaphragm kit for five VP 658 valves contains: five diaphragms, mounting screws to replace those lost or damaged

Order #	Mfg. #	Description	For Use With	Each
L38-016	656-736	Actuator Diaphragm Kit	5-Pack for 656 Valves	**159.00**
L38-017	656-601	Stem Replacing Kit	Six VP656 Valves	**155.00**
L38-018	658-166	Diaphragm Kit	Five VP658 Valves	**135.00**
L38-019	658-167	Stem Packing Kit	Ten VP658 Valves	**259.00**

SIEMENS
Ingenuity for life

RC 195 Receiver-Controllers

A

B

- Control temperatures, humidity and static pressure of mechanical HVAC equipment
- Available in single input or multiple input
- Produce a pneumatic output signal based on the net pneumatic input and the setpoint, percent proportional band and authority (on multiple input model) settings
- Internal replaceable restrictors
- Plug-in connectors for supply, control and transmitter inputs
- Stick-on scales for set point indication for all available Landis transmitter ranges
- Control action of inputs: Single input model — #1 direct acting; #2 reverse acting; multiple input model — #1 direct acting, #2 reverse acting, #3 reverse acting (for hot water reset)
- Transmitter calibration card provided for converting transmitter signal to a 3–15 PSI signal
- Control pressure gauge provided on multiple input model
- 3–15 PSI input signal
- Air connections are barbed for 1/4" O.D. poly tubing

Fig.	Order #	Mfg. #	Description	Air Consumption	Max. Pressure	Each
A	**L37-975**	195-0011	RC 195 Single Input	60 SCIM	30 PSI	**805.00**
B	**L37-976**	195-0003	RC 195 Multi Input w/ Gauge	60 SCIM	30 PSI	**1199.00**

SIEMENS
Ingenuity for life

TT 184 Temperature Transmitters

- TT 184 temperature transmitters sense temperature and transmit a proportional 3–15 PSI signal to a remotely located receiver controller
- TT 184 transmitters are available in rigid, remote or averaging bulb configurations for mounting on air handlers
- Factory calibrated for excellent linearity and accuracy

Specifications:
- Control action: direct acting
- Output pressure: 3–15 PSI
- Supply air pressure: with a 40 SCIM restrictor, 22 PSI +1.0 - 1.0
- Air consumption: 35 SCIM
- Air connection: 1/8" -27 NPT female thread

Order #	Mfg. #	Description	Temp. Range	Style	Each
L37-977	184-0001	Rigid Bulb Trans.	35 to 135	1/4" O.D. x 9" L	**509.00**
L37-978	184-0028	Rigid Bulb Trans.	0 to 100	1/4" O.D. x 9" L	**509.00**
L37-986	184-119	Copper Well for Rigid Bulb Transmitters	—	—	**345.00**

RL 243 SW Switching Relay

SIEMENS Ingenuity for life

- The RL 243 SW switching relay is a compact, three-way air valve for switching and diverting functions
- Changeover pressure is adjustable via an adjustment screw at the top of the relay
- Switching action connects a common port to either of two other ports
- Port connections are 1/8" -27 NPT female thread
- Changeover diff. PSI 1.5

Order #	Mfg. #	Spring Range	Max. Pressure	Each
L37-994	243-0001	0 to 25 Adj. PSI	30	**569.00**

RL 243 H Highest Pressure Signal Selector Relay

SIEMENS Ingenuity for life

- Dual input, single output logic device that compares two input signals and transmits the higher of the two to the output port
- Port connections are for 1/4" poly tubing

Order #	Mfg. #	Spring Range	Max. Pressure	Air Capacity	Each
L37-995	243-0018	None	30	130 SCIM	**265.00**

RL 243 L Lowest Pressure Signal Selector Relay

SIEMENS Ingenuity for life

- Dual input, single output logic device that compares two input signals and transmits the lower of the two to the output port
- Used as a direct acting amplifying relay or to control a single fan heating control from two direct acting relay type room thermostats
- Port connections are for 1/4" poly tubing

Order #	Mfg. #	Spring Range	Max. Pressure	Air Capacity	Air Consumption	Each
L37-996	243-0020	None	30	82 SCIM	29 SCIM	**175.00**

RL 243 R Reverse Acting Relay

SIEMENS Ingenuity for life

- Provides a proportional output signal that varies inversely with the input signal
- Two applications, signal reversing and signal inverting
- Both applications require that the supply air pressure must be equal or greater than the adjustable spring setting
- Port connections are barbed for 1/4" O.D. poly tubing

Order #	Mfg. #	Spring Range	Max. Pressure	Air Capacity	Air Consumption	Each
L37-997	243-0024	0 to 30 Adj. PSI	30	230 SCIM	29 SCIM	**465.00**

RL 243 LH Lowest and Highest Signal Selector Relay

SIEMENS Ingenuity for life

- Used where up to six pneumatic input signals are compared and the lowest and/or highest input signal is output to another logic or control device
- All port connections are barbed for 1/4" O.D. poly tubing
- This is a low capacity output device, therefore, an amplifying relay may be required in many applications

Order #	Mfg. #	Max. Pressure	Input Signal	Action	Air Capacity	Air Consumption	Each
L37-998	243-0019	0 to 30 PSI	0 to 20	Direct	230 SCIM-29 SCIM	30	**739.00**

Valve Linkage Kits

SIEMENS Ingenuity for life

- For use with SKB, SKC, SKD, and SAX Actuators
- Easy installation
- High force with output forces up to 1,000 lbs.
- Built-in manual override — no tools required

Order #	Mfg. #	Description	Valve Type	Each
L49-076	ARK13	Valve Linkage Kit	Globe	**355.00**
L49-077	ARK14	Valve Linkage Kit	Globe	**355.00**
L49-078	ARK16	Valve Linkage Kit	Globe	**355.00**
L49-079	ARK17	Valve Linkage Kit	Globe	**355.00**

Order #	Mfg. #	Description	Valve Type	Each
L49-080	ARK18	Valve Linkage Kit	Globe	**355.00**
L49-081	ARK19	Valve Linkage Kit	Globe	**355.00**
L49-082	ARK21	Valve Linkage Kit	Globe	**355.00**

Two-Pipe Room Thermostats

- Designed for proportional control of pneumatic valve and damper actuators
- Utilizes a highly sensitive bimetal element with feedback and pilot bleed relay for accuracy and stability
- Throttling range is factory set and is field adjustable
- Adjustable slider; adjustment may be concealed and locked or limited

Specifications:
- Temperature setpoint range: 55°F to 85°F
- Throttling range: factory set @ 3°F, adjustable to 12°F

Order #	Mfg. #	Control Action	Air Consumption	Air Capacity	Each
L40-190	CTC-1621-103	Direct Acting	20 SCIM	200 SCIM	**305.00**
L40-191	CTC-1622-103	Reverse Acting	20 SCIM	200 SCIM	**299.00**

Electronic VAV Flow Controller Actuator

- Pressure-independent combination controller-actuator designed primarily for use with variable air volume terminal units
- Air flow is sensed by using a single or multi-point differential (velocity) pressure measuring station or pilot tube (not included)
- The actuator section provides adjustable stops, magnetic clutch and a gear disengagement button
- Internal status LEDs indicate green for opening and red for closing

Specifications:
- Output torque: 50 in./Lb. Min., 70 in./Lb. Max, (5.6 Nm Min., 7.9 Nm Max.)
- Stroke time: 18°/minute @ 60 Hz; 15°/minute @ 50 Hz
- Angular rotation: 0 to 95°, both ends stops adjustable

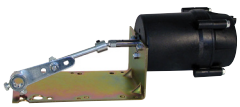
Order #	Mfg. #	Volts	Input Power	Conn.	Mounting	Each
L40-189	CSP-5001	24VAC	4VA	Wire Clamp Type; 14 to 22 AWG Cu	Direct to 1/2" Diameter Shaft or 3/8" Diameter with Adapter	**745.00**

Rotary Pneumatic Damper Actuator

- Designed for use in VAV terminal units and other small dampers
- Will mount to 1/2" diameter damper shafts, or 3/8" diameter shafts using the HLO-1011 shaft adapter for 100° normal rotation
- Actuator can be mounted with either side toward damper to allow clockwise or counterclockwise rotation
- A non-rotation bracket is supplied with each actuator
- Supply connection: 3/16" nipple for 1/4" O.D. polyethylene tubing

Order #	Mfg. #	Spring Range	Max. Pressure	Effective Area	Each
L40-195	MCP-36313000	5 to 10 PSI	30 PSI	8 Sq. In.	**205.00**

Pneumatic Damper Actuators



- Designed for use in pneumatic control systems positioning automatic air dampers
- May be used for gradual or two-position applications
- Available with right angle bracket mounting and several linkage arrangements
- Spring range: 8-13 PSI
- Linkage: 1/2" crankarm

Order #	Mfg. #	Max. Pressure	Effective Area	Actuator Stroke	Replacement Diaphragm Part #	Each
L40-192	MCP-10205311	30 PSI	3" Sq. In.	2"	VTD-9422	**459.00**
L40-193	MCP-10305111	30 PSI	7" Sq. In.	3"	VTD-9423	**565.00**
L40-194	MCP-10405211	30 PSI	11" Sq. In.	4"	VTD-9424	**725.00**

Damper Actuators for Terminal Boxes

- Designed for use in VAV terminal units and other small dampers
- Furnished with a right-angle mounting bracket for mounting
- Has bronze bushing with clevis and cotter pins
- May be rotated in the bracket so the air connection can be placed where desired
- Shaft end has a slot and clevis pin to allow direct connection to the damper linkage of a VAV terminal
- Metal body allows use in ceiling plenums where concern for local safety codes is a factor
- Stroke: 1-11/16", signal connection: 3/16" O.D. metal fitting

Order #	Mfg. #	Spring Range	Max. Pressure	Effective Area	Each
L40-196	MCP-80313101	5 to 10 PSI	30 PSI	8 Sq. In.	**205.00**
L40-197	MCP-80315101	8 to 13 PSI	30 PSI	8 Sq. In.	**215.00**
L40-198	MCP-80318101	4 to 8 PSI	30 PSI	8 Sq. In.	**215.00**

Differential Pressure Flow-Sensors

- Designed to sense differential pressure in the inlet section of a variable air volume terminal unit and fan terminal unit; sensors can also be used at other locations in the main or branch duct systems
- Normally used with CSC-1000, CSC-2000, and CSC-3000 series VAV terminal controllers for individual zone control
- The difference between the "H" port and the "L" port is the differential pressure
- Connection: 1/4" nipples for 3/8" O.D. polyethylene tubing

Order #	Mfg. #	Length	Sensing Points	Mounting	Each
L40-207	SSS-1002	3-5/32"	One Set	Integral Flange w/ Gasket	**44.49**
L40-208	SSS-1003	5-13/32"	Two Set	Integral Flange w/ Gasket	**49.99**
L40-209	SSS-1004	7-21/32"	Three Set	Integral Flange w/ Gasket	**59.00**

Dual Input Receiver-Controller

- For use with pneumatic transmitters or other devices providing 3 to 15 PSIG signals
- Adjustable proportional band, authority and setpoint
- Integral setpoint dial is marked from 3 to 15 PSI; optional adhesive dials are available for most transmitter ranges
- Remote setpoint capable
- Suitable for most control applications requiring a single or dual input receiver-controller
- Connections: 3/16" fittings for 1/4" O.D. polyethylene tubing

Order #	Mfg. #	Max. Pressure	Action	Air Capacity	Air Consumption	Each
L40-179	CCC-1002	30 PSIG	Direct or Reverse	200 SCIM	43.2 SCIM	**1199.00**

Reset Volume Controllers

- Pressure independent controllers for use with VAV terminal units
- Velocity setpoint is reset between adjustable minimum and maximum limits by a master controller
- Equipped with separate adjustment knobs for minimum and maximum airflow setting
- Models available for DA thermostat & N.O. damper, or RA thermostat and N.C. damper
- **L40-182** and **L40-183** are equipped with paper labels; other models have molded plastic dials

Specifications:
- Output sensitivity: 5 PSIG/.02" w.g.
- Main air pressure: 15 to 30 PSIG
- Maximum signal pressure: 6" w.g. applied to either port (X or Y)

Order #	Mfg. #	Thermostat	Air Consumption	De-Energized Position	Each
L40-182	CSC-2001	Cooling — DA; Heating — RA	14.4 SCIM @ 20 PSIG	Normally Open	**435.00**
L40-183	CSC-2002	Cooling — RA; Heating — DA	14.4 SCIM @ 20 PSIG	Normally Closed	**435.00**
L40-184	CSC-2003	Cooling — DA; Heating — RA	14.4 SCIM @ 20 PSIG	Normally Open	**359.00**
L40-185	CSC-2004	Cooling — RA; Heating — DA	14.4 SCIM @ 20 PSIG	Normally Closed	**359.00**
L40-186	CSC-2007	Cooling — DA; Heating — RA	11.5 SCIM @ 20 PSIG	Normally Open	**359.00**

Multi-Function Reset Volume Controllers

- Pressure independent controllers for use with VAV terminal units
- Velocity setpoint is reset between adjustable minimum and maximum limits by a master controller
- Equipped with separate adjustment knobs for minimum and maximum airflow setting
- Multi-function for direct or reverse acting thermostats, and N.O. or N.C. damper actions
- Reset start point is factory set at 8 PSIG (Adjustable 0-10 PSIG)
- Reset span is factory set at 5 PSIG (adjustable 0-10 PSIG)
- Includes mounting bracket
- **L40-187** is used with most all VAV units except Trane units
- **L40-188** is typically used with Trane VAV units

Specifications:
- Output sensitivity: **L40-187** 5 PSI/.02" w.g., **L40-188** 5 PSI/.04 w.g.
- Main air pressure: 15 to 30 PSIG
- Maximum signal pressure: 6" w.g. applied to either port (H or L)

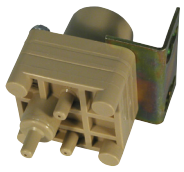
Order #	Mfg. #	Description	Action	Air Consumption	Each
L40-187	CSC-3011-10	Differential Pressure: 0-1" wg	Cooling — DA / RA; Heating — DA / RA	28.8 SCIM @ 20 PSIG	**445.00**
L40-188	CSC-3025-10	Differential Pressure: 0-2" wg	Cooling — DA / RA; Heating — DA / RA	46.1 SCIM @ 20 PSIG	**445.00**

Multiple Input Selector Relay

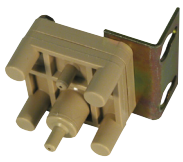
- Selects and transmits the highest and/or lowest of up to six input signals
- Low air capacity (for high capacity requirements, add a volume booster relay)
- Mounting bracket included, can be mounted in-line
- Connections: 3/16" nipples for 1/4" O.D. polyethylene tubing

Order #	Mfg. #	Max. Pressure	Air Capacity	Air Consumption	Each
L40-203	RCC-1111	30 PSIG	28.8 SCIM	28.8 SCIM	**139.00**

Relays



A



B

C

D

- **L40-199** and **L40-204** reversing relays reverse the action of a proportional control signal, with adjustable offset to advance or retard cross-over on both models
- **L40-199** has a 9 PSIG cross-over, **L40-204** has an 8 PSIG cross-over, and they are for low capacity; for high capacity requirements, use **L40-205** (RCC-1502) or **L40-206** (RCC-1504)
- **L40-200** low pressure selector selects the lowest of two pneumatic signals and can be used as a signal repeating relay
- **L40-201** high pressure selector selects the highest of two pneumatic signals
- **L40-202** diverting relay diverts input signal to either of two outputs or selects one of two inputs for the output signal and can be used to feed or exhaust a circuit (SPDT switch action)

Specifications:
- Max. pressure: 30 PSIG
- Mounting bracket included, can be mounted in-line
- Connections: 3/16" fittings for 3/4" O.D. polyethylene tubing

Fig.	Order #	Mfg. #	Description	Max. Pressure	Air Capacity	Air Consumption	Each
A	**L40-199**	RCC-1101	Reversing Relay	30 PSIG	17.3 SCIM @ 20 PSIG	17.3 SCIM	**59.00**
B	**L40-200**	RCC-1106	Low pressure Selector	30 PSIG	21.6 SCIM @ 20 PSIG	21.6 SCIM	**38.99**
C	**L40-201**	RCC-1108	High Pressure Selector	30 PSIG	260 SCIM @ 5 PSIG Pressure Drop	None	**37.49**
D	**L40-202**	RCC-1109	Diverting Relay	30 PSIG	432 SCIM @ 20 PSIG	None	**105.00**
A	**L40-204**	RCC-1112	Reversing Relay	30 PSIG	17.3 SCIM @ 20 PSIG	17.3 SCIM	**69.00**

Reversing Relays

- Reverses the action of a proportional control signal
- **L40-205** has an 8 PSIG cross-over
- **L40-206** has a 9 PSIG cross-over
- Adjustable offset to advance or retard cross-over on both models
- Mounting bracket included, can be mounted in-line
- Connection: 3/16" nipples for 1/4" O.D. polyethylene tubing

Order #	Mfg. #	Max. Pressure	Air Capacity	Air Consumption	Each
L40-205	RCC-1502	30 PSIG	1728 SCIM @ 20 PSIG	14.4 SCIM	**175.00**
L40-206	RCC-1504	30 PSIG	1729 SCIM @ 20 PSIG	14.4 SCIM	**175.00**

Pneumatic-Electric Switch

- Converts a proportional control signal change into a positive electrical switching action
- Includes case cover to conceal the switch and wiring with electrical access through two 1/2" conduit openings
- Ideal for applications such as starting fan coil unit fans, exhaust fans, and direct control of electric duct heaters
- Electrical rating: 20A non-inductive @ 120/240/480VAC; 1 HP @ 120VAC; 2 HP @ 240VAC

Order #	Mfg. #	Max. Pressure	Diff.	Switch Action	Each
L40-180	CCE-1001	30 PSIG	2 PSIG fixed	SPDT	**255.00**

©2024 Johnstone Supply, LLC

Pressure Transducer

- Converts a proportional electronic signal to a proportional pneumatic signal
- Will interface most building automation systems to pneumatic actuators and valves
- Manual override jumper with potentiometer adjustment
- Surface mount

Order #	Mfg. #	Volts	Input Signal	Output Signal	Each
L40-211	XEC-3004	24VAC/VDC	1 to 5VDC, 2 to 10VDC, 4 to 20mA	3 to 15 PSIG	**535.00**

Simplex and Duplex Climate Control Compressed Air Systems

- Available in 1/2 HP to 25 HP
- Available in 4.40 to 106.00 CFM FAD @ 80 PSIG
- Available tank and base mounted
- Available in 30 to 200 lb. tank size
- Two parts per million (PPM) maximum oil carryover certification
- Two-year bumper to bumper warranty on all units
- ASME-coded and National Board-Approved receiver tank; California Code 462-L-2 approval upon request
- ASME-coded relief valve
- Pressure gauge, manual drain valve and manual shutoff valve at tank discharge
- Initial Quin-Cup™ oil fill and enclosed belt guard on all units
- Unit does not include a motor starter — Simplex starter panels and solid-state duplex control panels with auto-alternation available
- Units available with packaged air dryer

Note: Voltage must be specified when ordering

Johnstone Supply is a Quincy Compressor® Climate Control national account.

The products shown here are available from participating Johnstone Supply stores.

QT Climate Control Compressors

- Replaces virtually any manufacturers' compressor without requiring complete package-unit removal
- Includes compressor, flywheel, motor, belt, guard and pulley, all mounted on a specially designed base plate that will fit any tank top plate from any manufacturer
- Equipped with a special lap gap ring design, allowing certified oil carryover rating of 2 PPM or less
- Template and instructions for quick and easy installation included
- Three-phase motors; units with single-phase motors also available
- Voltage must be specified when ordering

AF 908 Compressed Air Filter

- AF 908 air filters are designed to remove water, oil or particles from HVAC compressed air systems
- Pneumatic HVAC systems require clean, dry, oil-free air to function properly
- Filtration efficiency: 0.025 micron or larger

Order #	Mfg. #	Description	Max. Pressure	Max. Flow	Each

Refrigerated Air Dryers

- Removes moisture from pneumatic supply air lines and helps prevent condensation at low temperatures
- Assures clean air downstream at pneumatic controls and devices
- In/out connection: 3/8" O.D.
- No pre-filter required
- Automatic condensate drain discharges condensation from the dryer
- Compressor does not short-cycle, even during rapid load changes
- Uses R134a refrigerant
- Sized for system air consumption
- Reheated outlet air eliminates cold, sweaty piping

Johnson Controls

Direct Coupled Actuators- Non-Spring Return

- Direct mount to dampers; valves require **L46-281**, or **L46-596** valve linkage kit
- Designed to position balancing, control, round and zone dampers in HVAC Systems
- Provides floating control (AGA), floating control with automatic shutoff (IGA), and proportional controls with selectable 0-10 or 2-10VDC (GGA)
- The XXX-2S models are equipped with plenum cables and the XXX-3S models are equipped with terminal blocks
- Synchronous drive - provides a constant rotation time that is independent of the load
- Electronic circuitry or magnetic clutch protection for torque limiting
- Universal collar design easily accommodates most round and square shaft sizes
- Small, compact design - allows installation in tight fitting locations
- **L47-078**, **L47-082**, **L47-084**, **L47-086**, **L47-088**, **L47-092**, **L47-094**, **L47-096**, **L47-098**, **L47-101** include two SPDT auxiliary switches
- Electrical Connection: A = Screw Terminals; B = 1/4" Spade Terminals; C = 48" (1.2m) 10 AWG Plenum Cable; D = 120" 19 AWG Plenum Cable
- **L47-079** and **L47-089** include Resistive 135 ohm Potentiometer Position Feedback
- **L47-080**, **L47-081**, **L47-082**, **L47-083**, **L47-084**, **L47-085**, **L47-086**, **L47-090**, **L47-091**, **L47-092**, **L47-093**, **L47-094**, **L47-095**, **L47-096**, **L47-099**, **L47-100** and **L47-101** include Resistive 1000 ohm Potentiometer Position Feedback

Direct Coupled Actuators - Spring Return

Johnson Controls

- Direct mount to dampers; valves require **L46-281**, or **L46-596** valve linkage kit
- A mechanical spring return system provides rated torque with and without power applied to the actuator
- 120VAC supply voltage on **L45-654**, **L47-114**, **L47-121** and **L47-122**; 120/240VAC on **L46-277**, **L47-106**, **L47-107** and **L47-108**; 240VAC on **L47-115**, **L47-116**, **L47-123** and **L47-124**; 24VAC on all others
- **L47-103**, **L47-104**, **L47-105**, **L41-107**, **L47-108**, **L47-110** and **L47-111** include one SPDT auxiliary switch

Direct Coupled Actuators- Non-Spring Return

- Declutch for manual adjustment
- Adjustable mechanical end limits
- Removable access cover for direct wiring
- Mountable in any orientation
- Function selection switch for selecting modulating or floating/2- position control
- Models available with three-foot, 18 AWG color-coded cable
- **N20 Series is a control for air damper applications with up to 50 sq ft assuming 3.5 in-lb per sq ft of damper area, velocity independent
- **N34 Series is a control for air damper applications with up to 85 sq ft assuming 3.5 in-lb per sq ft of damper area, velocity independent

Applications:

- Stroke Degrees: 95 ±3 degrees

Direct Coupled Actuators-Spring Return

Honeywell

- Brushless DC submotor with electronic stall protection on all models
- Self-centering shaft adaptor (shaft coupling) for wide range of shaft sizes
- Models available for use with two-position, SPST, line- (Series 40) or low- (Series 80) voltage controls
- Models available for use with floating or switched SPDT (Series 60) controls
- Models available for use with proportional current or voltage (Series 70) controls
- Models available with combined floating and modulating control in a single device
- Models available with an internal end switch
- Models available with three-foot, 18 AWG color-coded cable
- Access cover to facilitate connectivity
- Durable plastic housing with built-in mechanical end limits
- Spring return direction field selectable
- Shaft position indicator and scale
- UL (cUL) listed and CE compliant
- All models are plenum rated per UL873
- Integral 1/2 in. NPSM conduit connection on some models"

Applications:
- Stroke Degrees: 95° ±3°

Direct Coupled Actuators - Universal Fire and Smoke

Honeywell

- Brush DC submotor with electronic stall protection for 2-position models
- Self-centering shaft adapter (shaft coupling) for wide range of shaft sizes
- Models available for use with two-position, single pole single throw (spst), line- (Series 40) or low- (Series 80) voltage controls
- Metal housing with built-in mechanical end limits
- Spring return direction field-selectable
- Shaft position indicator and scale
- Manual winding capability with locking function
- UL (cUL) listed and CE compliant
- All Models are plenum-rated per UL873
- Reversible design enables mounting for clockwise or counter-clockwise spring return with one model
- Optional internal end switches reduce the installation time and eliminates the need for an accessory auxiliary switch pack that was required in the past for confirming full open or full close of the actuator/damper
- Clip-in conduit connections have been added to the base of the actuator to simplify wiring and connection of flexible conduit
- Simplified shaft adapter enables fast, tight, and secure connection to the damper shaft

Applications:
- Stroke Degree: 95° ±3°

SIEMENS
Ingenuity for life

Direct Coupled Actuators – Non-Spring Return

- Patented self-centering shaft coupling
- Brushless motor technology
- Models available with dual independently adjustable auxiliary switches
- All metal housing
- Manual override
- UL60730 (to replace UL873) and cUL (C22.2
- No. 24-93) listed, certification
- Small actuator footprint with 132 lb-in (16 Nm) of torque

Direct Coupled Actuator – Spring Return – Fire and Smoke

- High temperature rated drive system
- Reversible fail-safe spring return
- All metal housing
- Teflon® insulated lead wires
- Mechanical range adjustment
- Multiple shaft couplings available; will accommodate up to 1.05-inch shafts
- Fifteen second nominal open time; 15-second nominal spring return time
- Fixed dual end switches models available: 5° and 85°

Direct Coupled Actuators – Spring Return

SIEMENS
Ingenuity for life

- Plenum-rated models available
- Optional built-in auxiliary switches with fixed switch points at 5° and 85° rotation
- Fast run time
- Signal inversion capability on modulating types (2 to 10 VDC or 10 to 2 VDC)
- UL and cUL listed, CE certified
- Compact footprint
- Low-voltage models are 24 VAC/DC compatible
- 120 VAC model with 1/2" NPT conduit connection

Order #	Mfg. #	Torque	Control Signal	Includes	Each

Electronic Actuators – Spring Return and Non-Spring Return

SIEMENS
Ingenuity for life

- Proportional or floating (3P) control
- Direct-coupled installation
- Visual and electronic stroke indication
- Manual override
- 180 lb. (800 N) nominal force
- Automatic calibration (SAX61.03U only)
- Electro-mechanical switches protect components from overload and stall condition
- Maintenance-free
- Standard rated

SmartX® Direct Coupled Actuators

Schneider Electric

- For damper and valve control applications
- Shaft coupling easily mounts to round or square damper shafts
- Advanced motor torque overload protection
- Visual position indicator
- Equipped with manual override (except **L40-452**, **L40-453** and **L40-458**)
- **L40-459** converts a 4 to 20mA signal to a 2 to 10VDC signal; use with **L40-447**, **L40-449**, **L40-451**, **L40-455** and **L40-457**

Two-Way Ball Valves

- Designed to regulate the flow of hot or chilled water, 50/50 glycol solution and low-pressure steam in HVAC applications
- Amodel® flow characterization disk allows for accurate control and eliminates the need for pipe reducers
- Used with M9000 series actuators and linkage kits
- Compact size allows for installation in tight-fit locations
- Maintenance-free design; no packing or rebuilding necessary
- Equal percentage flow characteristic
- NPT connections; also available in sweat and press connected

Specifications:

- Fluid temperature range: brass trim: 23°F to 203°F water; stainless steel trim: 23°F to 250°F water and 15 PSIG at 250°F steam
- Maximum closeoff pressure: 200 PSIG
- Rangeability: 500:1

Three-Way Ball Valves

- Designed to regulate the flow of hot or chilled water, 50/50 glycol solution and low-pressure steam in HVAC applications
- Amodel® flow characterization disk allows for accurate control and eliminates the need for pipe reducers
- Forged brass body, dual EPDM stem seals and 15% graphite-filled PTFE ball seats for leak-free operation
- Used with M9000 series actuators and linkage kits
- Maintenance-free design; no packing or rebuilding necessary
- Equal percentage flow characteristic (in-line port); linear flow characteristic (angle-port)
- NPT connections; also available in sweat and press connected

Specifications:

- Fluid temperature range: Brass trim: 23°F to 203°F water; stainless steel trim: 23°F to 250°F water and 15 PSIG at 250°F steam
- Maximum closeoff pressure: 200 PSIG
- Rangeability: 500:1

Valve Actuators

- For use with VG1000 series ball valves
- Single screw, direct mounting
- Reversible mounting design simplifies set-up of valve spring return position
- Compact design to accommodate limited-space applications

Order #	Mfg. #	Type	Torque	Control Signal
L46-279	VA9203-GGA-2Z	Spring Return	27 lb	0-10VDC/4-20mA
L41-790	VA9104-GGA-2S	Non-Spring Return	35 lb-in	Proportional 0(2) to 10VDC, 0(4) to 20mA
L46-280	VA9208-GGA-3	Spring Return	70 lb	0-10VDC/4-20mA

Valve Linkage Kits

- Used for mounting M9000 series actuators on VG1000 series ball valves
- **L46-281** ensures stable actuator mounting while preventing loading on the valve stem and stem seals
- **L46-596** provides thermal isolation and permits use of actuators on VG1000 valves with low pressure steam

Duralynx® Two-Way Ball Valve Assemblies

- For control of hot or chilled water and 50% glycol solutions
- Includes valve body, linkage, and anti-rotation clips
- Forged brass body and nickel plated ball
- Reinforced Teflon® seals with EPDM O-rings
- Equal percentage flow characteristic optimizes heat transfer and increases energy efficiency

Specifications:

- Fluid temperature range: 20°F to 250°F
- Maximum closeoff pressure: 130 PSI (1/2" and 3/4" valves), 100 PSI (1" to 3" valves)

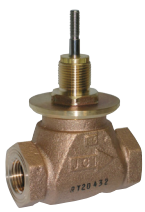
Johnson Controls



Two-Way Globe Valves

- Designed to regulate the flow of hot or chilled water, 50/50 glycol solution and steam in HVAC applications
- Complies with ANSI Class 250 pressure/temperature standard
- Used with V-3000/V-3801 series pneumatic actuators or VA715x-1001 electric actuators

Specifications:
- Ambient operating temperature range: 35°F to 150°F pneumatic actuated; 35°F to 140°F VA-7150, 35°F to 122°F M9216 electrically actuated
- Maximum pressure/temperature: 400 PSIG up to 150°F decreasing to 365 PSIG at 248°F (water); 35 PSIG at 281°F (steam)
- Rangeability: 25:1

Valve Actuators

- Direct coupled, no linkage required
- Controls hot water, chilled water, glycol solutions and steam
- Long life replaceable ring packing provides highest reliability and longest life
- Fluid temperature range: 35 to 284°F (2 to 140°C)
- Voltage: 24VAC, 50/60 Hz
- **L46-602** and **L46-603** include selector switches that allow field conversion from proportional control to floating or on/off control
- Control signal for On/Off
- Floating models are 24VAC/VDC
- Proportional models are 0(2) to 10VDC, 0(4) to 20mA

Valve Actuator

- For use with VG7000 series globe valves
- Provides floating/incremental control of valves with up to 5/16" stroke
- Compact assembly size fits most unit vent, baseboard, and other small coil applications
- Reversible synchronous motor accurately positions valve
- Includes stem retainer, clip kit and wire nuts

Order #	Mfg. #	Type	Torque	Control Signal
L41-791	VA-8020-1	Non-Spring Return	22 lb-in	Floating/Incremental 24VAC

Two-Way Globe Valves

- Used for two-position or modulating control of water and glycol solutions (to 50% concentration) in heating or cooling systems
- 50:1 rangeability per VDI/VDE 2173

Specifications:
- Materials (body): Brass with Stainless Steel Seat and Stem
- Temperature range: 36°F to 248°F water
- Use with actuator: Q5001/Modutrol IV™ Motor; Q5020/DCA
- Maximum operating pressure: 250 PSI water

Two-Way Cartridge Cage Valves

- Controls the flow of hot water, cold water or glycol solutions (up to 50% concentration)
- Designed for on-off “zone” control of heating/cooling systems, or to control individual fan coil, baseboard radiator or convector applications
- Depending on the model selected they can be controlled by either a low or line voltage SPST or SPDT controller, like a room thermostat, aquastat or flow switch

Specifications:
- Flow characteristic: Linear
- Temperature range: 36°F to 230°F

Fig.	Order #	Mfg. #	Conn. Size	Max. Pressure	Cv

Three-Way Cartridge Cage Valves

- Controls the flow of hot water, cold water or glycol solutions (up to 50% concentration)
- Valves can be piped for either diverting or mixing applications in heating and/or cooling systems, or for individual fan coil, radiator or convector applications
- Bronze body with stainless steel stem

Specifications:
- Flow characteristic: linear
- Fluid temperature range: 34°F to 203°F
- Ambient temperature range: 32°F to 150°F

Three-Way Cartridge Globe Valves

Honeywell

- Control hot and/or chilled water for VAV terminal units, fan coil units, small reheaters and recoolers in electric/electronic temperature control systems
- Used with the M6410 Small Individual Room Controller (IRC) 3-position floating Electronic Linear Valve Actuator, M7410 selectable 0 to 10VDC or 2 to 10VDC Electronic Actuator, or MP958 Pneumatic Valve Actuator
- Valve inserts are changeable without draining valve when used with the insert replacement tool
- Threaded plastic cover/manual handle allows manual operation
- Easily installed in areas where space is limited
- Brass body and stainless steel stem

Specifications:

- Flow characteristic: equal percentage (A-AB), linear (B-AB)
- Leakage rate: less than 0.02% of Cv
- Temperature range: 36°F to 230°F
- Maximum operating pressure: 230 PSIG

Order #	Mfg. #	Conn. Size	Cv
L39-988	V5853A2048	1/2" Sweat	1.9
L39-989	V5853A2063	3/4" Sweat	4.9

Valve Actuators

Honeywell

- Small electric actuators provide floating or modulating individual room control (IRC) of V5852, V5862 two-way or V5853, V5863 three-way cartridge globe valves
- Magnetic coupling for torque limitation independent of voltage supply and self-adjustment of the closeoff port
- Includes conduit connector
- **L39-863** includes direct/reverse acting switch

Specifications:

- Voltage: 24VAC, 50/60 Hz
- Stroke: 1/4"
- Timing: 125 Sec. (at 60 Hz)
- Fail safe mode: non-spring return
- Ambient temperature range : 32°F to 140°F
- Torque/force: 40.5 lb.
- Dimensions: 3-7/16" H x 1-15/16" W x 2-3/8" D

Order #	Mfg. #	Control Signal	Power Consumption	For Use With	Each
L39-860	M6410A1029	SPDT Floating Control	0.7VA	Floating or SPDT Controllers	**325.00**
L39-863	M7410F1000	Modulating Control; or Reverse	1.4VA	0/2 to 10VDC Proportional Controllers	**509.00**

Valve Actuators

Honeywell

- Allows the use of one common transformer power supply for multiple actuators and controllers
- Self-contained, motorized valve linkage
- Linkage self-adjusts to valve stroke from 12 to 25 mm (1/2 - 1")
- Multi-pose mounting
- Strong valve seat closing force 160 lbf (710 N)
- Compact size for easy installation in confined area

Order #	Mfg. #	Type	Torque	Control Signal	Power Consumption	For Use With	Each
L46-220	ML7984A4009	Non-Spring Return Direct-Coupled	160 lbf	SuperMod	6 VA	V5011/13, VGF21, and VGF22 up to 3 in.; V5045 w/ 272629A	**925.00**

Honeywell

Valve Linkage Kits

- Q5024 Series globe valve linkages connect a Honeywell direct coupled actuator (DCA) to a steam or water globe valve
- Q5024 Series linkages are compatible with 2- and 3-way globe valves
- Used with 2-way and 3-way globe valves in modulating or two-position service
- Quick and simple installation with no disassembly required
- Heavy-duty steel rack and pinion construction and aluminum die-cast housing
- Maintenance-free construction
- Flexible actuator mounting orientation
- Adjustable manual override lever and valve position indicator
- Available for 1/2" through 6" globe valves made by most manufacturers
- Used with Honeywell MS and MN Spring and Non-Spring Actuators

Order #	Mfg. #	Description	For Use With	Each
L47-890	Q5024A1116	Linkage for 0.63"/16mm Valve Stroke	MS and MN Spring and Non-Spring Actuators, 2-Way and 3-Way Globe Valves in Modulating or Two-Position Service	**705.00**
L47-891	Q5024A1123	Linkage for 0.91"/23mm Valve Stroke	MS and MN Spring and Non-Spring Actuators, 2-Way and 3-Way Globe Valves in Modulating or Two-Position Service	**715.00**
L47-892	Q5024A1130	Linkage for 1.18"/30mm Valve Stroke	MS and MN Spring and Non-Spring Actuators, 2-Way and 3-Way Globe Valves in Modulating or Two-Position Service	**939.00**
L47-893	Q5024B2230	Double Linkage for 1.18/30mm Valve Stroke	MS and MN Spring and Non-Spring Actuators, 2-Way and 3-Way Globe Valves in Modulating or Two-Position Service	**1099.00**
L47-894	Q5024B2240	Double Linkage for 1.57"/40mm Valve Stroke	MS and MN Spring and Non-Spring Actuators, 2-Way and 3-Way Globe Valves in Modulating or Two-Position Service	**1199.00**

Honeywell

Modutrol IV Motors

- Auxiliary shaft has same torque and dead weight rating as power end shaft — the auxiliary shaft of a normally closed motor can be used for valve or damper linkages in a normally open application
- Wiring box provides protection from driving rain (rated NEMA-3)
- Reduced power consumption may allow smaller transformer use
- Configurable to replace many previous motors
- Double ended shafts; 3/8" square, ambient temperature ratings of -40°F to +150°F
- Motors are non-spring-return unless otherwise noted
- **L39-855** and **L39-857**: Two-position, spring-return motor used to operate dampers and valves; integral helical spring returns motor shaft to fully closed position on power interruption; one auxiliary switch
- **L86-163**: Reversing, three-wire SPDT or floating control motor used to operate dampers and valves; adjustable stroke
- **L86-919**: Proportional motor used to operate dampers and valves when used with a modulating DC voltage source
- **L39-861**: Proportional motor used to operate dampers and valves when used with a modulating 4-20mA control signal
- **L39-862**: Proportional motor used to operate dampers and valves when used with a modulating 4-20mA control signal; includes two auxiliary switches
- **L86-164**: Two-position, spring-return motor used to operate dampers and valves; integral helical spring returns motor shaft to fully closed position on power interruption
- **L86-165**, **L39-870**, **L39-871**, **L86-166**, **L86-167**, **L39-874** and **L86-168**: Reversing, proportional motor used to operate dampers and valves
- **L39-870**: Includes one auxiliary switch
- **L39-871**: Includes two auxiliary switches
- **L86-167**: Both power and auxiliary shafts are tapped
- **L39-874** and **L86-168**: Integral helical spring returns motor shaft to fully closed position on power interruption

L40-045	S963B1128	Manual Potentiometer	**1299.00**

Damper Linkages

Honeywell

- Connects Modutrol motors to standard dampers
- Adjustable to any degree of damper opening

Order #	Mfg. #	Includes	Each
L39-891	Q605A1070	Motor Bracket, Damper Arm, Motor Crankarm & 2 Ball Joints	**265.00**
L37-274	Q605D1069	Motor Bracket, 3 Damper Arms, Motor Crankarm, 4 Ball Joints, Left Hand Drive Ear & Crankarm Adapter	**1545.00**

Modutrol Motor/Valve Linkages

Honeywell

- Connect Honeywell Modutrol III or IV motor to 2 or 3-way valve in modulating or two-position service
- For use with Honeywell V5011 and V5013 water and steam valves having a fixed 3/4" lift (stem travel) and 1-3/8" bonnet
- Q5001D switch replaces all Q618A or Q601 J, K, L and M linkages
- For use with M6184D, M9184D, M8185D, M9164D, M9174D, M9185D

Order #	Mfg. #	Description	Each
L37-275	Q5001D1018	Stem force 160–320 lbs.	**2599.00**
L37-276	Q5001D1000	Stem force: 80–160 lbs.	**2299.00**

Interface Modules

Honeywell

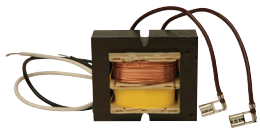
- For converting series 90 Modutrol IV control
- Includes reversing switch
- **L86-667** adapts 90 series motor to function as M71XX model
- **L39-971** adapts 90 series motor to function as M72XX model
- Control signal 4 to 7, 6 to 9 or 10.5 to 13.5VDC for **L86-667**
- Adjustable zero and span, voltage or current (2 to 10VDC or 4 to 20 mA) for **L39-971**

Order #	Mfg. #	Each
L86-667	Q7130A1006	**585.00**
L39-971	Q7230A1005	**539.00**

Internal Transformers

Honeywell

- Converts line voltage to 24VAC for powering Modutrol® Motors
- **L40-757** provides 24VAC isolation

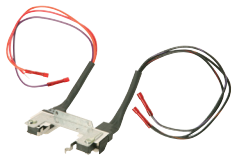


Order #	Mfg. #	Primary Voltage	Each
L40-757	198162JA	24	**215.00**
L40-759	198162GA	220	**215.00**
L37-646	198162AA	120/208/240 (selectable)	**319.00**

Internal Auxiliary Switch Kit

Honeywell

- Controls auxiliary equipment as a function of motor shaft position in Honeywell Modutrol motors
- Includes two microswitch V3 precision switches



Order #	Mfg. #	Each
L37-647	220736B	**605.00**

Honeywell

Commercial ZonePRO Modulating Thermostats

- Modulating (TB6980), floating (TB7980) or standalone control for VAV zones
- Can be used in any application requiring floating or analog control of an actuator
- Energy saving features include night setback input, range stop temperature limits and timed occupancy override
- Range stop temperature limits for setting maximum and minimum setpoints
- Timed occupancy override (2 hours)
- Single and multi-output models available

Specifications:

- Power supply: 24V
- Auto changeover deadband: 9ºF
- Temperature range: 50º F to 95º F
- Dimensions: 2.7" W x 4.6" H x 1" D

Order #	Mfg. #	System Application	Power Method	Color	Output Signal	Each
L41-702	TB6980A1007	Heat/Cool Zone control	Hardwired	White	Floating	**519.00**
L41-703	TB6980B1006	Heat/Cool Zone control	Hardwired	White	Floating plus Analog and Triac output	**639.00**

L41-705	TB7980B1005	Heat/Cool Zone control	Hardwired	White	Analog plus Additional Analog and Triac	**775.00**

Honeywell

Proportional Remote Bulb Temperature Controls

- Provides proportional control of water or air temperature
- Controls Series 90 Modutrol motors only
- Includes 1/2" diameter copper bulb with copper capillary
- Fast response models (for duct mounting) have coiled sensing element giving at least four times faster response than standard models
- Ambient temperature compensated for the case and tubing
- Sensing element capillary tubing allows remote mounting of sensing element
- Setpoint may be read and adjusted through cover
- Throttling dial inside case adjusts proportional throttling range
- **L40-091** and **L37-649** include #107324A duct bulb holder
- **L40-760** has 3/8" diameter, 5-1/2" insertion
- 135 Ohm potentiometer

Order #	Mfg. #	Sensing Element	Temp. Range	Max. Operating Temp.	Each

Johnson Controls

Commercial Dampers

Fire Dampers

- Available in curtain and multi-blade styles
- Blades shut when fusible link reaches 165°F, 212°F or 285°F (depending on model) to prevent the spread of fire
- Available in sizes 8” to 150” wide by 8” to 96” high and round in 6” to 24” diameter

Smoke Dampers

- Class I and Class II two-position operation to restrict the flow of smoke
- Class I modulating operation for smoke and volume control
- Used with factory-installed electric or pneumatic actuators
- Available in sizes 8” to 120” wide by 6” to 96” high and round in 6” to 24” diameter
- Built to perform beyond UL standards an building code requirements

Fire/Smoke Combination Dampers

- Class I and Class II two-position operation to prevent the spread of fifire and smoke
- Class I modulating operation for volume, smoke and fifire applications
- Used with factory-installed electric or pneumatic actuators
- Available in sizes 8” to 120” wide by 7” to 96” high and round in 6” to 24” diameter
- Built to perform beyond UL standards and building code requirements

Round Dampers

- Offered with seals for use as a control damper and without seals for use as a balancing damper
- Optional factory-installed electric or pneumatic actuators (some models)
- Available in sizes 4” to 22” diameter

Volume Control Dampers

- Offered in three performance levels, galvanized
- Aluminum, 304 stainless steel and thermal isolated options
- Optional factory-installed electric or pneumatic actuators
- Available in sizes 8” to 192” wide by 6” to 228” high

Balancing Dampers

- Designed for balancing or variable volume control applications
- Optional factory-installed electric or pneumatic actuators
- Available in sizes 8” to 48” wide by 6” to 76” high

Damper Accessory Kits and Replacement Parts

Johnson Controls

Order #	Mfg. #	Description
L47-047	DMPR-KC005	7 in. Blade Pin Extension w/ Coupler
L47-053	DMPR-KC211	Damper Jackshaft 1 in. Diameter, 2 Panel
L47-054	DMPR-KC212	Damper Jackshaft 1 in. Diameter, 3 Panel

Order #	Mfg. #	Description
L47-058	DMPR-JS-0029	Swivel Ball Joint
L92-619	DMPR-KC102	Damper Push Rod, 5/16 x 48 in. length

JADE Economizer Kits

Honeywell

- LCD screen delivers continuous messages, important diagnostics and system status
- Color-coded wiring terminals help with easy installation
- Built-in freeze protection closes the outdoor dampers to protect coils when temperatures drop
- Two-wire Sylk® bus enabled communications enable simple integration and future expansion
- On-board fault detection and diagnostics quickly identifies sensor failures or loss of communication, saving time on service and commissioning

Order #	Mfg. #	Description	For Use With	Each
L81-238	YL7220AJ3103	Dry Bulb With Communicating 27 lb-in DCA	Series 72 Actuators; C7232	**1799.00**
L81-239	YL7220AJ3105	Dry Bulb With Communicating 44 lb-in DCA	Series 72 Actuators; C7232	**1599.00**
L81-205	Y7220S7215	Enthalpy With Black Motor	Series 72 Actuators	**2145.00**
L81-210	YL7220SJ3105	Enthalpy With Communicating 44 lb-in DCA	Series 72 Actuators; C7232	**1745.00**

JADE Economizer Components

Honeywell

- On screen checkout feature saves valuable labor time and checks for installation accuracy
- LCD screen simplifies the user interface and lowers installation cost
- Simplified wiring eliminates wiring errors and saves time
- Ability to stage exhaust fans without extra hardware
- Modular solution provides base requirements without adding cost of other components and allows for upgrades as required
- Fault detection and diagnostics provide code compliance while simplifying setup and maintenance

Order #	Mfg. #	Description	For Use With	Each
L46-112	W7220A1000	Economizer logic with DCV and commissioning	Honeywell Series 72 Actuators	**869.00**
L46-111	C7400S1000	Solid State Enthalpy Sensor	W7220 Only	**265.00**
L46-110	C7250A1001	Electronic 20K Temperature Sensor	W7720 Only	**75.00**

Legacy Economizer Components

Honeywell

- Enthalpy sensors
- Not for use with W7220 JADE

Specifications:

- Operating humidity range: 10% to 90% relative humidity
- Temperature range: -25°F to +125°F
- Dimensions: 3-7/8" W x 3-5/32" H x 1" D

Blue Angel Plus™ Flame Retention Oil Burners

- Provide outstanding efficiency, reliability and performance
- Feature high static capabilities and offer a wide firing rate for a broad use of applications
- Burners are shipped assembled and include an adjustable mounting flange and flange gasket
- Factory installed 0.75 GPH test nozzle
- Single piece electrode — extremely easy to set up (eliminates the eight piece assembly)
- Simple three step installation — saves installation time and money
- Wide firing rate — from 0.5 to 3.0 GPH
- Flame retention head — keeps flame uniform and prevents soot and smoke
- Dimensions: 12-7/8" W x 12-1/2" H x 7-3/4" D
- Fuel: No. 1 or No. 2 heating oil
- Air tube length: 6" for **L86-098**; 9" for **L86-099**

Order #	Mfg. #	Wt. Lbs.	Each
L86-098	300-711C	37	**2099.00**
L86-099	300-713C	37	**2099.00**

Gas Conversion Burners

For Residential and Light Commercial Applications

- Easily converts a wide variety of oil fired boilers, furnaces and water heaters to fire gas
- The unique forced draft design provides the precise amount of combustion air for flame retention and to overpower poor flue conditions
- Direct spark (pilotless) multi-try ignition system
- 1/2" NPT gas connection
- Units include an adjustable mounting flange (pedestal optional) and flange gasket
- **L81-827** and **L81-828** feature an exclusive adjustable flame spreader which properly shapes the flame for round, square or rectangular shaped combustion chambers and are for use with combustion chambers no smaller than 7" wide, 8" long, 7" high or 8" round

Features:
- Electrical enclosure hides most wires from view
- Multi-try ignition
- Installed with terminal blocks
- Direct spark ignition

Specifications:
- **L81-827** and **L81-828** for equipment with input rates of 50,000-250,000 Btu/Hr. 120V/60 Hz.(4" D. air tube is 8-1/8" long, 7-1/8" max. insertion)
- **L81-829** 4" D. air tube is 7-3/8" long (6-3/8" max. insertion) and is for equipment with input rates of 65,000-200,000 Btu/Hr

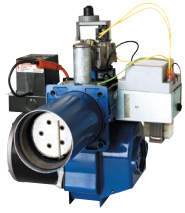
Gas Conversion Burners

- High efficiency/high static gas burners fire even tough to fire appliances, with the ability to overcome adverse draft situations
- HSG gas burners fire either Natural or LP/Propane gas with a simple orifice change (all orifices provided) and gas valve pressure adjustment
- Direct spark ignition
- HSG200 rate range: 60,000 BtuH min. to 200,000 BtuH max.
- HSG400 rate range: 200,000 BtuH min. to 400,000 BtuH max.
- Voltage: 120VAC/50-60 Hz; gas valve and controls: 24VAC



Order #	Mfg. #	Model #	Gas Type	Wt. Lbs.	Each

Residential Flame Retention Oil Burners

- Provides compact flame and peak performance
- Fuel: No. 1 or No. 2 heating oil
- 1/7 HP, 3450 RPM, NEMA 48H flange, PSC motor
- Manual reset overload protection
- 14K VAC ignitor solid state electronic ignitor
- Air tube sold separately
- **L86-353** includes R7184B interrupted primary with 15 second pre-purge, clean-cut pump with solenoid valve, air turbo injector and high efficiency blower wheel with 56,000 to 420,000 BtuH input
- **L86-354** offers fuel efficiency over a broad firing range, is virtually unaffected by poor chimney or draft conditions and offers a one-piece flame retention burner head

Order #	Mfg. #	Model #	Amps	Firing Rate	Each
L86-353	B2007	AFG	5.8A	0.4–3.0 GPH	**1499.00**

Cleancut Oil Pumps

- Solenoid valve provides higher-pressure cut-ons and cut-offs for cleaner, more efficient burner operation
- Fewer moving parts than traditional pumps
- Piston valve for protection from leak-through in gravity feed situations
- 3450 RPM
- Factory set @ 100 PSI
- Nozzle pressure: 100 to 200 PSI
- Lift or gravity feed applications with 10 PSI maximum inlet/return pressure
- For use with #2 or lighter fuel oils
- Nozzle port location: RH
- Strainer and nozzle rating at 100 PSI: 4 GPH

Order #	Mfg. #	Description	Each

Fuel Oil Units

Model A Single-Stage, Model B Two-Stage

- Contamination resistant control valve
- No leak easy flow bleed valve
- High contact ratio precision matched gears for long life
- Double-lip shaft seal
- Original diaphragm/cone valve
- Involute tooth-form gears for quiet operation
- Two-stage units for high lift application
- Factory set at 100 PSI
- Pressure adjustable from 100 to 200 PSI @ 3450 RPM, 100 to 200 PSI @ 1725 RPM
- Lift or gravity feed applications with 10 PSI maximum inlet/return pressure
- Suitable for No. 1 and No. 2 fuel oil or kerosene
- May be mounted in any position, except upside down
- **L86-145** through **L86-148** are for installations requiring up to 6" HG vacuum single pipe and 12" HG vacuum two pipe
- **L86-149** and **L86-150** are rated to 17" HG vacuum two pipe

Order #	Mfg. #	RPM	Rot.	Nozzle Port Location	Stages	Strainer & Nozzle Rating @ 100 PSI	Each

L86-150	B2YA-8916B	3450	RH	RH	Two	3 GPH	**529.00**

Shutoff Valves

- Top quality field-proven valves provide instantaneous fuel supply cutoff back-up in oil fuel circuits
- Wired in parallel with burner motor, valve closes whenever current to motor is interrupted, blocking oil flow to nozzle
- Used with fuel units rated up to 16 GPH
- Suitable for use with No. 1 and No. 2 fuel oil or kerosene
- Non-delay opening response, valves mount in any position

Hundreds of Thousands of OEM Solutions at Your Fingertips
For all of your AC needs *supporting you from installation and beyond*

Beckett

Electronic Oil Ignitors

- 20kV peak rating guarantees quick and efficient ignition
- Small size and lightweight
- Synthetic resin provides high impact strength and scratch resistance; impenetrable to most chemicals
- Case design has breakout sections at the rear and side for lead wire exit and a hood to cover and protect wires
- Secondary mid-point ground

Specifications:
- Input: 120VAC, 60 Hz, 35VA
- Output voltage: 6 kV RMS, 20 kV PEAK
- Output current: 35mA RMS
- Ambient operating temperature: -20°F to +150° F

Electric Oil Ignitors

- Primary Voltage: 120VAC
- No extra mounting plate needed
- Low operating temperature
- 50/60 Hz
- Small size and lightweight
- **L81-185** is a replacement for Wayne HI speed M/MH burners
- **L81-186** is a replacement for Beckett A, AF, AFG burners
- **L81-187** is replacement for Beckett S burners
- **L81-188** is a replacement for Carlin 99, 100, 101, Card Miser burners
- **L81-189** is a replacement for Wayne E burners

Oil Burner Nozzles

- 100% tested for GPH and spray angle against a calibrated master nozzle to obtain maximum performance
- Stainless steel orifice has a high quality heat and water resistant body
- Closer manufacturing tolerances reduce flow, angle and pattern valuation for more consistent nozzles
- Up to 50 GPH nozzles available at participating Johnstone Supply stores or by special order
- Type A nozzles (Fig. A - red cap) are hollow cone nozzles designed to create clean, quiet efficient fire for stable flame at low flows, and is recommend for trial on burners without distinct air patterns
- Type B nozzles (Fig. B - blue cap) are solid cone nozzles designed to produce uniform spray throughout the entire pattern and provide smooth ignition, for use on larger burners and where air pattern is heavy in center or for long fires
- Type W nozzles (Fig. C - Green cap) are semi-solid nozzles that can replace type A or B nozzles at 0.4 to 1.2 GPH in 70° or 80° spray for reducing specific problems

Fuel Oil Filters

- 10 micron oil filter
- Now standard with BioGasket™
- Compatible with Bio-Fuel blends up through B100
- Leak-proof design
- 4EVERLoc with bottom bolt design
- Durable epoxy-coated galvanized steel filter bowl inside and out
- Pipe size 3/8” NPT standard

Order #	Mfg. #	Application	Max. Nozzle Capacity	Replacement Cartridges	Each
L37-078	1A-25B	Small to Average Homes & Commercial	10 GPH	L37-080 or L37-523	**75.00**
L37-079	2A-700B	Larger Homes & Commercial	25 GPH	L37-081 or L37-524	**99.00**

Wool Felt Replacement Cartridges

- 10 micron
- Core center bonded to prevent media migration
- Includes 3 gaskets: Buna-N, center bolt and vent screw gasket
- Compatible with fuel oil conforming to ASTM D396-09 (Up to B5)

Order #	Mfg. #	Description	For Use With	Each
L37-080	1A-30	Wool	1A-25A, 77, Sears 8055, Sid Harvey XF-25/264, Mitco 264, AutoFlo F-300, Eddington S-254, Federal A-77	**5.69**
L37-081	2A-710	Wool	2A-700A, 99, Sid Harvey XF-1/265, Mitco 265, AutoFlo F-400, Eddington S-252	**14.49**

L41-665	101	Wool	2A-700A, 99, Sid Harvey XF-1/265, Mitco 265, AutoFlo F-400, Eddington S-252	**14.99**

Unifilters

- 10 micron oil filter
- Compatible with fuel oil conforming to ASTM D396-09 (Up to B5)
- Leak-proof design
- 4EVERLoc with bottom bolt design
- Durable epoxy-coated galvanized steel filter bowl inside and out
- 40 PSI working pressure
- ETL listed
- Pipe size 3/8” NPT standard

Order #	Mfg. #	Application	Max. Nozzle Capacity	Replacement Cartridges	Each
L41-662	77B	Small to Average Homes & Commercial	10 GPH	L41-664 or L37-523	**65.00**
L41-663	99B	Larger Homes & Commercial	25 GPH	L41-665 or L37-524	**95.00**

Replacement Cartridges

- 10 micron
- Continuous spun rayon fibers with gear tooth design
- Includes 3 gaskets: Buna-N, center bolt and vent screw gasket
- MicRoFiber provides maximum surface area and enhanced depth filtration
- Compatible with fuel oil conforming to ASTM D396-09 (Up to B5)

Order #	Mfg. #	Description	For Use With	Each
L37-523	RF-1	Micro Fiber	1A-25A, 77, Sears 8055, Sid Harvey XF-25/264, Mitco 264, AutoFlo F-300, Eddington S-254, Federal A-77	**6.39**

L39-025	RF-4	Micro Fiber	Fulflo B4, AS4, FB4	**9.65**

Gar-Ber Fuel Oil Filters

- Filters spin on for quick and easy installation
- 7 to 10 micron filtering capacity
- Ideal for systems with nozzle clogging problems
- **L41-658** filter restriction indicator displays vacuum reading for determining when to replace filter (included with some models)
- Inlet/outlet size: 3/8" NPT
- Maximum firing rate: 10 GPH

Order #	Mfg. #	Application	Includes	Max. Nozzle Capacity	Each

Tigerloop Oil De-aerators

A

B

- Safely handles suction line air leaks and reduces running vacuum for clear, foam-free oil at the nozzle
- Removes air entrained in oil during transporting and delivery
- Eliminates potential leak hazard by eliminating the return line
- Preheats oil for cleaner combustion

Fig.	Order #	Mfg. #	Description	Each

Oil Burner Tune-Up Kit

WAYNE

- For use with Wayne models M, MSR, MH, ER, ERA, EH, EHA, EHASR, OE and OEA burners
- E and M Series burner tune-up kit
- Kit includes: Two each electrode stems, electrode assemblies with insulators, buss bars, insulator bushings; one each oil line assembly, coupling, elbow, buss bar support, gun setting gauge

Order #	Mfg. #	Each
L38-666	31156	**155.00**

Oil Burner Tune-Up Kit

WAYNE

- Specially designed to fill the parts requirements for HS model Blue Angel burners with two-piece electrode assemblies
- Kit includes: One each buss bar support, 8" oil line, electrode holder, J-pump coupling end, brass elbow coupling; two 6" electrode assemblies

Order #	Mfg. #	Each	3 Lot
L37-484	31157	**229.00**	**215.00**

Fuel Oil Test Kit

- Determines pump efficiency, cut-off, suction, etc.
- Analyzes and troubleshoots burner efficiency
- Kit includes: 2" gauge with 30" 0–150 lbs. scale, 12" hose with necessary fittings and heavy-duty plastic case

Order #	Mfg. #	Each
H25-149	78020	**125.00**

King Combination Fill Alarm and Gauges

- For vertical tank applications
- Durable cast iron with corrosion-resistant powder coating
- Tangle-free solid link hinge withstands rough handling
- Large, easy-to-read, break-resistant plastic vial
- Meets 5 PSI air test requirements
- Fits tanks with 42" through 44" diameter
- Also available for horizontal applications

Order #	Mfg. #	Conn. Size Bottom	Conn. Size Top	Each
L87-320	4522	1-1/2" NPT (Male)	1-1/4" NPT (Female)	**125.00**

L-Series Water Leak Control

Professional-Grade Water Damage Prevention

By teaming the L1 Wi-Fi Water Leak & Freeze Detector with the L5 Wi-Fi Water Leak Shutoff Valve, your customers have a comprehensive water management system that can be controlled from most anywhere via WiFi.

L-SERIES WATER LEAK AND FREEZE DETECTOR

L5 Wi-Fi Water Leak Shutoff Valve

- Shuts off the water supply when paired with the L1 Detector or one of the sensing cables
- Controls the valve remotely through the Resideo App
- Manual override to turn on or off

Order #	Mfg. #	Description
L51-334	VWS02Y-1/2	½" NPT L5 Valve
L51-335	VWS02Y-3/4	¾" NPT L5 Valve
L51-336	VWS02Y-1	1" L5 Valve
L51-337	VWS02Y-11/4	1-1/4" NPT L5 Valve

L1 Wi-Fi Water Leak and Freeze Detector

- Alerts to leaks with LED lights and a 100 dBA alarm
- Reset and reuse the device after detection
- Includes 5 ft sensor cable
- Runs on two AA batteries, no wiring, hub, or base required

Order #	Mfg. #	Description
L51-332	CHW3610W8001/U	Single Pack
L51-333	YCHW3000W3003/U	Triple Pack

00 Series Cartridge Circulator Pumps

- Designed for hydronic heating and chilled water systems
- Compact, lightweight, self-lubricating, direct drive design
- Wet rotor circulator
- Operates in systems up to 125 PSI and 230°F
- Iron pumps for closed systems, stainless steel or bronze for open systems
- 3250 RPM
- N/A in chart indicates not to operate pumps at these low head levels
- **L86-212** through **L86-215** include flanges
- **L80-893**, **L87-211** and **L87-214** have a removable integral flow check that eliminates the need for a separate in-line flow check
- **L87-212** has a built-in transformer, relay and priority switch for easy installation of an additional zone or indirect hot water heater

3-Speed Cartridge Circulator Pumps

- Fine tune control to match system requirements
- Removable, high-flow integral flow check (IFC) prevents gravity flow and improves pump performance
- For use in systems up to 125 PSI and 230°F
- 3250 RPM
- Flow data shown below is at high-speed setting

007e ECM High-Efficiency Circulators

A

B

- Ideal for hydronic systems zoned with circulators or zone valves
- High efficiency ECM motor uses up to 85% less electricity
- BIO Barrier protects pump from system contaminants
- SureStart automatically frees locked rotor condition and self-purges air from pump
- Integral Flow Check (IFC) included
- Dual electrical knockouts, 6" stranded wire leads included
- 10' shut-off head, 16 gpm max flow
- Double insulated, no ground wire required
- Cast iron
- **L82-017** is a standard 2-bolt flange
- **L82-018** is a universal 4-bolt

006e3™ ECM High Efficiency Hot Water Circulators

A

B

- Infinitely variable, high efficiency wet rotor circulator with an ECM permanent magnet motor
- Low, medium and high settings
- Compact for tight spaces
- Multiple connection options
- ECM motor uses up to 85% less electricity
- SureStart automatic unblocking and air purging mode
- Not suitable for chilled water
- **L82-144** Includes a 6' power cord

0015e 3-Speed ECM High-Efficiency Circulators

- Ideal for hydronic systems zoned with circulators or zone valves
- High efficiency ECM motor uses up to 85% less electricity
- BIO Barrier protects pump from system contaminants
- SureStart automatically frees locked rotor condition and self-purges air from pump
- Integral Flow Check (IFC) included
- Dual electrical knockouts, 6" stranded wire leads included
- 3 easy settings: LOW (5' head), MEDIUM (10' head), HIGH (18' head),16 gpm max flow
- Double insulated, no ground wire required
- Cast iron
- Not suitable for potable water or chilled water systems
- **L82-095** is a standard, 2-bolt flange
- **L82-096** is a universal, 4-bolt flange

0034e ECM Variable Speed Circulators

- High-performance, variable speed, wet-rotor circulator with high-efficiency ECM permanent magnet technology
- With an easy-to-use dial and 5 easy settings, its variable speed performance curves are equivalent to the Taco 009, 0010, 0011, 0012, 0012 3-Speed, 0013, 0013 3-Speed & 0014
- Ideal for large residential and light commercial hydronic heating, chilled water cooling and domestic hot water systems
- Reduces power consumption by up to 85% compared to equivalent AC permanent split capacitor circulators

0018e ECM High-Efficiency Circulators with Bluetooth

A

B

- The 00e® series 0018e circulator is a variable speed wet rotor circulator with an ECM permanent magnet motor
- Operating modes include infinitely variable fixed speed, constant pressure, proportional pressure, activeADAPT self-adjusting proportional pressure
- Adjust the operating mode with the dial or the Taco 0018e ECM Circulator Mobile App using Bluetooth® connectivity on your smartphone or tablet
- The ECM high-efficiency motor reduces power consumption by up to 85% compared to equivalent AC permanent split capacitor circulators
- NOT suitable for chilled water or open loop potable water systems

0026e™ ECM High-Efficency Circulators

A

B

- The 0026e is a high-performance, variable speed, wet-rotor circulator with high-efficiency ECM permanent magnet technology
- Ideal for large residential and light commercial hydronic heating, chilled water cooling and domestic hot water systems
- Reduces power consumption by up to 85% compared to equivalent AC permanent split capacitor circulators
- Rotatable cover allows mounting in any orientation
- Cast iron or stainless steel

VR1816 Infinitely Variable Speed ECM High-Efficiency Circulator

- Infinitely variable speed, ECM high-efficiency Delta-P (Differential Pressure) circulator that can operate in 3 different modes: Infinitely Variable Fixed Speed (min/max), Constant Pressure Variable Speed, Proportional Pressure Variable Speed
- High-Efficiency ECM motor uses up to 85% less electricity
- Performance range of 18' shut-off and 16 gpm max flow
- Easy to use selector dial to change the operating mode to match system design
- Multi-color LED's indicate operating mode or error code diagnostics
- Power range from 4-44 watts
- Innovative BIO Barrier protects the pump from system contaminants
- Whisper quiet operation
- Unique Sure Start automatic unblocking and air purging mode
- Nut-capture feature on flanges
- Dual electric knockouts
- Integral Flow Check (IFC) included
- 60Hz, single phase

1915e ECM High-Efficiency In-Line Circulator Pumps

- The ECM 1915e is a self-sensing, close coupled, mechanically sealed in-line circulator pump with an advanced hydraulic design
- It features a high-efficiency volute, permanent magnet motor with ECM technology and integrated frequency drive
- Versatile control options include constant pressure, constant speed, proportional pressure, 0-10VDC and parallel pump alternation
- These standard features combined with the intuitive user interface allow for quick start-ups achieving optimum system efficiency and maximum comfort
- Ductile Iron for closed loop hydronic heating and cooling systems.

VT2218 Delta-T Variable Speed ECM High-Efficiency Circulator

- Delta-T (Differential Temperature), Variable Speed, ECM High-efficiency circulator
- Senses system water temperature
- Accurately controls speed/gpm flow to precisely match the heat loss in the system and maintain a constant design Delta-T
- Overall system comfort, efficiency and energy savings are maximized
- Delta-T with settings from 5-50°F (20°F factory preset)
- Constant Speed - 4 fixed speed settings
- Set Point Heat (50-220°F)
- Set Point Cool (32-100°F)
- Boiler protection (100-160°F)
- Performance range of 22' shut-off head and 18 gpm max flow
- Easy 3 button programming
- Full view LCD provides real time data
- Power range from 9-58 watts
- Full speed over-ride option for system fill and purging
- Innovative BIO Barrier protects the pump from system contaminants
- Whisper quiet operation
- Nut-capture feature on flanges
- Integral Flow Check (IFC) included
- 50/60Hz, single phase

In-Line Circulator Pumps

- Circulates heated or chilled water in residential or light commercial hydronic systems, also used in zoning large installations
- Resilient mounted, split-phase motor with overload protection and sleeve bearings
- One-piece dynamically balanced impeller
- Stainless steel shaft and bronze sleeve bearings
- Carbon/ceramic seal assembly
- Durable one piece spring coupling
- 1750 RPM, single-phase motor
- N/A in chart indicates not to operate pumps at these low head levels

2400 Series High Capacity Circulators

- Designed for a wide range of medium to high flow/head hydronic heating, chilled water cooling and hot water recirculation applications
- Compact, space-saving design
- Powerful close-coupled, maintenance free motor
- Superior efficiency, high starting torque
- Permanently lubricated, sealed for life bearings
- Rugged 1/2" Stainless Steel Shaft
- Carbon/Silicon-Carbide mechanical seal for long life
- Universal flange to flange dimensions - Ideal for retrofits
- Anti-Condensate design for chilled water
- Dual electrical knock-outs
- Dual pressure taps, suction/discharge

UPSe Circulation Pumps

A

B

- Improved wiring for easier installation with a toolless power connector
- Automatic self-venting eliminates the need to burp the pump
- Robust startup
- Dry-run protection
- Troubleshooting aid with alarm and warning lights
- Highest Hydraulic Institute Energy Rating (ER) in the market: 193

Circulator Pumps

- High starting torque prevents rotor lock-up even after seasonal shutdown
- Water lubricated — maintenance free
- UPS series 3-speed pumps easily set to match system requirements and provide energy savings

Specifications:

- 115V, single-speed (UP series); 115V or 230V, 3-speed (UPS series)
- UPS series data shown below is in high-speed performance

ALPHA Circulation Pumps

- Bluetooth connectivity and a touch-screen interface
- Guided setup for energy savings while maintaining comfort
- Firmware updates
- Improved AUTOADAPT for faster setup and improved energy efficiency
- Min, max, and constant flow settings for faster setup
- Improved system air venting for faster setup
- Display showing flow, power, and head for faster troubleshooting
- Trend data and event log for faster and easier system troubleshooting

GRUNDFOS

ALPHA1 ECM Pumps

- Features three-constant pressure control modes with push button settings
- Large LED display shows energy watt consumption and estimated flow in gallons per minute
- Extremely quiet 19.2 dB(A) operation
- Features the highest torque rating and most powerful start feature in its class
- Attempts to restart indefinitely every seven seconds in blocked rotor conditions
- Can replace more than 30 other pump models
- Features an integrated check-valve and nut captures for flanges
- Magnetite resistant design with a stainless-steel bearing plate, robust ceramic shaft and ceramic bearing rings

GRUNDFOS

Alpha Pumps

- Pumps come equipped with the unique Grundfos AUTOADAPT™ function which automatically balances optimum comfort with minimum power consumption
- A simple and intuitive one-touch button accesses the other settings
- Automatic performance adjustment
- Display of actual power consumption
- Water lubricated - maintenance free
- Simple installation — external plug for electrical connection
- Single-speed or two- or three-speed performance adjustment high efficiency ECM motor uses up to 85% less energy

MAGNA3™ Circulator Pumps

High Efficiency Commercial Pumps

- Integrated frequency converter ensures maximum efficiency during operation
- AUTOADAPT™ function controls pump performance automatically
- Plug and pump
- Quiet operation
- 145 PSI maximum working pressure
- Water lubricated- maintenance free
- ECM motor uses up to 85% less energy

GRUNDFOS

Circulator Pumps

- For light commercial and larger residential applications
- Wet rotor design ensures maintenance-free relability with no leakage or mechanical seals
- Quiet operation and no accessible electrical components
- Drop in replacement for B&G, Taco and Armstrong
- UPS series 3-speed pumps easily set to match system requirements and provide energy savings

Specifications:

- 115/230V single-phase **L80-105**, 208-230V three-phase **L80-113** and 115V single-phase for all others
- UPS series data shown below is in high-speed performance

ecocirc® 20-18 Variable Speed ECM Smart Circulators

- Maximum 20' of head or 18 GPM
- 70 watt max. power
- 3 modes; proportioN/Al pressure, constant pressure, or adjustable speed control
- Automatic air purge to remove any air trapped in the pump
- One turn knob and LED display
- Check valve included in box
- Insulation shell included

Features:

- Premium models include: Bluetooth communication
- 0-10VDC input
- Tempurature control
- eAdapt autolearn and Night Mode
- Digital display

System Lubricated Circulator Pumps

For Hydronic and Solar Applications

- High starting torque single-speed motor, 115V, 60 Hz
- Suitable for 240°F operation at 150 PSI
- Flanges not included
- **L87-196** and **L87-197** are equipped with three-speed motors for application flexibility (GPM data below is for high-speed setting)

Zonetrol II Zone Pump Controller

- On call for heat, operates the pump and closes end switch to energize boiler
- Snap-on design allows the controller to be quickly attached to any Bell & Gossett model NRF, NBF, SSF or 1/12 to 1/6 HP Series PL
- Clearly marked terminals make for sure, fast wiring of the system
- Daisy-chain to form up to three zones
- Transformer: 2.5VA

Order #	Mfg. #	Model #	Volts	Relay
L39-556	109423	AZ-1A	115/120VAC	24VAC/5 Amps

TC-1 Automatic Timer Kit

- Increases overall efficiency of hot water recirculation systems
- Can be used on any Bell & Gossett NBF circulator
- Programmable to turn circulator on and off automatically at preset times
- Single-phase, 115/120VAC, 60 Hz

Booster Pumps

For Hydronic Heating and Cooling Systems and Service Water Heating

A

B

- Oil lubrication system
- Proven mechanical seal to protect against water leakage
- Sleeve-type extra long bearings
- Centrifugal impeller design
- **L86-074** and **L86-076** do not include flanges

Specifications:

- Maximum working pressure: 125 PSI
- Maximum operating temperature: 225°F continuous duty

Bell & Gossett Motors

Single-Speed, 1725 RPM, Single-Phase

- Single-Speed, 1725 RPM, Single-Phase

Features:

- Manufactured to rigid Bell & Gossett specifications to ensure quiet, dependable performance, including immediate start-up on system demand even after seasonal shutdowns
- Resilient mounted, with oil lubricated bronze sleeve bearings
- **S88-377** is 5" diameter, **S88-376** is 6" diameter
- **S88-417** is for 60 series pumps, **S88-419** and **S88-420** are for PD and 60 series pumps, **S88-481** is for 2-1/2" and LD3 pumps

Permanently Lubricated Circulator Pumps

- Permanently oil-lubricated and maintenance free
- Operates in systems up to 150 PSI with temperatures up to 225°F
- Precision-machined and balanced alloy steel rotor
- Carbon/silicon carbide seal system

Pump Coupler

- Lovejoy replacement coupler for PD-35 and PD-37 booster pumps with 1/2" motor shafts

Order #	Mfg. #
L37-187	P77234

Lubricant

- For pumps and motors
- 2-1/2 fl. oz.

Order #	Mfg. #
G31-205	L25201

AquaPUMP Variable Speed Circulators

resideo

A

B

- Variable speed, in-line, ECM wet rotor circulator is designed for variable or constant pressure applications in closed-loop hydronic heating and cooling systems, as well as open circulation systems (stainless steel model)
- Capable of taking an analog control signal 0-10VDC
- Integral Flow Check included

Fig.	Order #	Mfg. #	Description	Body Type	Volts	Phase	RPM	Conn.	Flange Size	Flange to Flange	Wt. Lbs.	Each

AquaPumps

resideo

- Twist-To-Fit Universal Flange rotates 90° to fit every application
- 3-speed versatility allows maximum efficiency and provide sufficient flow rates with a single pump
- Threaded conduit connection
- Stainless steel plate and can
- Impeller engineered for a quieter, more efficient operation
- Ceramic bearings and shaf
- Includes check valve in the box

Motor Mounted End Suction Centrifugal Pumps

- For use on cooling towers, HVAC and general purpose applications
- Aluminum die cast adapter with integral support foot deliverying light weight, durable construction
- Carbon rotating element against a stationary seat mechanical seal
- High strength engineered resin impeller
- Cast iron body
- Single-phase, 115/230V motor, 3500 RPM

E Series Permanently Lubricated Circulator Pumps

- High efficiency dry motor design, up to 70% more efficient than competitive pumps of similar power
- 30% smaller than other dry motor circulators
- Carbon/silicon carbide mechanical seal
- Bronze models for use in open domestic water recirculation systems

Header Mounted Pumps

- For use in Raypak and Laars boilers
- Quiet sleeve bearing assembly and non-ferrous impeller
- Standard Viton seal kit included
- Noryl plastic impeller rated to 400°F
- 115V **L80-088**, 115/208/230V **L80-089** and **L80-090**

Isolation Flanges

The Isolator Uniflange Ball Valve

- Heavy-duty forged brass construction
- Full port for full flow
- 600 WOG, 150 WSP
- Unibody construction
- Prevents electrolysis and eliminates galvanic corrosion
- **R55-637** through **R55-641** include quick quarter turn ball valve purge/drain feature
- For hydronic system applications – not for use in potable systems
- **R55-630**, **R55-636**, **R55-641** and **R55-646** are for use with high velocity pump applications
- **R56-340** through **R56-347** are full port forged brass ballvalves with detachable rotating flange
- **R56-348** through **R56-355** are full port forged brass ball valves with detachable rotating flange and hi-flow hose drain

Double Flanged Check Valves

- Uni-body design reduces leak paths
- Adds a check valve to any pump
- Installs between the pump & isolator uni-flange ball valve
- Inner & outer flanges are designed to help prevent problems from over-torquing
- 360° rotating flange with snap ring provides greater control during installation
- Guaranteed for life

Pro-Pal Series® Union-Ball Drain™

Full Port Forged Brass Ball Valves with Single Union End, Hi-Flow Hose Drain and Reversible Handle

- Five-in-one alternative replaces a union + nipple + ball valve + tee fitting + purge drain
- Easily disconnect and replace any portion of a system
- Eliminate assemblies needed to isolate the system and drain after the ball
- For hydronic system applications – not for use in potable system

Lead-Free Pro-Pal Series® Ball Drain™

Full Port Forged Brass Ball Valves with Hi-Flow Hose Drain and Reversible Handle

- Three-in-one alternative replaces a ball valve + tee fitting + purge drain
- Isolate and drain an entire house with a single quarter-turn action
- SWT x IPS option designed specifically for use with pre-fabricated threaded headers
- Eliminate assemblies needed to isolate and drain any portion of a piped system
- Lead free products are certified to ASSE 1061 & NSF/ANSI 61-G

Pro-Pal Series® Purge Tee Valves

- For hydronic system applications – not for use in potable system
- Specifically designed for power purging individual loops in a hydronic heating system and ensures the critical distance between tees is within tolerance for hydronic separation
- Ideal for primary/secondary piping in mod-con boiler systems

Hot Water Recirculation Systems

- Each system is fully automatic and controlled by built-in sensors
- **N87-653** is for homes without a dedicated return line, does not require power under the furthest fixture
- **N87-654** does not require a dedicated return line. Requires power under the furthest fixture
- **N87-655** is single speed and requires dedicated return line
- **N87-656** 3-speed, works with tank or tankless water heaters, requires dedicated return line

Comfort PM Hot Water Recirculators

- Low noise permanent magnet motor
- Integral external sensor cable
- 6' line cord standard
- Lead-free brass housing
- Designed for single family homes with dedicated hot water return piping
- Features AutoAdapt which learns and stores water consumption patterns ensuring pump only runs when required

Hot-LinkPlus-e™ ECM High-Efficiency Hot Water Recirculation System

Retrofits to Existing Plumbing System

- The Hot-LinkPlus-e with its 006e3 ECM Circulator provides hot water in seconds. No timers or programming
- Easy to use Low/Medium/High dial
- "Smart" setting maximizes hot water comfort and energy savings
- High-efficiency ECM motor uses up to 85% less electricity
- SureStart® automatically purges air and unblocks the pump
- 3/4" NPT male & female union fitting set included
- Double insulated, no ground wire required
- Includes a 6' power cord
- Easy to install and whisper quiet operation
- Average residential water savings of 12,000 gallons per year
- Not suitable for chilled water
- Indoor use only

Plumb n'Plug® Domestic Hot Water Recirculator Pumps

For Systems with Return Line Piping

- Provides instant hot water at the faucet
- Includes factory installed 6' line cord and 24-hour timer
- Unique replaceable cartridge design
- Quiet, efficient operation
- 003 PNP series for loop lengths under 200'
- 006 PNP series for loop lengths of 200' to 400'
- Optional aquastat available
- 3250 RPM

Specifications:

- For use only on systems with dedicated return line piping

SmartPlug® Instant Hot Water Control

- Designed to upgrade any hot water recirculation system
- SmartPlug replaces inefficient timers and aquastats typically used in recirculation systems
- Adds intelligence to your system by learning the hot water is usage
- The pipe-mounted temperature sensor records daily hot water usage patterns during the course of a week
- Recorded data is used to automatically run the circulator at the same times the following week allowing hot water to be available when needed
- If usage pattern changes, the SmartPlug adjusts automatically
- No programming, timers or aquastats required
- Sensor Included

SmartPlus-e™ ECM High Efficiency Hot Water Recirculation System

For Systems with Return Line Piping

- Ideal for systems with a dedicated hot water return line and tank-style water heater
- The SmartPlus-e pairs a 006e3 ECM hot water circulator with the intelligence of the award-winning SmartPlug Instant Hot Water Control in one easily-installed package
- The SmartPlug control learns hot water usage patterns and delivers when needed
- Uses up to 85% less electricity than a conventional circulator
- SureStart® automatically purges air and unblocks the pump
- Double insulated, no ground wire required
- No programming needed
- Saves on average 12,000 gallons of water per year by eliminating the wait for hot water

Specifications:

- For use only on systems with dedicated return line piping

Hot Water Expansion Tanks

- Pre-pressurized, diaphragm-type expansion tank with a standard charge of 12 PSI
- Tanks are of welded steel construction
- **L86-190**, **L86-191** and **L86-192** can be used in glycol systems and should be installed into bottom of purger using a single 1/2" nipple for both pipe connection and mounting
- **L86-478** and **L86-479** can be used in glycol systems and includes automatic pressure reducing valve and are fully adjustable up to 100 PSIG maximum working pressure
- For hydronic system applications – not for use in potable system
- **L86-193** and **L86-194** have a system connection of 3/4" brass and are listed by IAPMO, SBCCI and NSF61

TK300 Series Expansion Tanks

- Accommodate the expansion of water in a closed hot water heating or solar system
- The diaphragm separates the air cushion from water and prevents absorption of air cushion by the water, thus avoiding water logging
- Compact design
- Pre-charged tank has a maximum operating temperature up to 240° F and a maximum operating pressure up to 100PSI

Order #	Mfg. #	Conn. Size	Description

Flo-Chek Valves

- Used to prevent gravity circulation
- Allows use of the heating boiler to maintain domestic hot water
- In multiple zone systems, allows circulation only to the zone(s) calling for heat
- Thumb screw allows for manual opening for gravity feed applications

Specifications:

- Maximum operating temperature: 277°F
- Maximum operating pressure: 125 PSI

Pressure Safety Relief Valves

For Protection of Hot Water Heating Boilers

A

B

- Watts series 374A (**R54-684**) and 174A (**R54-685**, **R54-686**, **R55-839** and **R55-840**) are designed and recommended for hot water heating and supply boilers
- Watts series 740 (**R54-687** and **R54-688**) valves are specially designed for hot water space heating boilers

Features:
- ASME certified
- Pressure pre-set @ 30 PSI
- Maximum temperature: 250°F (121°C)
- Meets military spec. MIL-V-18634B, Type I, Class 3A, Style A (bronze body), Style B (iron body)
- Product is not approved for potable water usage based on overall lead content
- Used in conjunction with temperature relief valves where separate installation of safety devices is required or desired

Relief Valves

- Installed in systems to discharge water should excessive pressure develop
- Can only be used for non-potable applications per the Safe Drinking Water Act
- Dual units have a relief valve, diaphragm operated, with low differential between opening and closing pressures and a reducing valve with a built-in low inlet pressure check valve
- **L37-316** ASME rated, 790,000 BtuH
- **L37-317** ASME rated, 1,170,000 BtuH

Pressure Reducing Valves

- Protects heating and plumbing systems against excessive line pressures
- Each valve is equipped with a low inlet pressure check valve and a removable strainer
- High pressure valve reduces incoming 125 PSI to 45 PSI
- Tested and certified to NSF 372 low lead requirement
- "F" models have manual "fast fill" feature

Specifications:
- Maximum operating temperature: 225°F
- Maximum working pressure: 125 PSIG
- Maximum flow: 5-1/2 to 6 GPM at 125 PSIG inlet pressure

Fig.	Order #	Mfg. #	Conn. Size	Pressure Range PSIG

Pressure Reducing Valves

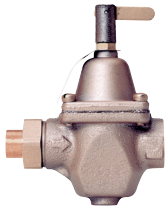
- Automatically feeds water whenever pressure drops below PSI setting
- Fast-fill lever lock
- Not for potable water applications

Specifications:
- Maximum fluid temperature: 212°F
- Maximum inlet pressure: 100 PSI
- Factory settings: 12 PSI

Order #	Mfg. #	Conn. Size	Pressure Range PSIG	Body Type
L41-607	329-3	1/2" Sweat (Inlet), 1/2" NPT (Outlet)	10 to 25	Cast Iron
L41-608	335-3	3/4" NPT (Inlet), 3/4" NPT (Outlet)	10 to 50	Bronze

Feed Water Pressure Regulators

- Adjustable range 10–25 lbs.; pre-set to 15 PSI
- Maximum temperature: 212°F
- Maximum pressure: 100 PSI
- All 1/2" models furnished with purge lever
- Product is not approved for potable water usage based on overall lead content
- **R55-794** has bronze valve body with union solder inlet connection



Order #	Mfg. #	Model #	Inlet Conn.	Outlet Conn.	Conn. Size	Outlet Pressure Range PSI	Outlet Pressure Preset PSI

Water Pressure Regulator

- Bronze high capacity feed water pressure regulators are for use in commercial and residential hydronic heating systems to fill the boiler and piping system with water, and to maintain water pressure in the system at all times
- Product is not approved for potable water usage based on overall lead content
- Consists of a bronze body construction with NPT threaded inlet and outlet connections, a tight seating check valve, purge lever for manual purging, and a stainless steel strainer

Order #	Mfg. #	Model #	Inlet Conn.	Outlet Conn.	Conn. Size	Outlet Pressure Range PSI	Outlet Pressure Preset PSI

Cartridge Style Pressure Reducing Valves

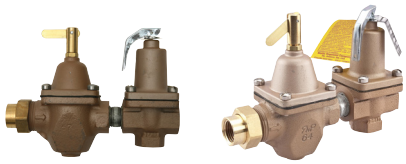
- Automatically feeds water whenever pressure drops below PSI setting
- Easy-to-see dial on cartridge adjusts PSI setting
- Built-in check valve on outlet
- One-piece cartridge can be replaced or serviced without draining the system
- Fast-fill button delivers increased flow to speed system fill times
- 1/2" bottom tapping for pressure relief valve or expansion tank

Specifications:
- Maximum fluid temperature: 180°F
- Maximum inlet pressure: 230 PSI
- Factory settings: 12 PSI

Order #	Mfg. #	Conn. Size	Pressure Range PSIG
L41-604	3350-3	1/2" Union	10 to 50
L41-605	3350-T3	1/2" NPT	10 to 50

Feed Water Pressure Regulator Dual Controls

For Boilers



A B

- Used on boiler feed lines to provide make-up water to the system
- Combines water pressure regulator and an iron body diaphragm relief valve set at 30 PSI
- Product is not approved for potable water usage based on overall lead content

Specifications:
- Maximum pressure: 100 PSI
- Maximum temperature: 212°F (100°C)
- Regulator set at: 15 PSI
- Adjustment range: 10–25 PSI

Fig.	Order #	Mfg. #	Model #	Inlet Conn.	Conn. Size	Outlet Pressure Range PSI	Outlet Pressure Preset PSI

Lead-Free Water Pressure Reducing Valves

WATTS

- Adjustable from 25 to 75 lbs.; standard setting at 50 lbs.
- A.S.S.E. 1003 and I.A.P.M.O. rated
- Bypass feature
- Series 25AUB-Z3 for supply pressures up to 300 lbs. and 160°F
- Series N55BU for supply pressures up to 400 lbs. and 180°F
- Series 25AUB-Z3 includes integral stainless steel strainer, with a high temperature resisting reinforced diaphragm for hot
- Series N55BU has union inlet, NPT threaded outlet
- Series N55BU can be used for waterworks installations
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Dialset Boiler Fill Valve

resideo

- Easy dial-set technology allows simple output pressure setting in psi.
- With an integrated ¼" NPT pressure gauge port for testing, the boiler fill valve also has ½" internal NPT threads and external union threads on both input and output sides

Order #	Mfg. #
R57-486	VF06-100-SUSUT

DialSet Double Union Press Lead-Free Pressure Reducing Valves

◀ NEW

resideo

- Features a downstream pressure adjustment dial that removes the need for a pressure gauge when adjusting settings (static pressure only)
- Suitable for potable water and irrigation applications
- Noncorroding Unitized Cartridge - contains all working parts and is replaceable
- Outlet adjustment range of 25 PSI to 90 PSI
- Suitable for household, commercial, industrial and turf-and-irrigation applications
- Internal and external threading allows for use in thread-by-thread, single-union or double-union configurations
- Built in strainer to simplify maintenance
- Approvals - ASSE 1003, IAPMO, CSA, Low Lead Compliant

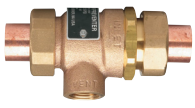
Backflow Preventers With Intermediate Atmospheric Vent

WATTS

Series 9D

- ASSE 1012 listed
- For low hazard applications and low flow supply lines
- Product is not approved for potable water usage based on overall lead content
- Recommended for residential boiler feed lines when supply pressure falls below heating system pressure
- Suitable for working pressures up to 175 lbs. (minimum 25 PSI required)
- Install either horizontally or vertically



Order #	Mfg. #	Model #	Conn. Size
R54-574	061935	9DM3	1/2" x 1/2" Threaded
R54-575	061888	9DM2	3/4" x 3/4" Threaded

Backflow Preventers

A

B

C

- Prevent the reverse flow of polluted water from entering potable water supply
- Product is not approved for potable water usage based on overall lead content
- Brass body with stainless steel internal parts
- Max Temp: 250°F
- Max PSI: 175 Watts

Spirovent® Air Eliminators

SPIROTHERM

- Highly efficient air separation and elimination devices capable of removing up to 99.6% of air in water
- Reduces risk of hydronic system damage by preventing air logging and circulator pump cavitation
- Maintenance-free spirotube design results in extremely low head pressure drop and dirt collection
- 1/2" bottom tap for connection of bladder-type compression tank if needed
- Solid brass construction and 20-year warranty
- Operating pressure: 150 PSI; operating temperature: 270°F

Supervent™ Air Eliminators

◀ NEW

resideo

- Automatically eliminates air from hydronic heating and cooling systems without bleeding
- 360 degree adjustable collar ring for installation flexibility
- No clog vent assembly
- Stainless steel concentrator eliminates noise
- Bronze body construction
- 1/2" NPT bottom connection for expansion tank mounting
- Maximum pressure: 125 PSI
- Maximum temperature: 240°F

In-Line Air Separators

- Efficiently separates air from circulating water
- One-piece cast iron construction with no moving parts eliminating need for service
- Maximum working pressure: 175 PSI
- Maximum operating temperature: 300°F

Order #	Mfg. #	Model #	Conn. Size	Max. Flow
L39-678	112118	IAS-1	1" NPT	15 GPM
L39-679	112119	IAS-1-1/4	1-1/4" NPT	25 GPM
L39-680	112097	IAS-1-1/2	1-1/2" NPT	35 GPM

Air Purgers

- Installed horizontally on main as close to boiler as possible
- Models have tappings for installation of air vents
- Cast Iron
- Separates air from water in closed loop hydronic heating systems
- System connection sets the point of no pressure change

Order #	Mfg. #	Description	Type	Conn. Size	Length	Height	Width	Conn. Size Top	Conn. Size Bottom

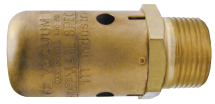
Vacuum Breaker

- Used to control induced vacuum in steam systems
- Adjustable from 1/4" to 20" Hg vacuum



Order #	Mfg. #	Model #	Conn. Size	Max. Pressure	Max. Temp.
L41-575	401446	62	3/4" NPT (Straight)	150 PSI	366°F

Steam Vents

- Used to vent air from radiators and convectors
- **L41-571** has six port settings for true proportional venting; others have a single non-adjustable port
- Max. pressure: 10 PSI

Fig.	Order #	Mfg. #	Model #	Description	Conn. Size
A	**L41-571**	401422	#1A	Radiator Steam Vent	1/8" NPT (Angle)

C	**L41-574**	401458	#43	Convector Steam Vent	1/4" NPT (Straight)

Jacobus® Steam Air Vents

- Vents accumulated, trapped troublesome air
- #1 vent is designed to vent the air from the main lines as well as on longer runs
- #5 has venting capacity equal to 4 ordinary air vents; used on radiators near boiler and in warm rooms
- Nickel plated brass body

Fig.	Order #	Mfg. #	Type	Height	Width	Pipe Size	Vent Size
A	**L41-837**	1	Straight Main Vent	1"	3-1/2"	1/2" x 3/4"	0.1850"
B	**L41-838**	5	Angle	1"	2-1/4"	1/8"	0.7000"

Thermostatic Steam Traps

- Used to vent air and gas in response to pressure
- Resistant to water hammer and chemicals
- Brass body, stainless steel components

Order #	Mfg. #	Model #	Conn. Size	Max. Pressure
L41-566	401536	17C-2 Angle	1/2"	25 PSI
L41-567	401545	17C-2 Swivel	1/2"	25 PSI
L41-568	401551	17C-2 Vertical	1/2"	25 PSI

Order #	Mfg. #	Model #	Conn. Size	Max. Pressure

L41-570	402003	8C-A-3-125	3/4"	125 PSI

Float and Thermostatic Steam Traps

- Universal 4-port tappings (2 inlet and 2 outlet) for easy piping and system monitoring
- Resistant to water hammer and corrosion
- Below condensate level seat design prevents steam leakage
- Rugged thermostatic element eliminates air binding
- Cast iron body, stainless steel components

Order #	Mfg. #	Model #	Conn. Size	Max. Pressure	Max. Temp.

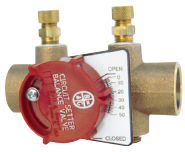
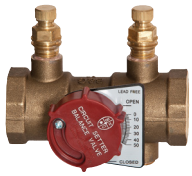
Circuit Setter Calibrated Balance Valves

A



B



C

- Proportional balance assures accurate system balance
- Designs allow for optimum system balance at minimum operating horsepower
- Positive shutoff for isolation and service
- Readout valves allow for differential pressure readings
- One-way stop indicator
- Rated to 200 PSI at 250°F
- **L46-198** through **L46-203** are lead-free as defined by CA AB1953

Accu-Flo Hydronic Balancing Valves

For Balancing Flow to Terminal Units on Hydronic Systems

- Fixed port venturi balancing provides accuracy 4–5 times greater than the standard valve
- Flow measurement independent of ball position
- Compact design
- Tamper resistant memory stop
- Positive shutoff for servicing system
- Built-in drain port
- Rated to 300 PSI, 250°F

Lead-Free Hot Water Temperature Control Valves

A.S.S.E. 1017 Approved

- For mixing hot and cold water on hot water supply systems
- Designed to be installed at or near the boiler or water heater to provide tempered water to the supply piping
- Valves provide additional safety as they restrict mixed water to a drip upon loss of cold water supply to valve
- Thermostat controls both hot and cold water
- 3/4" and 1" can also be used as diverting valves
- Solid wax hydraulic principle thermostat
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Lead-Free Thermostatic Mixing Valves

A.S.S.E. 1016 Listed

- Designed for mixing hot and cold water to supply sinks, baths, showers or lavatories with tempered water
- Thermostat controls both hot and cold water
- Can be used in any point-of-use installation requiring preset water temperatures
- A.S.S.E. 1016 listing is for individual showers, baths, or a combination of both
- Solid wax hydraulic principle thermostat
- Locking adjustment cap
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Lead-Free Hot Water Extender Tempering Valves

- Maximum pressure of 150 PSI
- Series 70A valves for small domestic water supply systems
- Series 70A recommended for FHA tankless heaters, water heaters, and solar systems
- Series N170 valves are designed for larger hot water supply systems
- Series N170 valves include bronze body with stainless steel disc, and a thermostat that controls both hot and cold water
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Lead-Free Thermostatic Mixing Valves

A.S.S.E. 1017 Certified

- Fail-safe on hot or cold water supply failure
- High flow, low head-loss
- Ideal for domestic water and radiant installations
- Delivers stable mixed water temperature
- Mix temperature range of 85°F to 150°F
- Lockable handle
- Factory temperature setting is 130°F

Order #	Mfg. #	Conn. Size	Max. Flow	Max. Pressure

R57-423	5004-C3	1"	22.5 GPM	200 PSI

MixCal 3-Way Thermostatic Mixing Valves

- Adjustable thermostatic and pressure balanced mixing valve for point of distribution in domestic water systems and hydronic heating systems
- Sweat connection
- Low-lead brass body
- Internal anti-scale materials
- ASSE 1017

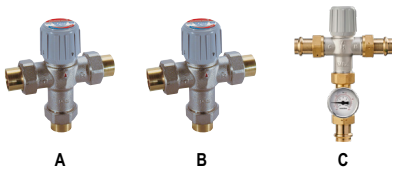
Lead-Free AM-1 Series Thermostatic Mixing Valves ◀ NEW



- Low lead content less than 0.25% by weighted average
- Dual purpose mixing or diverting valves
- Maintains constant water temperature under varying operating conditions
- Anti-scald/anti-chill protection
- Nickel-plated brass/bronze construction
- Teflon® coated spool and body to prevent mineral build-up
- Maximum pressure: 150 PSI
- Maximum temperature: 212°F

Lead-Free AMX Series DirectConnect Thermostatic Mixing Valves

resideo

- Low lead content less than 0.25% by weighted average
- Dual purpose mixing or diverting valves
- Maintains constant water temperature under varying operating conditions
- Installs directly on the water heater hot port
- Integrated recirculation port allows for optional recirculation
- Bronze/stainless construction
- Teflon® coated wear surfaces to prevent lime deposits
- Maximum temperature: 212°F

Copper Monoflo Fittings

- Allows a single pipe to serve as both supply and return main
- Recommended for most installations including cast iron non-ferrous baseboards, free-standing radiation or convectors
- Connects risers to the main, assuring proper diversion of water to each heating unit regardless of type and position in the system

Order #	Mfg. #	Conn. Size	Cv
L39-696	108120	1" x 1/2"	14.5

L39-698	108125	1-1/2" x 1"	39

Lead-Free Dielectric Pipe Unions

- Protects from galvanic corrosion when dissimilar metals are joined
- For use with hot water heaters, boilers and air conditioning
- Suitable for water, air, oil, natural gas, propane, gasoline, kerosene, mineral oil, vegetable oil and alkalines
- Rated at 250 PSI at 210°F
- Meets requirements of ANSI B16.39 and ANSI B2.1
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

L5 Wi-Fi Water Leak Shutoff Valves

- Shuts off the water supply automatically via paired sensing cable or one or more paired Resideo WiFi Water Leak and Freeze Detectors
- Control the Valve remotely through the Resideo App
- Manual override to turn water on or off
- Standard ball valve makes it easy for a licensed plumber to install
- Includes a 5' cable that detects water along its entire length
- 5-year limited warranty

Wi-Fi Water Leak and Freeze Detectors

- Notifies of leaks via Resideo App
- Alerts to leaks with LED lights and a 100 dBA alarm
- Easily pairs with the new L5 WiFi Water Leak Shutoff Valve
- Reset and reuse the device after a detection
- Includes a 5' cable that detects water along its entire length
- 2-year limited warranty

Note: L51-744 cable accessory expands leak detector coverage area

Flow Switches

- For use as automatic control in air conditioning, heating, water systems and process work
- SPDT Switch
- Primary wetted parts are brass
- **L37-332** and **L38-791** used principally on water lines, installed in tee or welding neck in horizontal pipe up to 6", with 1" NPT threaded connection pipe size
- **L37-333** used in areas of high humidity and outdoor installation, installed in tee or welding neck in horizontal pipe up to 6", with 1" threaded connection pipe size
- **L37-333** is NEMA 4X rated – water-tight, dust-tight, corrosion-resistant
- **L37-415** used for low flow rate applications, 1/2" pipe size, NEMA 1 rated
- **L86-133** designed for industrial use, 1-1/4" pipe size
- **L40-232** is designed for industrial use in high humidity and outdoor installations, with 1-1/4" NPT threaded connection pipe size and a 6" paddle
- **L40-232** is NEMA 4X rated – water-tight, dust-tight, corrosion-resistant
- **L40-232** includes a magnetic switching mechanism that eliminates the need for bellows, and includes a sensitivity adjusting screw
- **L37-636** is suitable for a wide range of applications, with 3/4" pipe size
- **L40-231** is designed for high sensitivity applications, with 1" NPT connection pipe size, and inline configuration that eliminates the need for a pipe tee
- **L40-231** has a high flow capacity, sensitivity adjusting screw, and a completely sealed switch compartment

Thermostatic Radiator Valves and Controls

Self-Powered Thermostatic Actuators and Valve Bodies that Provide Comfort and Energy Savings

A

B

C

- Valves and actuators meet ASHRAE Standard 102-1989
- For control of hot water or steam radiators, convectors or other hydronic heating units
- Thermostatic actuator setpoint dial shows guide marks (1-5) and provides positive shutoff when turned fully clockwise (0)
- Thermostatic actuator includes sensor and setpoint dial; components may be integral or connected by capillary tubes
- Valve seat disc, made of resilient EPDM, ensures tight shutoff on hot water or low pressure steam systems
- Nickel-plated brass cast valve body with working parts in cartridge insert for ease of service
- No electrical connections or wiring required
- All working parts replaceable while valve remains in service, in-line, under pressure
- Use T100 thermostatic actuators with V100 valve bodies, T104 thermostat actuators with V110 valve bodies
- T104/V110 designed to meet higher capacity normally required of North American radiator systems — over twice the flow capacity of most competitive valves
- Ratings: maximum temperature — 248°F; maximum system PSI — 150 PSI (hot water); 14 PSI (steam V100 series), 15 PSI (steam V110 series); maximum differential — 17 PSI

Note: The "New" style T100 actuators directly fit both the "New" and "Old" style V100 bodies. However, the "Old" style T100 actuators fit only "Old" style V100 bodies.

Fig.	Order #	Mfg. #	Description	For Use With	Style

Valve Bodies

- Listed Cv Factor = GPM at 1 PSI differential pressure
- Designed with the higher capacity normally required by North American heating systems
- Valve seat disc, which is made of resilient material (EPDM), ensures tight shutoff on steam or hot water systems
- Nickel-plated bronze casted body with working parts in cartridge insert for ease of service
- All working parts are replaceable using service tool (MT110C1011) while valve remains in service, in-line, under pressure
- Valves normally open without control mounted
- Valves may be used with T104 Thermostatic Actuators
- Meet ASHRAE Standard 102-1989

Radiator Thermostat

Honeywell Home

- Fits all existing Honeywell thermostatic radiator valve bodies
- Adapter included in box to fit Danfoss valve bodies for most applications
- Easy programming: thermostat head can be removed for easier programming
- Adjustable display: the flip-up display can be easily read, even in tight locations
- Background lighting
- Frost-proof function automatically opens valve when temperature drops below 41 degrees
- Child/Safety lock included to prevent unauthorized access
- ECO saver mode automatically lowers ambient temperature to save on energy costs
- Window function saves energy by closing the valve when you open a window to avoid steep drops in room temperature
- Additional modes include “Party”, “Special Day” and “Holiday” to allow simple pre-set adjustments for special occasions
- Set up to six set points per day and three different temperatures (7 days per week)

Erie PopTop™ Zone Valves

Pushbutton Release Actuator

Schneider Electric

- Two-way and three-way zone valves
- The PopTop actuator mounts directly onto the body quickly, without the need for linkages and calibration
- Normally closed operation
- Two-position spring return, 18" leads and 100% shutoff
- Temperature range: 32°F to 200°F @ 169°F ambient temperature
- 300 PSI operating pressure limit

Snap Zone Valves

For residential and Light Commercial Applications

- Four wire thermoelectrically operated valves designed for heat and cooling systems
- Visual indicator provides quick recognition of which valves are energized and which are closed
- Forged Brass Body
- Union connections allow for quick installation of the zone valve.

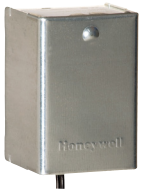
Zone Valves

A

B

C



D

E

- Controls the flow of hot or chilled water
- Replace power head without breaking line connections or draining the system
- Manual opener for valve operation on power failure; returns to automatic position when power is restored
- "E" and "F" models include an end switch
- Ball seal design provides a new sealing surface each time the valve operates

Specifications:

- Maximum static pressure: 125 PSI
- Power consumption: 9.6VA (V4043 Models); 7.7VA (V8043 and V8044 Models)
- Nominal timing: 30 seconds (V8044 Models); 15 seconds (V4043 and V8043 Models)
- Temperature range: 40°F to 240°F (V4043 Models); 40°F to 200°F (V8043 and V8044 Models)

Aquatrol AQ2000 Series Hydronic Heating System Controls

A

B

- Provides simplified control of residential hydronic systems
- Modular design for installation flexibility — panels connect together and require only six control wires to add on new modules
- Expandable up to 16 zones
- Status LEDs for easy diagnostics
- Extends boiler life and saves energy by minimizing frequent boiler cycling
- Boiler post purge delivers retained heat in the boiler to zones where it can be used
- Periodically activates all valves and pumps to prevent seasonal start-up problems
- Freeze protection feature activates all valves and pumps if communication is lost between the zones and the controller

5000 Series High Performance Zone Valves

Honeywell Home

- Slow close technology reduces water hammer
- Patented ball seal design provides a quality seal
- Quick fit pushbutton actuator easily snaps on and off without draining the system
- Forged brass body
- Normally closed operation

Specifications:

- Electrical rating: 24VAC (actuator); 120V (end switch — selected models)
- Maximum fluid temperature: 200°F
- Static pressure rating: 300 PSI

Special Boiler With Reset

Honeywell

- Save time on installations with the easy-to-use graphical Interface, large display, and the intuitive programming
- Use the time clock scheduler or digital input to control the setback and disable output options to help save energy
- Provide very fast or very fast response times on modulating outputs by adjusting the integral and derivative times (PI or PID)
- Configure models with reset in a few easy steps
- Eliminate the need for a separate time delay device and protect equipment with the minimum off time option
- Use the T775L and T775P to stage up to 12 relays (with optional T775S) from two independent heat or cool setpoints
- Support for digital output alarm on the T775P configurable based on minimum, maximum, or differential temperature

Applications:

- Staging controller for applications where electronic accuracy and remote sensing of temperature is required

Features:

- 3 sensors included
- 3 temp input, 1 digital output

Fan Coil Valves

Honeywell Home

- For controlling flow of hot or cold water
- Has manual opener for valve operation on power failure; returns to automatic position when power is restored
- Install without disassembling valve
- Static pressure rating: 125PSI (862 kPa)
- **L37-468** has a valve rating of 4.0 Cv and a max. close-off pressure of 20 PSI
- **L37-469** has a valve rating of 7.0 Cv and a max. close-off pressure of 10 PSI

WHITE-RODGERS

Zone Valves

- Valve stem made of stainless steel
- Automatic recycling manual operator shows valve position at all times
- Built-in auxiliary contacts to control burner or circulator relay
- Motor can be removed from valve assembly without draining system
- **L39-521**, **L39-522** and **L39-523** have valve current of 0.4A only during opening or closing
- **L39-524**, **L39-525** and **L39-526** have valve current of .52A when opening and 0.2A when fully open

Specifications:

- Time cycle: **L39-521**, **L39-522** and **L39-523**: 45 seconds open, 45 seconds closed; **L39-524**, **L39-525** and **L39-526**: 45 seconds open, 60 seconds closed
- Max. temp: 240°F
- Electrical rating: 2A @ 24VAC
- Max. system pressure: 50 PSI

Taco Comfort Solutions® A Taco Family Company

Zone Sentry™ Zone Valves

- Uses up to 93% less energy than other commonly installed zone valves
- Quiet actuator operation
- Suitable for hot water or chilled water applications
- Can be mounted in any orientation
- Up to 12 valves on (1) 40VA transformer

QuickTop Zone Valves™

- Provides on-off, normally closed control in closed hydronic systems
- Create individual zones or equipment isolation
- Utilizing one pump with multiple zone valves, flow can be started and stopped through the system providing individual room or area comfort
- Can be used in a wide variety of heating & cooling applications
- Use with baseboard, fan coils, radiators, convectors, air handlers, heat pumps and radiant applications

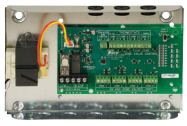
EXP Control Accessories

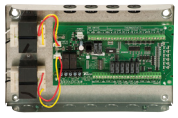
- Easy, plug-in connections to the EXP pump or zone valve relay controls

Order #	Mfg. #	Description
L41-624	PC700-2	Boiler Reset Control
L41-625	PC705-2	Variable Speed Injection Mixing Control

Hydronic Zone Valve Controls



A



B

- Works with 2-, 3- or 4-wired zone valves
- Built-in transformer
- End switches rated at 5A, 1/6 HP @ 120VAC
- Allows use of multiple circulators in conjunction with zone valves
- External diagnostic lights, fuse protected
- Extended 3-year warranty

Hydro Air Fan Control

- Interfaces between the thermostat and air handler
- Compatible with 1- or 2-speed air handlers
- Built-in 24V transformer for heating and cooling thermostats
- Includes three built-in fan time delay options, two selectable pump exercise modes, a secondary aquastat connection for freeze protection and the ability to switch a pump and/or boiler

Order #	Mfg. #	Volts
L41-634	HAFC201-4	120

Mixing Blocks

A

B

- Can be setup as outdoor reset controls, setpoint controls or delta T limiting controls
- No special piping – four pipe connections complete the installation
- Uses Taco pump repair cartridges
- Bronze construction can be used on “open” or “closed” systems (barrier or non-barrier PEX tubing)
- 6' power cord included; 120 VAC
- Operates in systems up to 125 PSI with temperatures up to 185°F
- 3250 RPM
- 3/4" NPT connections
- **L87-238** combines a variable-speed injection mixing control, injection circulator, system circulator and air elimination into a single unit, with integral check valve and 120,000 BtuH capacity
- **L87-239** combines a variable-speed injection mixing control, heat source circulator, system circulator and heat exchanger into a single unit, with 60,000 BtuH capacity
- **L87-239** for use in system combining any style heat source with any style heat delivery method or system condition

AquaSmart Model 7600 Boiler Controls

- Beckett HeatManager™ dynamic temperature reset
- Cycle history diagnostic information
- Reduce inventory through universal design
- Backlit LCD screen with programming touch pad
- Freeze resistance
- Energy saving through circulator hold-on function
- Priority override for domestic hot water
- Self-checking sensor

Order #	Mfg. #	Description
L45-303	7610A0001U	120VAC Burner, AquaSmart Boiler Temp Control
L45-304	7610B0001U	24 VAC Burner, AquaSmart Boiler Temp Control

Order #	Mfg. #	Description
L45-305	7600RMU	48" AquaSmart Remote Mount Kit
L45-306	7600TSU	Replacement Temperature Sensor

HeatManager™ Fuel Economizer

- Adjusts burner firing patterns and average boiler water temperature to match system heat load
- Reduces fuel consumption 10 to 20%
- For use with new or existing residential boilers up to 300,000 Btu
- Compatible with oil, gas and propane burners
- Easy installation; no programming or ongoing maintenance required
- Sensor and wiring connections at the boiler; no outdoor sensor required
- Additional temperature sensor port for supporting a domestic hot water system with tankless coil

Specifications:
- Electrical rating: 24/115/220VAC
- Dimensions: 4" W x 4" H x 2-1/2" D

Order #	Mfg. #	Description
L40-789	7518	Additional Sensor for Tankless Coil Applications

Hydronic Switching Relays

- Provides intermediate switching of a line-voltage device from a low voltage controller
- Integral transformer provides 24VAC power for control circuit
- **L36-918** for switching one line voltage load
- **L36-919** for switching two line voltage loads having a common power source; millivolt rating: 300mA minimum at 750mV; includes auxiliary contacts for switching additional low or millivoltage (Powerpile®) loads; maximum connected load: 2000VA
- **L37-916** provides DPST switching for hot water zone control systems or SPST control of two separate loads; second set of contacts rated for line or low voltage load; maximum connected load: 2000VA

Specifications:
- Resistive rating: 120VAC, 10A; 240VAC, 6A; maximum input 5W
- Maximum ambient temperature: 115°F for 60 Hz, 105°F for 50 Hz

Order #	Mfg. #	Switch Action	Volts	F/L Amps @ 120V	L/R Amps @ 120V	F/L Amps @ 240V	L/R Amps @ 240V

Universal Hydronic Switching Relay

- Replacement relay common to other Honeywell hydronic replacement controls
- Restores intermediate line and low-voltage switching in most oil-fired or gas-fired hydronic heating systems
- Two troubleshooting LEDs; push-to-test button
- Replaceable transformer fuse
- Long-life DC relay drive control technology
- Switching action: two SPST, plus Powerpile® rated low-voltage SPST, max. conn. load: 1500VA
- Use with external 24VAC or 24VDC supply, line-voltage control, or internal 24V transformer
- Model functionally replaces: R182A, B, C, J; R482A, B, C, J; R845A, R882A, B, C, J and RA832A

Order #	Mfg. #	Switch Action	Volts	F/L Amps @ 120V	L/R Amps @ 120V

resideo

Hydronic Switching Relay

- Provides switching of a line or low-voltage device from a line or low-voltage controller; typically applied in hydronic heating systems
- Relay for use with external 24VAC or 24VDC supply, with line-voltage control, or with internal 24V transformer supply
- Push-to-test button
- Long-life DC relay drive control technology
- Secondary of transformer protected by replaceable 1A automotive-style fuse

Specifications:
- Electrical ratings: primary voltage 120VAC; contact ratings: 120VAC, 60 Hz, 15A FL, 30A ALR, 2000VA max. on line voltage contacts
- Switching action: SPDT, plus Powerpile® rated low voltage SPST relay
- Ambient temperature: -20°F to +120°F
- Dimensions: 6-1/4" H x 4-7/16" W x 3-1/2" D

Combination Protectorelay And Hydronic Heating Controllers

A

B

- Immersion-type aquastat controller and oil burner primary provide oil-fired hydronic heating system high and low limit/circulator control
- Use in intermittent ignition applications
- Capable of zone control with zone valves
- 45 second safety switch timing with manual reset
- Includes heat-conductive compound
- **L37-825** mounts directly on burner; includes well adapter
- **L39-031** has 5' armored capillary with remote sensor

Specifications:
- Maximum pressure on immersion well: 200 PSI
- High limit: 130°F to 240°F range; 10°F fixed differential; SPST switch
- Low limit/circulation: 110°F to 220°F range; 10°F to 25°F adjusted differential; SPDT switch

resideo

Multi-Function Aquastat® Controllers

- Used to regulate boiler water temperature in gas or oil-fired hydronic heating systems
- Controller may be mounted in any position; no leveling required
- All adjustments accessible inside front cover
- Push-in terminals for quick connecting
- Single sensing element for easy installation

Specifications:
- Low limit: 110°F to 220°F
- High limit: 130°F to 240°F

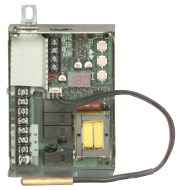
Universal Oil Electronic Aquastat® Controller



- Controls circulator, oil burner and boiler temperature
- LED display shows status and diagnostic information
- EnviraCOM™ compatible for local or remote diagnostics/monitoring
- Replaces L8124A,C, L7124U, L7148A, L7248A,C, L7224A,C, and L8148A controllers

Specifications:
- Operating range (low limit): 110°F to 220°F, 10°F to 25°F adjustable
- Operating range (high limit): 130°F to 240°F, 5°F to 20°F adjustable

Triple Aquastat Relays

resideo

- Immersion-type controller combines high limit protection with low limit and circulator control
- Use in forced hydronic systems, including domestic hot water
- All models (except **L39-952**) can provide multi-zone control with a separate circulator and relay for each zone
- **L37-826** and **L39-949** include 3" insertion well
- **L37-826** has 1-1/2" insulation depth; **L39-949** has 3" insulation depth
- **L39-951**, **L39-952** and **L37-827** have large transformers and extra terminals for supplying power to low voltage zone valves

Specifications:
- Low limit: 110°F to 220°F adjustable; 10°F to 25°F adj. diff.
- High limit: 130°F to 240°F adjustable; 10°F fixed differential

Order #	Mfg. #	Mounting	Burner Circuit Type
L37-826	L8124A1007	Vertical	120V

L37-827	L8124L1011	Horizontal/Vertical	120V

Aquastat Relays

resideo

- Immersion-type controllers that combine high limit protection with switching relay control of burner and circulator motors
- High limit opens burner circuit only
- Case available for horizontal or vertical mounting
- Requires a 24VAC thermostat with heat anticipator set at 0.2A
- **L37-788** and **L39-035** are for oil boilers and include a well adapter; **L39-036** is for gas boilers and includes a well adapter and Molex plug for use with vent damper
- **L39-953** includes 50VA transformer

Zone Valves with Press Connection

◀ NEW

Honeywell Home

- Consists of an actuator and valve assembly for controlling the flow of hot water
- Complete powerhead may be removed or replaced without breaking plumbing line connections or draining the system
- Actuator motor may be replaced without removing the valve body or draining the system

Single Zone Switching Relays

Honeywell Home

- Zoning is an ideal way to help your customers maximize comfort while enjoying energy savings
- Honeywell's Hydronic Zoning Panels feature simplified setup and reduced wiring for quick installation
- Compatible with most thermostats, including power-stealing and electromechanical models
- C-terminal available for every thermostat connection

AquaReset™

A B

- Quick, easy, consistent installation time - reliable RedLINK wireless communication provides easy installation
- Energy savings while maintaining indoor comfort - maximizes energy savings by decreasing the boiler set-point based on the outdoor temperature
- Reduced boiler standby losses
- Improve boiler system running efficiency
- Reduced equipment cycling for longer equipment life, and more continuous, comfortable space heating
- Built-in diagnostics help ensure proper system operation and efficiency
- Generate additional revenue opportunities for your business by offering real energy savings to your homeowners
- Built-in diagnostics help ensure proper system operation
- Complies with 2012 Department of Energy Standards
- Domestic hot water (DHW) priority available

Warning: This product contains lithium batteries and cannot be shipped by air

Aquastat® Controller

- Immersion type controller for regulating and limiting the tank temperature in water heaters
- Regulates temperature and provides energy cutoff (ECO) action on a temperature rise past the setpoint
- Includes a second sensing element that senses average water temperature to minimize stacking
- Fluid-filled element operates Micro Switch™ SPST snap-acting switch
- ECO switch interrupts the thermocouple circuit or main valve before tank reaches 210°F maximum temperature
- Includes factory-installed immersion well on controller
- Internal adjustment screw
- Special switch terminal provides three-wire hookup from Aquastat® controller to gas valve

Specifications:
- Electrical rating (full load): 2A maximum 24VAC
- Differential: 5°F fixed (controller); switch: 20°F (energy cutoff)

Hazardous Material Shipping Alert

- For high or low limit temperature control of boiler water or liquid in tanks
- Sensing element actuates enclosed snap switch
- Tube of heat-conductive compound (see HC Tube column) included with some models
- **L39-030** for surface mounting; **L39-030** and **L39-939** include bracket for strap-on mounting
- **L39-946** includes remote bulb with 66" capillary

Specifications:
- Copper bulb dimensions: 3/8" diameter x 2-7/8" L
- Case dimensions: 5-5/8" H x 2" W x 2-1/8" D

Immersion Wells

resideo

- For use with Immersion Type Hydronic Controllers from Honeywell
- **L37-829** for use with **L37-826** Triple Aquastat relay

Order #	Mfg. #	Conn. Size	Mounting
L37-828	121371A	1/2" NPT	Well Assembly
L37-829	121371B	3/4" NPT	Well Assembly

Immersion Control

WHITE-RODGERS

- Regulates temperature of any non-corrosive to copper liquid
- 5' armored capillary permits convenient location of the control
- Switch handles all voltages from millivolts to 240VAC; SPST opens on rise
- Temperature range: 100°F to 240°F
- Differential: 5°F

Order #	Mfg. #	Bulb
L36-084	11B06-1	3 1/2 x 7/18"

Immersion Well

WHITE-RODGERS

- 1/2" NPT for use with remote bulb immersion control

Order #	Mfg. #	Conn. Size
L36-156	F89-0036	1/2" NPT

Strap-On Control

WHITE-RODGERS

- Attaches directly to the surface of a pipe for use as a high limit control, low limit control, circulator control or combination low limit and circulator control
- Can be mounted at any angle, no leveling necessary
- Temperature range: 100°F to 240°F

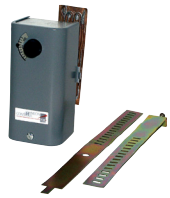
Order #	Mfg. #	Switch Action	Temp. Range	Diff.
L36-087	1127-2	SPDT	100°F - 240°F	Fixed 10°F

Penn Type A19 Strap-On Thermostat

For Control of Hot Water

Johnson Controls

- Strap-on surface type hot water control can be used for direct (open high) or reverse (open low) action
- May be mounted on either horizontal or vertical riser pipe
- Insulated case to minimize effects of ambient temperature (140°F max.)
- Maximum sensing element temperature: 250°F
- Universal shaft kit for concealed knob or slotted shaft applications



Order #	Mfg. #	Switch Action	Temp. Range	Diff.
L36-930	A19DAC-1	SPDT	100°F to 240°F	10°F Fixed

Operating Controls for Hot Water Boilers

Johnson Controls

- Universal replacement control for open high or SPDT applications
- Liquid-filled element provides rapid response to temperature change
- Furnished with a well assembly for 1/2" tapping
- Adjustable differential; temperature range: 100°F to 240°F
- 1/2" connection

P/T Plugs

Test Plugs for Pressure or Temperature

- Provides accurate pressure and temperature measurements for a quick, economical method to balance heating and air conditioning systems
- Provides access to system fluid without permanent installation of gauges, valves, thermometers or sampling equipment
- 1/4" or 1/2" NPT brass plugs with Nordel valve cones
- Water temperature to 350°F
- Pressure to 1000 PSI
- Stainless steel plugs for process applications
- BTX extensions for insulated pipe
- Johnstone Supply carries a large selection of pressure gauges and stem thermometers; see index for listings

Water Pressure Test Gauge

- Used to test water supply pressures within a distribution system
- Red indicator hand holds at the highest reading registered for detection of thermal expansion pressure surges
- Black enamel steel case, Kostil Polymer window, 3/4" H.T. hose connection, and copper alloy Bourdon tube sensing element
- Accuracy is ASME, Type B

Order #	Mfg. #	Description	PSI	Conn.
L46-625	0069721	Pressure Gauge	0 - 300	3/4" H.T. hose connection

Standard Gauges

- General purpose 2" steel case gauge for pressure measurement
- Suited for use with water, oil, air, gas or other media that will not attack brass or bronze
- Utilizes a copper alloy bourdon tube
- Brass socket and tip
- Case is drawn steel, pretreated for rust resistance
- Lower stem mount and center back connection in 1/8" and 1/4" NPT

Specifications:

- Accuracy: A.N.S.I. B40.1 grade B; ±3-2-3% of range across scale
- Pressure range: 30 to 300 PSI
- Temperature limits: ambient temperature and temperature of operating medium should not exceed 160°F; install a protective siphon in steam applications
- Minimum temperature: -40°F

Liquid-Filled Severe Service Gauges

- Liquid-filled severe service gauges are designed to perform in rugged applications and harsh environmental conditions, especially where pulsation and vibration are a problem
- Liquid-filled gauges offer a significant cushioning and dampening effect, reducing pointer flutter and internal gauge damage
- Lower stem mount in 1/4" NPT
- Stainless steel case with crimped front ring
- Hermetically sealed and glycerin-filled
- Brass socket with phosphor bronze bourdon tubes

Specifications:
- Accuracy: 2-1/2" gauges are A.N.S.I. grade B; ±1.6% of range across middle half of scale, 4" gauges are A.N.S.I. grade A; ±1% of range across middle half of scale
- Temperature limits: ambient temperature and temperature of operating medium should not exceed 150°F; for higher temperatures other fill mediums are available

Tri-O-Meter Boiler Gauges

- Specifically designed for hot water heating system boilers
- Indicates water pressure in PSI and kPA, and temperature in °F and °C
- Available in both bottom mount and back mount square and round styles

Specifications:
- Temperature range: 60°F to 260°F
- Pressure accuracy: ±3-2-3% full scale per A.N.S.I. B40.1 grade B
- Temperature accuracy: ±3% full scale per A.N.S.I. B40.1 grade B

Industrial Glass Vari-Angle® Thermometers

- 9" scale thermometer molded of GE Valox® polyester, in black textured finish
- 3-1/2" and 6" stems are ideal for pipeline applications for chilled and hot water installations
- Heavy glass protected front, blue liquid filled
- Scale has both °F and °C
- Uses include tanks, pipelines and boilers
- Thermowells required for new installations

Pressuretrol Controllers for Steam Boilers

- Pressure actuated high limit
- Sensitive pressure actuated diaphragm expands or contracts with pressure variations, moving lever mechanism operating snap switch
- For use in 24, 120, 240 or 277V control circuits or in self-powered (millivoltage) applications
- **L39-957** and **L39-044** are safety controls for steam heating boilers and break an electrical circuit to shut down the burner if steam pressure rises above a safe level
- **L39-958** is a fan control for suspension-type unit heaters and makes a fan circuit when pressure rise indicates presence of steam

Specifications:

- Maximum operating pressure rating: 20 PSI; ambient temperature rating: 150°F
- Dimensions (case): 4-15/32" H x 3-3/8" W x 2-1/4" D

VXT Automatic Water Feeders

For Steam Boilers

- Automatically maintains safe boiler water level and monitors make-up water additions
- Works with all probe and float-type low water cut-offs
- Digital feed counter displays amount of water added to boiler and helps diagnose water loss problems
- Programmable feed delay helps prevent flooded boilers, with six programmable feed settings
- Features manual feed button, underfeed protection, lockout flood protection, and on-board diagnostics

Water Feeders For Steam Boilers

Uni-Match® Electric

McDonnell & Miller a xylem brand

- For low pressure steam boilers up to 1,000,000 BtuH
- Three position slide switch allows timing to be matched to most major low water cut-off manufacturers
- Field adaptable flow rate — 1, 2 or 4 GPM
- Universal design; manual feed button
- Easy to clean strainer
- Can be used with mechanical or electronic water cut-off controls
- Includes 3/8" x 1/2" sweat adapters for quick installation with copper tubing

Specifications:
- Maximum water temperature: 175°F
- Maximum ambient temperature: 100°F
- Maximum water pressure: 150 PSI
- Maximum boiler pressure: 15 PSI

Order #	Mfg. #	Model #	Volts
L38-789	169550	WF-2-U-24	24
L38-790	169560	WF-2-U-120	120

Water Feeders For Steam Boilers

McDonnell & Miller a xylem brand

- For low pressure steam boilers with cold water feed
- Can be used with mechanical or electronic low water cut-off controls
- Quick-change replaceable cartridge valve and strainer
- Manual feed button
- **L38-766** features a 120VAC solenoid
- **L38-767** features a 24VAC solenoid and a separate 50VA transformer

Specifications:
- Maximum water pressure: 150 PSI
- Maximum boiler pressure: 25 PSI
- Maximum water temperature: 175°F
- Maximum power consumption: 40 watts

Order #	Mfg. #	Model #	Volts
L38-766	169400	101A	120
L38-767	169500	101A-24	24

Boiler-Water Feeder Cut-Off Combination

McDonnell & Miller a xylem brand

- For closed, hand fired steam heating system boilers up to 5,000 sq. ft. capacity
- Has time-saving quick hook-up fitting for installation in gauge glass tappings with 1/2" connections
- Self-closing blow-off valve without cut-off switch
- Maximum boiler pressure: 25 PSI
- Maximum water supply pressure: 150 PSI

Order #	Mfg. #	Model #
L86-137	132800	47-2

Replacement Valve And Strainer

McDonnell & Miller a xylem brand

- Replacement valve, cartridge and strainer assembly kit for series 47 (**L86-137**), 247 and 847 low water cut-off assemblies

Order #	Mfg. #	Model #
L38-786	341600	SA47-101-102

Replacement Blow-Down Valve

McDonnell & Miller a xylem brand

- Replacement boiler control blow-down valve for McDonnell & Miller series 47 (**L86-137**), 67 (**L37-423**) and 70 low water cut-offs
- Maximum pressure: 30 PSI
- Gasket and mounting screws included

Order #	Mfg. #
L38-713	14-B

Low Water Cut-Off For Steam Boilers

McDonnell & Miller a xylem brand

- For low pressure steam boilers of any size
- Float-actuated electrical switch used to protect boilers against the hazard of a low water condition
- Quick hook-up fitting for installation in gauge glass tappings
- Has large area self-closing blow-off valve
- Adjustable conduit outlet
- 1/4" NPT pressure control tapping
- Maximum steam pressure: 20 PSI
- Electrical ratings: 120VAC — maximum FLA 7.4; maximum LRA 44.4; 240VAC — maximum FLA 3.7; maximum LRA 22.2
- Pilot duty: 120/240VAC, 125VA

Low Water Cut-Offs For Steam Boilers

Electric

- For residential and commercial low pressure steam boilers
- Mounts in 2-1/2" NPT boiler side tappings
- Packless bellows
- Adjustable BX outlet for easy installation
- Dual precision switches for operation of the low water cut-off and an alarm or an electric water feeder

Specifications:

- Maximum steam pressure: 20 PSI

Order #	Mfg. #	Model #	Insertion Length	Volts

Low Water Cut-Offs For Steam Boilers

Electric

- For residential and commercial applications
- Green LED multi-function test light
- Red LED low water indicator light
- Shorted probe indication
- No blow-down required when mounted directly to boiler trappings
- 24V meets ANSI specification Z21.13a
- No lockout with loss of power if probe is in water
- Increased probe sensitivity prevents nuisance shutdowns, and a new test feature diagnoses shorted probe problems at installation
- **L46-640** and **L46-639** have manual resets

Specifications:

- Maximum ambient temperature: 120°F
- Maximum water temperature: 250°F
- Maximum steam pressure: 15 PSI
- Voltage across probe to ground: 14VAC
- Power consumption: 1.7 VA @ 24 VAC, 3.6 VA @ 124 VAC
- Probe sensitivity: 7,000 ohms

Note: Model PS804 with foam compensator also available at your local Johnstone Supply location by special order

Low Water Cut-Off And Pump Controller

McDonnell & Miller a xylem brand

- For boilers of any size with separate water columns
- Designed for high pressure, high temperature service
- Float-actuated electrical switch controls boiler feed pump directly from the boiler water level
- Keeps boiler water level within the limits recommended for maximum steaming efficiency and fuel economy
- Includes a second switch, operating at a lower level, which provides a circuit for stopping the automatic burner and sounds an alarm
- Snap switch
- Can also be used as a cut-off and alarm on many high pressure hot water space heating boilers
- 1" NPT connections
- Maximum pressure: 150 PSI boiler
- Electrical ratings for pump and cut-off circuits: 120VAC — maximum F/L amps 7.4; maximum L/R amps 44.4; 240VAC — maximum F/L amps 3.7; maximum L/R amps 22.2; 120VDC — maximum F/L amps 2.4; maximum L/R amps 24.0; 240VDC — maximum F/L amps 1.2; maximum L/R amps 12.0
- Amp rating for alarm circuit: 120VAC — 1A; 240VAC — 1/2A; 120VDC — 1/2A; 240VDC — 1/4A circuit
- Pilot duty service: 120/240VAC, 345VA

Low Water Cut-Offs for Steam Boilers

Electric with Manual Reset and Test Switch

McDonnell & Miller a xylem brand GUARDDOG

- For commercial and industrial secondary low water protection
- Electronic circuitry with remote conductance probe
- LED low water indicator light
- No lockout with loss of power if probe is in water
- Meets ASME Code CSD-1 requirements
- Remote sensor **L38-783** includes probe, **L38-784** probe sold separately
- **L40-233** includes PA-800 probe

Specifications:

- Maximum ambient temperature: 120°F
- Voltage across probe to ground: 14VAC
- Maximum remote sensor water temperature: **L38-783** — 250°F; **L38-784** — 406°F
- Maximum remote sensor steam pressure: **L38-783** — 15 PSI; **L38-784** — 250 PSI

Combination Low Water Cut-Off/Mechanical Water Feeder

For Low Pressure Steam and Hot Water Boilers

- For systems larger than 5,000 sq. ft. capacity with cold water feed
- Includes No. 2 cut-off switch (**L38-774**)

Specifications:
- Maximum water supply pressure: 150 PSI
- Maximum pressure: 35 PSI

Order #	Mfg. #	Model #	Volts
L86-351	135000	51-2	120/240

HYDROLEVEL COMPANY

CycleGard Low Water Cut-Offs

For Steam Boilers

- Mounts directly to boiler and monitors water level in low pressure steam boilers
- Allows boiler to operate continuously as long as water remains in contact with probe
- 15-second delay feature prevents burner from short cycling during temporary low water levels
- Control delays 30 seconds before restarting when water level is restored, allowing optional water feeder to raise water to normal operating level
- Recommended for boilers with tankless coils

Low Water Cut-Off For Hot Water Boilers

Electric

- For residential and, where codes allow, commercial applications
- Electro-mechanical operation
- Automatic reset
- No blow-down required

Specifications:
- Maximum ambient temperature: 120°F
- Maximum water temperature: 250°F
- Maximum water pressure: 160 PSI
- Voltage across probe to ground: 125VAC
- Power consumption: 15VA
- Probe sensitivity: 6,000 ohms

SafGard Low Water Cut-Offs

For Hot Water Boilers

- Automatically shuts off burner in a low water condition to prevent boiler damage
- Heavy-duty electro-mechanical design for long life
- Low maintenance, no moving parts to wear or stick
- Auto reset feature automatically re-energizes circuit upon return to safe water level
- Manual reset feature requires manual reset if low water condition exists for 30 seconds or longer
- Test button allows operator to test control operation without lowering water level
- **L42-929** and **L42-932** are equipped with shorter probe for mounting in standard reducing tees
- **L42-931** and **L42-935** are compact models for applications with space limitations

Test-N-Check® Valves

For Hot Water Boilers

- Simplifies ASME CSD-1a code mandated testing of low water cut-offs by eliminating the need to drain the system
- Includes one upper and one lower valve for mounting at crosses in equalizing lines
- Restricts water flow when the low water cut-off blow-down valve is open
- Adjustable built-in vacuum breaker in upper valve provides rapid evacuation of water from the float chamber

Specifications:
- Maximum temperature: 250°F
- Maximum pressure: 160 PSI

Kickspace Heaters

Ideal for Limited Space Installations

- Space saving design for installation in cabinets, between floor joists, foyers, bathrooms, basements, under stair risers, windows and other limited space areas
- Installation kits for locations other than under a cabinet purchased separately
- Installation kits include all hardware needed to install heater
- Recessed kits fit into wall recesses; the smaller **N87-172** kit fits between 16" center studs
- Surface kits install quickly and directly into wall surface
- Floor kits install easily between standard floor joists; grille provides forward or rear directional air flow
- Works with existing hot water heater or boiler
- Quiet operation
- Fins are mechanically bonded to coil to enhance heat transfer
- Supply and return connections are 1/2" nominal
- 110V

Hydronic Baseboard Heaters

Model R, 3/4" Copper Tube

- Enclosure and back panel are of one-piece steel construction
- Snap-in brackets are die-formed one-piece heavy gauge rust resistant galvanized steel
- Flat dent-resistant front panel snaps onto brackets either way — no top or bottom edge
- Air intake space for unrestricted air circulation
- Pivot mounted damper for easy opening and closing
- Silent slide shoe made of heat resistant nylon
- Stands 7-7/16" high and extends only 2-7/8" into the room when set flush against wall
- Each assembly includes: one length each front and back panel, damper, support brackets, slide cradles and 3/4" element; joining piece sets included with lengths of 5', 6' and 8'
- Return pipe into enclosure with use of supply tube support hanger
- White prime coat

Hydronic Electric Baseboard Heaters

TPI Corporation

- Hydronic element retains heat after the thermostat is turned off
- Low-profile design and three-inch depth allows heater to mount flush on wall and flat on floor
- No-maintenance sealed system requires no filling or replacement
- Liquid solution is permanently sealed

Submersible Sump Pumps

Little GIANT

- PSC motor with thermal overload protection
- 1-1/2" NPT discharge
- Epoxy coated cast iron housings with polypropylene base
- UL, CSA approved
- Three-conductor UL listed cord with three-prong molded plug
- 115V, 6A

Cast Iron Sump Pump

- Cast iron pump housing with protective epoxy coating for corrosion resistance
- Stainless steel screws, bolts and handle protect against corrosion
- Bearings: upper and lower sintered sleeve bearings for extended motor life

Order #	Mfg. #	HP	Volts	Amps	Watts	Shutoff	GPM @ 5'	GPM @ 10'	GPM @ 15'	Wt. Lbs.	Each

Piggyback Mechanical Float Switch

- Converts manual pump to automatic
- Rated to 13 amps or less
- 3-prong piggy-back style plug with 10’ cord
- 115V, UL and CSA listing

Order #	Mfg. #	Each
W69-744	599118	**155.00**

Liquid Level Controls

- Pressure actuated remote switches convert any manual pump to automatic operation
- Attached easily to the back of the **B81-121** Water Wizard pump

Order #	Mfg. #	Cord Length	Off Depth	On Depth	Volts	HP	Each
G22-965	599008	10'	1" – 4"	7" – 10"	115	1/2	**225.00**
G31-755	599014	18'	1-3/4" ± 1/2"	3-1/2" ± 1/2"	115	1/3	**295.00**

Water Wizard Submersible Pump

- Can be partially or totally submersed
- Removes water to within 1/8" of the floor
- 7-3/4" H x 4-5/16" W x 6-1/6" base D
- 1/6 HP heavy-duty motor
- Weighs 8.25 lbs.
- Maximum PSI 11.4
- Power cord, three-wire, 10' length, three-prong molded plug, 115V, single-phase
- Thermally protected

Applications:
- Emptying flooded rooms
- Bailing boats and tanks
- Cleaning out pools and ponds
- Powering waterfalls
- Draining garages and basements
- Dewatering flat roofs
- Residential and commercial use

Features:
- Epoxy coated housing
- Snap out filter screen
- Pumping height to 26'
- Fixed carrying handle
- Oil filled sealed housing for lifetime lubrication
- Free garden hose adapter
- To convert to automatic operation use **G31-755** remote switch

Order #	Mfg. #	GPM @ 1'	GPM @ 5'	GPM @ 10'	GPM @ 15'	GPM @ 20'	Each
B81-121	505723	20 (1,200 GPH)	18.3 (1,100 GPH)	16.7 (1,000 GPH)	14 (840 GPH)	8.7 (520 GPH)	**379.00**

Portable Utility Transfer Pump

- Ideal for flooded basements, watering lawns, draining water heaters and boosting water pressure for washing vehicles, sidewalks, etc.
- 3/4" brass garden hose adapters
- 1/2 HP motor with permanently lubricated ball bearings
- Self-priming to 15' when priming chamber is filled
- 142' shutoff
- 115V with 8' power cord

Order #	Mfg. #	Each
W89-409	555104	**1099.00**

Submersible Utility Pump

LittleGIANT

- For Use with aqueous solutions or UL Listed solvents
- Made of corrosion resistant materials
- Rated for continuous duty
- 1/4" MNPT discharge
- 1/2" MNPT builders fitting
- 6' power cord without plug

Order #	Mfg. #	HP	GPH @ 1'	GPH @ 3'	GPH @ 5'	GPH @ 8'	GPH @ 10'	Each

Small Submersible Pump

LittleGIANT

- Hermetically sealed, corrosion-resistant nylon housing
- Sump type pick-up, smooth intake, set on any of five sides
- 1/4" male NPT discharge
- Has 6', 3-connector cord with 3-prong plug; impedance protected
- 1/160 HP, 115V, 3-7/8" H x 3-7/8" L x 3" W
- GPH is at total feet of head
- 4.6' shutoff

Order #	Mfg. #	Wt. Lbs.	GPH @ 1'	GPH @ 2'	GPH @ 3'	GPH @ 4'	Each
B81-033	523003	3	120	90	70	40	**335.00**

Submersible In-Line Pump

LittleGIANT

- Compact, hermetically sealed, corrosion resistant pump for high volume, low pressure submerged and/or open air use
- Epoxy coating to protect against corrosion
- For use with liquids such as water, mild acids, mild chemicals, alkalis or saline solutions with a pH factor of 5 to 9
- Dielectric oil filled with aluminum housing
- Furnished with nitrile shaft seal
- Polypropylene impeller and screen
- Thermal protection
- 6', three conductor cord with molded three prong plug
- 115V, 60 Hz
- 205 GPH @ 1'; 168 GPH @ 3'; 120 GPH @ 5'; 7.4' shutoff

Pony Pump® Utility Pumps

LittleGIANT

- Non-submersible self-priming transfer pumps
- Solid brass and chrome plated body
- Dual threaded inlet and outlet: 3/8" I.D. and 3/4" O.D. hole thread
- Includes one **W69-157** impeller repair kit
- Use with 10 amp fuse such as **G31-332** with 12V pump — not included
- Cord set: 6' 3-conductor for **W88-959**; 2 10" leads for **W88-960**

AIRSTAGE

FUJITSU

All heat pumps are NOT created equal

Whole Home Comfort - Multi-Zone Mini-Split Systems

Look for the Fujitsu AIRSTAGE Advantage!

- "Leak Proof" HCR Copper
- Outdoor units in 18, 24, 36k BTU/h with service valves to isolate each zone
- Operate one or all indoor units
- 5 indoor unit styles from as low as 7,000 and high as 24,000 BTU/h
- Certain combinations are Energy Star Qualified
- Hundreds of combinations - mix and match flexibility
- DC Twin Rotary Compressor

XLTH Xtra Low Temp Heating:

- XLTH heating rated down to -15°F (-26°C) outdoor temps - No cut-off temperature
- Built-in STAINLESS STEEL base pan heater
- Enhanced soy-based wiring harness
- XLTH: Connect 14,000 to 39,000 BTU/h
- Metal fan guard

Raptor Firetube Stainless Steel Condensing Gas Hot Water Boilers

- Stainless steel condensing hot water boiler
- Stainless steel fire tube heat exchanger
- Wall mounted
- Natural gas, field convertible to LP gas
- Fully modulating with 10:1 turndown ratio
- Honeywell SOLA control with touch screen user interface
- Vent adapter allows for venting with CPVC/PVC or single wall polypropylene venting

Specifications:

- If flue diameter chart information shows more than one size, see manual for conversion instructions

Zone Control Panels

- For use with Phantom 10:1, Raptor 5:1 &10:1, Phantom X and Raptor X boilers
- Sage Zone Control Panel reduces installation time and increases system efficiency by evaluating individual zone heat demands and optimizing the modulation
- Control Panel can control up to 4 zones and is expandable to 4 Zoning Controls (16 zones with 4 controls)
- RJ45 cable included
- Additional features include priority protection, post purge of DHW, circulator exercise, front external indicator lights, fuse protected sealed relays and universal thermostat compatibility
- All controls panels are UL Approved

Aruba 5 Gas Fired Hot Water Boilers

NEW

AWR Series, Atmospheric, Chimney Vent

- Approved for installation on non-carpeted combustible floors
- Electronic ignition
- Cast iron heat exchanger
- Built-in draft diverter — category 1 venting
- Motorized vent damper
- Supply tapping located off top of boiler for easier supply piping
- 1-1/4" high performance circulator
- Stainless steel burners
- Combination high limit/LWCO/circulator control
- Aquastat mounted directly into heat exchanger
- Spill switch detects venting problems
- ASME relief valve set at 30 PSI
- Approved for installation to 7,000 ft. elevation
- For altitudes above 2,000', refer to manual for reduced input ratings

Bali 2 Gas Fired Hot Water Boilers

BWF Series, Induced Draft

- Approved for installation on non-carpeted combustible floors
- Cast iron heat exchanger
- Side-wall or vertical venting with AL294C stainless steel venting material
- Induced draft blower with pressure switch
- Integrated Boiler Control - with temperature control, relay and ignition functions in a single module
- Includes additional circulator output for a second heating zone or an indirect water heater like the Mega-Stor
- Universal vent adapter
- Circulator, Rollout Switch; ASME relief valve (30 PSI)
- Stainless steel burners
- Two-tone powder coated jacket insulated with fiberglass
- Natural gas (LP gas available at participating locations)
- For altitudes above 2,000', ratings should be reduced at rate of 4% for each 1,000' above sea level
- Boiler must be ordered for proper elevation above sea level when being installed at altitudes above 2,000'

Tobago Cast Iron Oil Hot Water Boilers

- Not for installation on combustible floors
- High efficiency — up to 85.8% AFUE
- Two-tone powder coated jacket, resists scratching, insulated with fiberglass to minimize wasteful heat loss
- Split top jacket panel easily removed
- Higher capacities can be achieved by changing the nozzle size
- Chimney vent
- Wet base construction surrounds combustion area at top, bottom, rear and sides of boiler
- Combustion chamber has a ceramic fiber target wall with floor blanket
- Swing open burner door for easy service
- Standard equipment includes: oil solenoid valve, burner twist disconnect, flame retention oil burner with interrupted ignition, combination aquastat/relay, draft regulator, 1-1/2" circulator, combination temperature/pressure gauge, boiler drain valve, ASME relief valve

Specifications:

- See www.JohnstoneSupply.com for burner configurations as these models that do not include them

Bermuda Gas Fired Cast Iron Steam Boilers

BSI Series

- Cast iron heat exchanger
- Stainless steel burners
- Built-in draft diverter to fit low spaces
- Automatic vent damper included (BSI069 through BSI276)
- Attractive, rugged jacket
- Fully assembled or available as knock-down package
- Ten sizes from 69 to 379 MBH
- Designed for installation on combustible floors
- Full 1-year warranty, and 12-year limited warranty for heat exchanger

NFB Condensing Fire Tube Boilers

- 10:1 turn down ratio
- Patented compact stainless steel fire tube heat exchanger "H" stamped to reduce high stress point weld failures common on other boilers
- Heat exchanger allows water to fill the entire heat exchanger eliminating the need for extra insulation at the top of the combustion chamber
- Non-metallic drain pan prevents corrosion caused by acidic condensate
- 1/2" gas piping for up to 24' in length
- Low-noise, lightweight, space-saving design
- Field convertible to LP

TRX Water Tube Boilers

- Innovative XTRATECH® stainless steel heat exchanger with large diameter tubing
- Modulating Combustion up to 11:1
- Wi-Fi on board for remote control and monitoring
- Integrated ECM pump and DHW diverter valve
- Small zone valve systems may not require additional pump or low-loss header
- Easy service access and quick component connections
- For indirect DHW applications, internal diverter valve eliminates need for indirect pump

FTVN Series Fire Tube Boilers

- Wall-hung boiler with vertical fire tube heat exchanger made of 439 stainless steel
- Programmable display
- 10:1 turndown ratio
- Outdoor reset sensor included
- LP convertible with veturi insert
- Universal vent connections

Specifications:

- Combi models provide endless hot water and space heating
- Integrated pump and no primary loop or system pump required
- Brazed plate heat exchanger
- Includes low loss header

Gas Fired Hot Water Boiler

Trinity TFTN Series, Condensing, Ultra High Efficiency

- Comes with an LP adapter kit
- Sealed modulation combustion system
- Constructed using 439 stainless steel heat exchanger
- All copper or stainless-steel internal piping
- Sizes 85-399 are wall mounting, 500 and above are floor standing
- The touch screen control interface provides easy navigation and set up with a 7" display
- EZ Set Up Wizard, Self-diagnostic display with lead lag capability
- Flexible design allows for plumbing connections either at the top or bottom of boiler
- High quality appliance finish

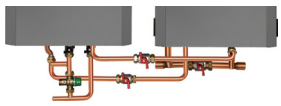
Wall Mounted Indirect Water Heater

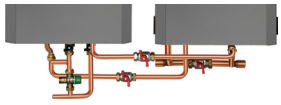
- 20 gallon indirect with first hour recovery rate
- Stainless Steel Tank & coil use type 444
- CFC-free 2" ultra high density EPS insulation
- Thermostatic mixing valve included
- The S20W Indirect Water Heater can be used with any boiler to provide high-performance hot water



Order #	Mfg. #	Gallons	First Hour GPH	BtuH Output	Length	Height	Wt. Lbs.
N99-229	S20W	20	348	199	20-7/8"	34-1/4"	150

Piping Kit and Low-Loss Header for S20W

- PLUS Kit - S20W to TRX/FTVN piping Kit
- The PLUS Kit is designed to twin together the S20W and the Heat Only versions of all the FTVN and TRX 150 and 199 to create a High Output Combi System. The PLUS Kit also includes the Low Loss Header, 87262



Order #	Mfg. #	Description	For Use With

Indirect Water Heaters

TRIN and Stor Series

- Limited lifetime warranty
- S and SL series are indirect water heaters
- ST series are storage tanks
- Easy access cleanout
- Special quick recovery coil
- Designed to work with all NTI boilers
- Package includes aquastat and relief valve
- SL series offers a stone lined tank with copper coil for harsh water conditions
- S series offers a stainless steel tank with a single coil
- ST series offers storage for volume water heating

Commercial Gas Water Heaters

Cyclone Mxi BTH Models

- Up to 98% thermal efficiency
- Modulating burner
- Vents vertically or horizontally
- Approved for zero clearance to combustibles
- Digital diagnostic control panel
- Three-year tank/one-year parts warranty
- PERMAGLASS® ULTRA COAT glass lining
- Exceeds ASHRAE/IES 90.1b-1992 for thermal efficiency and standby loss

Commercial Gas Water Heaters

BTR Models

- 80+% thermal efficiency
- Three sets of inlets and outlets offers more installation flexibility
- Low profile draft diverter with automatic motorized flue damper
- ASME models available
- Three-year tank/one-year parts warranty
- Exceeds ASHRAE/IESNA 90.1 for thermal efficiency and standby loss

Note: Please check ASME requirements for your state

Copper Coil Gas Water Heaters and Boilers

Conservationist® Burkay Series, 80% Efficiency

- Copper finned tube heat exchanger
- All copper, brass or bronze waterways
- 120VAC
- Safety pilot with electronic ignition
- Gas pressure regulator
- Draft diverter
- Automatic gas shutoff
- 5-year coil and heat exchanger limited warranty
- **N98-046** through **N98-049** have main and pilot cocks
- **N98-048** through **N98-054** have thermal balancer
- Factory equipped New York State or California State code models available by special order
- **N98-050** through **N98-054** offer a step opening automatic gas valve adjustable limit control, temperature protector switch assembly, intermittent ignition device and a main gas shutoff

Commercial Gas Water Heaters

Master-Fit® BTL Low NOx Models

- Meets Texas low NOx and California ULN requirements
- Induced draft built-in blower
- No draft hood or barometric damper
- 3-year tank/1-year parts warranty
- PERMAGLAS®ULTRA COAT™ Glass Lining
- Exceeds ASHRAE/IESNA 90.1 for thermal efficiency and standby loss

Note: Other gas, oil and electric models available at participating Johnstone Supply stores or by special order.

Manufactured Housing Water Heaters

Standard-vent and Direct-vent

- Meets HUD requirements for manufactured housing installation
- Available in standard or direct-vent design
- Convertible gas control for natural gas or propane operation
- Environmentally friendly Green Choice™ gas burner reduces NOx emissions by 33% compared to standard burners

THAT'S THE POWER OF JOHNSTONE™

Residential Electric Water Heaters

Promax™ Energy Saver Models

A

B

- Factory installed temperature and pressure relief valve
- Six-year tank/six-year parts warranty
- DynaClean diffuser dip tube reduces lime and sediment buildup
- Permaglas coating for defense against corrosion
- Coregard anode rod with stainless steel core

Note: Also available from participating Johnstone Supply stores or by special order: Energy Saver Sealed Shot, Sure Shot, Power Shot, Point-of-use and table top water heaters.

Residential Electric Water Heaters

Voltex® Hybrid Electric Heat Pump

- Delivers 79-gallon first hour rating
- ENERGY STAR® certified, reduces water heating costs by up to 73% compared to standard electric technology
- Up to a 3.45 Uniform Energy Factor (UEF) rating
- User-friendly electronic interface allows easy control of temperature setting, operating modes and communicates diagnostics
- Choose from Hybrid, Efficiency, Electric or Vacation modes
- Quiet operation at 51dB
- 6-year limited tank and parts warranty

Anode Rods and Dip Tubes

- **N87-652** is The Product Preservers™ Powered Anode System which eliminates smelly water caused by sacrificial magnesium anodes or to replace aluminum anodes where aluminum hydroxide is a problem
- For use with residential gas or electric 30-50 gallon water heater installations
- Permanent anode rod made of titanium and mixed metal oxide that will never be depleted unlike traditional sacrificial anodes

Lead-Free Thermostatic Mixing Valves

A.S.S.E. 1016 Listed

- Designed for mixing hot and cold water to supply sinks, baths, showers or lavatories with tempered water
- Thermostat controls both hot and cold water
- Can be used in any point-of-use installation requiring preset water temperatures
- A.S.S.E. 1016 listing is for individual showers, baths, or a combination of both
- Solid wax hydraulic principle thermostat
- Locking adjustment cap
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Lead-Free AMX300 Series Direct Connect Water Heater Kits

- Temperature is adjustable using push-twist-release locking hand wheel design and if cold water supply is interrupted, flow reduction occurs in seconds
- Recirculation portion option offers fast delivery of heated water to the furthest fixtures, increasing user comfort with more available hot water
- The alternate hot port bypasses hot water directly from the tank to non-mixed temperature applications
- Fits most water heaters up to 1 in., with all necessary adapters included
- Brass/stainless construction with Teflon coated wear surfaces for extended surface
- Meets ASSE 1017 Standards
- **L46-687** is a mixing valve (for replacement only)
- **L46-688** includes mixing valve, cold water tee, 8" flex connector
- **L46-689** includes mixing valve, cold water tee, 11" flex connector

NAVIEN

NPE2 Series Condensing High Efficient Tankless Water Heaters

- Up to 95% UEF on S models and 96% on A models
- Ships NG - field convertible to LP
- Can use 1/2" gas line up to 24'
- Dual stainless steel heat exchangers
- Compatible with 2" SCH 40 PVC vent up to 75' and 150' using 3"SCH 40 PVC with no elbows
- Common vent up to 12 units
- Cascade up to 32 units
- Commercial or residential

Adapt™ Condensing Gas Tankless Water Heaters

◀ NEW

- Premium condensing gas tankless water heater
- Heavy-duty stainless steel heat exchanger
- Integrated recirculation pump & display
- 9,000 minimum BTU Input
- Max flow rate 10.5 GPM
- .95 UEF
- Ultra low NOx
- Universal indoor or outdoor installation
- Field convertible fuel type
- .5" gas line
- 2" or 3" PVC venting
- Cascade up to 12 Units
- Approved for manufactured homes
- 15-Year limited heat exchanger warranty
- 5-year limited parts warranty
- No hardwater warranty exclusion
- Energy Star certified

Note: N99-378, **N99-379**, and **N99-380** include X3 Scale Prevention Technology

AO Smith Tankless Water Heaters

- For residential or commercial applications
- Energy Star qualified
- Primary copper heat exchanger, secondary stainless steel heat exchanger
- Remote included
- Easy-Link cables included

Features:
- **N98-940** and **N98-941** include an integrated recirculating pump

Product Preservers® Anti-Scale System for Tankless Water Heaters

- Provides active protection against scale formation so there is no requirement to flush/ descale the unit
- Does not add chemicals to the water or require electricity
- Virtually maintenance free
- One filter change every two years to ensure protection for the effects of hard water scale
- 2-year limited warranty

Rinnai

SENSEI™ Condensing Tankless Water Heaters

NEW

- Energy Star Qualified with uniform Energy Factor of .97
- Wireless setup via Bluetooth
- No gas conversion kit required
- Quick-Flush™ provides an efficient flushing procedure to make periodic preventive maintenance simple
- Outdoor vent cap adapts to any SENSEI™ RX Series model for outdoor installation
- Valves NOT Included

Features:

- **N99-388** and **N99-389** include hot water recirculator

B

Condensate Neutralizer

- Re-useable design with a clear chamber for annual visual inspections
- This design also allows for easy removal, cleaning and media replacement
- Mounting brackets included
- A condensate neutralizer should be used on all condensing gas appliances, as the condensate from gas combustion has a very low pH which could be harmful to septic and sewage systems

Fig.	Order #	Mfg. #	Description	For Use With
A	**N46-299**	804000074	Condensate Neutralizer Kit	All condensing gas appliances
B	**N46-300**	809000114	Refill, condensate neutralizer (All Models)	804000074 Rinnai Neutralizer Systems

Rinnai

ScaleCutter® Anti-Scale System

- Can be used with tankless water heaters and combi boilers
- It works by simply preventing the amount of minerals found in potable water to prevent lime-scale buildup and corrosion that can diminish hot water performance within the appliance
- The Scale Cutter offers similar benefits of traditional water softeners

Order #	Mfg. #	Description	For Use With
N46-296	103000038	Scale Cutter System Unit 3/4"	All Tankless Water Heaters and Combi Boilers
N46-297	103000039	Scale Cutter Refill Cartridge 3/4"	103000038 - Scale Cutter System Unit 3/4in

Lead Free Tankless Water Heater Isolation Valves

EXP Series

Webstone VALVE INNOVATION

- Easy two-step color coded union connections
- Easy quarter turn ball valve operation
- Full port throughout entire valve body
- Individually controlled full port drain outlet
- Easy cleaning or flushing of system
- 3/4" outlet for pressure relief valve
- LEAD FREE Products are Certified to ASSE 1061 & NSF/ANSI 61-G

Lead Free Series TWH Tankless Water Heater Valves

A B

- Hot and cold valves certified to NSF/ANSI 61
- Staggered connection points for ease of installation and access
- Valves are suitable for most tankless installations
- No additional adapters required
- Size: 3/4" (20mm)
- The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

OneFlow® Anti-Scale System

A B

- Compatible with all major tankless water heater brands
- Maintains manufacturer's stated water heater efficiency
- Works to prevent heater malfunction due to scale build-up
- Diminishes existing scale problems and costs associated with de-scaling
- Environmentally friendly alternative to water softeners
- Almost zero maintenance required due to no salt of chemicals needed
- No backwashing or electricity needed

Fig.	Order #	Mfg. #	Description	Conn. Size	Length	Wt. Lbs.	Max. Height

Vital-Flo Tankless Water Heater Descaler Kit

- Restore heat and flow capabilities by dissolving scale formed by naturally occurring minerals in the water supply
- Descaler is fast acting and metal safe
- Pump sizing provides flow rate to wet common tube diameters in horizontal line runs and secondary benefit of warming fluid for added performance
- Includes 4 gallon chemical resistant container, 1/6 HP submersible pump, two 5' hose assemblies and 8 ounce bottle of descaler solution

Order #	Mfg. #	Description	Each

Aquefier Heat Recovery Unit

Heat Recovery for Domestic Hot Water

- Utilizes hot refrigerant gas from the compressor routed through the gas side of a heat exchanger to supply heated water to the water tank for domestic use
- Can be connected to an air conditioner, heat pump, or refrigeration compressor
- Factory wired and preset controls, factory set at 140°F
- High efficiency vented double-wall heat exchanger
- Aluminum cabinet with baked enamel finish
- Units will produce 5–7 gallons per hour of hot water per ton of compressor rating
- 5–7 GPH recovery rate at 15°F rise per nominal ton
- Suitable for use in 1.5 to 5 ton system

Water Heater Thermostats

Replaces APCOM Thermostats

- Replacements for domestic water heaters, for State water heaters and most new production water heaters
- Can replace old style Robertshaw, APCOM and Therm-O-Disc®
- Temperature range: 120°F to 160°F
- Electrical rating: 7200 watts @ 240V

Gas Water Heater Control

- Automatic shutoff on main and pilot gas in the event of pilot failure
- Built-in E.C.O. (energy cut off) non-cycling high limit
- 1/2" inlet; 1/2" inverted flare outlet with adapter fittings for 3/8" FPT; 3/4" x 1-1/4" shank; 4-1/2" insertion bulb

Order #	Mfg. #	Pressure Setting	Pilot	Each
N45-205	37C73U-168	3.5" W.C.	Fixed	**299.00**

LP Gas Water Heater Control

- Designed with built-in, non-recycling energy cutoff (ECO) device; gas shuts off at excessive water temperature — 160°F
- Incorporates new, easy-to-adjust pressure regulator to maintain constant outlet pressure on pilot and main burner
- 100,000 BtuH capacity
- Control has internal sediment trap
- Dimensions: inlet 1/2" pipe; outlet 1/2" inverted flare; shank 1-5/8"
- Pressure: preset 10" (adjustable 9" W.C. to 12" W.C.)
- Includes 3/8" NPT reducer bushing

Warning: Outlet to gas burner has right hand threads and does not replace Robertshaw Model #R65RR.

Order #	Mfg. #	Each
N45-069	110-262	**725.00**

Convertible Gas — Water Heater Control

For Modular and Mobile Home Applications

- Main gas and pilot gas have reversible conversion from LP to natural gas
- Balanced pressure regulator
- Built-in, non-cycling energy cutoff (ECO) system to shut off all gas to water heater in case of excessive water temperature
- 160°F temperature dial
- 1-3/8" shank length, 1/2" inverted flare outlet, 1/2" pipe inlet
- Includes 3/8" NPT reducer bushing

Order #	Mfg. #	Each
N45-079	110-204	**329.00**

Shank Extension

- Increases 1-1/4" and 1-3/8" shank length on Robertshaw controls to approximately 3"

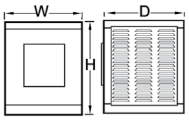
Order #	Mfg. #	Each
N45-071	10-250	**59.00**

Evaporative Coolers

Cabinet Only

- Choose from side or down discharge models
- Models include pump, float, bleed-off and quick disconnect
- Can also be used as a make-up air unit in bakeries and laundromats
- All units use 1725 RPM motors, 120V single-phase
- Blower wheel, blower pulley and belt included

Note: Order motor, motor pulley, electrical pigtail and clamps separately.



Side Discharge

Evaporative Coolers

TBQI Series, Variable-Speed Motor, Down Draft

- Ideal for residential and light-commercial applications
- Inverter variable-speed axial fan motor offers maximum control over comfort and is energy-efficient
- Non-clogging, patented water distribution system
- Microprocessor constantly analyzes water quality and power output
- UV resistant, high strength long-life structural polymer cabinet
- Tornado® water pump with fully encapsulated motor windings, pumps in 1/2" water
- Long-life Chillcel pads provide maximum cooling
- Watermanager™ and auto drain function
- Choose from the MagIQtouch® wired control kit **B19-560** or MagIQtouch® wireless control kit **B22-021**
- Optional Internal Air Sensor **B19-559** for remote temperature and humidity sensing
- Optional External Air Sensor **B22-188** for remote outside temperature sensing
- Optional Link Module for installations where both internal and external sensors are required
- Optional AUTO Weatherseal helps to reduce air circulation - Requires a 21 5/8" square raw edged roof jack – not supplied with cooler

- 2-speed junction box with on-board isolation switch and overload circuit breaker
- Non-clogging, patented water distribution system
- Light weight Permatuf™ corrosion-proof cabinet
- Tornado® water pump with fully encapsulated motor windings, pumps in 1/2" water
- Long-life Chillcel® pads provide maximum cooling
- **B61-451** requires 2 pads
- 115V

Portable Evaporative Coolers

MobileMAX 2 and MobileMAX 3

- UV resistant, high strength polymer cabinet
- Multiple commercial applications
- Filters out dust, pollen and contaminants
- Two-speed motor
- Easy access drain plug
- 26 gallon internal tank lasts up to 8 hours
- Can be connected to a dedicated water line or garden hose

WHITE-RODGERS

Evaporative Cooler Control System

- Includes 24VAC thermostat (Mfg. #1**F51-619**) and control relay (Mfg. #8A18Z-2)
- Control relay functions as a switching device for the thermostat to provide an even cooling level plus a choice of high and low-speed fan control on evaporative coolers
- Designed with a fan delay (approximately 60 seconds) to pre-wet the cooler pads before the fan starts
- 100% automatic
- High or low fan speed selection
- Integral transformer 120/240VAC to 24VAC, 60 Hz
- Separate fan and pump relays
- Raintight relay enclosure
- Dimensions: 3-1/4" H x 4-1/2" W x 1-5/8" D (thermostat); 8-1/2" H x 6-1/8" W x 4-1/8" D (control relay)

Order #	Mfg. #	Description	Each
L37-281	21D28-6	Includes 240VAC thermostat and control relay	**429.00**

Dial Manufacturing, Inc.

Digital Cooler Controller

- LCD digital temperature display
- Case door covers operating controls
- Single touch temperature adjustment
- Rated at 20A, 125V, 60 Hz for 1/3–1 HP motors

Order #	Mfg. #	Description	Size	Type	For Use With	Each
L39-511	7617	Digital Cooler Controller	3" x 4-1/2"	Switch	Down & Side Coolers	**185.00**

Dial Manufacturing, Inc.

Two-Speed Cooler Switch

- Recommended for evaporative coolers with two-speed blower motors
- Six-position rotary switch; white wall plate
- Kit includes mounting screws and wiring diagram
- Rated at 15A, 120V for 1/3–3/4 HP motors
- 2-3/4" W x 4-1/2" L x 1-1/2" H (knob to base of plate)

Order #	Mfg. #	Description	Size	Type	For Use With	Each
G22-278	7110	8 Position, 2 Speed Cooler Switch	4-3/4" x 2-1/2"	Switch	Down & Side Coolers	**26.49**

TPI Corporation

Line Voltage Cooling Thermostat

For Evaporative Coolers

- Large knob has temperature indicator with positive dial positions
- Vertical mount with easy to read thermometer
- Color: off-white
- Temperature range 50°F to 90°F; approximate differential 4°F; switch action — close on rise; 3/4 HP @ 125VAC, 1-1/2 HP @ 250VAC; 4-5/8" H x 2-3/4" W x 2-1/8" D

Order #	Mfg. #	Description	Size	Type	For Use With
L36-898	ET9SRTHS	Line Voltage Cooling Thermostat	3" x 5"	Switch	Evaporative Coolers

Float Valve

- 3/8" compression valve for industrial coolers
- Heavy-duty corrosion resistant bronze body, brass plunger, arm and stem
- Polypropylene float, two-piece arm with adjustable screw

Order #	Mfg. #	Description	Type	Each
B17-216	4164	3/8" HD Brass Float Valve	Brass	**36.49**

Cooler Coating

A B

- A heavy-bodied, thick asphaltic base coating, designed to coat and seal evaporative cooler bottom pans
- Protects cooler bottom pans against rust and corrosion
- Resistant to moisture, non-asbestos
- Has sound deadening qualities

Fig.	Order #	Mfg. #	Description	Size	Type	For Use With	Each
A	**B85-528**	5347	Cooler Coating - 1 Quart	1 Qt.	Liquid	Cooler Pans	**18.99**
B	**B86-755**	5328	20 Oz Cooler Coating	20 oz.	Can	Cooler Pans	**31.49**

Hose Cap Nut and Brass Sill Cock

A B

- **R54-404** fits 3/4" female hose
- **R57-442** is cast brass 3/4" FHT inlet with 1/8" FPT side outlet and 3/4" male hose outlet; the wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight

Fig.	Order #	Mfg. #	Description	Size	Type	For Use With	Each
A	**R54-404**	311-12Q	Hose Cap Nut	3/4"	—	—	**3.09**

Saddle Tapping Valve

- Fits 3/8" to 1-3/8" O.D. tube
- For installing ice machines and evaporative coolers
- Self-piercing on copper tubing
- Installs on pipe, if hole is pre-drilled
- 1/4" O.D. compression outlet
- Includes fittings for copper and plastic tubing
- Stainless steel piercing needle
- Molded gasket to seal on both pipe and valve
- Low lead

Order #	Mfg. #	Each
B18-879	STV2LL	**15.49**

EZ-ADD-A-VALVES

- Ideal for humidifier and evaporative cooler installations
- Full-slip compression or sweat styles
- 1/4" OD compression on shut-off valve
- Lead free

Fig.	Order #	Trunk Size	Each
A	**R57-447**	1/2" FSWT	**35.49**
A	**R57-448**	3/4" FSWT	**37.49**

Evaporative Cooler Pumps

Heavy-Duty, Moisture-Proof Windings

- For residential and commercial cooler applications
- Corrosion-resistant, one-piece steel motor shaft
- Snap-off volute for easy cleaning
- Polyester impeller
- Heavy-duty fan-cooled motor with oversized sleeve bearings, moisture-proof windings
- Mesh debris screen
- All have 4' power cord with 3-prong plug

Infrasave

Shop / Garage IR Tube Heater

Residential Compact Series

- Completely assembled, lift and hang right out of the box
- One piece 4" aluminized steel tube
- Complete with 120V cord and plug
- Status indicator lights
- Accessories included in carton
- 24VAC thermostat
- Thermostat wire – 20ft
- Hanging chain and safety hooks
- 80%+ efficiency
- 3-year warranty
- Easy to open and service Premier burner box
- Optional safety cover available

Luminous Heaters

IL Series

- High performance ceramic tile burner
- Aluminized steel burner housing
- Each burner with independent ignitor and sensor
- Direct spark ignition with 100% shutoff for safety
- Full operation temperature and safe cool-down in 60 seconds
- Large bell shaped venturi for optimum gas air mixture
- Mounting height between 15' and 100'
- Horizontal to 45 degree mounting angle
- Entire space or spot heating applications
- Ideal for buildings with negative air problems
- All models are natural gas, LP kits sold separately, comes pre-assembled
- Parts replacement for 10-years on the ceramic tiles and 2-years on all components

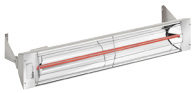
Infrared Electric Heaters

ES/ESD Series, Indoor/Outdoor Overhead Heaters



A

B

- For spot or space heating indoor/outdoor applications
- Weatherproof stainless-steel heater
- 92% radiant efficiency
- Polished aluminum reflector and quartz lamps
- Stainless steel wire guards
- Mounting options include ceiling, flush mount/recessed and post-mount
- For use with restaurants, hotel patios, sports venues, outdoor areas, balcony/terraces, hobby shops, garage/workshops, warehouse facilities, etc.
- 60° symmetrical reflector pattern

Outdoor Patio Heaters

IO-100 Series

- Heats up in as little as one minute
- Dual cabinet
- Optional faceplate available
- Balanced suspension points
- Remote or individual control of heaters
- Saves valuable floor space with 9ft minimum overhead mounting heights
- **L93-366** and **L93-367** offer 2-stage heating
- All heaters are manufactured in marine grade 316 stainless steel
- Corrosion resistant

Outdoor Patio Heaters

IO-200 Series

- Two firing rates
- Heats up in as little as one minute
- Insulated cabinet
- Stainless steel enclosure lens with black emissive coating
- Balanced suspension points
- Remote or individual control of heaters
- Saves valuable floor space and mounts on wall, ceiling, and post-mount
- Manufactured in marine grade 316 stainless steel
- Available in natural gas or propane models

Outdoor Patio Heaters

4000 Series, Portable and Fixed Mount Parasols

- Deluxe commercial models
- LP and NG gas options
- Single piece reflector
- 38,000 BtuH input, double emitter, conical burner saves fuel
- Pressure equalization 3/4" tall burner
- Reinforced emitting mantle, aluminum sectional reflector and battery electronic ignitor
- Solid stainless housing for 20-30lbs propane tank (LP tank not included)
- Fold-away wheels (**L86-953**) or fixed mounts (**L82-555**)
- Warranty: burner and mantle: 3-years; all other parts: 1-year

Gas-Fired Unit Heaters

Power Vented Propeller Type Models, Horizontal, Single-Phase

- Steel heat exchanger comes standard on all units
- Bent tube, low-profile design
- Totally enclosed fan motors and all controls mounted inside the cabinet for protection from airborne moisture and dust
- 10-year heat exchanger warranty
- Quick and easy installations with wiring terminals and knockouts for quick access to gas and electricity and a spacious controls cabinet for ease of work
- Standard power exhaust simplifies side-wall or roof venting with small diameter vent pipe
- Optional finger-proof fan guard for operation at low mounting heights
- Conversion kits for natural gas and propane available
- 115V
- Certified commercial and industrial use

Gas-Fired Unit Heaters

Power Vented Propeller Type Models, Separated Combustion, High Efficiency

- Up to 97% efficient; all units a minimum of 93% efficient
- Modine's stainless steel secondary heat exchanger Conservicore™ technology built for corrosive environments
- Can be vented with 3" and 4" PVC vent pipe
- Ability to be vented either with a two-pipe or concentric vent system
- Totally enclosed fan motors
- High limit safety control for both heated air and flue gas temperatures
- Fan delay timer
- Conversion kits for natural gas and propane available
- 115V
- Certified for residential, commercial and industrial use
- Designed, engineered and assembled in the USA

Gas-Fired Unit Heaters

◀ NEW

Hot Dawg Power Vented, Horizontal, Single-Phase

- Certified for residential, commercial and industrial use
- Compact low profile design great for garage installations
- Installation made easy with knockouts for quick access to gas and electricity
- Easily serviceable; includes LED diagnostics on control board
- Natural gas-fired units can be converted to propane with conversion kit **L43-840**
- Includes direct spark ignition, inshot style burners
- Tubular, aluminized steel heat exchanger with full ten-year warranty
- 115V
- Designed, engineered and assembled in the USA

Steam and/or Hot Water Unit Heaters

Horizontal Air Delivery, Single-Phase

- Two-piece casing for quick access to coil
- In the chart below, hot water ratings are at 200°F in, 180°F out, 60°F entering air
- Steam ratings are at 2# steam, 60°F entering air
- Designed, engineered and assembled in the USA

Steam and/or Hot Water Unit Heaters

Lodronic™ Low-Temperature Horizontal Air Delivery, Single and Three-Phase

- Designed and engineered for high-efficiency boilers*, geothermal or air-to-water heat pump systems to maximizing efficiency.
- High-efficiency 4-row coil with low water pressure drop
- Smaller fan and motor for a lower system amp draw
- Designed for lower entering hot water temperatures
- High-temperature output vs old traditional systems
- UL1995 Certified
- 370 to 3200 CFM
- Single-phase 115V shown
- Designed, engineered and assembled in the USA

Gas-Fired Unit Heaters

Nexus High Efficiency Unit Heater, Horizontal Delivery, Single-Phase

- Up to 99% maximum efficiency
- Power vented propeller
- Premix burner technology
- Brass and aluminum fins
- Stainless steel cabinet
- Fully modulating
- Standard or Separated Combustion All In One
- Field installed LP Conversion
- Also available in various voltage and gas controls
- 115V

Gas-Fired Unit Heaters

Power Vented Propeller Type Models, Horizontal Delivery, Single-Phase

- 83% thermal efficiency
- All-in-one standard or separated combustion
- Tubular heat exchanger with 10-year warranty
- Direct spark ignition with inshot burners
- Easy access control panel
- Factory test fired
- Certified for commercial / industrial use
- Stainless steel, non-standard voltages, and accessories available
- 115V

Gas-Fired Unit Heaters

Tubular Blower Type Model, Horizontal Delivery, Single-Phase, Convertible Vent

- 83% thermal efficiency
- Tubular heat exchanger with 10-year warranty
- Direct spark ignition with inshot burners
- Easy access control panel
- Factory test fired
- All-in-one standard or separated combustion
- External LED diagnostic light
- Heat throw specs listed below are based on an 8ft mounting height from floor to bottom of the unit
- 115V
- Additional voltage, heat exchanger, gas control and motor sizes available

Gas-Fired Unit Heaters

Power Vented Propeller Type Models, Low Profile Design, Single-Phase

- 82% thermal efficiency
- Can be vented horizontally or vertically
- Certified for residential, commercial and industrial use
- Tubular heat exchanger with 10-year warranty
- Direct spark ignition
- Standard or Separated Combustion All In One
- Easy access control panel
- Single orifice burner system
- 321 stainless steel burner box
- 115V
- Includes LP conversion kit

L80-478	11AS-X7-5	5 " Concentric Vent Kit	GG090, GG105, GG120	18	11" L x 26-1/2" W x 17" H	18

Condensate Pumps and Neutralizers

For HU Series Units

- **B87-260** and **B87-261** neutralize flue condensate and are mounted in line with condensate pipe
- **B87-262** facilitates condensate removal when gravity drainage not available

Order #	Mfg. #	Application	For Use With	Shipping Wt. Lbs.	Shipping Dimensions	Wt. Lbs.
B87-260	11AS-E9-1	To neutralize flue condensate; mounted in line with condensate pipe	HU050, HU100, HU150, HU200	3	14" L x 5" W x 5" H	3
B87-261	11AS-E9-2	To neutralize flue condensate; mounted in line with condensate pipe	HU300, HU400	4	18" L x 5" W x 5" H	4
B87-262	11AS-K8	Facilitates condensate removal when gravity drainage not available	HU050, HU100, HU150, HU200, HU300, HU400	5	12" L x 6" W x 6" H	5

Gas Conversion Kits

For GG Series Units

Order #	Mfg. #	Description	Application	For Use With	Shipping Wt. Lbs.	Shipping Dimensions	Wt. Lbs.
L44-937	11CKNTPDS030-52	NG to LP Conversion Kit	Used to convert GG Series Natural Gas unit to LP Gas	GG030	1	4" L x 4" W x 7" H	1
L44-938	11CKNTPDS045-48	NG to LP Conversion Kit	Used to convert GG Series Natural Gas unit to LP Gas	GG045	1	4" L x 4" W x 7" H	1

Steam and/or Hot Water Unit Heaters

Horizontal Air Delivery, Single-Phase

A

B

- Horizontal louvers are standard
- Vertical louvers optional
- Thermal overload protection
- Thermostats feature 'off-auto' and 'auto-fan-off
- Copper/aluminum coils
- ETL certified
- Totally enclosed fan motor
- Header type units can operate with steam or hot water
- 115VAC, 60Hz

Steam and/or Hot Water Unit Heaters

Vertical Air Delivery, Single-Phase

- Provides air circulation and reduces stratification
- Spot heating for high loss areas
- Aluminum blade fans are quiet and factory balanced
- Totally enclosed standard motors
- 115VAC, 60Hz
- Field convertible to low output

Quick-Sling Unit Heater Swivel Mounts

QUICK-SLING

- Quick-Swivel allows for 360° unit rotation
- 14-gauge steel
- Directs flow of heat for maximum efficiency
- Includes all necessary hardware
- Unit heater not included

Power Vented Axial Fan Models, Horizontal, Single-Phase

- TCORE² titanium stabilized aluminum steel heat exchanger
- Isolated axial fan and motor assembly
- Single burner combustion system
- Multi-try direct spark ignition with timed lockout
- Flame rollout safety switch
- Vibration/noise isolated fan and venter motors
- All sizes certified for commercial and industrial use
- 30K through 125K BtuH models approved for residential 115V applications
- Separated Combustion Kits Available **L82-987** and **L82-988**

Gas-Fired Unit Heaters

REZNOR

High-Efficiency, Separated Combustion, Single-Phase

- Up to 93% thermal efficient
- TCORE³ 409 stainless steel primary heat exchanger
- Aluminum MacroChannel secondary heat exchanger
- Sealed control compartment houses all electrical components
- Single burner combustion system
- Multi-try direct spark ignition with timed lockout
- External gas connection
- Vibration/noise isolated fan and venter motors
- Certified for commercial and industrial use
- 115V

TPI Corporation

Hydronic Electric Baseboard Heaters

- Hydronic element retains heat after the thermostat is turned off
- Low-profile design and three-inch depth allows heater to mount flush on wall and flat on floor
- No-maintenance sealed system requires no filling or replacement
- Liquid solution is permanently sealed
